Section One: Introduction

University of the Rockies is a graduate school of social and behavioral sciences. The students and faculty of University of the Rockies are passionate for excellence in business and society.

Mission Statement of the University

University of the Rockies provides high-quality, accessible learning opportunities globally for diverse groups of individuals seeking preparation for life goals, professional practice, service, and distinguished leadership.

Accreditation

Alteration and/or unauthorized use prohibited.

University of the Rockies is a private, independent graduate school offering Master of Arts (MA), Doctor of Philosophy (PhD), and Doctor of Psychology (PsyD) degrees. University of the Rockies is accredited by The Higher Learning. For

additional information about the University's accreditation, please contact:

The Higher Learning Commission
North Central Association
<http://www.ncahlc.org>.

A copy of the documentation describing the University's accreditation will be made available to any enrolled or prospective student upon request. Please contact the University Provost at Provost@rockies.edu.

Core Values

The Core Values of University of the Rockies are Integrity, Service, Excellence, and Diversity. Board Members, administrators, faculty members, and students strive to embody these Core Values in all their activities and dealings with individuals both inside and outside the University of the Rockies community.

Integrity means University of the Rockies will model, both in attitude and in behavior, a strong sense of doing the right thing for the right reason.

Service means University of the Rockies will work to meet the learning demands of the individual student through a quality program and a supportive learning environment.

Excellence means University of the Rockies will deliver its programs in such a manner as to ensure academic rigor and relevance.

Diversity means University of the Rockies encourages students of all cultures and experiences to seek higher learning opportunities and learn from one another.

Commitment to Diversity

Diversity at University of the Rockies means encouraging students of all cultures and experiences to seek higher learning opportunities and learn from one another. At University of the Rockies, diversity is defined by the difference made in people's lives. Diversity is more than just a mission statement — it is a Core Value.

Understanding that issues of diversity are integral to the successful and ethical functioning of institutions of higher education, University of the Rockies demonstrates a commitment to diversity by advocating for inclusivity throughout our curriculum and establishing an infrastructure that fosters a welcoming and respectful learning environment. Additionally, administrators, faculty, staff, and students strive to encourage and support diversity in their actions with individuals both inside and outside the Rockies community.

History of the University

University of the Rockies was founded on June 18, 1998, as the Colorado School of Professional Psychology (COSPP), to provide a professional graduate education in psychology to individuals who seek licensure as psychologists or practice in other arenas of the profession. In 2007, the University was acquired by Bridgepoint Education, Inc. Since that time, University of the Rockies has broadened its focus as a private graduate school to include both social and behavioral science. University of the Rockies offers Master of Arts (MA), Doctor of Philosophy (PhD), and Doctor of Psychology (PsyD) degrees.

Student Consumer Information

Prospective and current students can locate important information about University of the Rockies on the

Student Consumer Information page on the University website at www.rockies.edu/about/consumer-information. This page includes links to helpful information on a variety of key information and disclosures. The presentation of this information complies with the Higher Education Opportunity Act of 2008, which requires colleges and universities to publicly disclose various aspects of their policies and procedures.

The *Student Consumer Information* page is designed to provide open, pertinent information and disclosures for both prospective and current students.

Rights to Change Requirements

The 2016-2017 University of the Rockies Academic Catalog presents the policies and procedures for graduate programs offered by the University. The University reserves the right to make alterations to this Catalog and the policies and procedures therein as deemed necessary by the University. Changes may also be necessitated by federal, state or local law, other regulatory requirements, accreditation, or licensure. Changes may include but are not limited to curriculum, academic policies, administrative policies, procedures, and costs. Notice is not required for a new policy to take effect; however, University of the Rockies will make reasonable attempts to notify students promptly of any policy changes through communication methods deemed appropriate by the University administration. In the event that the University plans to change a program such that it will impact a student's graduation requirements, the information will be posted at the following website address www.rockies.edu/catalog. Please refer to the Plans to Improve an Academic Program policy in the General Academic Policies and Information section of this Catalog for more information.

University of the Rockies reserves the right to refuse to admit or readmit any applicant. Furthermore, University of the Rockies reserves the right to dismiss any student, at any time, who fails to give satisfactory evidence of academic or clinical ability, earnestness of purpose, or active cooperation in all requirements for acceptable program completion.

University of the Rockies cannot guarantee that a student will earn a Doctorate degree or a Master's degree or qualify for licensure in Colorado or any other state. Students residing in, or seeking licensure in, states other than Colorado are responsible for

assuring that their program at University of the Rockies will meet the licensure requirements of that state.

State Regulatory Information

A copy of the documentation describing the institution's licensure, registration, authorization or certification will be made available to any enrolled or prospective student upon request. Please contact Bridgepoint Education, Inc.'s Regulatory Compliance team at RegCompliance-State@bpiedu.com.

The University of the Rockies has been approved by Colorado to participate in the National Council for State Authorization Reciprocity Agreements. NC-SARA is a voluntary, regional approach to state oversight of postsecondary distance education. For more information and a list of states where the university is authorized under this approval please go to <http://www.nc-sara.org/>

Additionally, the University of the Rockies continues to monitor developments in state laws for non-SARA member states in which it enrolls students and, if authorization or licensure is or becomes necessary, will promptly seek to obtain such approvals. Please be aware that individual programs may not be approved or may be pending approval by a state licensing authority and cannot be offered to students residing in that state.

In addition to the approved SAA-member states, the University of the Rockies is approved and legally authorized to do business in the state of Wisconsin as a private, post-secondary school, subject to the provisions of §38.50 Wisconsin Statute, and all administrative rules adopted pursuant to the statute.

In the event student complaints are not satisfactorily resolved with the school, students can contact the State of Wisconsin Educational Approval Board at (608) 266-1996.

Ownership

University of the Rockies, LLC is a wholly owned subsidiary of

Bridgepoint Education, Inc.
13500 Evening Creek Drive North, Suite 600
San Diego, CA 92128

Contact Information

For additional information pertaining to this Catalog, please contact University of the Rockies at (866) 621-0124 (toll-free) or write to 1201 16th St., Suite 200, Denver, CO 80202. Obtain information by visiting the University website at <http://www.rockies.edu>.

Denver Campus

The Denver Campus, located at 1201 16th Street, Suite 200, Denver, Colorado, 80202, has approximately 30,000 square feet of space, which includes classrooms, a library, student study areas, a student lounge, staff offices, and a 150-seat auditorium. "Coaching" classrooms are also available for observation and video feedback. All areas of the campus have wireless access and the public areas have power and network outlets.

Throughout the facility, technology has been incorporated to aid the teaching and learning process. Classrooms have projection systems, high definition cameras, conferencing capabilities and computer and Internet access. The coaching classrooms have one-way glass windows and video control systems, enabling faculty to provide feedback and coaching to their students.

The library has approximately 8,000 square feet of space with study rooms and a lounge area. The library provides university-wide access to a variety of research resources both online and on ground. The library also offers interlibrary loan services allowing students to obtain books, articles, and other documents not currently in the electronic collections.

University of the Rockies' Denver Campus is open for business from 9:00am to 6:00pm, Monday through Friday.

To reach our staff, please dial (303) 446-5867 or (855) 531-4705 (toll-free), and then dial the appropriate extension.

Online

University of the Rockies online is open for business from 9 am to 6 pm, Monday through Friday. Please dial (866) 621-0124 (toll-free) to reach contacts for the online delivery format.

Section Two: Student Rights and Responsibilities

University of the Rockies is committed to fostering an environment that respects and values diversity and encourages self-advocacy and self-determination. This section communicates the meaning and importance of personal and academic integrity to all members of the University community. University of the Rockies believes that the ideal academic environment is one of that aligns with its core values of service, integrity, diversity, and excellence through mutual respect and honesty.

All Students Agree to Adhere to the Following:

- American Psychological Association's current Ethical Principles and Code of Conduct and/or the American Association Code of Ethics (as appropriate to the student's discipline);
- Latest version of the University of the Rockies Academic Catalog; and
- Latest versions of all other University of the Rockies handbooks.

Students agree to stay informed and abide by University of the Rockies policies as they progress through the program.

Freedom of Inquiry and Expression

University of the Rockies is committed to preserving the exercise of freedom of inquiry, freedom of thought, and freedom of discussion and expression and the right of petition and peaceful assembly. A student, who exercises his or her rights as a private citizen, whether individually or collectively, must assume full responsibility for the consequences of such actions and must not identify his or her position or actions as representing the University.

Each student shall enjoy certain freedoms as a member of the academic community and should exercise these freedoms with responsibility and professionalism.

Exercise of Rights of Citizenship

University of the Rockies students are members of a global academic community and citizens of the Colorado Springs and Denver communities. As members of the academic community, students are entitled to all the rights and protections enjoyed by other members of the community. Students are also subject to obligations by virtue of this membership. As citizens of the Colorado Springs and Denver communities, students are subject to all local, state, and federal laws, the enforcement of which is the responsibility of duly constituted local, state, and federal authorities.

Institutional Authority and Local, State, and Federal Penalties

When students violate University regulations, they are subject to disciplinary action by the University, whether or not their conduct violates local, state, or federal laws. By committing an act of misconduct, a student or organization may be subject to disciplinary action by the University. Conduct regulations apply to misconduct when the conduct adversely affects some distinct and clear interest of the University academic community. Students who act in concert to violate the University regulations, or students who advise or incite to violate the University regulations, are also responsible for such violations.

When students violate local, state, or federal law(s), they may incur penalties as determined by local, state, or federal authorities. Institutional actions shall not be used to duplicate functions of general laws, but when the violation of the law also adversely affects the orderly operation of the University, the University may enforce its own regulations regardless of any federal, state, or local legal proceedings or dispositions. University action will be initiated only when the institution's interest as an academic community is clearly involved.

Felonies and Misdemeanors

All students who apply for a program in one of the Mental Healthcare Specializations will undergo a background check. Individuals who have been convicted of a felony or certain misdemeanors, which would preclude them from being licensed and insured to practice in Colorado in one of the Colorado mental health disciplines, as defined by Colorado Regulatory Statutes (CRS), will not be allowed to enroll or remain

enrolled in a Mental Healthcare Specialization program.

Disability Support Services: Access and Wellness

The University is committed to providing an equal opportunity for students to access a full educational experience. In accordance with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) of 1990, as amended, University of the Rockies prohibits discrimination on the basis of a disability. Reasonable accommodations will be granted to students who present appropriate documentation of disability and are otherwise qualified to participate in their specific program of study.

University of the Rockies' Office of Student Access and Wellness is dedicated to fostering equal opportunities to student success through accessible educational programs, disability related advocacy, faculty and staff education, and an enhanced awareness of individual abilities and contributions.

Effective Communication for Persons with Disabilities

University of the Rockies will provide information to interested persons with disabilities concerning the existence of support services and accommodations to ensure accessible programs, services, and activities of the University. The University will ensure that no individual with a disability is excluded, denied services, segregated, or otherwise treated differently than other individuals because of the absence of auxiliary aids and services. The University will furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities.

Disability Documentation

University of the Rockies will provide reasonable accommodation to students with documented disabilities in order to ensure the accessibility of programs, services, and activities of the University. The University requirements for documentation are based upon the Association on Higher Education and Disability (AHEAD) Best Practices: Disability Documentation in Higher Education.

The process for determining accommodations is a collaborative one that may or may not require third-party documentation. The University reserves the right

to request a reasonable level of documentation. One or more of the following documentation categories will be considered in the evaluation of student accommodation requests:

1. Primary Documentation: Student's Self-report

University of the Rockies believes the student is a vital source of information regarding how he or she may be "limited by impairment.**" A student's narrative of his or her experience of disability, barriers, and effective and ineffective accommodations is an important tool which, when structured by interview or questionnaire and interpreted by professional staff, may be sufficient for establishing disability and a need for accommodation.

2. Secondary Documentation: Observation and Interaction

The impressions and conclusions formed by University of the Rockies disability professionals during interviews and conversations with students or in evaluating the effectiveness of previously implemented or provisional accommodations are important forms of documentation. The University employs qualified and experienced disability professionals who will observe students' language, performance, and strategies as an appropriate tool in validating student narrative and self-report.

3. Tertiary Documentation: Information From External or Third Parties

Documentation from external sources may include educational or medical records, reports and assessments created by health care providers, school psychologists, teachers, or the educational system. This information is inclusive of documents that reflect education and accommodation history, such as Individual Education Program (IEP), Summary of Performance (SOP), and teacher observations.** External documentation will vary in its relevance and value depending on the original context, credentials of the evaluator, the level of detail provided, and the comprehensiveness of the narrative.

A note about documentation: These guidelines apply to students taking University of the Rockies classes. Students should be aware that other universities and testing agencies (which administer standardized tests such as the Graduate Record Exam and Law School Admission Test) may require more extensive documentation.

*Disability with respect to an individual is defined by the ADA as “(A) a physical or mental impairment that substantially limits one or more of the major life activities, (B) a record of such an impairment or (C) being regarded as having such an impairment...” 42 U.S.C. §12102

**Revisions to Title III regulations provide, “When considering requests for modifications, accommodations, or auxiliary aids or services, the entity gives considerable weight to documentation of past modifications, accommodations, or auxiliary aids or services received in similar testing situations, as well as such modifications, accommodations, or related aids and services provided in response to an Individualized Education Program (IEP) provided under [IDEA] or a plan describing services provided pursuant to Section 504 of the Rehabilitation Act of 1973 as amended.” (28 C.F.R. § 36.309(b)(1)(v))

Guidance and Section-by-Section Analysis provides these examples of types of information to consider: “recommendations of qualified professionals familiar with the individual, results of psycho-educational or other professional evaluations, an applicant’s history of diagnosis, participation in a special education program, observations by educators, or the applicant’s past use of testing accommodations.” 28 CFR Part 36 (2010)

AHEAD. (2012). Supporting Accommodation Requests: Guidance on Documentation Practices. Retrieved from http://www.ahead.org/resources/documentation_guidance.

Contact Information

Students who believe they are in need of accommodations should contact the Office of Student Access and Wellness at access@rockies.edu or review general information regarding disability services and accommodations at www.rockies.edu/resources/access_wellness.

Students who have a concern about their disability accommodations may contact the Student Access and Wellness Specialist. Formal complaints will be handled in accordance with the University of the Rockies *Dispute Resolution Procedure for Student Complaints*.

For additional information on Accessibility for Students with Disabilities see the Student Support, Health, and Safety section of this Catalog.

Family Educational Rights and Privacy Act (FERPA) of 1974

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. FERPA rights begin upon the student’s enrollment, which occurs when the student has been admitted to the University and attends any portion of a course. FERPA-protected rights include the following:

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a request for access.
 - o Students should submit written requests that identify the record(s) they wish to inspect to the University Registrar. The Registrar will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the Registrar’s Office, the Registrar’s Office will facilitate the student’s access to the requested records.
2. The right to request the amendment of the student’s education records that the student believes is inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA.
 - o Students may ask the University to amend a record that they believe is inaccurate, misleading or otherwise in violation of the student’s privacy rights under FERPA. They should write the Registrar, clearly identifying the part of the record they want corrected, and specifying why it should be corrected.
 - o If the University decides not to amend the record as requested by the student, the University Registrar will notify the student in writing of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

- If, as a result of the hearing, University of the Rockies decides that the information in the education record is not inaccurate, misleading, or otherwise in violation of the privacy rights of the student, the student will be afforded the opportunity to place with the education record a statement commenting on the contested information in the record and/or a statement setting forth any reason for disagreeing with the decision of the hearing. The statement placed in the education record by the student will be maintained with the contested part of the record for as long as the record is maintained. When the related record is disclosed to an authorized party, the record will include the statement filed by the student.
3. The right to provide written consent prior to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent.
- An exception, which permits disclosure without consent, is disclosure to school officials with legitimate educational interests. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University. A school official may include any of the following:
 - A person employed by the University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff);
 - A person or company with whom the University has contracted (such as an attorney, auditor, or collection agent);
 - A person or organization acting as an official agent of the institution and performing a business function or service on behalf of the institution;
 - A person serving on the Board of Trustees; or
 - A student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her professional responsibilities.
 - Upon request, the University discloses education records without consent to officials of another school in which a student seeks or intends to enroll, or is already enrolled so long as the disclosure is for purposes related to the student's enrollment or transfer.
 - The University may disclose education records without consent in connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions for the aid.
 - The University may disclose education records without consent to parents in the following circumstances:
 - When a student is a dependent student as defined in Section 152 of the Internal Revenue Code of 1986;
 - When the student has violated any federal, state, or local law, or any rule or policy of University of the Rockies, governing the use or possession of alcohol or a controlled substance if University of the Rockies determines that the student has committed a disciplinary violation with respect to that use or possession, and the student is under the age of 21 at the time of the disclosure to the parent; or
 - The disclosure is in connection with a health or safety emergency.
 - The University may disclose education records without consent when the information is deemed necessary to protect the health or safety of the student or other individuals in an emergency.
 - The University may disclose education records without consent to comply with

- a judicial order or lawfully issued subpoena.
- Directory information can be published and/or disclosed to outside organizations without a student's prior written consent. "Directory information" means information contained in an education record of a student that would not generally be considered harmful or an invasion of privacy if disclosed. If you do not want University of the Rockies to disclose directory information from your education records without your prior written consent, you must notify the University Registrar in writing. A request for nondisclosure of directory information is valid unless or until the student requests a change in writing. University of the Rockies has designated the following information as directory information:
 - Student's name
 - Address
 - Telephone listing
 - Email address
 - Photograph
 - Degrees, honors, and awards received
 - Date and place of birth
 - Program of study
 - Dates of attendance
 - Degree level
 - The most recent educational agency or institution attended
 - Enrollment status (e.g., non-degree seeking, graduate, full-time, half-time, or less than half-time)
 - Class rosters within the classroom
 - The University may disclose education records without consent to authorized representatives of the U. S. Comptroller General, the U. S. Attorney General, the U.S. Secretary of Education, or state and local educational authorities, such as a state postsecondary authority that is responsible for supervising the University's state-supported education programs.
 - Disclosures under this provision may be made in connection with an audit or evaluation of federal- or state-supported education programs, or for the enforcement of or compliance with federal legal requirements that relate to those programs. These entities may make further disclosures to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, or enforcement or compliance activity on their behalf.
 - The University may disclose education records without consent to accrediting organizations to carry out their accrediting functions.
 - The University may disclose education records without consent to organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate, or administer predictive tests; (b) administer student aid programs; or (c) improve instruction.
 - The outcome of a campus hearing is part of the education record of any student personally identified, and is protected from release under FERPA. However, University of the Rockies observes the following legal exceptions:
 - Complainants and accused in sexual misconduct and sexual harassment incidents have a right to be informed of the outcome and sanctions of the hearing, in writing, without condition or limitation, and to be kept apprised of the status of investigations;
 - The University may release the final results of a disciplinary proceeding in which a student who is an alleged perpetrator of a "crime of violence"* or non-forcible sex offense, is found in violation of the University's *Student Community Standards*. The University may not disclose the name of any other student, including the victim or witness, without the prior written consent of the other student. The University will also release this information to the Complainant in any of these offenses regardless of the outcome.

- In the event that the alleged victim is deceased as a result of the crime or offense, the notification will be made to next of kin (upon written request).

*A “crime of violence,” includes arson, burglary, robbery, criminal homicide (manslaughter by negligence, murder, and non-negligent manslaughter), forcible sex offenses, assault, destruction/damage/vandalism of property and kidnapping/abduction.

- The University may also disclose education records without consent under other exceptions authorized by FERPA.
4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by University of the Rockies to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is:

Family Policy Compliance Office
 U.S. Department of Education
 400 Maryland Avenue, SW
 Washington, DC 20202

Personally Identifiable Information

The U.S. Department of Education’s Family Educational Rights and Privacy Act (FERPA) regulations expanded the circumstances under which a student’s education records and personally identifiable information contained in such records (including Social Security Number, grades, or other private information) may be accessed without prior consent. First, the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local education authorities (Federal and State Authorities) may allow access to student records and personally identifiable information without prior consent to any third party designated by a Federal or State Authority to evaluate a federal- or state-supported education program. The evaluation may relate to any education program which is defined as any program “that is principally engaged in the provision of education,” such as early childhood education, elementary and secondary education, postsecondary education, special education, career and technical education, adult education, and job training, as well as any program that is administered by an education agency or institution. See 34 CFR § 99.3. Second, Federal and State Authorities may allow

access to a student’s education records and personally identifiable information without prior consent to researchers performing certain types of studies, even when the University objects to or does not request such research. Federal and State Authorities must obtain certain use-restriction and data security promises from the entities that they authorize to receive any personally identifiable information, but the Authorities need not maintain direct control over such entities. In addition, in connection with Statewide Longitudinal Data Systems, State Authorities may collect, compile, permanently retain, and share without prior consent personally identifiable information from a student’s education records, and they may track a student’s participation in education and other programs by linking such personally identifiable information to other personal information about a student that they obtain from other Federal or State data sources, including workforce development, unemployment insurance, child welfare, juvenile justice, military service, and migrant student records systems.

Publicity and Photo Release

All media releases of information originating from the University should be channeled to the Communications Manager. Media inquiries directed toward students, faculty, and staff at the University are to be directed to the Communications Manager, and administrators, faculty, staff, or students who are contacted directly by the media should refer the media to the Communications Manager. Comments should not be given to the media until the Communications Manager has been contacted.

All students authorize the University to record and use their names, images, likenesses and voices in all media, for instructional or promotional purposes, unless a written request to withhold directory information is on file in the Registrar’s Office.

Students, faculty, and staff are encouraged to inform the Communications Manager about newsworthy events and developments regarding class and campus events of interest. Students should also contact their advisors regarding newsworthy information.

Changes to Records

If the University becomes aware that a student's name recorded in the University system does not match the student's official name as reflected by the United States Social Security Administration, the Registrar's Office will change the name in all systems to reflect the student's legal name. The student's legal name must be reflected in all systems of record, including the online classroom. Nicknames may not be used.

If the student has an official name change, he or she must complete a *Change of Name Request* form and provide copies of a Social Security card reflecting the new name, along with supplemental documentation, as outlined on the form, to the Registrar's Office.

Students are responsible to provide the Registrar's Office with changes to contact information including home address, work information, email addresses, phone numbers, or other key information. The student must provide that information to the Registrar's Office within one week of the change through the Student Portal or email the Registrar's Office from the student's current email of record.

Electronic Communication

Email is considered an official form of University-related communication. When students are enrolled into their program, they are given a University generated email address. It is the responsibility of students to check their email regularly to stay current with University-related communications. Students should recognize that certain communications distributed via email may be time-critical. Failure to check for messages and failure to receive messages due to full mailboxes, spam filtering, or auto-forwarded email are not acceptable excuses for missing official University communications. Students who elect to use an email other than the one provided by the University must maintain a current email address on file for correspondence with University administration, staff, and faculty.

Monitoring of Email Communications

The University does not intend to monitor individual electronic mail as a routine matter, but may do so at any time as the University deems necessary for purposes of maintaining the integrity and effective operation of a student email system, once implemented. No facility exists on this system for the sending or receiving of private communications.

The University reserves the right to inspect and disclose the contents of email as follows:

- in the course of an investigation triggered by indications of misconduct or misuse;
- as needed to protect the health and safety of students and staff;
- as needed to prevent interference with the academic mission; or
- as needed for technical troubleshooting or spam/content filtering.

Username and Password Integrity

It is the responsibility of students to protect the usernames and passwords issued to them by University of the Rockies for the purpose of accessing the online classroom, the student portal, academic search engines, or any other activity of the University. The sharing of a personal username and password with an unauthorized person is a *Student Community Standards* violation, which could result in disciplinary action including dismissal from the University.

Student Evaluation of Faculty and Courses

Currently enrolled students evaluate their instructors anonymously in each course at the end of each term. This process is used both by the University and the instructor to obtain valuable information about the course content and instructional methods.

Recording of Courses, Lectures, Supervision, Conversations, or Presentations

Students must obtain permission to audio or video record any lecture, supervision session, or presentation offered by or through University of the Rockies including conversations with other University professionals. The University representative, instructor, or other presenter must grant permission for the recording, and the University professional, instructor, or presenter should obtain verbal permission from others in the class or audience, if appropriate. Lecture or presentation materials remain the intellectual property of the instructor/presenter and should not be used without written permission. Clandestine recording

of any type, in any University of the Rockies setting, is grounds for disciplinary action.

It is the student's responsibility to ensure that no confidential client information appears on any recordings other than those authorized by approved practicum sites.

Tuition Credit Request Policy and Procedure

A tuition credit may be approved and applied for the following documented reasons that directly impacted a student's ability to continue in their course or program during the timeframe in which the course occurred:

- Documented military duty that resulted in an inability to continue in the course or program*^;
- Documented personal or immediate family medical emergency**;
- Documented act of nature;
- Documented death in the immediate family**;
- Documented temporary severe economic hardship.

*Students who experienced military deployment that resulted in an inability to continue in the course or program are eligible for a tuition credit but should instead complete and submit a *Military Course Drop or Incomplete Request*.

^For information regarding Readmission of Students After Military Service under the Higher Education Opportunity Act of 2008, please see the General Academic Policies and Information section of this Catalog.

**Immediate family is defined as spouse, domestic partner, grandparent, grandchild, (step/adoptive) mother, (step/adoptive) father, (step/adoptive) brother, (step/adoptive) sister, (step/adoptive) child, mother-in-law, father-in-law, brother-in-law, sister-in-law, daughter-in-law, or son-in-law. Additional considerations can be made on a case-by-case basis as determined by the University. Please contact student.records@rockies.edu for specific consideration.

This is accomplished by requesting a *Tuition Credit Request* form from the student's assigned Advisor.

Grade Appeals

Basis for a Grade Appeal

Grades may be appealed if any of the following conditions exist:

- An error was made in the calculation of the course grade; or
- The instructor was incorrect with respect to an objective fact within the discipline and this error affected the student's final grade.

Students experiencing extreme temporary hardship during the last 33% of a course may request an Incomplete (I) grade through their instructor prior to the course end date. However, there may be extreme circumstances that prohibit a student from making this request prior to the conclusion of a course. To appeal for an "I" grade after the end date of a course, the student must fax or email the written grade appeal with official documentation of the hardship experienced.

An Incomplete (I) grade or a Withdraw (W) grade may be approved and applied for the following documented reasons that directly impacted the student's ability to complete the course requirements or program during the last 33% of the course:

- Documented military duty that resulted in an inability to continue in the course or program^;
- Documented personal or immediate family medical emergency*;
- Documented act of nature;
- Documented death in the immediate family*;
- Documented temporary severe economic hardship.

Students who are administratively dropped from a course for not meeting attendance requirements are not eligible to receive an "I" grade. Students who are not able to complete at least 67% of the course prior to requesting an incomplete grade are also ineligible.

Note: Please refer to the General Academic Policies and Information section in this Catalog for complete details on the Incomplete Grade policy.

^ For information regarding Readmission of Students After Military Service under the Higher Education Opportunity Act of 2008, please see the General Academic Policies and Information section of this Catalog.

*Immediate family is defined as spouse, domestic partner, grandparent, grandchild, (step/adoptive) mother, (step/adoptive) father, (step/adoptive) brother, (step/adoptive) sister, (step/adoptive) child, mother-in-law, father-in-law, brother-in-law, sister-in-law, daughter-in-law, or son-in-law. Additional considerations can be made on a case by case basis as determined by the University. Please contact gradeappeals@rockies.edu for specific consideration.

Grade Appeal Procedure

All grades may be appealed in writing within fourteen (14) calendar days after the grade in dispute is granted, through the following procedure:

The student should first discuss his or her concerns with the instructor who issued the grade by appealing to the instructor in writing for reconsideration of the grade.

- If the student is not satisfied with the outcome of appeal to the instructor of the course, students may appeal to the Office of Academic Integrity by submitting a Grade Appeal form to gradeappeals@rockies.edu. Appeals will not be accepted without documentation that the student has made a written appeal to the instructor.
- The Manager of Academic Integrity, working with the Academic Department Chair for the level of degree program in which the student is enrolled, is the final decision maker on all grade appeals.

Student Community Standards

The following *Student Community Standards* are applicable to individuals during all periods of enrollment following the submission of an admissions application, including institutional breaks or approved Academic Leaves from the University. All students of the University are expected to conduct themselves in a professional and respectful manner. Students and alumni have a responsibility to comply with all University policies and procedures. The responsibility to secure and maintain conditions conducive to learning is shared by all members of the University community.

University policies are necessary to safeguard the mission of University of the Rockies, thus protecting students' ability to learn without undue interference by others. If misconduct occurs, the University must respond in ways that protect the rights and freedoms

of all members of the community. To fulfill its function as an educational institution and to protect the rights of all the members of the University community, the University has the right and the duty to maintain order and to exclude persons who disrupt the educational process. When necessary, the University will call upon the local, state, and/or federal authorities to maintain order.

All students and alumni are expected to familiarize themselves with the *Student Community Standards* (hereinafter referred to as *Standards*). Ignorance of these *Standards*, including behavioral expectations, specific prohibited conduct, or consequences for misconduct is not a defense to, nor grounds for, violating the *Standards*.

Please note that prospective students are required to uphold all relevant *Standards*. University of the Rockies reserves the right to refuse admission or preclude from enrolling any applicant whose behavior is deemed inappropriate based on communication with University personnel.

University of the Rockies reserves the right to create, modify, or make changes to the *Standards* as needed, or when necessary in particular circumstances. The *Standards* may also be extended or amended to apply to new and/or unanticipated situations that may arise.

In a community of learning and living, individual or group conduct that is unlawful, disrupts or interferes with the educational process, causes destruction of property, or otherwise infringes upon the rights of other members of the University community or of the University itself cannot be tolerated.

Student Responsibilities and Conduct Expectations

University of the Rockies is committed to fostering an environment that is conducive to academic inquiry, productive student life, and thoughtful study and discourse. A community exists on the basis of shared values and principles. At University of the Rockies, student members of the community are expected to uphold and abide by certain standards of conduct that form the basis of these *Standards*. These *Standards* are embodied within a set of core values that include integrity, fairness, respect, community and responsibility. When members of the community fail to

exemplify these values, campus conduct proceedings are used to assert and uphold the *Standards*.

The student conduct process at University of the Rockies is not intended to punish students. Rather, it exists to protect the interests of the community and to challenge those whose behavior is not in accordance with the *Standards*. Sanctions are intended to challenge students' moral and ethical decision-making and to help them bring their behavior into accord with our community expectations. When a student is unable to adapt his or her behavior to community expectations, the student conduct process may determine that he or she should no longer share in the privilege of participating in this community.

Students should be aware that the student conduct process is quite different from criminal and civil court proceedings. Procedures and rights in student conduct proceedings are conducted with fairness to all, but do not include the same protections of due process afforded by the courts. Fair process, within the context of these *Standards*, assures written notice and a hearing before an objective decision-maker. It assures that no student will be found in violation of University policy without evidence showing that it is more likely than not that a policy violation occurred, and that any sanction will be proportionate to the severity of the violation.

The Standards

The standards of conduct align with the University's belief that members of the University community should act with integrity, honor, and in a respectful manner. It is the responsibility of everyone connected to the University to abide by these *Standards*. As such, conduct is measured by, but not limited to, the following standards:

Integrity: University of the Rockies students exemplify honesty, integrity and a respect for truth in all of their dealings.

Community: University of the Rockies students honor and value their academic and learning communities.

Fairness: University of the Rockies students exemplify fair treatment of each other in their dealings and interactions.

Respect: University of the Rockies students show respect for each other, for property, and for the community.

Responsibility: University of the Rockies students are given and accept a high level of responsibility as role models

Any student, prospective student, or alumnus found to have committed the following misconduct is subject to the sanctions outlined subsequently. Unacceptable conduct includes, but is not limited to, the following:

Lapse of Integrity

Behavior that demonstrates a lapse of integrity includes, but is not limited to:

- Knowingly furnishing false, falsified, or forged information to any member of the University community, such as falsification or misuse of documents, accounts, records, identification, or financial instruments;
- Acts of academic dishonesty, as defined in this Catalog;
- Unauthorized possession, duplication, or use of means of access (keys, cards, etc.) to any University building;
- Action or inaction by someone in collusion with a wrongdoer which fails to discourage a known and obvious violation of University policy or law;
- Violations of positions of trust or authority within the community; and
- Tampering with the election of any University recognized student organization.

Dishonorable Behavior in the Community

Behavior that does not honor and value the community includes, but is not limited to:

- Misuse of access privileges to University premises or unauthorized entry to or use of buildings, including trespass;
- Misuse or unauthorized use of University or organizational names and images;
- Knowingly taking possession of stolen property;
- Intentional and unauthorized taking of the property of the University or personal property of a member of the University community.
- Intentional and unauthorized destruction or damage to University property or to the property of another;
- Misuse of University computing facilities, as described in this Catalog;
- Electronic Mail Abuse, as described in this Catalog: Sharing with others or taking from others, passwords to University issued email accounts,

student portal, online learning platform, social networking sites, etc.;

- Gambling;
- Possession of firearms, fireworks, explosives, other weapons (including, but not limited to BB/pellet guns, slingshots, and sharp edged instruments, such as hatchets when used as weapons), or dangerous chemicals while on campus, unless properly authorized by the University President or his or her delegate;

Concealed Weapons: All students, visitors and employees, including contractors and third-party vendors, are prohibited from carrying firearms on University premises. Violations of this policy will be referred to the Security Staff in charge who will notify the appropriate University delegate.

Violation of state, local, or on-campus fire policies, including:

- Failure to evacuate a University-owned building during a fire alarm;
- Improper use of University fire safety equipment; and
- Tampering with or improperly engaging a fire alarm in a University building.

Unfair Treatment

Behavior that violates the fair treatment of others in dealing or interactions includes, but is not limited to:

- Disruption of University operations, including obstruction of teaching, research, administration, other University activities, or other authorized non-University activities which occur on campus or online;
- Obstruction of freedom of movement by community members or visitors;
- Abuse, interference, or failing to comply in University processes, including Student Community Standards hearings; and
- Abuse of the University conduct system, including:
 - Failure to attend meetings scheduled for conduct code administration purposes;
 - Falsification, distortion, or misrepresentation of information;
 - Failure to provide, destroying, or hiding information during an investigation of an alleged policy violation;
 - Attempting to discourage an individual's proper participation in, or use of, the University conduct system;

- Harassment (verbal or physical) and/or intimidation of a member of a University conduct committee prior to, during, and/or after a University conduct proceeding;
- Failure to comply with the sanction(s) imposed by the University conduct system; and Influencing or attempting to influence another person to commit an abuse of the University conduct system.

Disrespectful Behaviors

Behavior that violates students showing respect for each other, for property, or for the community includes, but is not limited to:

- Threatening or causing physical harm, extreme verbal abuse, or other conduct which threatens or endangers the health or safety of any person;
- Discrimination, intimidation, harassment (as defined in this Catalog);
- Hazing (as defined in this Catalog);
- Violence between those in an intimate relationship to each other, including:
 - sexual harassment
 - sexual assault
 - sexual violence
 - sexual exploitation
 - stalking
- Inappropriate conduct which is disorderly, disruptive, obscene or indecent in the online environment, on campus or at functions sponsored by, or participated in by, the University;
- Failure to comply with directions of University officials or law enforcement officers during the performance of their duties and/or failure to identify oneself to these persons when requested to do so; and
- Smoking in any University building, campus, or area designated as non-smoking.

Responsibility

University of the Rockies students are given and accept a high level of responsibility as role models. Behavior that violates this value includes, but is not limited to:

- Use, possession, manufacture, or distribution of alcoholic beverages on campus;
- Use, possession, or distribution of narcotics, or other controlled substances, as well as drug paraphernalia, except as expressly permitted by law;

- Abuse or misuse of prescriptions or over-the-counter medications;
- Assisting in the violation of University policies or public laws;
- Violations of federal, state, or local laws which affect the interests of the University community, whether on or off-campus;
- The knowing failure of any organized group to exercise preventive measures relative to violations of these Standards by members;
- Violation of other published University policies or rules;
- Intentionally or recklessly causing a fire which damages University or personal property, or which causes injury to any member of the community;
- Littering and posting of notices in non-designated spaces or without approval; from the appropriate University personnel and unauthorized distribution or sale of goods on campus;
- Violation of University traffic and parking regulations;
- Leaving children or animals unattended on campus; and
- Use of bicycles, skateboards, roller blades, and any other non-motorized vehicle or equipment (except wheelchairs) outside designated areas.

Communication

Written communication is an extremely important factor in an online community. The ability to communicate clearly and effectively is crucial to the success of all online learning programs. Professional language relevant to the course content should be used in the online discussion postings. Students are expected to follow the rules of Netiquette, as posted in their online courses. The following behaviors are disruptive to the online learning environment and will not be tolerated.

Flaming: Flaming is the term used for behaving disrespectfully to others online. This behavior includes, but is not limited to, mocking, shouting, cursing, humiliating, and discriminating against someone in the online environment.

Disrespect: Impolite and impertinent behavior such as putting down or cursing.

Offensiveness: An online classroom is not the place for graphic terminology, sexual discussions, swearing, or any pornographic resources. Inappropriate language and materials of this nature are inexcusable and constitute unacceptable behavior.

Discrimination: Derogatory statements based upon an individual's actual or perceived race, color, creed, national or ethnic origin, religion, sex, pregnancy, childbirth and related medical conditions, marital status, medical condition, service in the uniformed services, political activities and affiliations, age, disability, sexual orientation, gender identity, veteran status, or any other consideration made unlawful by federal, state, or local laws that is sufficiently serious that it interferes with or limits a student's ability to participate in or benefit from the University's educational program.

Solicitation: It is against policy and inappropriate for students to use the communication channels within the online learning platform to solicit other users for personal or professional reasons. Students may not send emails to classmates or post messages that attempt to sell products, promote business, or solicit employees.

Shouting: Using all capital letters and serial exclamation points when communicating in an online environment is known as shouting. Emails that contain an entire message in the subject line without content in the body of the email is considered shouting. These actions are considered inappropriate or rude methods of communication. Avoid using all capital letters in online communications.

Impatience: University personnel and instructors make every effort to respond in a timely manner. Once a student has submitted a question or concern, the student should wait patiently for a reply.

Course Netiquette Rules

Instructors and Students in an Online Community Should Be:

Considerate: Students should treat each other with respect and should take time to read and respond to each other in such a way that a learning environment can continue to develop. Students should format postings so that everyone can learn from their knowledge, skills, and abilities.

Encouraging: There are varying degrees of comfort and familiarity with the online environment. Some students may spend more time observing (reading other students' postings, remaining invisible for some time) than others. Notice the habits of other students and classmates and provide encouragement for creative and critical conversation.

Helpful: Even a well-presented course can create some confusion. It is very easy to lose a place or miss reading information on certain links or pages. When other students appear to be off-track, offer a helping hand by pointing them in the right online direction so they can regain their confidence in the online learning environment.

Aware: Be aware that the written word is the only form of communication in an asynchronous learning environment. Choose words carefully. If a comment could possibly be interpreted as insulting, disrespectful, discriminating, mocking, or rude, students should choose other wording.

Misuse of Technology Resources

University technology resources are to be used to advance the University's mission of education, scholarship, and service. Students may use these resources for purposes related to their studies or research or other University-sanctioned activities. These resources include, but are not limited to, hardware (including telephones, computers, and traditional media equipment) either owned or leased by the University, software, and consulting time (and expertise) of the Business Technology Services or other University technology support staff. The use of technology resources provided by the University for commercial or other purposes not directly related to study, research, or University-sanctioned activities should be considered as secondary activities (i.e., personal or otherwise). Should such secondary activity in any way interfere with primary activities, the secondary activity must be terminated immediately.

Many of the University's technology resources are shared among the entire University community. The use of these resources will not violate law or the rights of others. Prohibited activities include, but are not limited to:

- Activities that violate copyright or other intellectual property rights of others, including, but not limited to, the infringing use of peer-to-peer file sharing services;
- Sending copies of documents in violation of copyright laws via electronic mail or any other electronic transmission;
- Inclusion of the work of others into electronic mail communications or any other electronic transmission in violation of copyright laws;
- Activities that obstruct usage or deny access to technology resources;
- Activities that could be considered as harassing, libelous, or obscene;
- Activities that violate University policies;
- Activities that violate federal, state, or local laws;
- Unauthorized use of computer accounts;
- Impersonating other individuals;
- Attempts to exploit or explore security provisions, either at the University or elsewhere;
- Activities that invade the right to privacy of others;
- Destruction or alteration of data belonging to others;
- Creating, using, or distributing computer viruses;
- Allowing other individuals to use your account or password, including for the purpose of meeting attendance requirements in an online class;
- Disruption or unauthorized monitoring of electronic communications or of computer accounts; and
- Inappropriate/widespread email distribution.

Gambling

Students are expected to abide by all federal, state, and local laws prohibiting illegal gambling, including online gaming. Gambling for money or other things of value on campus or at University-sponsored activities is prohibited except as permitted by law.

Such prohibited activity includes, but is not limited to:

- possessing on one's person or premises any card, book, or other device for registering bets;
- knowingly permitting the use of one's premises or one's telephone or other electronic communications device for illegal gambling;
- knowingly receiving or delivering a letter, package or parcel related to illegal gambling;

- offering, soliciting, or accepting a bribe to influence the outcome of an athletic event; and
- involvement in bookmaking or wagering pools with respect to sporting events.

Hazing

All acts of hazing by any individual student or University-registered student club or organization and any of its members or alumni are prohibited. Students are entitled to be treated with consideration and respect, and no individual may perform an act that is likely to cause physical or psychological harm or social ostracism to any other person within the University community.

Identity

Any misrepresentation, theft, or misuse of a person's identity for any improper purpose, including, but not limited to, obtaining federal financial aid, other financial gain, or obtaining access to confidential information. Identity theft is not only a violation of University policy and the Standards, but may also constitute a criminal offense under federal and state law. University of the Rockies recognizes the importance of protecting student privacy and reserves the right to request documentation to establish or verify any student's identity at any time, for administrative and/or compliance purposes. Students are expected to provide such documentation. Students may be placed on Administrative Leave for failure to provide documentation requested by University officials for the purpose of authenticating a student's identity. The University may also deny or rescind admission to any student for failure to authenticate his or her identity, or for engaging in identity theft.

Prescription Drug Policy

The distribution, sale to others, or use of prescription medication for other than its prescribed use by the individual for whom it was prescribed is a violation of University policy and state law.

American Psychological Association (APA) Ethical Standards

The Ethical Standards of the American Psychological Association (APA), American Counseling Association (ACA) and American Association of Marriage and Family Therapists (AAMFT) set forth enforceable rules of conduct for psychologists, counselors and marriage and family therapists, and provide the standard to

which the School of Professional Psychology holds all students. Any practicum student found to have committed an act of misconduct that violates APA Ethical Standards is subject to the Standards disciplinary consequences outlined in *the Student Community Standards* in this section of this *Catalog*. Violations will be referred to the *Student Community Standards Committee*, who will determine one or more consequence for any single violation. Consequences for misconduct may include:

- Reprimand or disciplinary warning;
- Conduct probation;
- Completion of non-degree remediation course or program;
- Removal from course;
- Restitution - compensation for loss, damage, or injury;
- Emergency Administrative Leave;
- Suspension (not to exceed one year);
- Expulsion; or
- Rescindment of degree.

Annual and Periodic Background Check Policy for Mental Healthcare Specializations

Recognizing the need to enhance the safety and well-being of patients, and in so doing, to bolster the public's continuing trust in health professions, and to ascertain the ability of students to maintain or eventually become licensed and/or certified in their professions, annual criminal background checks will be conducted on actively enrolled students in Mental Healthcare Specializations that may lead to licensure.

Should a background check reveal any criminal convictions or pending charges against a student, that have been unreported by the student, the student will be reviewed for their status in the program by the Behavioral Intervention Team to determine the impact on licensure. Should the BIT determine that a code of conduct violation or academic standard has been impacted by the disclosed event, students will be required to appear before the *Student Community Standards Committee*.

In addition to annual background checks, the University may conduct a periodic background check as, and when, needed for any student in a degree program that may lead to licensure who is thought to have violated the mandatory *Subsequent Charges: Self-Reporting Policy*.

Subsequent Charges: Self-Reporting Policy for Mental Healthcare Specializations

Students admitted to the University and enrolled in a Mental Healthcare Specialization that may lead to licensure must submit to an initial background check during the enrollment process. In addition, students have an ongoing duty to self-report any criminal convictions or pending charges no later than five business days following the charge of the crime. To self-report a charge, students must complete a self-reporting letter. The self-reporting letter should be:

- Typed;
- Formal/professional letter directed to the Office of Student Affairs; and
- Specific:

Physical address, email, and daytime phone number;

State the exact charge (i.e., misdemeanor, felony and degree – 1st, 2nd, etc.);

- Date of occurrence;
- Judgment;
- Disposition;
- Timeline of restitution;

If a counseling evaluation is recommended, a copy of the results of the evaluation should be attached to the response. If treatment is required as part of the restitution, documentation of the treatment and the current status should be provided.

Actively enrolled Mental Healthcare Specialization licensure students who fail to notify the University after a criminal charge or conviction will be reviewed for their status in the program by the Behavioral Intervention Team to determine the impact on licensure. Should the BIT determine that a code of conduct violation or academic standard has been impacted by the disclosed event, students will be required to appear before the *Student Community Standards Committee*.

Violation of Federal Copyright Laws

Any member of the University community who participates in the unauthorized distribution of copyrighted material, including peer-to-peer file sharing, may be subject to civil and criminal liabilities, in addition to sanctions imposed by the University. Penalties for violating federal copyright laws may include civil damages, costs and attorneys' fees, injunctions, fines, and imprisonment. The following is a non-exhaustive list of specific penalties.

Summary of Civil and Criminal Penalties for Violation of Federal Copyright Laws

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under Section 106 of the Copyright Act (Title 17 of the United States Code). These rights include the right to reproduce or distribute a copyrighted work. In the file-sharing context, downloading or uploading substantial parts of a copyrighted work without authority constitutes an infringement.

Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or "statutory" damages affixed at not less than \$750 and not more than \$30,000 per work infringed. For "willful" infringement, a court may award up to \$150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys' fees. For details, see Title 17, United States Code, Sections 504, 505.

For more information, please see the U.S. Copyright Office website at <http://www.copyright.gov>, especially their FAQ's at <http://www.copyright.gov/help/faq>.

Students who are found to have participated in the unauthorized distribution of copyrighted material and/or other forms of copyright infringement will be subject to an appropriate consequence in accordance with the *Standards* found in this *Catalog*.

Both the Recording Industry Association of America (RIAA) and the Motion Picture Association of America (MPAA) maintain a list of legal alternatives for downloading. Please visit <http://www.whymusicmatters.com> or <http://www.mpaa.org> for more information.

Conspiracy to Commit Fraud against the University

University of the Rockies students are expected to exemplify honesty, integrity and a respect for truth in all of their dealings. Fraudulent behavior or attempts to commit fraudulent behavior will not be tolerated. Behavior that demonstrates fraudulent activity includes but is not limited to:

- Knowingly furnishing false, falsified, or forged information to any member of the University Community, such as falsification or misuse of documents, accounts, records, identification or financial instruments;
- Acts of academic dishonesty, as defined in this Catalog; and
- Action or inaction by someone in collusion with a wrongdoer which fails to discourage a known and obvious violation of University policy or law.

When members of groups, individuals acting in collusion, or members of an organization act in concert in violation of this policy, they may be held accountable as a group. To prevent fraud, a designee in the Office of Student Affairs may, in lieu of *Student Community Standards* proceedings, impose individual and/or group sanctions up to and including immediate expulsion from the University, subject to appeal, upon a determination of student involvement in such behavior. Determinations will be made with respect to the involvement of each accused individual. In most circumstances, University of the Rockies will treat attempts to commit any of the violations listed previously as if those attempts had been completed.

Jurisdiction over Student Conduct

Students at University of the Rockies are given a copy of the *Student Community Standards* at orientation (campus based) and annually thereafter and all students may access the *Standards* via the University of the Rockies webpage. Students are responsible for reading, and agreeing to abide by, the provisions of the *Standards* and the authority of the student conduct process. The *Student Community Standards* and the student conduct process apply to the conduct of individual students and University-affiliated student organizations. Because the *Standards* are based on

shared values, it sets a range of expectations for University of the Rockies students no matter where or when their conduct may take place. Therefore, the *Standards* will apply to behaviors that take place on campus, at University-sponsored events, University-related online networking sites, and in online courses, and may also apply off-campus when the administration determines that the off-campus conduct affects a substantial University interest. A substantial University interest is defined to include:

- any action that constitutes a criminal offense as defined by federal, state, or local law;
- any situation where it appears that the student may present a danger or threat to the health or safety of himself or herself or others;
- any situation that significantly impinges upon the rights, property or achievements of self or others or significantly violates the peace and/or causes social disorder, and
- any situation that is detrimental to the educational interests of the University.

The *Standards* may be applied to conduct that takes place during the time a person is enrolled as a student, including during breaks between terms and approved breaks in attendance or any involuntary leave. Further, the *Standards* apply to guests of community members, whose hosts may be held accountable for the misconduct of their guests. Visitors to and guests of University of the Rockies are also protected by the *Standards*, and may initiate complaints for violations of the *Standards* committed by members of the University of the Rockies community against them. University of the Rockies may also extend its jurisdiction to misconduct that occurs prior to, but is not reported until after the graduation of the offending student. There is no time limit on reporting violations of the *Standards*.

However, the longer someone waits to report an offense, the harder it becomes for University of the Rockies to obtain information and witness statements, and to make a determination regarding alleged violations. Those who are aware of misconduct are encouraged to report it as quickly as possible to the appropriate University officials at studentaffairs@rockies.edu.

Violations of Law

Violations of federal, state, and local laws are incorporated as offenses under the *Standards*. When an offense occurs over which the University has jurisdiction, the University conduct process will usually

go forward, notwithstanding any criminal charges that may arise from the same incident. Should a student withdraw from the University when criminal charges are made, it is the typical practice of the University to pursue investigation and resolution of campus conduct matters, regardless of the fact that the student has withdrawn.

When a student is accused, arrested, charged, or indicted for a violent or drug-related off-campus crime, the University may elect to take action against that student for violation of the Standards, which incorporates violation of local, state, and federal laws as code infractions.

When it has reasonable cause to separate a student from the community, the University may separate a student via the Emergency Administrative Leave policy pending the scheduling of a hearing for violation of the Student Community Standards. The University reserves the right to exercise its authority of Emergency Administrative Leave upon notification that a student is facing criminal investigation and/or charges. The University will permit a student who receives Emergency Administrative Leave to request a meeting to show cause as to why an Emergency Administrative Leave is not merited. Regardless of the outcome of this meeting, the University may still proceed with the scheduling of a(n) online/campus hearing.

When criminal charges are pending, the University may be delayed or prevented from conducting its own investigation, and moving forward with a hearing. In such cases, the University will delay its hearing until such time as it can conduct an internal investigation, or obtain from law enforcement sufficient information upon which to proceed.

Special Provisions

Attempted Violations

In most circumstances, University of the Rockies will treat attempts to commit any of the violations listed in the Standards as if those attempts had been completed.

University as Complainant

As necessary, University of the Rockies reserves the right to initiate a complaint, to serve as complainant, and to initiate conduct proceedings without a formal complaint by the victim of misconduct.

False Reports

University of the Rockies will not tolerate intentional false reporting of incidents. To make an intentionally false report of any policy violation is a violation of the *Standards* and may also violate state criminal statutes and civil defamation laws.

Group Violations

When members of groups, individuals acting collusively, or members of an organization act in concert in violation of any policy, they may be held accountable as a group, and a hearing may proceed against the group as joint accused students, or individually, at the discretion of the University.

Immunity for Victims

University of the Rockies encourages the reporting of *Student Community Standards* violations and crimes by victims. In some cases, victims are hesitant to report to University officials because they fear that they themselves may be accused of policy violations. It is in the best interests of this community that as many victims as possible choose to report to University officials. To encourage reporting, University of the Rockies pursues a policy of offering victims of crimes amnesty from policy violations related to the incident.

Good Samaritan

The welfare of students in the University community is of paramount importance. At times, students on and off-campus may need assistance. University of the Rockies encourages students to offer help and assistance to others in need. Sometimes, students are hesitant to offer assistance to others, for fear that they may get themselves in trouble. University of the Rockies pursues a policy of immunity for students who offer help to others in need for any minor violations the Good Samaritan was involved in at the time.

Notification of Outcomes

The outcome of a *Student Community Standards* hearing is part of the education record of any student personally identified, and is protected from release under the Family Educational Rights and Privacy Act (FERPA), a federal law. However, University of the Rockies observes the following legal exceptions:

- Complainants and accused in sexual misconduct and sexual harassment incidents have a right to be informed of the outcome and sanctions of the hearing, in writing, without condition or limitation, and to be kept apprised of the status of investigations;
- The University will disclose to the alleged victim of a "crime of violence", or a non-forcible sec

offense, the final results of a disciplinary proceeding conducted by the institution against the student who is the alleged perpetrator of such a crime or offense. A “crime of violence,” includes arson, burglary, robbery, criminal homicide (manslaughter by negligence, murder, and non-negligent manslaughter), forcible sex offenses, assault, destruction/damage/vandalism of property and kidnapping/abduction. The University may not disclose the name of any other student, including the victim or witness, without the prior written consent of the other student. The University will also release this information to the complainant in any of these offenses regardless of the outcome.

- In the event that the alleged victim is deceased as a result of the crime or offense, the notification will be made to next of kin (upon written request).

Remedy of the effect of sexual offense may include changes to the academic situation of the complainant. The University does not maintain residential facilities for students and does not maintain responsibility to find or assist a student in finding housing.

Defenses

It has become common for students accused of policy violations to try to defend their actions with excuses, such as prescription drug interactions, self-defense, alcohol, etc. Defending actions is admitting to a policy violation. While a student’s defense will not excuse his or her actions, University of the Rockies will take the legitimacy of his or her defense into consideration in addressing the proper sanction.

Social Media Policy

All social media sites are public regardless of the stated level of security or privacy. Students should be aware that all interactions via web-based or social media technologies, virtual communities, social networks, internet, and similar online communications platforms are public. Use of social media at or concerning University of the Rockies is governed by applicable laws and regulations, subject to other University policies and *Student Community Standards* that apply to all other activities at or concerning University of the Rockies.

Guidelines for University of the Rockies’ students include, without limitation:

- Protect confidential and proprietary information, and do not disclose any non-public and/or official

information about the University, its students, faculty, staff, or alumni.

- Respect copyright and intellectual property rights of others and of the University, and do not post copyrighted content (such as text, photographs, audio or video files) without permission from the copyright holder.
- Do not create or post personal social media content that implies such posting or content is on behalf of, or is endorsed by, the University; if a university affiliation is identified in such content and this could appear as institutionally endorsed by the University, students should include the following disclaimer: “These are my personal opinions and do not reflect the views of University of the Rockies.”
- Do not use the University name, marks, symbols, logos, or trademarks to promote a product, service, cause, political party, or candidate on a personal social media account or platform.

The University is not responsible for monitoring or pre-screening content posted on its social media sites. Nonetheless, the University reserves the right to monitor and remove, without notice, any content that the University determines to be harmful, harassing, offensive, commercial in nature, or otherwise illegal or inappropriate in violation of law or this policy. Further, the University reserves the right, under circumstances it deems appropriate and subject to applicable laws or this policy, to take action, up to and including expulsion from the University, if and when such information is brought to the attention of University officials.

Faculty, students, and staff may contact the Office of Student Affairs to report any potential violations of this policy.

Duty to Report a Crime

Colorado is a “Duty to Report” State, meaning Colorado residents are required to report crimes committed by others if they have knowledge of them. Colorado Revised Statutes (CRS) 18-8-115, “Duty to Report a Crime” states, “It is the duty of every corporation or person who has reasonable grounds to believe that a crime has been committed to report promptly the suspected crime to law enforcement authorities.”

Faculty, staff, administrators, and students are required to report a crime, of which they become aware, immediately to the local authorities and to the University. Specifically, the crime should be reported to the Safety Coordinator or a member of the faculty,

Office of the Provost, or to the University Registrar, so the University may complete an Incident Report.

Denver:

Phone: 866.621.0124 ext. 30230;
Fax: 877.856.695;
Address: 1201 16th Street, Ste. 200,
Denver, CO 80202.

Colorado Springs:

Phone: 866.621.0124 ext. 30230;
Fax: 877.856.1695;
Address: 102 South Tejon, 11th Floor,
Colorado Springs, CO 80903;

University of the Rockies will report any crime occurring at the Denver Campus with the Denver police department or other appropriate law enforcement agencies. (It should be noted that the institution maintains a contract for security with Allied Barton Security at the Denver Campus). University of the Rockies will report any crime occurring at the Colorado Springs location with the Colorado Springs Police Department or other appropriate law enforcement agencies).

University of the Rockies does not have any policies or procedures that allow victims or witnesses to report crimes on a voluntary, confidential basis to University administrators. In addition, the University does not employ professional counselors or pastoral (faith-based) counselors for student or faculty/staff utilization, nor does it have a policy that encourages pastoral counselors and professional counselors to inform the persons they are counseling of any procedures to report crimes on a voluntary, confidential basis for inclusion in the annual disclosure of crime statistics. Students/employees may anonymously report a crime directly to the local police or through other anonymous crime reporting mechanisms such as Crime Stoppers to comply with Colorado's Duty to Report law. All incident reports are submitted to the Office of the Provost for review and potential action if there is a breach of *Student Community Standards* and violations of law will be referred to law enforcement agencies. When a potentially dangerous threat to the University community arises, timely reports or warnings will be issued as set forth in the University of the Rockies Campus Security and Safety Reports located on the University of the Rockies website at <http://www.rockies.edu/campus-safety.htm>

Academic Integrity Policy

This Academic Integrity policy covers current students and conduct in which alumni engaged while enrolled. The University may address allegations of academic misconduct after a student has graduated and will process allegations concerning alumni in the same manner it addresses allegations concerning current students. All sanctions that could be applied to a current student could be applied to an alumnus, and the University reserves the right to rescind a previously conferred degree when the *Student Community Standards Committee* deems this an appropriate sanction. All references to "student" in the *Academic Integrity Policy* section of this *Catalog* refer to current students, students no longer in attendance, and alumni.

University of the Rockies students and alumni are expected to conduct themselves as responsible adults who are worthy of the profession they pursue. University of the Rockies is a community of learners and scholars. As such, all students and alumni are responsible for doing their own work and participating in this community with a sense of academic integrity. Academic dishonesty of any kind, including plagiarism, falsification of data, cheating, or submitting the same work in more than one course without obtaining both faculty members' approval in advance, will not be tolerated by the University and may be grounds for dismissal from the University.

Academic Integrity Violations

Academic dishonesty can take a number of forms. It includes, but is not limited to, cheating on a test or examination, claiming the work of another as one's own, plagiarizing any paper, research project, or assignment, or falsely submitting material to fulfill course requirements.

Cheating

Cheating includes unauthorized copying from the work of another student, with or without that student's consent, using notes or other unauthorized material during a test period, and giving or receiving assistance from another when it is expected the student will perform his or her own work. Cheating also includes the unauthorized possession, attempt to possess, distribution, or attempt to distribute examinations or examination questions.

Deceitful Statements of Academic Achievements/Attainments

Cheating or furnishing fabricated or false information to University of Rockies' officials and/or faculty (such as lying to effect a grade change) or to the general public (such as falsifying information on a resume) are also acts of academic dishonesty prohibited by the *Student Community Standards*.

Facilitating Academic Dishonesty

Intentionally or knowingly helping or attempting to help another to commit a violation of academic integrity.

Falsifying Data

Falsifying data to show either the process or the product of scholarly examination to be different from what actually occurred is also considered dishonest. This includes falsely reporting attendance or participation in any field work experience. Students may not submit work done in one course to satisfy the requirements of another course, unless both instructors agree beforehand.

Forged or Altered Documents

Forged or altered documents may not be presented for any purpose. This includes transcripts, withdrawal forms, petitions, or any academic form that has been falsified or on which the signature of a member of the faculty or administration, or anyone else's signature, has been forged or altered.

Unapproved Research

Unapproved research is any research that is undertaken without approval by the University or the Institutional Review Board (IRB), including any solicitation of or interaction with human subjects or accessing any data. In the case of dissertation research, unapproved dissertation research is any research that is started before officially enrolling in dissertation course work, any research for which the Research Review Board (RRB) has not approved the dissertation proposal, and for which the Institutional Review Board has not approved the IRB request. Conducting dissertation research without RRB/IRB approval is an Academic Integrity violation and could result in sanctions.

Plagiarism

Students agree to produce all the work assigned in every course as their individual work, unless collaboration is required or expressly permitted by the instructor. Plagiarism includes the use of the student's own previously published work (in whole or in part) or work previously submitted (in whole or in part) in any course, including within the same course, without proper citation in accordance with the guidelines set

forth in the *Sixth Edition Publication Manual of the American Psychological Association*.

Students must obtain specific, written permission from their instructor(s), prior to the inclusion in course assignments, to submit work the student previously submitted (in the same course or any other course) or work the student previously published, in whole or in part.

Students will avoid all forms of plagiarism and will not submit as their own work material obtained from persons (with or without that person's knowledge), or from other sources such as term paper companies or the Internet. Students will give credit (proper APA citations) for all the sources of their ideas, whether written or oral, formal or informal, published or unpublished. Plagiarism may be grounds for dismissal from the University.

Avoiding Plagiarism: Address any questions regarding plagiarism to the course instructor. Students should be aware that University of the Rockies' instructors utilize anti-plagiarism resources to determine the originality of submitted written work. These tools compare students' work with texts available in internal databases and through Internet searches.

Consequences for Academic Dishonesty

A student who commits an act of academic dishonesty may face disciplinary action, including but not limited to: failure to receive credit on an academic assignment, course failure, rewrite of an assignment, and/or dismissal from the University. (Please see the specific plagiarism sanctions listed below.)

Students who commit academic dishonesty violations will be referred by faculty and staff to the Office of Academic Integrity to review for the possibility of sanctioning. Formal notice will be provided to the student of the allegations of the offense, as well as any resulting consequences deemed appropriate by the University outside of the classroom environment. The student may be asked to meet for either an informal hearing or a formal hearing.

The formal conduct hearing process is outlined under *Student Community Standards Disciplinary Processes*. Students may appeal disciplinary decisions regarding academic dishonesty through the Grade Appeal process. Students may appeal disciplinary actions of

the *Student Community Standards Committee* as per the process outlined in this *Catalog*.

A misconduct violation (or violations) committed by a student will remain on the student's conduct record throughout the student's academic career at University of the Rockies, and may be considered in the disciplinary process for other violations.

Academic Integrity Violations and Alumni

University of the Rockies retains its jurisdiction for misconduct that occurs prior to, but is not reported until after, the graduation of the offending student. There is no time limit on reporting violations to the Academic Integrity Policy. Alumni who commit Academic Integrity violations, including plagiarism, will be referred to the Office of Student Affairs to review for the possibility of sanctioning. The alumni/ae may be asked to meet for either an informal hearing or a formal hearing.

Acts of Plagiarism

First and second violations: For the first confirmed offense of academic dishonesty reported to the University, through the Office of Academic Integrity, the University will provide the student instructive resources to avoid plagiarism; acknowledgement of fault and the misused resources should be provided to the Manager of Academic Integrity. The consequence for the second confirmed offense of academic dishonesty includes, but is not limited to: successfully completing an American Psychological Association (APA) publication style instruction course, writing an essay demonstrating APA style competency, or similar disciplinary exercise as provided by the Manager of Academic Integrity.

Third violation: Third confirmed violations may be referred for a formal hearing by the *Student Community Standards Committee*. After review and confirmation by the *Committee*, the student may be failed for the course in which the violation occurred and suspended from the University for up to one year.

Fourth violation: Fourth confirmed violations will require a formal hearing by the *Committee*. After review and confirmation by the *Committee*, the student may be expelled, suspended or permanently separated, from the University.

The formal conduct hearing process is outlined under *Student Community Standards Disciplinary Processes*. Students may appeal disciplinary decisions regarding academic dishonesty through the Grade Appeal process. Students may appeal disciplinary actions of

the *Committee* as per the process outlined in this *Catalog*.

Plagiarism in Dissertation

The University requires that all dissertations be submitted for similarity review through Turnitin® for the purpose of detecting plagiarism prior to the defense of the dissertation. The University further requires that the student's Dissertation Chair certify that the dissertation has been submitted through Turnitin®.

If plagiarism is discovered after a doctoral student's dissertation has been submitted for final examination, or after the student's program has been completed, the alleged plagiarism must be immediately reported to the Provost. The Provost (or designated Chair) will collaborate with the Office of Academic Integrity to determine an appropriate course of action.

Turnitin® is available to students as a Learning Resource in the online classroom.

Student Community Standards Disciplinary Process

Whenever a complaint is made against any student or alumnus for misconduct, the University will conduct an investigation of the allegations as soon as possible. University of the Rockies may make any necessary modification to these procedures that does not materially jeopardize the fairness owed to any party.

Notice of Complaint

Once a determination is made that there is reasonable cause for the complaint, notice will be given to the accused student or alumnus in writing. Written notice may be delivered in person or via email. Once emailed, such notice will be presumptively delivered when an email is sent and considered an official form.

The written notice will state briefly a description of the incident alleged, as well as stating all policies the accused student or alumnus is alleged to have violated and the possible consequences if the accused student or alumnus is found in violation. The written notice will direct the accused student or alumnus to contact the appropriate University representative within two (2) business (Monday thru Friday) days of receipt to respond to the complaint.

The failure of a student or alumnus to acknowledge the notice within two (2) business days may result in an

administrative hold on the student's account or the alumnus' privileges. This administrative hold will remove the student from all future scheduled courses. The hold will not be lifted until the student participates in determined informal or formal hearings and the *Student Community Standards Procedures* for the student are closed.

A meeting (in person or by phone) with the University representative may be arranged to explain the nature of the complaint and the conduct process. Within the two business day (Monday thru Friday) period, the accused student or alumnus must schedule this meeting, and at that time or before, indicate in writing to the Manager of Academic Integrity whether he or she admits or denies the allegations of the complaint.

If the accused student or alumnus admits the violation(s), the Manager of Academic Integrity will impose appropriate sanctions. Such a disposition will be final and there will be no subsequent proceedings, unless the sanctions include suspension or expulsion. In that case, the accused may request a hearing by the *Student Community Standards Committee* on the issue of sanctions, only.

If the student or alumnus denies the violation(s), the complaint will be referred for a hearing. Minor complaints will be referred for an informal hearing, and more serious complaints will be referred to the *Student Community Standards Committee* (see the following for details on the proceedings of this committee). The Manager of Academic Integrity has discretion to determine the severity of the alleged violation(s), and whether informal or formal hearing procedures will apply. Generally, any misconduct that will result in less than separation is considered minor, and any misconduct that is likely to result in suspension or expulsion is eligible for referral to the *Student Community Standards Committee*.

Decisions made by the *Student Community Standards Committee* or members of the Office of Student Affairs and the Office of Academic Integrity will be final, and sanctions implemented, pending the normal appeal process. The Provost, or designees, have the authority to delay implementation of sanctions pending the appeal, at his or her discretion.

Informal Hearings Procedures

For hearing procedures relating to matters involving sexual misconduct or other sensitive issues, please see the Special Procedural Provisions for Sexual Misconduct Sanction Hearings section of this Catalog.

When a student or alumnus denies a minor violation of the *Student Community Standards*, the Manager of Academic Integrity, or designee, will upon receipt of a written denial from the accused student or alumnus, schedule a hearing.

- Informal hearings will be heard by a University Representative in the Office of Student Affairs.
- Written notice of the time, date, and location of the hearing will be sent to the accused student or alumnus at least seven (7) business days prior to the hearing date. The accused student or alumnus may additionally be notified in person, by telephone, or by email. Students or alumni may waive the seven (7) day notice requirement if they prefer an expedited hearing.
- If a student or alumnus fails to respond to the notice from the Manager of Academic Integrity or designee within seven (7) days, the hearing will proceed as scheduled, and the Manager of Academic Integrity, or designee, will make a determination on the basis of the evidence available at the hearing. If appropriate, sanctions will be implemented. A student or alumnus may not avoid the impositions of sanctions by withdrawing with conduct charges pending. The hearing will still proceed, and any finding of violation will result in a "WU" grade and other appropriate transcript notations.
- At least forty-eight (48) hours before any scheduled hearing, the following will occur:

The accused student or alumnus will deliver to the Manager of Academic Integrity, or designee, a written response to the complaint;

The accused student or alumnus will deliver to the Manager of Academic Integrity, or designee, a written list of all witnesses the accused student wants the University to call on his or her behalf at the hearing, giving the full contact information of any such witness, if known.

- At the hearing, witnesses and admissibility of information will be determined at the discretion of the Manager of Academic Integrity, or designee. The hearing will consist mainly of informal questioning and discussion of the alleged incident.
- After the hearing, the Manager of Academic Integrity, or designee, will deliberate and determine whether it is more likely than not that the student or alumnus has violated the *Student Community Standards*. Once a finding is determined, if that finding is that of a policy

violation, the Manager of Academic Integrity or designee will determine an appropriate sanction. The Manager of Academic Integrity, or designee, will prepare a written finding, which will be shared with the accused student or alumnus no later than two (2) business days following the hearing.

Formal Hearing Procedures

For hearing procedures relating to matters involving sexual misconduct or other sensitive issues, please see the Special Procedural Provisions for Sexual Misconduct Sanction Hearings section of this Catalog.

Notice

Written notice of the time, date and location of the hearing will be sent to all parties to the complaint, who may additionally be notified in person, by telephone, or by email.

Joint Hearing

In any joint hearing, separate determinations will be made as to the responsibility of each student or alumnus accused. The *Student Community Standards Committee* may elect to separate hearings that have been referred jointly, in its discretion and in consultation with the Manager of Academic Integrity or a representative from the Office of Student Affairs.

Composition

The Manager of Academic Integrity or designee will name a *Student Community Standards Committee* (hereinafter referred to as *Committee*) to conduct a formal hearing to review complaints. The *Committee* will consist of three (3) members, two of which will be from the faculty and/or administration, and one of which may be from the student body. The *Committee* will select its own chairman, vice-chairman, and secretary from among its members for each hearing by majority vote of those present. *Committee* members will serve without compensation. At any hearing before the *Committee*, at least three (3) members will be present to constitute a quorum in order to transact the business of the *Committee*. Any member of such *Committee* directly involved in the outcome of a hearing, or who believes he or she has a conflict of interest rendering him or her incapable of making an impartial decision will disqualify himself or herself from that hearing and the Manager of Academic Integrity will appoint a person to take his or her place at that hearing.

Committee Procedures

Once a student or alumnus responds to an alleged violation, he or she will be given a minimum of seven

(7) days to prepare for a hearing. Students or alumni may request to waive the seven (7) day preparation requirement if they prefer an expedited hearing.

At least forty-eight (48) hours before any scheduled hearing, the accused student or alumnus will deliver to the Manager of Academic Integrity, the following items:

- A written response to the complaint.
- A written list of all witnesses the accused student or alumnus wants the University to call on his or her behalf at the hearing, giving the full contact information of any such witness, if known.
- A written list of all items of physical information the accused student or alumnus intends to use or needs to have present at the hearing, and will indicate who has possession or custody of such information, if known.
- A written list of all witnesses the complainant wants the University to call and a list of all physical information that will be used by the complainant at the hearing and will indicate who has possession or custody of such information, if known. The parties will notify the Manager of Academic Integrity the names of any advisors who may be accompanying the parties at the hearing; advisors are to be selected from members of the University of the Rockies community unless special permission for an outside advisor is granted by the Provost or the Manager of Academic Integrity, or designee.

At least forty-eight (48) hours before any scheduled hearing, the following items will occur:

- If there is an alleged victim of the conduct in question, the alleged victim may serve as the complainant, or may elect to have the administration serve as complainant. Where there is no victim, the administration will serve as complainant.
- The Manager of Academic Integrity, or designee will ensure that this information and any other available written documentation is shared between the complainant and accused student or alumnus at least twenty-four hours before any scheduled hearing. In addition, the parties will be given a list of the names of all the hearing officers for the complaint. Should either party object to any members of the board or panel, they must raise all objections in writing to the Manager of Academic Integrity or designee immediately. Hearing officers will only be unseated if the Manager of Academic Integrity or designee concludes that their bias

precludes an impartial hearing of the complaint. Additionally, any Committee member or hearing officer who feels he or she cannot make an objective determination must excuse himself or herself from the proceedings.

Admissible Information

The *Committee* will consider all information that is relevant and credible. The *Committee* may in its discretion limit or bar character witnesses. Any questions of the admissibility of information will be determined by the Chair. The past sexual history or sexual character of a party will not be admissible by the other party in hearings unless such information is determined to be highly relevant by the Chair. All such information sought to be admitted will be presumed irrelevant, and any request to overcome this presumption by the parties must be included in the complaint/response or a subsequent written request, and must be reviewed in advance of the hearing by the Director of Student Affairs or designee. While previous conduct violations by the accused student or alumnus are not generally admissible as information about the present alleged violation, the Director of Student Affairs or designee may supply previous complaint information to the *Committee*, or may consider it himself or herself if he or she is hearing the complaint, only if:

1. The accused was previously found to be responsible;
2. The previous incident was substantially similar to the present allegation; and
3. Information indicates a pattern of behavior and substantial conformity with that pattern by the accused student or alumnus.

Record of Proceeding

Proceedings before the *Student Community Standards Committee* will be recorded. A tape recording of the proceedings will be sufficient. In the event a transcript of the proceedings is requested, the person so requiring will pay the cost of reproduction.

Post-Hearing Procedures

After a *Student Community Standards Committee* hearing, the *Committee* will deliberate and determine by majority vote whether it is more likely than not that the student or alumnus has violated the Student Community Standards. The Manager of Academic Integrity or designee will be present and available as a resource during all deliberations. Once a finding is determined, if that finding is that of a policy violation, the *Committee* will determine an appropriate sanction.

The Manager of Academic Integrity or designee is responsible for informing the *Committee* of applicable precedent and any previous conduct violations by the accused student. The Chair will prepare a written deliberation report to the Manager of Academic Integrity or designee detailing the finding, how each body member voted, the information cited by the body in support of its finding, and any information that the body excluded from its consideration, and why.

This report should conclude with any recommended sanctions. This report must be submitted to the Manager of Academic Integrity within 48 hours after the end of deliberations.

The Manager of Academic Integrity will implement the final determination and inform the parties within seven (7) days after the hearing.

Sanctions

The following sanctions may be imposed upon any student or alumnus found to have violated the *Student Community Standards*:

Disciplinary Warning: A notice in writing to the student or alumnus that the student is violating or has violated institutional policies. The letter informs the student or alumnus that continued misconduct will result in further disciplinary action.

- **Conduct Probation:** A student whose behavior on or off campus is in violation of established University policies and/or rules. This sanction may be imposed for not less than one academic term nor more than three academic terms. The conduct body determines the beginning and ending dates. Students on conduct probation may incur additional sanctions for any subsequent violation of University policies and/or rules, whether or not this violation is related to the original violation for which conduct probation was imposed.
- **Probation Restrictions:** Students on probation may be subject to the following restrictions:
- They may not hold any office or leadership role in any student or University organization or activity.
- They may not represent the University in any on- or off-campus event.
- Other restrictions may be established for individual situations.

Loss of Privileges: A denial of specified privileges for a definite period of time. Privileges that may be lost include, but are not limited to, the following:

1. **Restricted Access:** Offender may be restricted from entering specified buildings or areas on campus, from attendance at specified campus events, or from use of specified equipment or facilities for definite periods of time.
2. **Fines:** Fines may be imposed to restore damage to physical property. In addition, the conduct body may recommend that the University refuse: (1) to grant academic credits or degrees; or (2) to issue grades or transcripts to the student offender(s) or student member(s) of an offending organization, until such fine is paid. The method of payment will be specified by the conduct body imposing the fine.
3. **Restitution:** Compensation for loss, damage or injury. This may take the form of appropriate service and/or monetary or material replacement. The conduct body may recommend that the University refuse: (1) to grant academic credits or degrees; or (2) to issue grades or transcripts to the student offender(s) or student member(s) of an offending organization, until restitution is complete.
4. **Educational Remediation Projects:** Completion of an educational or remediation project such as, but not limited to, the following: attending a specific workshop or program, writing an article or research paper on a specified topic, making an oral presentation to a campus group, participating in specified counseling/evaluation, work assignments, and/or service to the University. The Director of Student Affairs or designee may develop additional remediation sanctions to meet individual student needs on a case by case basis.
5. **Alumni Services:** An alumnus who commits academic dishonesty may lose privileges afforded alumni.

Suspension: Separation of the student from campus, classes, and all privileges for a definite period of time, after which the student is eligible to return.

The offender may not be on campus at any time or participate in University classes except to come to the Administration Building for matters directly related to the suspension.

In cases where suspension prevents course work, the student will receive a "W" grade. Tuition and fees will be refunded as per applicable tuition refund policies outlined in *Tuition, Fees, and Financial Aid* section of this *Catalog*. Any conditions for readmission will be stated in the order of suspension.

Expulsion: With approval from the Provost or designee, permanent separation of the student from the University. Tuition and fees will be refunded as per applicable refund policies outlined in the *Tuition, Fees, and Financial Aid* section of this *Catalog*. The student is barred from being present on campus and at University-sponsored events.

The following sanctions may be imposed upon groups or organizations:

- Those sanctions listed previously; and
- **Deactivation:** Loss of all privileges, including University recognition, for a specified period of time.

Rescindment of Degree: With approval from the President, a University of the Rockies degree may be rescinded when there is clear and convincing evidence that one of the following has occurred:

- A degree has been conferred in error;
- All University-defined requirements were not satisfied at the time the degree was granted; or
- A previously awarded passing grade is reversed, resulting in unmet degree requirements.

Student Community Standards Committee Hearing Appeal

There is no appeal from the results of an informal hearing.

To appeal a formal *Student Community Standards Committee Hearing*:

1. Accused students or complainants may petition within three (3) business days of receiving the written decision of the *Committee* for the review of its decision or the sanction imposed. Such petitions will be in writing and will be delivered to the Provost.
2. If the Provost determines that one of the five bases for appeal listed subsequently has been met, the Provost may either re-open the hearing to allow reconsideration of the original determination and/or sanction(s) or will refer the matter back to the *Committee* for reconsideration. The Provost serves as the final level of review in the conduct matter.

3. Except as required to explain the basis of new information, a review will be limited to review of the verbatim record of the initial hearing and supporting documents for one or more of the following purposes:
- To consider new information, unavailable during the original hearing, that could be outcome determinative;
 - To assess whether a material deviation from written procedures impacted the fairness of the hearing;
 - To decide if a sanction(s) is grossly disproportionate to the severity of the offense;
 - To determine that the finding does not accord with the information;
 - To assess whether bias on the part of a conduct board member deprived the process of impartiality.

Every opportunity should be taken to return the complaint to the *Committee* for reconsideration, where possible. On appeal by any party to the complaint, the Provost or the *Committee* (by majority vote) may support or change a decision, increase, decrease or modify a sanction. An appeal is not a rehearing, though witnesses may be called or parties questioned as necessary. The reviewing body will be deferential to the original decision maker, making changes to the finding only where there is clear error and to the sanction only if a compelling justification to do so exists.

Administrative Class Leave

Students placed on Administrative Class Leave are removed from all classes scheduled to begin in the future, pending verification of their identity. Students who are placed on Administrative Class Leave based on the need to verify identity will have up to fourteen (14) days from their last date of attendance to provide the requested documentation to the Registrar's Office. If the student fails to provide the documentation necessary to verify his or her identity, he or she will be administratively withdrawn from the University. Students who have been administratively withdrawn for failure to authenticate their identity who are seeking to re-enroll in the University will be required to provide the necessary verification of identity prior to reapplying and may be subject to student conduct sanctions dependent upon the circumstances surrounding their

failure to authenticate identity in a timely manner. The University may also deny or rescind admission to any student the University determines to have engaged in identity related fraud or theft.

Emergency Administrative Leave

In situations requiring immediate action, and after consultation with concerned individuals (e.g., students, faculty, administrators, other staff members, internship, or student teaching supervisors, etc.), the Manager of Academic Integrity or designee may place the student on an Emergency Administrative Leave. Students placed on Emergency Administrative Leave are removed from all current and future courses.

During Emergency Administrative Leave, the University administration will conduct a timely investigation. Students will remain on an administrative leave no more than fourteen (14) days from the student's last date of attendance. Within that 14-day period, the University administration will follow University procedures for administration of the Student Community Standards and render a decision as to any change in status and/or and sanctions to be imposed by University of the Rockies. Students on Emergency Administrative Leave are not permitted to return to campus or to participate in University classes or events.

More than one of the sanctions listed previously may be imposed for any single violation.

Special Procedural Provisions for Sexual Misconduct and Other Sensitive Issues

Advisor/Advocate/Presence of Others: All parties to sexual misconduct complaints have the right to an advisor/advocate from the community. Any advisors from outside the community must be pre-approved by Manager of Academic Integrity. The accuser and the accused are entitled to the same opportunity to have other persons present during a disciplinary hearing, who may not be advisors or advocates.

Amnesty Policy: University of the Rockies encourages the reporting of crimes by victims. Sometimes, victims are hesitant to report to University officials because they fear that they themselves may be accused of policy violations. It is in the best interests of this community that as many victims as possible choose to report to University officials. To encourage reporting, University of the Rockies pursues

a policy of offering victims of crimes immunity from policy violations related to the incident.

Attempted Violations: In most circumstances, University of the Rockies will treat attempts to commit any of the violations listed in the *Standards* as if those attempts had been completed.

False Reporting: University of the Rockies will not tolerate intentional false reporting of incidents. It is a violation of the *Standards* to make an intentionally false report of any policy violation, and it may also violate state criminal statutes and civil defamation laws.

Group Action: When members of groups, individuals acting collusively, or members of an organization act in concert in violation of any policy, they may be held accountable as a group, and a hearing may proceed against the group as joint accused students.

List of Witnesses and Copies of Documentary Evidence: University procedures call for an exchange of information between the parties in advance of the hearing, including an exchange of the complaint and answer, witness lists, and other written statements that may be available.

No-Contact Order: Students are entitled to seek a no-contact order that imposes reasonable restrictions on student contact during and potentially after campus conduct proceedings are in progress.

Notice of When Complaint Delivered to Accused Student: Complainants are notified as to when notice of the complaint is delivered to the accused student, so as to protect themselves from potential retaliation.

Right to a Closed Hearing: In sensitive issues, such as stalking, violence, and sexual misconduct, all hearings will be closed to the public, and only those who have a legitimate reason to be present will be permitted to be present.

Right to Advance Notice of Board Composition and Right to Challenge: All parties to the complaint will receive advance notice of who will serve on the conduct board or panel and will be given the right to challenge any member of the basis of actual bias. Any challenge will be decided by the Office of Student Affairs.

Right to a Prompt Process and Hearing: Sexual misconduct complaints are fast-tracked to ensure that University of the Rockies provides a prompt response.

Right to be Informed of Appeal Status: The parties will be informed by the Office of Student Affairs if any of the parties to the complaint requests an appeal.

Right to be Present for Entire Proceeding: Each party has the right to be present for all testimony and questioning. Only deliberation is conducted in closed-session without the parties present. If findings and sanctions are presented orally at the end of the hearing, the complainant is permitted to be present.

Right to Know Outcome and Sanctions: Whether in writing or informed orally, the complainant and the accuser have the right to know the outcome and sanctions of the hearing.

Right to Present Own Complaint or Use Proxy: The alleged victim has the right to present his or her own complaint if he or she wants to, or to ask the University to stand as complainant in his or her place.

Separate Testimony Options: Any complainant can request to give his or her testimony via alternate means to being in the physical presence of the person he or she has accused. Screens and closed-circuit broadcasts may be permitted, but not to the disadvantage of the accused student.

Sexual History/Character: All parties to a complaint have a right not to face questions or discussion of their sexual history or character unless the hearing chair or administrative hearing officer determines that such information is highly relevant to determining whether the policy has been violated.

University as Complainant: As necessary, University of the Rockies reserves the right to initiate a complaint, to serve as complainant, and to initiate conduct proceedings without a formal complaint by the victim of misconduct.

In any complaint where there is a finding of violation of the sexual misconduct policy, the sanctioning, in addition to standard sanctioning principles, will be guided by the following goals to:

- Ensure that the discriminatory conduct is brought to an end;

- Make a reasonable effort to prevent the reoccurrence of the discriminatory conduct in the future;
- Restore the victim, as much as possible, to his or her pre-deprivation status and undo the effects of gender-based discrimination upon him or her; and
- Changes to Academic Situations: The University will make changes to the victims' academic situations following an alleged sex offense if the changes are requested and reasonably available. Note: The University does not maintain any residential campus facilities.

Involuntary Leave

The University of the Rockies considers the safety and well-being of its students, faculty, and staff as a top priority. The Involuntary Leave policy is not intended to be a substitute for appropriate disciplinary action when discipline is warranted, but may be used in cases when regular disciplinary proceedings cannot or should not be used, and after attempts to encourage the student to initiate a voluntary leave have been exhausted. Involuntary Leave is available to protect the health and safety of the University community and is not a penalty. When a student engages in behavior that violates the *Student Community Standards*, the behavior will be addressed as a disciplinary matter under the applicable *Standards*.

Grounds for Involuntary Leave

A student may be subjected to Involuntary Leave if there is evidence that the student's continued attendance presents an unreasonable risk of harm to themselves or to members of the University community. The leave will endure for a pre-determined period, or until the student no longer poses an unreasonable risk of harm, at which time the leave will end and the student will be reinstated. Grounds for Involuntary Leave include:

- Represents a significant threat to the safety and health of members of the University community, including themselves; or
- Impedes the educational process or activities of the University and its personnel.

Procedure

When the University receives credible information regarding a student's behavior, statements, or actions, that may constitute grounds for Involuntary Leave, the Manager of Academic Integrity, or designee will meet

with the student to review the reported behavior, actions, and or statements. If the University has a reasonable basis to believe that the student meets the criteria for Involuntary Leave, he or she may take any of the following actions:

- Impose an immediate Emergency Administrative Leave if there is compelling evidence that the student poses an immediate danger to the University community; or
- Require the evaluation of the student by an appropriate professional chosen by the University. The cost of the evaluation shall be paid for by the University's educational program. The evaluation shall be completed within ten (10) business days after the initial meeting with the Manager of Academic Integrity, or designee, unless an extension is granted.

Evaluation

In situations where a mandatory evaluation by a professional is expected, the student will be required to sign written authorization to allow for the exchange of relevant information between the University and the evaluating professional. Failure to cooperate with the evaluation or sign the written authorization may result in a referral to the student conduct process. The professional making the evaluation shall assess the student's ability to safely participate in the University community. The assessment shall include a determination of:

- The severity of risk posed by the student to the health and safety of the University community;
- The probability that potential harm may occur, and
- Whether reasonable modifications of policies, practices, and procedures will sufficiently mitigate the risk.

If the evaluation results in a determination that the student's continued attendance poses no significant threat to the health and safety of the University community, the University shall take no further action under the Involuntary Leave policy.

If the evaluation results in a determination that the continued attendance of the student presents a significant threat to the health and safety of any member(s) of the University community, the University may refer the matter to the Office of Student Affairs and/or will conduct an Involuntarily Leave hearing to make an individualized and objective assessment of the student's ability to safely participate in the University's educational program. The assessment will

include a determination of the severity of risk posed by the student to the health and safety of members of the University community, the probability that potential harm may occur, and whether reasonable modifications of policies, practices, and procedures will sufficiently mitigate the risk. The student may provide evidence showing he or she should not be placed on Involuntary Leave. If the hearing determines there is an unreasonable risk based on a high probability of substantial harm to members of the University community, the student will be placed on leave from the University.

During the period of either Emergency Administrative Leave or during a time period of Involuntary Leave after assessment, the student is not permitted to participate in University courses or events, or be present in any University facility or on any campus, except by the express permission of the Provost or designee. Appeals of an Involuntary Leave will be handled in accordance with the University of the Rockies *Dispute Resolution Procedure for Student Complaints*.

Consequences to Course Grades and Tuition or Other Fee Charges

If the Involuntary Leave policy is invoked, the student will receive “W” grades (withdraw grades) in all courses in which he or she is currently enrolled, and will be considered eligible for a tuition credit upon re-enrollment. Regular tuition charges and other applicable fees will be refunded per the *Tuition Refund Policy* outlined in the *Tuition, Fees, and Financial Aid* section of this *Catalog*, based on the student’s last date of attendance.

Appeal of Involuntary Leave after Evaluation or Emergency Administrative Leave

In situations where a student is involuntarily withdrawn as a result of either an Emergency Administrative Leave or as an action determined appropriate from the results of the assessment, a student shall be informed of his or her right to appeal the University’s decision regarding the Involuntary Leave.

The appeal shall be in writing and directed to Provost or designee and shall be received within ten (10) business days of the determination of the Involuntary Leave. Upon receipt of the appeal, the Provost or designee shall set a hearing date no later than 15 business days after receipt of the appeal. The hearing shall be an informal proceeding and is not considered adversarial.

At the hearing, the student will be provided with the opportunity to review any evaluations utilized by the University in the determination to invoke the Involuntary Leave policy. The student will also be provided with the opportunity to present relevant information from his or her perspective. The student may be accompanied by a person acting as an advocate who may be a family member or friend or member of the University community. The Provost or designee will review all the information presented in the hearing and make a determination of whether to uphold the involuntary leave of the student or consider readmission to the University.

Readmission to the University

A student who is involuntarily withdrawn under the Involuntary Leave policy will have the opportunity to re-enroll according to the time period specified in the decision letter from Provost or designee (in the case of an appeal). In all cases, the period of re-enrollment will not be before the start of the next academic term. The student must demonstrate, in addition to meeting all normal requirements for admission that the student no longer presents an unreasonable risk of harm and/or the student is no longer deemed to be engaging in and will not engage in any of the behaviors that led to the initial action of imposing the Involuntary Leave. The University may impose conditions upon the reenrollment status that limit the nature and scope of the student’s participation in the community if appropriate.

Nondiscrimination

University of the Rockies is an educational institution that admits academically qualified students to all the rights, privileges, programs, and activities generally available to students at the University. A student shall have the right to participate in University-sponsored services and activities without discrimination or harassment. The University does not discriminate in its education programs and activities on the basis of race, color, creed, national or ethnic origin, religion, sex, pregnancy, childbirth and related medical conditions, marital status, medical condition, service in the uniformed services, political activities and affiliations, age, disability, sexual orientation, gender identity, veteran status, or any other consideration made unlawful by federal, state, or local laws. Specifically, Title IX/SaVE requires the University not to discriminate on the basis of gender or sex in its education programs and activities. Gender/sex harassment, including gender sexual violence, is a form of prohibited gender or sexual discrimination. Examples of covered acts are found in the *Sexual Misconduct Policy* section of this *Catalog*.

Students who believe they have been subjected to discrimination, misconduct, harassment, violence or retaliation in violation of this policy should follow the procedures outlined in *Reporting/Filing a Complaint for Title IX (Gender/Sex Discrimination)* section of this *Catalog*. This process involves a thorough, impartial investigation designed to provide a fair, prompt, and reliable determination about whether University of the Rockies' nondiscrimination policies have been violated. As necessary, University of the Rockies reserves the right to initiate a complaint, to serve as complainant, and to initiate conduct proceedings without a formal complaint by the victim.

Students, staff, or faculty that wish to report a concern or complaint relating to discrimination, misconduct, harassment, violence or retaliation concerning faculty, staff, a student or students may do so by reporting the concern as listed in the following. For complaints alleging discrimination, misconduct, harassment, violence or retaliation based on gender or sex:

Contact the Title IX/SaVE Compliance Officer for University of the Rockies, **Francesca Galarraga, Director of Student Affairs and Strategy** at:

Phone: (866) 621-0124, ext. 30212

Email: TitleIX@rockies.edu

Mailing Address:

1201 16th Street

Denver, CO 80202

For all other complaints, including discrimination, misconduct, harassment, violence or retaliation based on race, color, creed, national or ethnic origin, religion, pregnancy, childbirth and related medical conditions, marital status, medical condition, service in the uniformed services, political activities and affiliations, age, disability, veteran status, or any other consideration made unlawful by federal, state, or local laws:

Contact, Pedro Hernandez or any member of the Student Dispute Resolution Center at Dispute.Resolution@rockies.edu or (866) 621-0124, ext. 11320.

Individuals with complaints of any nature described above also have the legal right to file a formal complaint with the Office for Civil Rights (OCR), United States Department of Education, Washington, DC 20202.

Sexual Misconduct/Harassment Policy

Sexual Harassment

Sexual harassment includes unwelcome conduct of a sexual nature, such as unwelcome sexual advances, requests for sexual favors, and other verbal, nonverbal, or physical conduct of a sexual nature that has the effect of unreasonably interfering with an individual's academic or work performance, or creates an intimidating, hostile, or offensive environment. Sexual violence is a form of sexual harassment prohibited by Title IX/SaVE.

Three Types of Sexual Harassment

1. Hostile Environment includes any situation in which there is harassing conduct that is sufficiently severe, pervasive/persistent or patently offensive so that it alters the conditions of education or employment, from both a subjective (the alleged victim's) and an objective (reasonable person's) viewpoint. The determination of whether an environment is "hostile" must be based on all of the circumstances. These circumstances could include:

- the frequency of the conduct;
- the nature and severity of the conduct;
- whether the conduct was physically threatening;
- whether the conduct was humiliating;
- the effect of the conduct on the alleged victim's mental or emotional state;
- whether the conduct was directed at more than one person;
- whether the conduct arose in the context of other discriminatory conduct;
- whether the statement is a mere utterance of an epithet which engenders offense in an individual, or offends by mere discourtesy or rudeness; and
- whether the speech or conduct deserves the protections under other principles such as academic freedom.

Hostile Environment sexual harassment may occur in student-to-student, faculty/staff to student or student to faculty/staff relationships or third party to student/faculty/staff.

2. *Quid pro quo* sexual harassment exists when there are:

- unwelcome sexual advances, requests for sexual favors or other verbal or physical conduct of a sexual nature; and
- submission to or rejection of such conduct results in adverse educational or employment action.

Quid Pro Quo harassment may occur in student to student, faculty/staff to student or student to faculty/staff relationships.

3. Retaliation. The University will sanction a faculty, student, or staff member who takes adverse action

against a person because of the person's participation in or support of an investigation of Sexual Misconduct/Harassment. Adverse action includes, but is not limited to, threats, harassment, intimidation (implied threats) or actual violence against the person or his or her property, adverse educational or employment consequences, ridicule, taunting, bullying, or ostracism.

Retaliation sexual harassment may occur in student to student, faculty/staff to student or student to faculty/staff relationships, or third party to student/faculty/staff.

Title IX/SaVE also prohibits gender-based harassment, which may include acts of verbal, nonverbal, or physical aggression, intimidation, or hostility based on sex or sex-stereotyping, even if those acts do not involve conduct of a sexual nature.

Definitions and Examples of Sexual Misconduct/Harassment

Sexual Misconduct/Harassment Offenses include, but are not limited to:

1. Sexual Violence
2. Sexual Assault
3. Domestic and/or Dating Violence
4. Stalking
5. Sexual Exploitation

The University reserves the right to determine the applicable definition based upon factors including but not limited to location of alleged offense, applicable laws or location of the University. Under University policy or Title IX or other federal law, conduct may constitute sexual misconduct/harassment even though that conduct does not meet a specific state or other definition of an offense.

Sexual Violence

Sexual violence is defined as physical sexual acts perpetrated against a person's will or where a person is incapable of giving consent. A number of different acts fall into the category of sexual violence, including, rape, sexual assault, sexual battery, sexual abuse, and sexual coercion, domestic violence, dating violence, and/or stalking. Sexual violence can be carried out by

University employees, other students, or third parties. All such acts of sexual violence are forms of sex discrimination prohibited by Title IX.

Consent

Consent means cooperation in act or attitude pursuant to an exercise of free will and with knowledge of the nature of the act. A current or previous relationship shall not be sufficient to constitute consent. Submission under the influence of fear shall not constitute consent.

Incapacitation

Incapacitation is the physical and/or mental inability to make informed, rational judgments. States of incapacitation include, but are not limited to, unconsciousness, sleep and blackouts. Where alcohol or drugs are involved, incapacitation is defined with respect to how the alcohol or other drugs consumed affects a person's decision-making capacity, awareness of consequences, and ability to make fully informed judgments. Being intoxicated by drugs or alcohol does not diminish one's responsibilities to obtain consent. The factors to be considered when determining whether consent was given include whether the accused knew, or whether a reasonable person should have known, that the complainant was incapacitated.

Sexual Assault

Any actor who knowingly inflicts sexual intrusion or sexual penetration on a victim commits sexual assault if:

- The actor causes submission of the victim by means of sufficient consequence reasonably calculated to cause submission against the victim's will; or
- The actor knows that the victim is incapable of appraising the nature of the victim's conduct; or
- The actor knows that the victim submits erroneously, believing the actor to be the victim's spouse; or
- At the time of the commission of the act, the victim is less than fifteen years of age and the actor is at least four years older than the victim and is not the spouse of the victim; or
- At the time of the commission of the act, the victim is at least fifteen years of age but less than seventeen years of age and the actor is at least ten years older than the victim and is not the spouse of the victim; or

- The victim is in custody of law or detained in a hospital or other institution and the actor has supervisory or disciplinary authority over the victim and uses this position of authority to coerce the victim to submit, unless the act is incident to a lawful search; or
- The actor, while purporting to offer a medical service, engages in treatment or examination of a victim for other than a bona fide medical purpose or in a manner substantially inconsistent with reasonable medical practices; or
- The victim is physically helpless and the actor knows the victim is physically helpless and the victim has not consented.

Domestic Violence

Domestic violence means an act or threatened act of violence upon a person with whom the actor is or has been involved in an intimate relationship. "Intimate relationship" means a relationship between spouses, former spouses, past or present unmarried couples, or persons who are both the parents of the same child regardless of whether the persons have been married or have lived together at any time. Domestic violence also includes any other crime against a person, or against property, including an animal, or any municipal ordinance violation against a person, or against property, including an animal, when used as a method of coercion, control, punishment, intimidation, or revenge directed against a person with whom the actor is or has been involved in an intimate relationship.

Dating Violence

The term "dating violence" means violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the victim; and where the existence of such a relationship shall be determined based on a consideration of the following factors:

- The length of the relationship.
- The type of relationship.
- The frequency of interaction between the persons involved in the relationship.

Stalking

A person commits stalking if directly, or indirectly through another person, the person knowingly:

- Makes a credible threat to another person and, in connection with the threat, repeatedly follows, approaches, contacts, or places under surveillance that person, a member of that person's immediate family, or someone with whom that person has or has had a continuing relationship; or
- Makes a credible threat to another person and, in connection with the threat, repeatedly makes any form of communication with that person, a member of that person's immediate family, or someone with whom that person has or has had a continuing relationship, regardless of whether a conversation ensues; or
- Repeatedly follows, approaches, contacts, places under surveillance, or makes any form of communication with another person, a member of that person's immediate family, or someone with whom that person has or has had a continuing relationship in a manner that would cause a reasonable person to suffer serious emotional distress and does cause that person, a member of that person's immediate family, or someone with whom that person has or has had a continuing relationship to suffer serious emotional distress. For purposes of this paragraph, a victim need not show that he or she received professional treatment or counseling to show that he or she suffered serious emotional distress.

Sexual Exploitation

Occurs when a person takes non-consensual or abusive sexual advantage of another for his or her own advantage or benefit, or to benefit or advantage anyone other than the one being exploited, and that behavior does not otherwise constitute one of the other Sexual Misconduct/Harassment offenses. Examples of sexual exploitation include, but are not limited to:

- prostituting another student;
- non-consensual video or audio-taping of sexual activity;
- going beyond the boundaries of consent (such as letting your friends hide in the closet to watch you having consensual sex);
- engaging in voyeurism; and
- knowingly transmitting an STI or HIV to another student.

Confidentiality

Students or parents of minor students, reporting incidents of Sexual Misconduct/Harassment may ask

that the students' names not be disclosed to the accused or that no investigation or disciplinary action be pursued to address the alleged Sexual Misconduct/Harassment. The University strongly supports a student's interest in confidentiality in cases involving Sexual Misconduct/Harassment. There are situations in which the University must override a student's request for confidentiality in order to meet its Title IX obligations; however, these instances will be limited and the information will only be shared with individuals who are responsible for handling the University's response to incidents of Sexual Misconduct/Harassment. Given the sensitive nature of reports of Sexual Misconduct/Harassment, the University will ensure that the information is maintained in a secure manner. The University is aware that disregarding requests for confidentiality can have a chilling effect and discourage other students from reporting Sexual Misconduct/Harassment. In the case of minors, state mandatory reporting laws may require disclosure, but will generally be followed without disclosing information to University personnel who are not responsible for handling the University's response to incidents of Sexual Misconduct/Harassment.

Even if a student does not specifically ask for confidentiality, to the extent possible, the University will only disclose information regarding alleged incidents of Sexual Misconduct/Harassment to individuals who are responsible for handling the University's response. To improve trust in the process for investigating Sexual Misconduct/Harassment complaints, the University will notify students of the information that will be disclosed, to whom it will be disclosed, and why. Regardless of whether student complainant requests confidentiality, the University will take steps to protect the complainant as necessary, including taken interim measures before the final outcome of an investigation.

For Title IX purposes, if a student requests that his/her name not be revealed to the accused or asks that the University not investigate or seek action against the accused, the University will inform the student that honoring the request may limit its ability to respond fully to the incident, including pursuing disciplinary action against the accused. The University will also explain that Title IX includes protection against retaliation, and that University officials will not only take steps to prevent retaliation but also take strong, responsive action if it occurs. This includes retaliatory action taken by the University and University officials. When the University knows or reasonably should know of possible retaliation by other students or third parties, including threats, intimidation, coercion, or

discrimination (including harassment), it will take immediate and appropriate steps to investigate or otherwise determine what occurred. The University will protect the complainant and ensure his/her safety as necessary.

If the student still requests that his/her name not be disclosed to the accused, or that the University not investigate or seek action against the accused, the University will determine whether or not it can honor such a request while still providing a safe and non-discriminatory environment for all students, including the student who reported the Sexual Misconduct/Harassment. The Title IX Compliance Officer will evaluate confidentiality requests.

If the University determines that it can respect the student's request not to disclose his/her identity to the accused it will take all reasonable steps to respond to the complaint consistent with the request. Although a student's request to have his/her name withheld may limit the University's ability to respond fully to an individual allegation of Sexual Misconduct/Harassment, the University will investigate other means available to address the Sexual Misconduct/Harassment, without initiating formal action against the accused or revealing the identity of the student complainant. The University will also take immediate action as necessary to protect the student while keeping the identity of the student confidential.

Resources

Please refer to the [Counseling, Treatment, and Rehabilitation Programs section in the Student Support, Health, and Safety section](#) of this Catalog.

Retaliation

This policy also prohibits retaliation against a person who reports Sexual Misconduct/Harassment, assists someone with a report of Sexual Misconduct/Harassment, or participates in any manner in an investigation or resolution of a Sexual Misconduct/Harassment report. Retaliation includes threats, intimidation, reprisals, and/or adverse actions related to employment or education.

Recordkeeping

The TitleIX/SaVE Compliance Officer, along with Legal & Compliance, is responsible for maintaining records relating to sexual harassment and sexual violence reports, investigations, and resolutions. Records shall be maintained in accordance with University Record Retention Policies. All records pertaining to pending litigation or a request for records shall be maintained in accordance with instructions from Legal & Compliance.

Reporting/Filing a Complaint for Title IX

Gender/Sex Discrimination

Sexual Misconduct/Harassment is a threat to the entire University community. Members from the University community are strongly encouraged to report all incidents that threaten a student's continued well-being, safety, or security. Complaints from any member of the University community relating to discrimination, misconduct, harassment, domestic violence, dating or other related violence, stalking, or retaliation based on gender or sex concerning a faculty, staff, a student or students should be reported to:

Contact the Title IX/SaVE Compliance Officer for University of the Rockies, **Francesca Galarraga, Director of Student Affairs and Strategy** at:

Phone: (866) 621-0124, ext. 30212

Email: TitleIX@rockies.edu

Mailing Address:

1201 16th Street

Denver, CO 80202

For Contact Information, please refer to the [Introduction section](#) of this *Catalog*.

The Title IX/SaVE Compliance Officer is responsible for the oversight, coordination and implementation of all Title IX compliance activities for the University. Title IX/SaVE Compliance Officer responsibilities include, but are not limited to, monitoring of the ongoing publication of the University's policy of *Nondiscrimination* including the Title IX/SaVE Compliance Officers contact information, continuous monitoring and oversight of overall University activities for compliance with Title IX requirements including athletic equity, grievance procedures, investigations, sanctions and evaluating requests for confidentiality.

University personnel will inform students in writing of procedures that victims should follow, including:

- the importance of preservation of any evidence;
- options regarding the assistance of local law enforcement, campus officials; the option to decline assistance, or decline notifying local law enforcement;
- any interim protective measures that will be taken and their options for protective orders; and
- resources including counseling, health, and mental health services.

Individuals with complaints of any nature described above also have the right to simultaneously file a formal complaint with the Office for Civil Rights (OCR), United States Department of Education, Washington DC 20201, and/or a criminal complaint with local law enforcement.

Other Complaints

All other complaints, including non-harassment, other forms of sex/gender based discrimination, misconduct, harassment, violence or retaliation based on race, color, creed, national or ethnic origin, religion, pregnancy, childbirth and related medical conditions, marital status, gender identity, medical condition, service in the uniformed services, political activities and affiliations, age, disability, veteran status, or any other consideration made unlawful by federal, state, or local laws, should follow the relevant procedure outlined in the *Dispute Resolution Procedure for Student Complaints* and/or contact:

Pedro Hernandez, ext. 11382 or any member of the Student Dispute Resolution Center at Dispute.Resolution@rockies.edu or (866) 621-0124, ext. 30015.

An individual may also file a complaint or grievance alleging discrimination, misconduct, harassment, domestic violence, dating or other related violence, stalking, or retaliation based on gender or sex in the procedure outlined in the *Dispute Resolution Procedure for Student Complaints*, if they prefer; however, these complaints will be routed back the Title IX/SaVE Compliance Officer.

The above complaint processes (Gender/Sex and Other Complaints) involve a thorough, impartial investigation designed to provide a fair, prompt, and reliable determination about whether the University nondiscrimination policies have been violated. As necessary, the University reserves the right to initiate a complaint, to serve as complainant, and to initiate conduct proceedings without a formal complaint by the victim. The University has an obligation to report any crimes of which it has knowledge under the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act).

Receipt of Complaint

Upon receiving notice of a possible violation of the Sexual Misconduct/Harassment policy, University of the Rockies will take immediate and appropriate steps to:

- end the behavior;
- conduct a prompt, fair and impartial investigation;
- remedy the effects, and
- prevent it from reoccurring.

Referral to Office of Student Grievance Resolution

Upon receipt of a complaint, the Title IX/Save Compliance Officer will refer the complaint to the Office of Student Grievance Resolution (OSGR), and if necessary, to Employee Relations, for investigation.

- The investigation should be completed and findings issued within sixty (60) calendar days from the receipt of the complaint, barring documented unforeseen circumstances.

In all campus based complaints, the Title IX/SaVE Compliance Officer and, if necessary, Human Resources, will determine the need for initial, short term remedial actions.

In order to protect the complainant, at any time during the investigation, the University may recommend short term, or interim, protections or remedies. These

remedial actions may include, but are not limited to, making the complainant aware of their rights, resources and support services, issuance of No Contact orders to separate or limit contact between the parties, modification of extracurricular, transportation, dining, working or living arrangements or course schedules, assignments or tests, increased monitoring, supervising, or security at applicable locations or activities, and/or interim suspension(s) pending investigation. These remedies or protections may apply in ground or online contexts.

Efforts will be made to minimize the burden on the complainant. Failure to comply with these interim protections may be considered a separate violation of this Policy.

Office of Student Grievance Resolution Initial Investigation into Complaint

The Initial Investigation will be completed within ten (10) calendar days from the receipt of the complaint, barring documented unforeseen circumstances.

- Upon receipt of a complaint from the Title IX/SaVE Compliance Officer, the Office of Student Grievance Resolution (OSGR), and if necessary, Human Resources staff, will mutually investigate the complaint.
- OSGR and, if necessary, Human Resources staff, will mutually determine the identity and contact information of the complainant, whether that will be the initiator, the alleged victim, or a University proxy or representative.
- OSGR and, if necessary, Human Resources staff, will mutually collaborate with the complainant to identify the correct policies allegedly violated.
- OSGR and, if necessary, Human Resources staff, will mutually conduct an immediate initial investigation to determine if there is reasonable cause to charge the accused individual, and what policy violations should be alleged as part of the complaint. If a reasonable cause exists, OSGR, and if necessary, Human Resources, will mutually prepare the initial investigation report and if applicable, a proposed Notice of Charges on the basis of the initial investigation and submit it to the Title IX/SaVE Compliance Officer for further action.
- Once the Title IX/SaVE Compliance Officer receives a copy of the report of initial findings, the Title IX/SaVE Compliance Officer will review the findings and make a determination within three (3)

calendar days of receipt of the initial investigation report and if applicable, the proposed Notice of Charges as to whether reasonable cause exists to bring charges against the accused individual. If reasonable cause exists, the matter shall proceed to a formal investigation.

- If the Title IX/SaVE Compliance Officer determines there is insufficient evidence to support reasonable cause, the Title IX/SaVE Compliance Officer or designee or, if necessary, Human Resources, will simultaneously and in writing inform the complainant and the accused that the investigation is discontinued. The interim, short term actions taken will be reversed.

Notice of Charges and Continued Investigation of Complaint

The decision whether to continue the Investigation will be made and communicated to the parties within fifteen (15) calendar days of the receipt of the complaint, barring documented unforeseen circumstances. The Title IX/SaVE Compliance Officer or his/her designee, will simultaneously communicate in writing to the parties the continuation of the investigation and intent to present the accused with a Notice of Charges.

If the Title IX/SaVE Compliance Officer determines there is sufficient evidence to support reasonable cause and approve the charges, the Title IX/SaVE Compliance Officer and, if necessary, Human Resources staff, will mutually determine the need for additional, short term remedial actions for any parties involved in the complaint.

In order to protect the complainant, at any time during the investigation, the University may recommend short term, or interim, protections or remedies. These remedial actions may include, but are not limited to, making the complainant aware of their rights, resources and support services, issuance of No Contact orders to separate or limit contact between the parties, modification of extracurricular, transportation, dining, working or living arrangements or course schedules, assignments or tests, increased monitoring, supervising, or security at applicable locations or activities, and/or interim suspension(s) pending investigation. These remedies or protections may apply in ground or online contexts.

Efforts will be made to minimize the burden on the complainant. Failure to comply with these interim

protections may be considered a separate violation of this Policy.

The investigator(s) will conduct the investigation in a manner appropriate in light of the circumstances of the case, which will typically include interviews with the complainant, the respondent, and any witnesses. As part of the investigation, the University will provide an opportunity for the parties to present statements, witnesses, and other evidence. The interviews will be supplemented by the gathering of any physical, documentary, or other evidence, as appropriate and available including but not limited to law enforcement investigation documents and student or employee personnel files. The investigation is deemed to be adequate, reliable, impartial, prompt, balanced and fair, and all individuals will be treated with appropriate sensitivity and respect throughout the investigation.

- Any requests for updates on the status of the investigation prior to its completion should be directed to the Title IX/SaVE Compliance Officer.
- The investigator will make a finding and present the findings to the Title IX/SaVE Compliance Officer within forty-five (45) calendar days of the receipt of the complaint, barring documented unforeseen circumstances.
- The Title IX/SaVE Compliance Officer will communicate the results, if applicable, to Human Resources staff.
- At any time during this process, the victim maintains their right to simultaneously file a formal complaint with the Office of Civil Rights (OCR), United States Department of Education, Washington DC 20201, and/or a criminal complaint with local law enforcement.

Presentation of Investigation Findings to the Parties

- The Title IX/SaVE Compliance Officer or designee, or, if necessary, Human Resources staff, will simultaneously and in writing communicate the findings to the accused and the complainant within fifty (50) calendar days of the receipt of the complaint, barring documented unforeseen circumstances. This communication will inform the parties whether the preponderance of the evidence supports a finding against the accused for the alleged violation(s).
- The communicated findings will inform the parties as to 1) whether there is a finding of sexual harassment; 2) whether the interim measures will continue; 3) what actions will be taken, including

any disciplinary procedures that will be initiated; and 4) whether any assistance will be provided to the victim.

- Where the accused is found not responsible for a violation, the Title IX/SaVE Coordinator and Human Resources staff where applicable, will consider the reversal of any remedial actions taken.
- The accused or the complainant may appeal the findings in part or in whole; the Title IX/SaVE Compliance Officer or his/her designee will advise the parties of the criteria for appeal of the findings when communicating the findings.

Investigation Findings: Acceptance

- If the complainant and/or accused individual(s) accept the findings in whole, each shall notify the Title IX/SaVE Compliance Officer within three (3) business days of communication of findings. If the complainant and/or accused individual do not indicate his/her acceptance or Appeal of the findings within three (3) business days of communication, non-communication will be considered acceptance and the University will proceed accordingly with the process four (4) business days following communication of the investigation findings.
- The Title IX SaVE/Compliance Officer will review all case information and determine appropriate sanctions within eight (8) business days following notification of all findings to the complainant and accused individual, barring documented unforeseen circumstances. If the accused is an employee, the Title IX/SaVE Compliance Officer in coordination with the Human Resources staff will determine appropriate sanctions.
- The Title IX/SaVE Compliance Officer, or Human Resources staff (if applicable) shall, within two (2) business days, barring documented unforeseen circumstances, simultaneously and in writing inform the complainant and the accused of the sanction decision.
- Sanctions against student(s) determined by this process are subject to the Sanction Appeal Process by either the accused or complainant.

Investigation Findings Appeal

- If the complainant and/or the accused individual (s) disagree with the findings, in part or in totality, either the complainant or the accused may appeal the finding in part or in totality on the following bases:

- The accused and/or complainant wants consideration of new evidence, which was unavailable during the original investigation, that could be outcome determinative. A summary of this new evidence and its potential impact must be included;
 - The accused and/or complainant alleges that a material deviation from written procedures impacted the fairness of the process in a way that could be outcome determinative;
 - The accused and/or complainant challenges the assertion that the evidence presented during the investigation process was sufficient to find them responsible by a preponderance of the evidence; or,
 - The accused and/or complainant alleges bias by the investigator, Title IX/SaVE Compliance Officer or Director of Student Affairs which deprived the process of impartiality in a way that was outcome determinative.
- The accused and/or complainant has five (5) business days, barring documented unforeseen circumstances from the date of communication of findings, to present the formal appeal, in writing, to the Title IX/SaVE Compliance Officer.

The Provost may be contacted as follows:

Email: Jeremy.moreland@rockies.edu
 Mailing Address:
 Office of the Provost
 University of the Rockies
 1201 16th Street, Suite 200
 Denver, Colorado 80202

Investigation Finding: Appeal Process

- Upon receipt of either party's appeal of the findings, the Provost will acknowledge receipt of the notice within three (3) business days.
- The written appeal must state the basis for appeal and provide sufficient information that supports the grounds for appeal.
- The Provost or designee will review all cases presented for appeal within five (5) business days of the appeal, barring documented unforeseen circumstances, to determine if the presented

grounds for appeal and supporting information will be accepted or rejected.

- If the appeal does not meet the stated grounds for appeal, the appeal will be rejected. The Provost, shall, within two (2) business days of the determination, barring documented unforeseen circumstances, simultaneously and in writing, inform the complainant and the accused the appeal decision.
- If the Provost determines there is sufficient evidence to support an appeal, the matter will return to the Office of Student Grievance Resolution for further investigation unless the appeal alleges bias of the investigator which deprived the process of impartiality in a way that was outcome determinative or an assertion that the evidence was insufficient to meet the preponderance of the evidence standard. In those cases, the appeal will remain with the Provost or her designee for review and final decision.
- Whether the investigation goes to the Office of Student Grievance Resolution or remains with the President or their designee, the appeal investigation will be completed within fourteen (14) calendar days of submission to the Provost, barring documented unforeseen circumstances that may extend the appeal review.
- The Provost, and if applicable in coordination with Human Resources, will communicate the appeal findings simultaneously and in writing to the complainant and the accused.
- Additionally, the Provost will consult with the Title IX/SaVE Compliance Officer and Human Resources (when necessary) to consider the reversal of any remedial actions taken.

Additional Information for Sexual Misconduct/Harassment Investigations

- Amnesty Policy. University of the Rockies encourages the reporting of crimes by victims and/or witnesses. Sometimes, victims and/or witnesses are hesitant to report to University officials because they fear that by reporting an incident he/she may be accused of policy violations, such as underage drinking at the time of the incident. It is in the best interests of this community that as many victims and/or witnesses as possible choose to report to University officials. To encourage reporting, University of the Rockies pursues a policy of offering victims and/or witnesses of crimes immunity from policy violations related to the incident, as long as those

policy violations are not directly related to the crime itself. For example, if a student reported a rape in which he or she was involved as an accused individual, he or she would not be immune from policy violations.

- **Attempted Violations.** In most circumstances, University of the Rockies will treat attempts to commit Sexual Misconduct/Harassment as if those attempts had been completed.
- **False Reporting.** University of the Rockies will not tolerate intentional false reporting of incidents.
- **Group Actions.** When members of groups, individuals acting collusively, or members of an organization act in concert in violation of any policy, they may be held accountable as a group or individually, and may proceed against the group of jointly accused students, or individually, at the discretion of the University.
- **Right to Present Own Complaint or Use Proxy.** The alleged victim has the right to present his or her own complaint if he or she wants to, or to ask the University to stand as complainant in his or her place.
- **Sexual History.** Questioning or presenting of evidence about the complainant's prior sexual conduct with anyone other than the accused will be prohibited. Evidence of a prior consensual dating or sexual relationship between the parties by itself does not imply consent or preclude a finding of Sexual Misconduct/Harassment.
- **University as complainant.** As necessary, University of the Rockies reserves the right to initiate a complaint, to serve as complainant, and to initiate conduct proceedings without a formal complaint by the victim of Sexual Misconduct/Harassment.

Possible Sanctions and Protective Measures

Any student found responsible for violating the policy on Sexual Misconduct/Harassment may receive a sanction ranging from a verbal warning, probation, and suspension to expulsion/termination, depending on the severity of the incident, and taking into account any previous documented conduct issues. If the accused individual is an employee, sanctions will be determined by Title IX/SaVE Compliance Officer in consultation with Human Resources if applicable.

In order to protect the complainant, at any time during the investigation, the University may recommend short term, or interim, protections or remedies. These

remedial actions may include, but are not limited to, making the complainant aware of their rights, resources and support services, issuance of No Contact orders to separate or limit contact between the parties, modification of extracurricular, transportation, dining, working or living arrangements or course schedules, assignments or tests, increased monitoring, supervising, or security at applicable locations or activities, and/or interim suspension(s) pending investigation. These remedies or protections may apply in ground or online contexts.

Efforts will be made to minimize the burden on the complainant. Failure to comply with these interim protections may be considered a separate violation of this Policy.

Sanction Process

The Title IX/SaVE Compliance Officer will review all case information and determine appropriate sanctions within five (5) business days of notification of acceptance or determination on appeal barring documented unforeseen circumstances.

Sanction Appeal Process

Where either party, the accused or the complainant, disagrees with the sanction(s), either has five (5) business days from the date sanctions are communicated, barring documented unforeseen circumstances to present an appeal of the sanctions, in writing, to the Provost. The written request for appeal of the sanctions must state one or more of the five (5) basis for appeal (SEE BELOW), along with facts and information that support the grounds for appeal; and be accompanied by any relevant, new information or evidence that was not available during the investigation phase of the process. The Title IX/SaVE Compliance Officer will forward all case information to the Provost or designee who will make a determination as to whether there is sufficient evidence to support an appeal of sanctions on the basis of:

- The availability of new information, unavailable during the original investigation, that could be outcome determinative regarding sanctions;
- A potential material deviation from written procedures which impacted the fairness of the process in a way that was outcome determinative;
- The evidence presented during the investigation process may have been insufficient to find the individual responsible by a preponderance of the evidence; or,

- The potential of bias by the Title IX/SaVE Compliance Officer which may have deprived the process of impartiality in a way that was outcome determinative.
- A belief that a sanction(s) is substantially disproportionate to the severity of the offense.
- The sanction(s) appeal will be reviewed by the Provost within five (5) business days of the sanction appeal notice, barring documented unforeseen circumstances, to determine whether there are sufficient grounds for appeal.
- If the appeal of the sanctions does not state a ground for appeal or sufficiently meet the grounds for appeal, the appeal will be rejected by the Provost or designee and the decision to reject the appeal communicated to the Title IX/SaVE Compliance Officer and if applicable Human Resources.
- The Title IX/SaVE Compliance Officer and if applicable Human Resources, will simultaneously and in writing inform the complainant and the accused of the rejection of the appeal within seven (7) business days of the determination, barring documented unforeseen circumstances.
- The Title IX/SaVE Compliance Officer will impose all sanctions on the accused student for the violation. Human Resources in consultation with the Title IX/SaVE Compliance Officer will impose all sanctions on the accused employee. Once the sanctions are carried out, the case will be closed.
- If the Provost determines there are grounds for the sanction appeal, the Provost will review all information presented with the sanction appeal and make a final sanction determination within fourteen (14) calendar days of acceptance of the appeal of sanctions, barring documented circumstances that may extend the determination. The Provost will forward the determination to the Title IX/SaVE Compliance Officer.
- The Title IX/SaVE Compliance Officer and if applicable, Human Resources, will simultaneously and in writing inform the complainant and the accused of the appeal decision within seven (7) business days of the decision, barring documented unforeseen circumstances.
- The Title IX/SaVE Compliance Officer or designee, and if applicable, Human Resources, will impose all sanctions for the violation. Once the sanctions are carried out, the case will be closed.

Special Procedural Provisions for Sexual Misconduct Sanction Hearings

- Right to a Closed Hearing. The sanction hearing will be closed to the public, and only those who have a legitimate reason to be present will be permitted to be present.
- Advisor. The accused and complainant to sexual misconduct complaints have the right to the same opportunities to have others present during the sanctioning hearing, including the opportunity to be accompanied to any related meeting or proceeding by an advisor of their choice.
- Right to be Present for Sanctioning Proceeding. Each party has the right to be present during Student Community Standards Hearing.
- Nondisclosure Agreements. The University will not require a party to abide by a nondisclosure agreement, in writing or otherwise, that would prevent the re-disclosure of information related to the outcome of the proceeding.

Dispute Resolution Procedure for Student* Complaints

The University of the Rockies community benefits from a complaint resolution process that encourages the prompt and equitable resolution of complaints and concerns that students may have about the implementation of policies and procedures that govern the institution.

Who May File A Complaint: The Student Dispute Resolution Center (Center) addresses complaints filed by an individual student, alumnus, former student, prospective applicant, or applicant. The terms “student” and “complainant” are used interchangeably.

Complaints initiated by attorneys on behalf of students will begin at Step III below.

No Reprisal: Students will not be subjected to reprisal or retaliation for using or participating in the Dispute Resolution Procedure.

Issues Eligible for Review: Issues eligible for review by the Center include, but are not limited to, implementation of policies and procedures that govern the institution, issues concerning transcripts, transfer credit, technology, financial aid and other finance options (excluding Employee Tuition Benefit), online classroom issues, course scheduling, personal hardship matters, student accounts, military education benefits matters, disability-related matters, and advising.

Issues Not Eligible for Review: Issues not eligible for review by the Center include grade appeal, instructor performance, challenge of course content, transfer credit appeal, appeal of satisfactory academic progress, appeal of dismissal, and appeal of *Student Community Standards Committee* findings.

*The Dispute Resolution Procedure may only be used for these issues if the challenge relates to allegations of bias or discrimination. **Otherwise, appeals of those matters should follow the procedures outlined elsewhere in this Catalog.***

Allegations of sexual harassment, violence, or discrimination will be addressed according to the section entitled *Nondiscrimination or Sexual Misconduct/Harassment Policy* in this *Catalog*.

Dispute Resolution Procedure

Step I: Departmental Resolution

Students should address the complaint or concern at the departmental level with the individual involved in the complaint (e.g., Advisor, Collections Specialist, Faculty Support and Development Associate, Instructor, Manager, etc.). If satisfactory resolution is not reached after discussion with the individual, or if it is impracticable to address the problem or complaint with the individual, the student should contact the individual's direct supervisor to attempt to resolve the complaint. If the student's concerns remain unresolved the student should proceed to filing a complaint with the Center.

How to File a Complaint

An individual student, alumnus, former student, prospective applicant, or applicant ("student" or "complainant") may file a complaint with the Center by

completing the Student Dispute Resolution Center Submission Form found at www.rockies.edu/resources/sdrc.htm. Students are encouraged to begin the Dispute Resolution Process within thirty (30) calendar days of the incident prompting the complaint or from the date of knowledge of the incident prompting the complaint.

Upon receipt of the *Student Dispute Resolution Center Submission Form*, the Center will review the complaint to determine if it is eligible to be addressed through the *Dispute Resolution Procedure* and to ensure the required information is included so the complaint can be appropriately assigned. Complaints alleging discrimination or bias may at any time proceed directly to Step II: Grievance Resolution.

If the complaint is eligible for review by the Center, and all required information has been submitted, the complaint will be assigned to a case handler within three (3) business days of receipt of the complaint.

If the complaint is not eligible for review by the Center (see above for "Issues Eligible for Review"), the complainant will be notified by the Center within three (3) business days of receipt of the complaint. The Center will attempt to direct the complainant to the appropriate resource(s) for addressing his or her concern(s).

If the required information has not been submitted with the complaint form, a representative from the Student Dispute Resolution Center will inform the complainant in writing of the missing information. The complainant will be provided a reasonable amount of time, based on the circumstances and outstanding required information, to submit the missing information for the complaint. If the complainant does not submit the additional required information, the complaint will not be processed. Once the required information has been submitted, the complaint will be assigned to a case handler within three (3) business days of receipt of the required information.

Step II: Grievance Resolution

During Step II, the case handler will investigate the dispute, evaluate the findings, and issue a written response. The case handler will adequately, reliably, and impartially investigate the complaint.

Investigation

During the investigation phase, the case handler will contact the student and others, including all witnesses* identified by either complainant or respondent who are likely to have knowledge relevant to the allegation, to discuss the student's concerns. The student's participation in the process is essential, and the case handler may speak with the student several times during the investigation stage. Students should be prepared to speak with the case handler and to provide any additional relevant information the case handler might request. Failure to provide the requested information may delay or preclude a thorough investigation.

*The case handler should document all efforts to contact relevant witness(es). If the case handler is unable to contact a relevant witness, the attempts to contact the witness and the reasons such attempts were unsuccessful must be thoroughly documented by the investigator.

Evaluation and Response

The Step II grievance investigation findings will be evaluated and decided upon through a collaborative process. That process may involve the following representatives or their designees: an Executive Dean, University Provost, Vice President of Financial Aid & Services, Vice President of Student Services, Vice President of Student Affairs. As necessary, the case handler will present the investigation findings and the student's requested resolution to those designated with decision-making authority.

For complaints alleging bias or discrimination, the case handler will present the investigation findings, along with all evidence submitted or identified by the complainant or respondent, to the aforementioned representatives or their designees. A deliberating body will be comprised of those with decision-making authority and will be available to review and complete deliberations in a timely manner. Complaints alleging bias and discrimination must be concluded within fifteen (15) days following the completion of the investigation.

The Step II process will be completed within thirty (30) business days following receipt of the complaint. If additional time is needed for the investigation, evaluation, or response, the student will be notified.

The response will be issued to the student and/or his/her representative via U.S. Mail or e-mail.

Per Step III below, a student may appeal the University's response to the Step II grievance. Unless a student articulates a permissible ground for appeal, the response at Step II is final.

If for any reason there is a delay in any of the timelines referenced above, the reasons for the delay must be thoroughly documented.

Step III: Presidential Appeal of Step II

Timeline for Filing an Appeal

The student should file the appeal within ten (10) business days of the date of the University's response.

Students may appeal the findings of the response at Step II only on the following grounds:

- To consider new evidence that was unavailable during the original investigation that could be outcome determinative;
- To assess whether a material deviation from written procedures impacted the fairness of the process in a way that could be outcome determinative;
- To challenge if the findings of the investigation do not accord with the preponderance of the evidence; or
- To assess whether bias of the investigator deprived the process of impartiality in a way that could be outcome determinative.

How to File an Appeal

The student should set forth in writing at least one of the above grounds for appeal with the information that supports the ground(s) for appeal. The written appeal shall be sent to grievanceappeal@rockies.edu.

Students in the State of Georgia may appeal the final decision to:

Georgia Nonpublic Postsecondary Education
Commission
2082 East Exchange Place, Suite 220
Tucker, GA 30084-5305
(770) 414-3300
www.gnpec.org

Appeal Process

Phase One: Review and Evaluation

Within three (3) business days of receipt of the appeal, the University will review the appeal to ensure that:

- It states one or more of the four (4) grounds for appeal; and
- It is accompanied by information that supports the ground(s) for appeal, including but not limited to any relevant newly available information or evidence that was not available during Step II.

If the appeal does not state a ground for appeal and include new information or evidence to evaluate, the complainant will be notified via e-mail that the appeal is ineligible for processing and that no action will be taken on the appeal. The complainant will be given three (3) business days** to amend and cure the appeal. The amended appeal should be sent to dispute.resolution@rockies.edu.

If the amended appeal meets the threshold it will proceed to Phase Two.

Phase Two: Evaluation and Determination

The President, or designee, will render a written decision on the appeal within ten (10) business days** from the date the appeal was accepted for processing. The President, or designee, will use the preponderance of the evidence standard (more likely than not) of review to make a determination on the appeal of the Step II outcome. The President's determination shall be final.

Additional Resources

University of the Rockies values its students and has created multiple avenues to bring forth concerns. In addition to the previously described complaint procedures, at any time, a student may select to notify the University of a concern using the confidential, third-party alert hotline, www.rockiesstudentcomplaints.alertline.com or (855) 274-5531.

**The terms "student" and "complainant" are used interchangeably and refer to an individual student,*

alumnus, former student, prospective applicant, or applicant.

***Business day is defined to mean normal operating hours, Monday through Friday, excluding recognized University holidays.*

Complaints to Accrediting Bodies and State Agencies:

Students may file a complaint with the University's institutional accrediting body by contacting The Higher Learning Commission, North Central Association, www.ncahlc.org.

The Colorado Department of Higher Education is the portal agency for the State Authorization Reciprocity Agreement and has the authority and responsibility to resolve student and other complaints. In the event that institutional processes do not result in a successful resolution of your complaint, please contact the SARA Portal Agency of Colorado is responsible for final resolution of the complaint (<http://higher.ed.colorado.gov/Academics/Complaints/>).

Students who are residents of Wisconsin can contact the State of Wisconsin Educational Approval Board at (608) 266-1996 in the event student complaints are not satisfactorily resolved with the school.

Student Body Diversity

University of the Rockies provides the following information regarding its student body. The information is based on data reporting in the IPEDS Fall 2015 Enrollment Survey.*

Gender:

Male 28%
Female 72%

Race/Ethnicity:

American Indian or Alaska Native 1%
Asian 1%
Black or African American 31%
Native Hawaiian or Other Pacific Islander 0%
Hispanic/Latino 10%
White 49%
Two or more races 3%
Nonresident alien 0%
Race/ethnicity unknown 5%
Source: Institutional Research Services, 2016.

*Pell Grant percentage is not included since graduate students are not eligible.

Enrollment and Graduate Statistics

Please reference <http://nces.ed.gov/collegenavigator/?q=university+of+the+Rockies&s=all&id=441308#programs> for information on our graduation rates.

Alumni Employment Information

Please refer to the University of the Rockies website for information regarding University of the Rockies Alumni employment statistics at http://www.rockies.edu/alumni_statistics. Alumni Statistics include types of employment obtained by University of the Rockies graduates and employment rates.

Section Three: Student Support, Health, and Safety

One of the Core Values of University of the Rockies is Service. This value means that the University cares about the well-being of students and the community. For students, the University provides high quality services which support the University mission and academic programs. Our faculty and staff are committed to the institution's educational programs, personalized services, and reliable levels of support to meet the needs of our students in an exceptional manner. In this section, you will find information about many of the resources, tools, and supports in place to demonstrate our commitment to student success. Information on relevant health, wellness, and safety issues is also included in this section.

Accessibility for Students with Disabilities

Use of Mobility Devices

University of the Rockies will maintain facilities accessible to persons with disabilities in compliance with the Americans with Disabilities Act, as amended. Individuals with disabilities who utilize powerdriven mobility devices, (e.g., any mobility device powered by batteries, fuel, or other engines—whether or not designed primarily for use by individuals with mobility disabilities—that is used by individuals with mobility disabilities for the purpose of locomotion, including golf carts, electronic personal assistance mobility devices (EPAMDs), such as the Segway® PT) may do so within University facilities only when operation of such mobility devices does not pose a substantial risk of harm to students, faculty, staff, or visitors to the campus. Use of power driven mobility devices for the purpose of ambulation between University facilities is permitted. Storage of power driven mobility devices within University facilities should not impede the path of travel for pedestrian traffic areas. Responsibility for the securing of power driven mobility devices resides with the user. The University does not accept responsibility for damage, loss, or theft of property stored on its premises.

Use of Service Animals

Service animals, performing a specific task for an individual with a documented disability, are welcome in all University facilities and in all activities of the University. If it is not readily apparent that an animal is a service animal, or the service animal does not have visually identifiable apparel, apparatus, or other evidence that the animal is a service animal, faculty and staff may ask to confirm that the animal is a service animal.

A service animal, as defined by the Americans with Disabilities Act (ADA), is a guide dog, signal dog, or other animal individually trained to do work or perform tasks in support of a person with a disability. An animal whose sole function is emotional support does not qualify under this definition.

Students and visitors to the University are responsible for the care and supervision of the service animal while on University premises or while engaged in University activities. Care includes but is not limited to, feeding, toileting, and hygiene.

Advising

Course planning is ultimately the student's responsibility; however, students are encouraged to contact their Student Advisor (online) or Registrar Advising Specialist (Campus) should they have questions concerning program requirements, attendance, progress toward or eligibility for graduation, or access to support services. Students seeking advice on academic issues should contact their instructor or designee (campus) or Student Advisor (online).

Registrar's Office

The Registrar's Office is responsible for a range of services available to University of the Rockies students. These services include providing guidance in the admissions, enrollment, and registration processes, maintaining student records, and providing transcripts. The Registrar's Office, in conjunction with the Provost or designee, assures that the academic program requirements and the needs of students are met and that students can access all support services.

The Registrar's Office works closely with members of the admissions, academic, and student services departments to facilitate inclusive student recruitment and retention efforts in compliance with regulatory

requirements. This office collects, records, maintains and reports all student records within FERPA guidelines (e.g., grades, registration information, transcripts, and student academic progress). The Registrar's Office determines student admissibility by requesting and evaluating all necessary student transcripts to determine applicability to programs. Program change requests, name changes, official transcript requests, and graduation functions are all handled by the Registrar's Office. Students in need of these services should contact the Registrar's Office for more information.

Resources and Services

University of the Rockies has a commitment to the educational goals of its diverse student population and thus provides a wide range of student-centered resources and services. Some of the following services may be limited to University of the Rockies students who are attending the campus. For additional support or for more information on the resources and services available to University of the Rockies students, check out the University website, www.rockies.edu, or contact your Student Advisor (online) or Registrar Advising Specialist (campus).

Online Academic Catalog

University of the Rockies provides an online version of this printed *Academic Catalog*. The *Online Academic Catalog* is an up-to-date, live version of this printed *Academic Catalog*, and includes all published Catalog Supplement updates. The *Academic Catalog* and *Catalog Supplement* are provided as PDF (Adobe® portable document format) files at www.rockies.edu/catalog-download and include effective publication dates and dates for policy and program changes. Due to expected, periodic updates to this printed *Academic Catalog*, please use the *Online Academic Catalog* at www.rockies.edu/catalog to access the most current policies, procedures, programs, and course information.

Website

University of the Rockies' website, www.rockies.edu, provides students with up-to-date information about degree programs, admissions, financial services, military education benefits, and much more.

Online Bookstore

All students can obtain the required book list for their classes through University of the Rockies' online bookstore. In addition, the online bookstore provides a convenient place to purchase textbooks. Students utilizing the online bookstore have the option to rent or purchase new or used books online and have the books delivered in a timely fashion. To access the online bookstore, visit the University of the Rockies website, www.rockies.edu. Students may purchase books through other vendors, but are responsible for ensuring that they acquire the correct version as outlined in the required book list.

Course Digital Materials System (Constellation™)

The Course Digital Materials System, which is known as Constellation™, is designed to help students master the instructional goals of University of the Rockies degree programs. These custom course digital materials (CDM) are created specifically to support University of the Rockies' curriculum. Course materials include essential readings, audio and video assets, interactive exercises, and other digital supplements. These materials may be displayed on a browser-based Constellation™ Reader or on a number of devices, such as the iPhone, Kindle, and Blackberry.

Students may read their materials online or download and save them to their hard drive. However, students may also want to download their materials to other devices, such as the iPhone or Kindle. Still others will want to save their materials on a thumb drive or print the materials. Constellation™ does not include restrictions on file storage or print functions. Full functionality of Constellation™ is best experienced with the included reader. The Constellation™ Reader will allow students to highlight material in a variety of colors, create notes, and make bookmarks. While the reader offers robust functionality, students will be able to access, download, and print their learning materials in accordance with their preferences. Students will lose access to any course digital materials approximately 60 days after the end of their course or their withdrawal date, unless they have downloaded the material to an external device or hard drive.

New Student Orientation

Prior to each term, new ground students attend an orientation designed to assist them in achieving success at University of the Rockies. The orientation is an exciting experience that allows students to begin new friendships and includes a dinner, a tour of the facilities, and information sessions with faculty, and administrative staff. New Student Orientation covers University policies and procedures along with helpful information to assist new students in successfully navigating their degree program and preparing for in-class and out-of-classroom experiences.

Library

The University of the Rockies Library provides 24/7 access to a variety of electronic databases and resources that include scholarly and peer reviewed journals, magazine articles, ebooks, videos, newspaper articles, book reviews, dissertations, conference papers, government reports, and more. These online databases/resources are available on the library's web page, which is accessible through the Student Portal or the online classroom.

The University of the Rockies has a physical library located at the Denver Campus in the Tabor Center overlooking the 16th street mall. This library provides access to print books, handouts, reference material, special collections, and the online public access catalog (OPAC) which contains records for all of our books, ebooks, and videos. The library also provides students a place to study, read, write, and research.

The library also provides computers for student use. Each computer is equipped with MS Office and Internet access. Select computers contain specialized programs such as various assessment-scoring programs and Dragon Speak, used for reading from text and writing from audio. The library also houses an extensive testing material collection, which includes protocols, manuals, and test kits.

Instructional aides for resources and services are available on the library's web page. These aides include: information on copyright and plagiarism, tip sheets for searching the databases, links to useful websites, information resources, and more. Some of the services available to you include assistance from librarians, one-on-one sessions, and interlibrary loan services which allow you to obtain articles and other documents that are not currently in the University Library's electronic or print collections.

Contact Information

The library staff is available for research assistance by email or telephone. You can reach the library staff at 800.901.3360 (toll free) or at uorlibrary@rockies.edu. Students can also access the 24/7 Ask-a-Librarian chat service on the library's website.

SMARTLab: A Statistics Primer

University of the Rockies maintains SMARTLab, an online statistics primer, designed to help prepare students for success in research courses. This resource does not cover all concepts or skills needed for these courses, and is not intended to substitute for a full introductory statistics course. SMARTLab is a compilation of interactive web-based course materials and activities focused on basic statistics. SMARTLab was specifically designed for students who have never taken a statistics course, or who need a refresher before embarking on their graduate studies. It is also useful as a reference for students while they are conducting background research, designing research studies, and/or writing dissertations.

Writing Center

University of the Rockies Writing Center (RWC) is an online Writing Center housed within a familiar online classroom format. On-ground and online students are enrolled in the RWC automatically and perpetually, and the RWC will appear as a course in the student's learning platform home page. The RWC provides several resources for improving academic writing skills. There is an automated tool that teaches students how to develop well-crafted thesis statements, paragraphs, and outlines for essays. The Live Chat and paper review features provides one-on-one writing support, including individual feedback, a revision plan or a road map for improvement. The Center also contains a section on APA formatting requirements, sample papers, grammar guides, and punctuation rule handouts for printing and quick reference.

In addition, the Rockies Writing Center includes a link to Smarthinking, an outsourced tutoring service. With *Smarthinking*, students can chat with an online tutor up to 24 hours a day, 7 days a week. Students can submit completed drafts of written assignments from any course to *Smarthinking's Essay Center* for a tutor to review. The tutor will provide detailed feedback on written assignments, typically

within 24 hours. Each student is allotted five hours of tutoring services per year.

Bulletin Boards

Bulletin boards are located in the Denver Campus for students who wish to post a notice to trade, sell, or purchase used textbooks.

All student materials to be posted or displayed on any other bulletin boards must be first approved by the Director of Student Affairs and Strategy (studentaffairs@rockies.edu) or a designee from the Students Affairs department. The displayed post must include a date stamp showing when approval was granted by the Director of Student Affairs and Strategy or designee.

No more than one copy of an item may be posted on any one bulletin board, and no student posters may be placed on the official University bulletin board. Faculty may not post academic information without approval from the Provost or designee.

Posting advertising events occurring in the University facilities may not be approved unless the event has been previously scheduled and confirmed. Advertising for an event may not include information or pictures indicating that alcohol will be served.

Posted materials should be professional in appearance. Posters and flyers must include the following information:

1. Student organization, department, or faculty member sponsoring event;
2. Event name, date, time, and location; and
3. Sponsor contact information.

Student postings written in a foreign language must have a translation on file with the Students Affairs department. The displayed foreign language posting must include a date stamp showing when approval was granted by either the Director of Student Affairs and Strategy or designee.

Posters and flyers should not be larger than 8 ½" x 11" because of the limited amount of posting space available. Posters and flyers may be placed only on available bulletin boards.

The following are strictly prohibited under the posting policy:

- materials which are profane, derogatory, sexist, or racist;
- materials displaying, promoting, or implying drug or alcohol consumption;
- postings for political candidates or issues external to University of the Rockies; and
- postings or handbills advertising unofficial off-campus parties (such parties are prohibited unless special permission has been granted).

The Director of Student Affairs and Strategy or designee reserves the right to refuse permission to post any materials that do not meet the previously listed requirements and are not deemed appropriate. Beyond the aforementioned restrictions, freedom of speech and expression are encouraged and respected.

Distribution of Printed Materials

Distribution of printed materials and publications at University of the Rockies is normally limited to University materials and publications. Placing materials and information on vehicle windshields is not allowed. If a student wishes to publicize a service, event, or activity, he or she should refer to the bulletin board policy previously mentioned. Students may contact the Office of Student Affairs with any further questions regarding the distribution of printed materials.

Copy Machines

Copy machines at the Denver Campus are located near the study rooms and in the library. Students, faculty, and staff are advised to contact IT Support in order to be issued an access code to these machines. A copy fee may be assessed. Users are responsible for ensuring that any copies made fall within the guidelines of the Fair Use Doctrine of U.S. Copyright Law.

Please refer to the *Student Rights and Responsibilities* section in this *Catalog* for information on *Violation of Federal Copyright Laws*.

Lost and Found

Lost and Found items are maintained in the Library. Items will be disposed of if they are not claimed within 60 days.

Facility Use

Any requests for scheduling the use of classrooms or other facilities by students or faculty at University of the Rockies must be submitted to the Academic Operations Supervisor. Use of facilities by non-University organizations requires the approval of the Director of Student Affairs and Strategy.

Parking

Denver Campus

Conveniently located in downtown Denver on the 16th Street Mall, University of the Rockies Denver Campus is easily accessible to students through public transportation. Students are encouraged to use RTD light rail and bus transportation options. In addition, several parking lots are located within walking distance of the University.

Graduate Student Association (GSA)

Students actively enrolled in degree programs at University of the Rockies may participate in the life and direction of the University through membership in the Graduate Student Association. The Career and Alumni Services Specialist is the liaison to the GSA. The Graduate Student Association develops its own bylaws, is an advocate for students, and acts, through its elected Executive Committee, as the agent of the student body in matters affecting student life and affairs.

Honor Societies

Top performing students are recognized for their academic achievement through invitation and participation in Golden Key and SALUTE honor societies.

The Golden Key International Honour Society was founded on November 29, 1977, to recognize academic excellence and encourage scholastic achievement among college students across all academic disciplines. Golden Key is the world's premier collegiate honor society connecting members

locally, regionally, and globally with lifetime opportunity, reward, and success. Golden Key keeps active membership in many National Organizations including Student Affairs Administrators in Higher Education (NASPA), ACHS Association of College Honor Societies (ACHS), National Scholarship Providers Association (NSPA), American Association of Collegiate Registrars and Admissions Officers (AACRAO), National Association of Graduate Admissions Professionals (NAGAP), Direct Marketing Association (DMA), and National Collegiate Honors Council (NCHC).

SALUTE stands for Service, Academics, Leadership, Unity, Tribute, and Excellence. In 2009, the SALUTE Veterans National Honor Society was established by Colorado State University through a grant from ACE/WalMart Foundation Success for Veterans. . SALUTE is the first honor society created for student veterans and military service members attending institutions of higher education nationwide. SALUTE was chartered at University of the Rockies in August 2011.

Honor society members have access to resources and opportunities such as networking, professional development, and scholarship programs. Students should contact the Office of Student Affairs at studentaffairs@rockies.edu for further information about honor societies.

Alumni Services

As a University of Rockies graduate, you have the opportunity to continue your involvement with the community, and stay connected with other alumni, students, faculty, and staff.

Graduates of University of the Rockies receive automatic membership into the University's Alumni Association. As part of the Alumni Association, graduates can become Alumni Ambassadors to support and encourage prospective and current students by offering personal testimony about their academic experience. Alumni are encouraged to participate in University events throughout the community. For more information, please contact Alumni Services at alumni@rockies.edu.

Career Services

The mission of University of the Rockies' Office of Career Services is to prepare students and alumni to be successful and ethical global citizens. Career

Services provides resources related to career exploration, job-seeking techniques, and resources necessary for current students and alumni to foster their ongoing professional development.

Career Services also offers individualized career planning assistance to all students and alumni. Students' seeking assistance may visit the career services webpage at www.rockies.edu/resources/career_services.

Students and alumni needing additional assistance may email a rough draft of their résumé, a summary of their work and educational background, and a brief note explaining how Career Services can be helpful to them as they develop a career plan to careerservices@rockies.edu.

Limitations Regarding Career Services

Certain positions presented on the career services webpage of University of the Rockies may include licensure or certification as a prerequisite to employment. Licensure requirements vary by state, and in some cases may not be met by completion of a degree program at University of the Rockies, as they may require separate application or testing. It is the sole responsibility of the student or alumnus to perform his or her own careful background research when seeking licensure or certification in any state.

University of the Rockies does not guarantee employment to any applicant as a result of his or her application, acceptance, attendance, or graduation in any program. University of the Rockies does not verify the content of job postings that are presented on the University website, and therefore makes no representations or guarantees about the accuracy of positions or contact information listed. University of the Rockies is not responsible for consequences that may follow from application to jobs listed on the University website. The inclusion of an employer's job posting on this site shall not be construed as an endorsement of the employer (or of any religious or political point of view promoted by the employer) by University of the Rockies or any of its affiliates, and does not constitute a guarantee that a job is available with a given employer.

It is the responsibility of the student or alumnus to perform his or her own careful background research when selecting a position, evaluating an employer, interviewing for, or accepting any position. It is the sole

responsibility of the student or alumnus to obtain or confirm any necessary information concerning an employer. University of the Rockies is in no way responsible for the safety, wages, working conditions, or other aspects of employment.

University of the Rockies' website also contains links to other websites as a convenience for its users and is not responsible for the contents of any linked site. Anyone who discovers misuse or abuse of this website is encouraged to report the matter to Career Services, either in person or via careerservices@rockies.edu.

Career Services abides by the principles of professional conduct set forth by the National Association of Colleges and Employers (NACE).

The University's programs and services are designed to prepare students and graduates to pursue employment in their field of study or related field; however, the University does not guarantee that students or graduates will be placed in any particular position or employment. Any statistics referenced on the University website and attributed to a source other than University of the Rockies have not been independently verified by University of the Rockies.

Employment Services

University of the Rockies does not guarantee employment to any applicant as a condition of his or her application, acceptance, or attendance in any program. University of the Rockies does not promote employment services or make student referrals to prospective employers based on direct contact with the employer regarding current job openings to any student attending University of the Rockies online or On-ground programs.

HEALTH INFORMATION

Drug Free Schools and Communities Act Program

Students may obtain information on the unlawful possession, use, or distribution of alcohol and illicit drugs, as well as the University's standards of conduct, health risks associated with the use of illicit drugs and alcohol abuse, resources for obtaining assistance with

drug and alcohol abuse (including counseling, treatment, and rehabilitation programs), University disciplinary actions, and legal sanctions for violations of federal, state, and local law by viewing the current Drug Free Schools and Communities Act Program Report, located on the University of the Rockies website at www.rockies.edu/DFSCA.

Health and Wellness Requirements

The University does not require any proof of vaccination as a condition of enrollment. Students are encouraged to speak to a physician for information on recommended immunizations.

Use of Tobacco/Marijuana Products

The facilities of University of the Rockies are smoke and tobacco free. No smoking, chewing, or dipping is allowed inside any University facility. University of the Rockies policy applies to all forms of tobacco and marijuana, including but not limited to paraphernalia, cigarettes, cigars, shisha, pipes, water pipes (hookah), electronic cigarettes, and all forms of smokeless tobacco and marijuana including, but not limited to chew, edibles, snus, snuff, sticks, strips, and orbs.

Alcohol and Drug Prevention Programs

The University provides services related to drug and alcohol use and abuse including the dissemination of informational materials, education programs, referrals, and disciplinary actions

These include:

- Alcohol and Drug Education: Office of Student Access and Wellness, Employee Assistance Program
- Counseling Referrals: Office of Student Access and Wellness, Employee Assistance Program
- University Disciplinary Actions: Office of Student Affairs, Human Resources

Counseling, Treatment, and Rehabilitation Programs

The following national toll-free telephone numbers are provided to assist any member of the University who may require assistance in dealing with a drug or alcohol problems, crisis situations, domestic violence, or other issues.

Ground Operations Closure Due to Inclement Weather Policy

Under extreme weather conditions, the University may alter the operating hours for the on ground locations. It is the intent of the University to maintain operations. Unless travel conditions are deemed excessively unsafe, we will strive to remain open and operational during posted hours of operation.

The safety and well-being of faculty, students, and staff are the top priority of the institution. In accordance with institutional policies and guidelines, select members of University senior leadership are authorized to make and announce decisions regarding weather-related closure or delays, and only those communication channels detailed below should be considered official sources for such announcements. Faculty, administrative staff, or students are not authorized to make, or otherwise announce such decisions.

Given travel locations and related conditions will be different among students, students may reserve the right to judge the conditions surrounding their own travel during inclement weather. Should a student consider conditions unsafe and not attend, they are obligated to follow established institutional guidelines and policies, or be accountable to potential penalties and restrictions for any absence in order to assure adherence to appropriate standards for compliance, accreditation, and/or applicable regulatory guidelines.

The determination is made after consideration of all available information, including:

- Weather reports, forecasts, and warnings from the National Weather Service;
- Road conditions in and around Denver, and
- Delays, closures, or non-closures of other schools and military bases in the vicinity of on-ground operations for the University.

Students are encouraged to check the Channel9 News website (9News.com) on a regular basis for school

closure information. Also, the SendWordNow alert will be used to send messages, including updates, directly to those actively enrolled students registered as users of this system.

Notice of a delayed opening or closure will normally occur before 6:00 am. Notice of an early closing will normally occur between 3:00 to 4:00 pm.

In the event of a closure, class session(s) will be made up within one week. The instructor will work with students and will notify the Registrar's Office of the date and time of the rescheduled class session.

In-Residence Workshops

In the event that extreme weather conditions require the Denver campus to close on a Fridays during which In-Residence workshops are scheduled, the University will notify Channel9 News. In addition, the University will notify the faculty and students affected that classes have been canceled and will be rescheduled at a later date.

Campus Security and Safety

The University of the Rockies Annual Campus Security and Safety Reports are available for your review. These reports are required by federal law and contain policy statements and crime statistics compiled by the University. The policy statements address the University's policies, procedures, and programs concerning safety and security, such as contact information for emergencies or reporting crimes, tips to reduce the risk of sexual assault and misconduct, policies for responding to emergency situations, etc.

Statistics for the previous three calendar years are included for certain types of crimes that were reported to have occurred:

- on the campus; or
- on public property within or immediately adjacent to and accessible from the campus or site location.

To request a paper copy of the reports, please contact studentaffairs@rockies.edu and a copy will be mailed to you. Or you may access them online at <http://www.rockies.edu/campus-safety.htm>.

Student ID or Access Card

For security purposes, access to the various building locations and activities of University of the Rockies is by Student ID or access card. Each student, faculty member, and staff person will be issued a Student ID or access card by the Security. University-issued Student ID cards must be available while students are on University premises. Students may be asked to show their ID by faculty, staff or security personnel for the purposes of identification. If a Student ID or access card is lost or stolen, it must be reported immediately and no later than 24 hours after the loss.

Section Four: Tuition, Fees, and Financial Aid

CONTACT INFORMATION FOR FINANCIAL SERVICES

University of the Rockies is committed to helping students understand and manage the financial aspects of obtaining their education.

Denver Campus and Colorado Springs Location

For questions regarding tuition, fees, and payment options for programs delivered at the Denver Campus, students should contact the Denver Campus Financial Aid Office. Financial Aid Office, 1201 16th Street, Suite 200, Denver, CO 80202; 866-621-0124; dis.financialaid@rockies.edu.

For cost of attendance information for Non-Standard Term Delivery Format and Non-Term Delivery Format programs, please visit www.rockies.edu/admissions/dis_cost.

Online

For questions regarding tuition, fees, and payment options for programs delivered online, students should contact their assigned Student Advisor. Financial Services Office, 1201 16th Street, Suite 200, Denver, CO 80202; (866) 621-0124 opt. 3; FinServices@rockies.edu.

For cost of attendance information for Non-Term Delivery Format (Online) programs, please visit www.rockies.edu/admissions/online_cost.

Tuition and Fees

Tuition and fees are due in full for all students on or before the first week of each course. An exception may be made for students who have completed all required federal financial aid paperwork prior to the start of the term and whose federal financial aid is significant enough to cover all current term charges. There will also be a limited exception for those students using specific payment methods. For additional information, please see *Payment Options* in this section of the *Catalog*. The student is responsible for any amount that their financial aid or third party payments do not cover and it must be paid in full on or before the first week of each course.

Acceptable forms of payment are cash, personal check, money order, or credit card (Visa, MasterCard, Discover, or American Express). University of the Rockies will withhold transcripts, degree verifications, and diplomas until accounts are paid in full.

Terms of Billing and Payment

Tuition and fees are billed on a federal financial aid payment period basis, regardless of payment option. All programs in the School of Organizational Leadership and the School of Social, Human, and Educational Development offered at the Denver Campus and all programs offered Online operate in a “non-term” format. In the non-term format, students typically take one class at a time. Classes are 6 weeks or 9 weeks in length. In the non-term format, a payment period is generally defined by the University as a minimum of 18 weeks of instructional time and 9 successfully completed/earned credits (typically 3 courses at a time) or 2 credits of dissertation courses or 3 credits of practicum. An exception to this may occur during the student’s final academic year if fewer weeks and credits are needed.

All programs in the School of Professional Psychology offered at the Denver Campus and all programs offered in Colorado Springs operate in a “non-standard term” format. In the non-standard term format, students typically take 2 classes at a time. Each term is nine weeks in length. Payment periods align with enrollment terms.

Tuition is due according to the terms and conditions of a student’s selected Payment Option. See the section on *Payment Options* for more information. Charges are estimated for each payment period and may change up to the course start date.

Non-Standard Term Delivery Format (Denver)

Master of Arts in Counseling – All Specializations

Master of Arts in Psychology - Career Management & Counseling, General Psychology, Sport & Performance Psychology Specializations

Doctor of Psychology, Clinical Specialization

The following is a list of tuition and fees applicable to programs and/or courses offered in the non-standard-term delivery format, effective April 1, 2016. Tuition rates and fees may change at any time without prior notice; however, students will not be charged retroactively for tuition and fee increases for coursework already completed or for coursework the students were in the process of completing. Indirect costs which are not billed directly by the University may be found at [:http://www.rockies.edu/admissions/dis_cost](http://www.rockies.edu/admissions/dis_cost).

Students are responsible for additional dissertation bindings.	
Dissertation Support Fee^ (per ORG/PSY 8991 credit)	\$500.00
Graduation Fee***	
Master's	\$250.00
Doctoral	\$500.00
Replacement/Duplicate Diploma Fee	\$45.00
Transcripts (electronic)****	\$6.00
Transcripts (paper) ****	\$8.00
One Internship Application Transcript	No Charge
Copies of Education Records (per page)	\$0.50
Miller Analogies Test (MAT)^	\$65.00

+ Required course materials may be updated on a periodic basis. Students retaking courses may find it necessary to purchase updated materials in order to meet course requirements. For courses where course

digital materials are provided in lieu of textbooks, **a \$75.00 fee (CDM fee) is applied for each individual CDM** directly to the student's account concurrent with the charge for tuition. Students are not charged the CDM fee for repeated coursework if previously charged. The fee is fully refundable if the student does not post attendance beyond the first week of the course.

++ This non-refundable fee is a requirement for students taking Non-Standard Term Delivery Format programs at the Denver Campus. Students will receive a CollegePass from the Regional Transportation District (RTD) allowing access to receive free Local, Limited, Express, and Regional bus service, light rail service in all fare zones, and free SkyRide bus service to DIA. CollegePass is not valid on special services, including but not limited to Access-a-Ride, BroncosRide, BuffRide, RockiesRide, RunRide, Saturday Shopper, and SeniorRide. Active duty military are exempt from the transportation fee and will not be issued a CollegePass. Active duty military who wear appropriate Class A or Class B uniforms at the time of boarding or display an Active Duty military ID card receive complimentary RTD access. Please note: Students in Internship or dissertation courses only are exempt from the Transportation Fee.

*Students in Internship or dissertation courses only are exempt from the Technology Fee.

**Doctoral students (excluding Doctor of Psychology, Clinical Specialization students) have an In-Residence Workshop Requirement. The In-Residence Workshop Fee is a fee which is applied to the student's account at the time the Workshop is scheduled for attendance. The scheduling of the Workshops must be prompted by the student at the prescribed points in time throughout the program. Graduation requirements for these programs include three In-Residence Workshops, with an optional fourth In-Residence Workshop should a student feel they need additional guidance in research application (additional \$500 fee). The fee covers continued administrative support throughout the In-Residence Workshop process. This fee is fully refundable if the workshop is unattended or unscheduled before the scheduled date. After this time, the fee becomes nonrefundable. *This fee is not covered by the VA utilizing your VA Educational Benefits.*

*** The graduation fee is a one-time non-refundable fee that covers the administrative review, evaluation of your file, and processing of your petition to graduate form. The fee is assessed to student accounts at the

time the Petition to Graduate is submitted. It is the student's responsibility to submit payment for this fee on or near the time the Petition to Graduate is submitted. The Graduation Fee can be deducted from a student's Financial Aid disbursement if he or she has granted authorization on the Credit Authorization form. For students utilizing Military Educational Benefits, the graduation fee may be covered by the benefit payment.

****Unofficial transcripts are available to students via the Student Portal at no cost. Transcripts (both unofficial and official) may not be viewed or released if a transcript hold is in place.

^ The Dissertation Support Fee is assessed per credit of Dissertation Extension. The fee covers continued administrative support throughout the dissertation process from the assigned dissertation committee. It is the student's responsibility to ensure payment of this fee when it is charged. Payment must be received before transcripts or diplomas can be released. This fee is fully refundable if a student does not attend beyond week one of a course. After this time, the fee becomes non-refundable.

^^ Charged to individuals who take the Miller Analogies Test on the University of the Rockies campus.

Other Expenses:

Audit: Students approved to audit a course must pay tuition equal to 50% of the normal course tuition. The audit fee must be paid prior to the start of the course.

Student Professional Liability Insurance: Two months prior to beginning Practicum, subsequent practica, or Pre-Doctoral Internship experience, Mental Healthcare Specialization students must have the minimum required student professional liability insurance. Cost of the insurance is the responsibility of the student. Proof of insurance must be submitted to the Director of Clinical Training.

Memberships in Professional Organizations: After admission to the Master of Arts in Counseling, Marriage, Couples, and Family Counseling Specialization or Clinical Mental Health Counseling Specialization, or the Doctor of Psychology (PsyD), Clinical Specialization programs, students are required to join their respective professional organization (i.e., for the Clinical Mental Health Counseling Specialization, the American Counseling Association; for the Marriage, Couples, and Family Counseling Specialization, the American Association of Marriage and Family Therapy; and for the PsyD, Clinical

Specialization, the American Psychological Association). University of the Rockies will credit the base annual student-rate membership dues for students who were actively enrolled at the time they joined the organization. Active students who submit a receipt for the required student-rate annual dues will receive a credit that can be applied to the next term's tuition.

Memberships in other professional associations remain the individual student's responsibility. Membership in a professional organization is not a substitute for professional licensure in any state.

Non-Standard Term Delivery Format (Online)

Master of Arts in Counseling – All Specializations

The following is a list of tuition and fees applicable to programs and/or courses offered in the non-standard term online delivery format, effective March 1, 2016. Sales Tax Disclaimer

University of the Rockies is required to charge sales tax for tuition and/or fees in certain jurisdictions based on state reporting obligations and the taxability of services and digital goods in accordance with local law on the date of charge. For sales tax purposes, electronically-delivered services and digital goods are considered to be received at the student's physical address. For specific sales tax charges, students should consult with their Student Advisor (online) or Financial Aid Office (campus).

Delinquent Accounts and Financial Hold

An account is considered delinquent if full payment is not received by the end of the first week of the course resulting in an outstanding account balance. Any student with a delinquent account will be put on a financial hold and not be allowed to register for a subsequent term or course until payment is received in full or a payment plan is established. A student with a

delinquent account will not be permitted to take comprehensive exams, obtain copies of official transcripts, or receive a diploma.

An administrative fee may be assessed to a student's account for items returned due to insufficient funds.

Bankruptcy

A student who has filed for bankruptcy or had a loan discharged for disability may need to give additional documentation before receiving aid. A student interested in using financial aid as a payment option upon re-entry or upon reapplication to the University may be required to do so as a secondary payment option and deferment of tuition and fee payment will not apply. The student may be required to pay any tuition and/or fee balance in full on an as-incurred basis.

Credit Balance Payments (Stipends)

A federal student aid credit balance is created when the total of all federal student aid funds that are credited to the student's account exceeds the amount of current and prior year (up to \$200) tuition, fees, and any other educationally related charges the institution assessed the student for the payment period. For students who have an institutional balance within the same academic year, subsequent disbursements will be held to cover the institutional charges. Unless the student authorizes the institution to hold a credit balance, the credit balance must be paid to the student as soon as possible, but not later than 14 days after the balance occurs (or 14 days after the first day of class if the credit balance occurred before the first day of class of that payment period). If a student elects to authorize University of the Rockies to hold any federal student aid credit balance beyond the 14 day period, the University will release any remaining credit balance to the student by the end of the loan period. If a campus student authorizes the school to retain funds and would later like to request a refund, the student must fill out a Disbursement Request form (available online).

Payment Options

University of the Rockies offers a variety of options for paying the costs of a student's education. During the application and enrollment process, students select their primary payment option and any secondary

payment option(s), if required. Funds are applied in the order received by the University, regardless of designation of primary or secondary.

Payment Plans

Payment plans are available to students and are subject to approval.

Payment plans allow students in a non-standard term format to pay their outstanding account balance in two equal monthly installments, guaranteeing that the balance will be paid in full by the end of the term. Payment plans allow for students in a non-term format to maintain continuous enrollment by offering monthly payments to cover any outstanding charges they have incurred throughout their program.

Invoices may be sent out periodically to students with outstanding balances. These invoices will be sent to the email address on file; the student is responsible for ensuring the accuracy of this information with the Registrar's Office. The invoice will reflect charges for current registered classes only. If a change is made to the student's schedule which results in an increase of the tuition bill for the term, the student is accountable for ensuring the updated payment is made. Students who are more than one week late in making payments on the payment plan may be administratively withdrawn from the program until their account is paid in full.

Tuition Reimbursement Plan

The Tuition Reimbursement Plan is available as a primary payment option if students qualify for their employer's tuition reimbursement program and if their employer reimburses at least 50% of annual tuition. Under this plan, tuition payment is deferred a maximum of 60 days from the course/term start date, regardless of when the student receives disbursement from the employer. Applicable fees are due on or before the start date of each course/term. To qualify, prior to the start of the course/term, online students must submit a signed *Tuition Reimbursement Certification and Authorization* form that includes a valid credit card number (debit cards are not accepted) with authorization to charge the card if the tuition is not paid within the 60-day time frame. The conditions of this plan are not dependent upon the receipt of a course grade or completion of the course. Tuition must

be paid in full 60 days after the start date of a course/term; otherwise, the online student's credit card will be automatically charged. If fees are not paid in full on or before the start date of a course/term, the online student's credit card will be automatically charged. A declined card will automatically result in an insufficient funds fee. Students who have two declined credit card payments will be required to comply with the terms of the Cash Plan and will no longer qualify for the Tuition Reimbursement Plan. Students should notify the University as to which payment option(s) they will be using in their initial meeting with the Financial Aid department.

Documentation required for the Tuition Reimbursement Plan:

- Student Finance Agreement; and
- Tuition Reimbursement Certification and Authorization.

Direct Bill Plan (Third-Party Billing)

University of the Rockies offers Third-Party Direct Billing to students sponsored by a Third-Party Agency with a Direct Bill Memorandum of Understanding on file. Third-Party Direct Billing is not available as a secondary payment option. The Third-Party Agency must offer a tuition benefit that covers a minimum of 50% of a student's annual tuition and fees to be eligible for this option. The Third-Party Agency is expected to remit payment to University of the Rockies within 90 days of the course start date. Any amounts not paid by the Third-Party Agency are the responsibility of the student. Vouchers, purchase orders, and other approved authorized mediums should be sent to directbill@rockies.edu at least five days prior to the start of each course. Failure to supply voucher or payment timely may result in loss of Third-Party Direct Bill benefits.

Documentation required for Direct Bill Plan:

- Executed Direct Bill Memorandum of Understanding;
- Student Finance Agreement indicating Direct Bill;
- Direct Bill Certification and Authorization form; and
- Voucher, purchase order, or other authorized medium approved by University of the Rockies

Cash Plan

When the Cash Plan is selected as a primary payment option, 100% of tuition and any applicable fees are to be paid on or before each course start date. Students may choose to have their tuition and/or fees automatically charged to their credit card when the Cash plan is the only payment option. Automatic credit card payments are charged on the start date of each course; otherwise, full payment must be received on or before the start date of each course.

When selected as a secondary payment option, any amount not covered by the primary payment option can be applied in any acceptable form of payment.

University of the Rockies accepts all forms of credit cards as long as the credit available is sufficient. Credit cards bearing high interest rates should not be used as a long-term financing method for educational costs. University of the Rockies encourages all students to utilize the free financial counseling provided by the Financial Aid Office.

Military VA Educational Benefits

University of the Rockies is approved to train veterans and their eligible spouses and dependents. Students utilizing VA Educational Benefits will have their tuition payment deferred for the first 30 days of each course in a degree program, regardless of when the student receives disbursement from the U.S. Department of Veterans Affairs. If additional deferment time is needed for government processing, the student must speak with their advisor in order to make arrangements

Students may choose to place a credit card on file for automatic recurring payment processing. Non-Degree Seeking students will be required to place a credit card on file when selecting this option with authorization to charge the card if tuition is not paid within a thirty (30) day timeframe. Online students should direct questions to the Student Advisor. Campus students should contact the Military Specialist for more information.

The Certificate of Eligibility is required documentation for all students utilizing Military VA Educational Benefits.

Military Tuition Assistance

University of the Rockies is approved for active duty Military Tuition Assistance. Students are required to submit approved Military Tuition Assistance forms prior to the start of each course. Any tuition and applicable fees not covered by the TA program must be paid prior to the start date of each course. Online students should direct questions to the Student Advisor. Campus students should contact the Military Specialist for more information.

Students may choose to place a credit card on file for automatic recurring payment processing. Non-Degree Seeking students will be required to place a credit card on file when selecting this option with authorization to charge the card if tuition is not paid within a sixty (60) day timeframe. Online students should direct questions to the Student Advisor. Campus students should contact the Military Specialist for more information.

Approved *Military Tuition Assistance Authorization* forms (branch specific) are required documentation for students utilizing Military TA.

Return of Tuition Assistance Funds

The School Certifying Official (SCO) will perform a Return of Tuition Assistance Funds calculation when a Tuition Assistance recipient withdraws from his or her course. This process ensures that the institution correctly calculates the amount of tuition assistance funding earned by the student and returns any unearned funds. In some cases, the student will be required to return unearned Tuition Assistance funds. In addition, the Return of Tuition Assistance process may result in the student owing the school for unpaid tuition and fees. A student may withdraw from the University at any time by notifying their Student Advisor (online) or the Registrar's Office (Campus) either verbally or in writing, of their decision to withdraw, but it is highly recommended that the student speak with an Advisor prior to withdrawing.

The portion of Tuition Assistance funds a student is allowed to receive is calculated on a percentage basis by comparing the total number of days completed before the student withdrew from the course to the total number of days in the course. An official

withdrawal date is determined when a student requests to be dropped from their course or does not meet attendance requirements to remain eligible for Tuition Assistance funding.

A student earns 100% of the Tuition Assistance funding once he or she has completed more than 60% of the course. For example, if a student withdraws from a 6-week course, prior to the 26th day of enrollment, then the return to Tuition Assistance would be calculated and refunded accordingly. If a student withdraws from a 9-week course, prior to the 38th day of enrollment, then the return to Tuition Assistance would be calculated and refunded accordingly. The numerator and the denominator include weekend days, but not scheduled breaks of five consecutive days or more.

The Marine Gunnery Sergeant John David Fry Scholarship (Fry Scholarship)

The Fry Scholarship is currently available for children of those who died in the line of duty after September 10, 2001. Beginning January 1, 2015, Fry Scholarship will also be available for surviving spouses of those who died in the line of duty after September 10, 2001.

University of the Rockies Military Grant

Students enrolled in a University of the Rockies degree program may be eligible for the University of the Rockies Military Grant. Eligible students include US Active Duty, Veterans, Reserves, National Guard, spouses of Active Duty, National Guard, or Reservists, or Veterans, students using VA Education Benefits, Department of Defense employees, Veterans Affairs employees, civilian employees of the US Coast Guard, recipients of MyCAA, and recipients of the Fry Scholarship.

The grant amount for Master's degree students will equate to 20% of the cost of tuition. The grant amount for Doctorate degree students will equate to 15% of the cost of tuition. In addition, this grant also waives the entire Technology Fee (non-standard term format) or Technology Services Fee (non-term format), sales

tax charged on tuition, fees, and Course Digital Materials (CDM), and covers the cost of books (e-books when available) and materials, including standard shipping costs and sales tax, required for an eligible student's program of study when purchased through the University of the Rockies' online bookstore.

The Military Grant is not retro-active.

To qualify to receive the University of the Rockies Military Grant, you must provide the appropriate verification:

- Provide proof of active duty or military status by submitting one of the following forms of identification: SOS, LES, COE, Marriage Certificate (spouses), MyCAA Award letter, Fry Scholarship Certificate of Eligibility, eBenefits website screenshot, or milConnect website screenshot;
- Submit application for admission to University of the Rockies with all grant-verifying documents; and
- Remain enrolled or return as scheduled from an approved break.
- Submit a DD-214, for Veterans not utilizing VA educational benefits or who have exhausted benefits.

Character of Service must be Honorable or Medically, Under Honorable and Dishonorable do not qualify.

A copy of the Marriage Certificate will be required with spouses DD-214.

Students who withdraw from the program and resume at a later date will be required to re-verify eligibility for the University of the Rockies Military Grant.

Please note: DD-214 is acceptable verification for Veterans or spouses not utilizing benefits or who have exhausted benefits. Dependents of Veterans not utilizing benefits or who have exhausted benefits are not eligible for the Military Grant

Students that exceed 14 days of consecutive non-attendance and are not on an approved break will be asked to recertify eligibility for the University of the Rockies Military Grant upon return by faxing appropriate verification. The University may schedule periods of non-enrollment during which no courses are scheduled. When this occurs, such as during the annual winter break, the non-enrollment period may extend the 14 day limit to include the break. Approved

students may obtain a book voucher code through their Student Advisor.

University of the Rockies Alliance Agreement Grant

Graduate Students: Students enrolled in a graduate program may be eligible for the University of the Rockies Alliance Agreement Grant. Eligible students include Participating Organizations' employees and/or immediate family members. Grants are only applied to an eligible student's account upon receipt of an approved employment/membership with a Participating Organization, and must provide the University with an approved verification of corporate affiliation.

Grants are applicable to course tuition, and are applied as a percentage of tuition per credit hour. In addition, this grant may also cover the course materials required for an eligible student's first course, including standard shipping costs where applicable, when purchased through University of the Rockies' bookstore or textbook partner. When course materials are available in both electronic format and hard copy, students may opt to purchase a hard copy textbook and are charged the difference in cost, plus shipping. Military students who reside in a forward location may opt for a hard copy textbook at no additional charge.

Students who exceed 30 days of consecutive non-attendance and are not on an approved Academic Leave will be asked to recertify eligibility for the University of the Rockies Alliance Agreement Grant upon return by providing appropriate verification of corporate affiliation.

Private Loan Plan

University of the Rockies will work with any lender participating in private student loans a student wishes to provide. University of the Rockies and its staff are prohibited from accepting remuneration or compensation from any institution providing loans to its students. Students participating in the Private Loan Plan may qualify for Federal Direct Loans from the federal government. Direct Loans may have more favorable rates than Private Loans.

Please contact the Financial Services department for additional information about all available education funding options.

Financial Aid Plan

The University will provide assistance to all students who are eligible for federal financial aid. The University provides a convenient online application process. This process includes financial aid forms, options for electronically signing the application, and links to complete the Free Application for Federal Student Aid (FAFSA), Entrance Loan Counseling, and Master Promissory Note. All students seeking federal financial aid benefits must be admitted to a financial-aid eligible degree program to determine financial aid eligibility.

For the purposes of Financial Aid, students at University of the Rockies may be eligible to apply for the following student financial aid programs:

- Federal Direct Loans (Unsubsidized)
- Direct Graduate PLUS Loans

Federal Student Aid Eligibility

To be eligible for most types of financial aid, a student must:

- be accepted into a degree program*;
- complete the Free Application for Federal Student Aid (FAFSA);
- be enrolled at least half-time in coursework that will count towards the student's degree each term;
- maintain Satisfactory Academic Progress or meet probationary requirements (see policy);
- be a U.S. citizen or eligible noncitizen;
- have a valid Social Security Number;
- register with the Selective Service (if required);
- certify that no federal student loan is in a default status and no money is owed on a federal student grant; and
- certify that use of federal student aid is only for educational purposes.

The total cost of attending University of the Rockies includes direct and indirect expenses. Direct expenses for students include tuition and fees. Also included in the budget are indirect expenses that include allowances for books and supplies, as well as personal and travel expenses that may be incurred while attending college. Students are notified of their estimated cost of attendance on their award

notification, including the calculation of Expected Family Contribution (EFC) which is subtracted from the total cost of attendance. Financial Aid will review the criteria determined by the Department of Education to package aid for each individual student. Please refer to *Tuition and Fees* in this section of the *Catalog* for more information.

Application Deadlines and Renewal of Aid

The annual application priority deadline for financial aid is June 1. Applications will be accepted after this date but may not receive priority. Financial Aid is not automatically renewed every year; the student must re-apply by completing the FAFSA and other paperwork as necessary. The Direct Master Promissory Note (MPN) for federal student loans is good for 10 years.

Applying for Financial Aid

The student will need to do the following to apply for

Financial Aid:

- Obtain a FSA User ID at the Federal Student Aid (FSA) registration page and complete the Free Application for Federal Student Aid (FAFSA) at www.fafsa.ed.gov. Make sure to include the University of the Rockies school code: G35453.
- Complete the Direct Master Promissory Note (MPN) and Entrance Counseling at <https://studentloans.gov>.
- Review the award letter.
- Complete any additional paperwork requested by the Financial Aid/Financial Services department.

Cost of Attendance

The Cost of Attendance represents the total amount it will cost a student to go to school, but may include more than direct costs billed by the University. This information can be found on the University website at:

Non-Standard Term Delivery Format and Non-Term Delivery Format (Denver Campus):

www.rockies.edu/admissions/dis_cost

Non-Term Delivery Format (Online):

www.rockies.edu/admissions/online_cost

Non-Standard Term Programs

Under the Financial Aid plan for enrollment for non-standard term programs, students are expected to submit all required financial aid documents prior to the course start date. If a student is unable to qualify for financial aid, the University will update the student's method of payment to the Cash Plan and the student will be held responsible for any outstanding balances incurred.

Note: For all programs, students are required to make Satisfactory Academic Progress in order to maintain eligibility for Title IV federal financial aid. See the Satisfactory Academic Progress (SAP) policy in the Academic Policies sections of this Catalog for further details related to SAP review and requirements, and information related to conditions of Academic and Financial Aid Warning, Academic and Financial Aid Probation and Probation-Academic Plans during which students maintain Title IV eligibility.

Non-Term Programs

To select the Financial Aid Plan as the primary payment option for enrollment in a non-term program, at least 50% of a student's annual tuition must be funded through the federal financial aid benefits. Under this plan when used as a primary payment option for enrollment in a non-term program, students are expected to submit all financial aid documents prior to their start date. If an enrolled student fails to supply all required documents by end of the first week (Monday at 12 am [midnight] in the Mountain Time Zone), the student will be withdrawn from his or her current course. Students who are otherwise qualified may be rescheduled to start their program at a later date when all required financial aid documentation is submitted. If the student is unable to qualify for financial aid, he or she must select another payment option and is held responsible for any outstanding balances incurred.

Continuous attendance with no breaks greater than 14 days or approved requests for breaks greater than 45 days is required to retain eligibility for federal financial aid funds. The University may schedule periods of non-enrollment during which no courses are scheduled. When this occurs, such as during the annual winter break, the non-enrollment period may extend the 14 day limit to include the break. The University may be required to return the federal funds of students with reduced financial aid eligibility due to attendance breaks, leaving the student responsible to the University for the remaining balance on the student's account. Students who are awarded Title IV aid in an amount exceeding the tuition and fees due

the University, and who withdraw before completion of the term or program, may be required to return unearned funds to the Department of Education and/or University of the Rockies. Students in this situation who received excess funds stipend checks may be required to return those funds to the institution. Students are strongly encouraged to contact their Student Advisor to understand the potential impact attendance changes may have on their financial aid as far in advance as possible.

Note: For all programs, students are required to make Satisfactory Academic Progress in order to maintain eligibility for Title IV federal financial aid. See the Satisfactory Academic Progress (SAP) policy in the Academic Policies sections of this Catalog for further details related to SAP review and requirements, and information related to conditions of Academic and Financial Aid Warning, Academic and Financial Aid Probation and Probation-Academic Plans during which students maintain Title IV eligibility.

General Financial Aid Reapplication Process

On this plan, it is the student's responsibility to reapply for funding as necessary. Students enrolled in a non-term program must reapply 90 days prior to the start of each academic year. Tardiness in applying could result in disqualification and require compliance with the terms and conditions of the Cash Plan. In accordance with Title IV Regulations, any student not completing the financial aid process in a timely manner while in attendance may forfeit eligibility for financial assistance that might otherwise have been available during that period of enrollment, and becomes fully responsible for all remaining balances.

Financial Aid Student's Rights

As a financial aid applicant or recipient, students have the following rights:

- To be advised of what financial aid programs are available and how to apply for them;
- To be advised of the requirements in cases of withdrawal, such as refunds or repayments of financial aid;
- To be advised of the requirements for maintaining financial aid standards of satisfactory academic progress and good academic standing; and
- To have all application information treated with the highest confidentiality.

Financial Aid Student's Responsibilities

As a financial aid applicant or recipient, students have the following responsibilities:

- To apply for financial aid if a student wishes to be considered for financial assistance;
- To submit all required forms accurately and completely;
- To provide documentation, verification of income, corrections and/or any information to complete the financial aid file, if applicable;
- To accept responsibility for all forms and agreements the student signs; and
- To use financial aid only for the student's actual educational expenses.

NSLDS Consumer Information Disclosure

When the University processes federal student aid, the loan will be submitted to the National Student Loan Data System (NSLDS) when the funds have been processed and will be accessible by guaranty agencies, lenders, and institutions determined to be authorized users of the data system.

Federal Direct Loans

Direct Unsubsidized: This loan is non-need-based. Direct Loans are low-interest loans for students to help pay for the cost of a student's education when attending post-secondary education. The lender is the U.S. Department of Education. Students may borrow directly from the federal government through the Direct loan servicer. To be eligible for a Direct loan, a student must be enrolled in an eligible degree program on at least a half-time basis. The Direct Loan Program offers a lower interest rate than most commercial/private loans. Graduate students can apply for an Unsubsidized Direct Loan, which begins to accrue interest while the student is in school. An origination/guarantee fee may be deducted from the student's loan amount that is disbursed. Please refer to the Federal Direct Annual Loan Limits and Federal Direct Aggregate Loan Limits tables in this section of this *Catalog*. The standard repayment plan begins six months after the student graduates or is no longer enrolled at least half-time, and up to 10 years may be allowed to repay the loan(s).

Students who meet eligibility requirements may request a deferment or forbearance of their loan payment. The following are circumstances under which a student may qualify for a deferment: currently enrolled in school on at least a half-time basis; graduate fellowship; rehabilitation training; unemployment; economic hardship; military service; or post-active duty student.

Please refer to www.studentaid.ed.gov for more information.

Direct Graduate PLUS Loan: This is a long-term, low-interest loan for graduate students. The student may borrow up to the cost of attendance, minus all other financial aid received, and after all Direct Unsubsidized loan eligibility has been exhausted. The lender is the U.S. Department of Education. These loans are non-need-based and are subject to credit approval. If denied, a student may apply using a co-signer. Repayment begins 60 days from the date the loan is fully disbursed. The student is responsible for paying the interest on this loan starting from the time of the first disbursement. However, your loan will be placed in deferment while you are enrolled at least half-time.

Please refer to www.studentaid.ed.gov for more information.

Term and Conditions of Direct Loans: The terms and conditions of Direct Loans can be found on the Master Promissory Note or through the Entrance Counseling the student completes.

Graduate Direct Annual Loan Limits:

Unsubsidized	20,500.00
Maximum Lifetime Loan Limit	138,500.00

A borrower who has reached his or her aggregate borrowing limit may not receive additional loans.

FINANCIAL AID

Repeating Coursework for Non-Standard Term

Courses that must be repeated due to an unsuccessful grade count towards eligibility for financial aid. Retaking coursework previously passed in a program offered in a non-standard term format may impact a student's enrollment status (e.g., full time, half time,

etc.). Courses attempted a third time when the prior two attempts resulted in a passing grade will not be included in the enrollment status calculation for the term. This may affect the student's eligibility for financial aid funds. Students are encouraged to contact the Financial Aid Office for more information.

Repeating Coursework for Non-Term Programs

Courses that must be repeated due to an unsuccessful grade do not count towards eligibility for financial aid. This may affect the student's eligibility for financial aid funds. Students are encouraged to contact the Financial Aid Office for more information.

Financial Aid Disbursements

Loan payments are split into five equal disbursements for non-standard term programs and two equal disbursements for non-term programs per Academic Year, generally made by payment period. Payments are delivered to the institution from the Department of Education. The funds are then posted to the student's account during the first week of every term for non-standard term students. Funds for non-term students will post to the student's account within the first three courses of each academic year (in the first payment period). A second disbursement will post to the student's account once they have reached the midpoint of required weeks and successfully completed credits necessary to complete an academic year. **The student is responsible for any balance that financial aid does not cover and must adhere to the tuition payment policy.**

Verification for Federal Student Aid Eligibility

Verification is the confirmation through documentation of the information provided on a student's Free Application for Federal Student Aid (FAFSA) is correct. The U.S. Department of Education routinely requires colleges and universities to verify, or confirm, the data reported by students and their parent(s) on the FAFSA. The verification process ensures that eligible students receive all the financial aid to which they are entitled and prevents ineligible students from receiving financial aid to which they are not entitled.

If the student is selected by the U.S. Department of Education for verification there will be an asterisk next

to the Expected Family Contribution (EFC) on the Student Aid Report (SAR). The student will also be informed of having been selected for verification in the SAR Acknowledgement letter, which is included with the SAR documents. SARs may be viewed online at <http://www.fafsa.ed.gov/> under Step 3, "View and Print Your Student Aid Report." If the student is selected for verification, the University of the Rockies Financial Aid Office will send a letter informing them of this selection and the additional documentation that is required.

The student will be required to provide appropriate and legible supporting documents to the University of the Rockies Financial Aid Office. In most cases, this documentation includes the following information:

1. Signed copies of Federal Tax Return Transcripts for the tax year prior to the award year in which the student is applying; or use the IRS Data Retrieval Tool on the FAFSA;
2. Documentation of untaxed income received during the calendar year, if applicable;
3. High school completion status; and
4. Signed and Notarized Identity and Statement of Educational Purpose form.

Please note that additional documents may be requested at the University of the Rockies Financial Aid Office's discretion.

Participation in the verification process is not optional. If a student who is selected for verification does not submit the required documentation within 30 days, financial aid processing will be delayed, and the student may not be eligible to receive federal financial aid as a University of the Rockies' student.

If any changes to the student's FAFSA or application information are needed or clarification is needed for additional documentation that may be required, an advisor from the Financial Aid Office will contact the student. In this case, the student or parent may be required to submit additional documentation and to resubmit his or her application for financial aid to the U.S. Department of Education. If a student's financial aid award in any way changes as a result of verification, a new award letter will be generated and emailed to the student with the updated Expected Family Contribution and award amounts, as applicable. If a student's financial aid award in any way changes as a result of verification, a new award letter will be generated and emailed to the student with the updated

Expected Family Contribution and award amounts, as applicable.

Financial aid will not be processed or disbursed if an applicant fails to provide the appropriate and legible verification documentation. In addition, the University will return to the lender any applicable loan proceeds otherwise payable to the applicant.

If University of the Rockies obtains any credible information indicating that an applicant for federal student financial assistance may have knowingly engaged in fraud or other criminal misconduct in connection with his or her application for federal student financial assistance, that individual will be referred to the Office of Inspector General of the U.S. Department of Education. Examples of this type of information are:

- (i) False claims of independent student status;
- (ii) False claims of citizenship;
- (iii) Use of false identities;
- (iv) Forgery of signatures or certifications; and
- (v) False statements of income.

Unusual Enrollment History (UEH)

Students who are flagged on the Student Aid Report (SAR) as comment code 359 or comment code 360 will need to submit official transcripts (in original sealed envelope) from all schools attended for the last four years in which they received a Pell grant and/or Direct Loan. Students may be required to submit a letter of explanation along with the official transcripts (in original sealed envelope) for review by University of the Rockies. Requested documentation related to comment code 359 or 360 must be submitted by new and continuing students. This documentation must be approved by University of the Rockies prior to a student receiving Federal student financial aid.

If a student who is selected for UEH does not submit the required documentation within 30 days, financial aid processing will be delayed, and the student may not be eligible to receive federal financial aid as a University of the Rockies' student.

Entrance and Exit Counseling

Entrance Counseling must be given to all financial aid students before federal student aid is disbursed and Exit Counseling must be given to all financial aid students within 30 days of separation from the school. The entrance and exit counseling is available on <https://studentloans.gov>. Students may contact the Financial Aid Office to receive individual repayment or account information.

Return to Title IV Funding

The Financial Aid Office will perform a Return of Title IV Funds calculation when a Title IV recipient withdraws from his or her program. This process ensures that the institution correctly calculates the amount of federal student financial aid earned by the student and returns any unearned funds back to the federal student financial aid programs. In some cases, the student will be required to return unearned Title IV funds. In addition, the Return of Title IV process may result in the student owing the school for unpaid tuition and fees. A student may withdraw from the University at any time by notifying their Student Advisor (online) or the Registrar's Office (on-ground), either verbally or in writing, of their decision to withdraw, but it is highly recommended that the student speak with an Advisor prior to withdrawing.

For Return of Title IV calculation purposes, the payment period for a non-standard term is defined as the term from which the student withdraws. For non-term, please reference the *Financial Aid Guidelines for Non-Term Delivery Format* in this *Catalog* for the definition of a payment period. For official or unofficial withdrawals from non-term and non-standard term programs, a student's last date of attendance is the last day in which a student attended class (for online students this is any academic related activity for their class in the Student Portal). If a student completes a course and receives a passing grade, the last date of attendance will be recorded as the end date of the course.

The portion of Title IV funds a student is allowed to receive is calculated on a percentage basis by comparing the total number of days completed before the student withdrew from the program to the total number of days in the payment period. An official

withdrawal date is determined when a student requests to be dropped from their program or does not meet attendance requirements to remain eligible for Title IV funding. For example, if the student withdrew on the 15th day of a payment period that has 63 days, the student has completed 24% of the payment period and has therefore earned 24% of the federal student financial aid that was disbursed or could have been disbursed. This means that 76% of the aid that was disbursed or could have been disbursed remains unearned and must be returned to the federal student financial aid program. The numerator and the denominator include weekend days but not scheduled breaks of five consecutive days or more. A student earns 100% of the aid once he or she has completed more than 60% of the term.

If the amount of aid disbursed to the student is greater than the amount of aid earned by the student, the unearned portion must be returned to the federal student aid program; this may include returns by the student, the institution, or both. In returning unearned funds, the institution is responsible for returning the portion of the unearned funds equal to the lesser of the institutional charges for the payment period multiplied by the unearned percentage of funds, or the entire amount of unearned funds. If the student is required to return any of the unearned funds, then the student must repay those funds. If the unearned funds consist of Title IV loans, then the student repays the loan in accordance with the terms and conditions of the promissory note.

If the amount of aid disbursed to the student is less than the amount of aid earned by the student, a post-withdrawal disbursement may be available to assist the payment of any outstanding tuition and fee charges on the student's account. If a student is eligible to receive a post-withdrawal disbursement from Title IV loan funds, the student will be asked for his or her permission to disburse the loan funds on the student's account to reduce the balance owed to the institution or disburse the excess loan funds directly to the student. The University has 30 days from the date of the institution's determination that the student withdrew to offer the post-withdrawal disbursement of a loan to the student. The student has 14 days from the date the institution sends the notification to accept the post-withdrawal disbursement in writing. If the student accepts the post-withdrawal disbursement, the University will make the disbursement within 180 days from the date of the institution's determination that the student withdrew. The Return of Title IV process will

determine whether the funds will be allocated to the school or the student.

Once the University's portion of the return of funds has been calculated, the Financial Aid Office will return the aid within 45 days to the appropriate federal student financial aid program(s) in the order specified below. If this creates a balance on the student's account, the student will be responsible for full payment to the institution. A student will not be allowed to re-enter, register, or receive an official academic transcript until the outstanding balance has been paid in full. If loan funds are required to be returned by the student, the student may pay these funds back under the original terms of the loan.

The University will return the unearned Title IV funds in the following order:

- Unsubsidized Direct Loan
- Direct Graduate PLUS Loan

For information regarding the determination of withdrawal date, please see the *Withdrawal from the University* policy in the *General Academic Policies and Information* section in this *Catalog*.

Statements

1098-T Tuition Statements are made available to students every year no later than January 31 as required by law. This statement may be used to claim education credits. 1098-T statements are made available electronically via the Student Portal. Students may elect to only receive paperless delivery of their 1098-T via the Student Portal. If a student does not elect paperless delivery, the statement will be mailed to the address on file. It is the student's responsibility to ensure the address is correct.

Financial Aid Guidelines for Non-Standard Term Delivery Format

Master's and Doctoral Program Definitions

Week = Seven (7) calendar days

Term = Nine (9) weeks

Payment Period = One (1) Term

Academic Year Definition = 45 weeks

Satisfactory Academic Progress (SAP) is evaluated at the end of each term.

Loan Qualifications and Disbursement

For non-standard term programs, loan periods are typically 45 calendar weeks in length. The beginning of the loan period will coincide with the date a student begins coursework. Each disbursement will be delivered on or after the start date of each term, depending upon completion of the financial aid paperwork.

Tuition Payment and Financial Aid

Each financial aid disbursement is intended to cover tuition costs for one term, which is 9 weeks with varying credit hours.

Financial Aid Guidelines for Non-Term Delivery Format

Master's Program Definitions

Week = 7 calendar days

Full Academic Year Definition = a minimum of 36 weeks of instructional time and either 18 successfully earned credits of coursework or 4 successfully earned credits of thesis work that apply toward the student's program of study. The credit requirement may be met through a combination of experiences and will be prorated as follows: 1 credit of coursework equals 1/18 of an Academic Year and 1 credit of thesis work equals 1/4 of an Academic Year.

A full Academic Year consists of 2 increments that may be referenced as payment periods, financial aid payment periods, or Satisfactory Academic Progress (SAP) increments.

- The first payment period in the Academic Year ends when half of the credits and weeks required for a completed Academic Year have been met.
- The second payment period in the Academic Year ends when the requirements for a completed Academic Year have been met.

Final Academic Year Exceptions:

- For any remaining portion of a program that is half of an Academic Year or less, the remaining portion is treated as a single payment period.

- For any remaining portion of a program that is more than half of an Academic Year but less than a full Academic Year, the remaining portion is divided into two payment periods and the first payment period is the period in which the student successfully completes half of the credits and half of the weeks of instructional time in the remaining portion.

Satisfactory Academic Progress (SAP) is evaluated at the end of each payment period.

Doctoral Program Definitions

Week = 7 calendar days

Full Academic Year Definition = a minimum of 36 weeks of instructional time and either 18 successfully earned credits of coursework or 6 successfully earned credits of practicum or 4 successfully earned credits of dissertation courses that apply toward the student's program of study. The credit requirement may be met through a combination of experiences and will be prorated as follows: 1 credit of coursework equals 1/18 of an Academic Year, 1 credit of practicum equals 1/6 of an Academic Year, and 1 credit of dissertation courses equals 1/4 of an Academic Year.

A full Academic Year consists of 2 increments that may be referenced as payment periods, financial aid payment periods, or Satisfactory Academic Progress (SAP) increments.

- The first payment period in the Academic Year ends when half of the credits and weeks required for a completed Academic Year have been met.
- The second payment period in the Academic Year ends when the requirements for a completed Academic Year have been met.
- Final Academic Year Exceptions:
- For any remaining portion of a program that is half of an Academic Year or less, the remaining portion is treated as a single payment period.
- For any remaining portion of a program that is more than half of an Academic Year but less than a full Academic Year, the remaining portion is divided into two payment periods and the first payment period is the period in which the student successfully completes half of the credits and half of the weeks of instructional time in the remaining portion.

Satisfactory Academic Progress (SAP) is evaluated at the end of each payment period.

Loan Qualifications and Disbursement

For non-term programs, loan periods are 36 calendar weeks in length. The beginning of the loan period will coincide with the date a student begins coursework.

The first disbursement will be delivered on or after the start date of the course, depending upon completion of the financial aid paperwork.

The second disbursement will be delivered once a student has successfully satisfied the requirements for a payment period. Please reference *Financial Aid Guidelines for Non-Term Delivery Format* in this section of the *Catalog* for the definition of a payment period. A student must also be registered for and start the next class. Grades of "W," "WU," "I*," or "U" do not count toward successfully earned credits. In addition, students who choose to repeat courses, which they have successfully completed during the same payment period, will not have the repeated course counted toward successfully earned credits as it relates to the payment period.

A student may receive a second loan once these conditions have been met:

- The initial 36-week loan period has ended;
- The student has completed at least 36 weeks of non-concurrent instructional time. This may take longer than the 36-week loan period if the student does not remain continuously enrolled in sequential courses; and
- The student has successfully satisfied the requirements for an academic year. Please reference *Financial Aid Guidelines for Non-Term Delivery Format* in this section of the *Catalog* for the definition of an academic year. Grades of "W," "WU," "I*," or "U" do not count toward successfully earned credits. In addition, students who choose to repeat courses in which they have successfully completed during the same payment period will not have the repeated course counted toward successfully earned credits as it relates to the payment period.

**Note: Once a grade of "I" is successfully completed for a permanent grade, the course will count towards successful completion.*

Tuition Payment and Financial Aid

Each financial aid disbursement is intended to cover tuition costs for at least 9 credits or 2 credits of thesis work at the Master's level, or 9 credits or 3 credits of practicum or 2 credits of dissertation courses at the Doctoral level. However, students who do not meet the aforementioned criteria for receipt of loan funds may be required to pay for additional repeat courses before a subsequent disbursement is available.

Non-Degree Seeking Students

A student must be enrolled as a degree-seeking student in a program in order to qualify for financial aid. Students who withdraw from a degree-seeking program and then enroll as a non-degree seeking student should contact their Student Advisor in order to determine how this may affect their financial aid.

Institutional Awards

Receiving institutional awards may impact a student's military and/or financial aid eligibility. The Financial Aid office will review any additional funds that a student receives to determine any remaining military and/or financial aid eligibility, not to exceed a student's cost of attendance, or if military and/or financial aid awards need to be adjusted.

Outside Scholarships

Students are encouraged to search for outside funding for their education. Any student who receives additional funds from any source, such as an outside scholarship, before or after receiving financial aid from the University, must report the source and the value of the award to the Financial Aid Office. Additional funds frequently require an adjustment to the existing financial aid award to avoid an "overaward" as defined by federal and state regulations. Scholarship searches are available at:

www.finaid.org/scholarships
www.scholarshipamerica.org

The University is in no way affiliated or endorses any of these listed sites. Please beware of sites that ask for payment for scholarship information and/or applications.

Scholarships and Awards

University of the Rockies awards annual scholarships to students that reflect its commitment to its core values of Integrity, Service, Excellence, and Diversity. Scholarship recipients are selected by committees consisting of faculty, administrators, and scholarship founders.

Each scholarship is a \$1,500 tuition-based award disbursed one time (unless otherwise noted) to be applied during one term of enrollment. Students may apply for more than one scholarship, if meeting the requirements for each.

For more information on scholarships and or to access a scholarship application, go to www.rockies.edu/admissions/scholarships.

Eligibility Requirements

- Applicants must be current Master's or Doctoral students at University of the Rockies with a GPA of 3.7 or higher at the time of this application.
- Applicants must have completed nine (9) credits and have at least twelve (12) credits remaining in his/her program by the scholarship award date.
- Students must be in good financial standing with the University.
- Students must be enrolled in a ground-based or online degree program.

In order to maintain eligibility, scholarship recipients must meet the following conditions:

- Remain continuously enrolled at the University.
- Maintain a minimum 3.0 GPA and satisfactory academic progress as outlined in the *Academic Catalog*.

Scholarship and Award Descriptions

J. Frank Rice Memorial Scholarship

Scholarship awarded in honor of J. Frank Rice, PhD, a founding faculty and Colorado School of Professional Psychology (COSPP) board member. The scholarship is awarded each year to an outstanding student who values the pursuit of knowledge and intends to serve the common good.

Applicants must submit a letter of recommendation from a University of the Rockies faculty member and a 500-word typed essay describing:

- Any work in community involvement or as a volunteer;
- How the scholarship will help their financial situation and support the pursuit of their degree; and
- How their degree will enhance their effectiveness in their professional role.

James R. Gregg Memorial Scholarship

Scholarship awarded in honor of James R. (Jim) Gregg, PsyD, an alumnus of COSPP. The scholarship is awarded each year to a student who demonstrates determination, tenacity, personal growth, and commitment to serving others.

Applicants must submit a letter of recommendation from a University of the Rockies faculty member and a 500-word typed essay describing:

- Any work in the community, or as a volunteer, that demonstrates a commitment to serving others;
- How the scholarship will help their financial situation and support the pursuit of their degree; and
- How their degree will enhance their effectiveness in their professional role.

Diversity Scholarship

The Diversity Scholarship will be awarded to a student of any background who demonstrates significant personal growth or community involvement related to their heritage.

Applicants must submit a letter of recommendation from a University of the Rockies faculty member and a 500-word typed essay describing:

- What does the core value of diversity mean to you?

- What community activities have you pursued that contribute to the University's commitment to diversity and inclusion?
- How will receiving this scholarship help your financial situation?

Presidential Alumni Scholarship

The Presidential Alumni Scholarship is awarded to a graduate of a University of Rockies' Master's program who is pursuing a Doctorate degree with the University.

Applicants must:

- Currently be enrolled and taking courses in a University of the Rockies doctoral program at the time of application;
- Submit a position statement addressing their commitment to service and articulating how their doctorate degree will enhance their effectiveness in their professional role and/or participation in a professional organization or association related to the field of study; and
- Submit a letter of recommendation from a University of the Rockies faculty member.

Excellence in Organizational Leadership Scholarship

The Excellence in Organizational Leadership Scholarship is awarded to a current Master's or Doctoral student in the School of Organizational Leadership who demonstrates excellence and embodies attributes of the University of the Rockies mission.

Applicants must:

- Submit a position statement addressing their commitment to service and articulating how their degree will enhance their effectiveness in their professional role and/or participation in a professional organization or association related to the field of Organizational Leadership; and
- Submit a letter of recommendation from a University of the Rockies faculty member.

Excellence in Psychology Scholarship

The Excellence in Psychology Scholarship is awarded to a current Master's or Doctoral student in the School of Psychology who demonstrates excellence and

embodies attributes of the University of the Rockies' mission.

Applicants must:

- Submit a position statement addressing their commitment to service and articulating how their degree will enhance their effectiveness in their professional role and/or participation in a professional organization or association related to the field of Psychology; and
- Submit a letter of recommendation from a University of the Rockies faculty member.

Excellence in Social, Human and Educational Development Scholarship

The Excellence in Social, Human and Educational Development Scholarship is awarded to a current Master's or Doctoral student in the School of Social, Human and Educational Development who demonstrates excellence and embodies attributes of the University of the Rockies' mission.

Applicants must:

- Submit a position statement addressing their commitment to service and articulating how their degree will enhance their effectiveness in their professional role and/or participation in a professional organization or association related to the field of Social, Human and Education Development and Services; and
- Submit a letter of recommendation from a University of the Rockies faculty member.

Distinguished Doctoral Dissertation Award (not tuition-based award)

The Distinguished Doctoral Dissertation award was established to honor distinguished scholarship and research at the doctoral level.

Deans and faculty will nominate dissertations that represent original work which makes an unusually significant contribution to the discipline. Both methodological and substantive quality will be judged.

The recipient will receive the recognition award at the University of the Rockies commencement ceremony.

State Grants

State grants may be available for online students. Please visit the Education Resource Organizations Directory (EROD) at http://wdcrobcolp01.ed.gov/Programs/EROD/org_list.cfm?category_cd=SGT for a list of agencies administering state grants. You may contact these agencies directly for information regarding state grants that may be available.

Alumni Tuition Grant

Students who graduate from a University of the Rockies or Ashford University degree program and meet admission requirements to enroll in a new degree program at University of the Rockies are eligible for an Alumni Tuition Grant. The Technology Services Fee for non-term degree programs is considered a one-time fee for University of the Rockies non-term students and will be waived for all University of the Rockies or Ashford University graduates enrolling in other University of the Rockies degree programs.

Students who qualify for the Alumni Tuition Grant must successfully complete three attempted courses after matriculation into a graduate degree program to remain eligible for the grant. The tuition grant will then be applied to the student's account in the amount of tuition charged for the fourth attempted course. Once the grant is applied to the student's account, a student is not eligible for an additional grant until he/she graduates from another University of the Rockies or Ashford University degree program and meets admissions requirements to enroll in a subsequent degree program.

AU Alumni Doctoral Scholarship

Students who graduate from an Ashford University degree program and meet admission requirements to enroll in a new doctoral degree program at University of the Rockies may be eligible for the AU Alumni Doctoral Scholarship. Prospective students will need to complete the AU Alumni Doctoral Scholarship Application and meet the requirements listed in the form.

Students awarded this scholarship will receive a waiver of the technology services fee and net tuition costs for every fourth course. The Technology Services Fee for non-term degree programs is considered a

one-time fee and will be waived for Ashford University graduates enrolling in a University of the Rockies Doctoral degree program. Students who qualify for the AU Alumni Doctoral Scholarship must successfully complete three courses to have the scholarship payments applied. In order to maintain eligibility, scholarship recipients must remain continuously enrolled at the University. Once the grant is applied to the student's account, a student is not eligible for an additional grant until he/she graduates from another University of the Rockies or Ashford University degree program and meets admissions requirements to enroll in a subsequent degree program. Please note dissertation courses are not eligible for scholarship.

Tuition Refund Policy

Non-Standard Term Format (ground) Tuition Refund Policy

Students who drop or are administratively dropped from courses will have the tuition refunded according to the following schedule based on their last date of attendance. Return of Title IV is based on the length of the payment period and the time the student attended before withdrawing. A student in a non-standard term format program wishing to withdraw from a class or from the University of the Rockies must notify the Registrar's Office. The refund policy excludes all fees which will remain payable. If a student registers for a course with an associated fee and never attends the course, the fee will be refunded. Federal funds required to be returned as a result of changes in eligibility due to reduced attendance (not a withdrawal from the University) will be the responsibility of the student. Refund requirements designated by certain state agencies, where applicable, may take precedence over the institutional refund policy.

Tuition Returned for 4-Credit Courses	Refund Percentage
Before the start the 6th hour of class	100%
Before the start of the 12th hour of class	80%
Before the start of the 17th hour of class	60%
Before the start of the 22nd hour of class	35%
Before the start of the 28th hour of class	10%
After the start of the 28th hour of class	0%

Tuition Returned for 3-Credit Courses	Refund Percentage
Before the start the 5th hour of class	100%
Before the start of the 9th hour of class	80%
Before the start of the 13th hour of class	60%
Before the start of the 17th hour of class	35%
Before the start of the 21st hour of class	10%
After the start of the 21st hour of class	0%

Tuition Returned for 2-Credit Courses	Refund Percentage
Before the start the 3rd hour of class	100%
Before the start of the 6th hour of class	80%
Before the start of the 11th hour of class	40%
After the start of the 11th hour of class	0%

Tuition Returned for 1-Credit Courses	Refund Percentage
Before the start of class	100%
Before the start of the 5th hour of class	60%
After the start of the 5th hour of class	0%
Tuition Returned for 1-Credit Courses	Refund Percentage
Before the start of class	100%
Before the start of the 5th hour of class	60%
After the start of the 5th hour of class	0%
Tuition Returned for Practicum, Internship, or Dissertation Courses	Refund Percentage
Before the start of term	100%
Before the start of the 5th week of the term	60%
After the start of the 5th week of the term	0%

Non-Standard Term Format (online) Tuition Refund Policy

Students who drop or are administratively dropped from courses will have the tuition refunded according to the following schedule based on their last date of attendance. Return of Title IV is based on the length of the payment period and the time the student attended

before withdrawing. Student must be withdrawn from all coursework for this refund policy to apply:

Tuition Returned for 3-Credit Courses	Refund Percentage
Before the start the 2 nd week of class	100%
Before the start of the 3 rd week of class	80%
Before the start of the 4 th week of class	60%
Before the start of the 5 th week of class	35%
After the start of the 5 th week of class	0%

Non-Term Format Tuition Refund Policy

Students who drop or are administratively dropped from a course (or the institution) may be eligible for a tuition refund. Return of Title IV is based on the length of the payment period and the time the student attended before withdrawing. A student in a non-term format program should refer to the following schedule or applicable state refund policy for specific information regarding tuition refunds. Students whose last date of attendance (LDA) is during the indicated week will receive the tuition credit indicated. If a non-term student drops on or before the start date of a course, a 100% refund of the total cost of the course will be provided. Fees are nonrefundable unless otherwise noted. Federal funds required to be returned as a result of changes in eligibility due to reduced attendance (not a withdrawal from the University) will be the responsibility of the student.

Weeks in Course	Refund % by Course 6 weeks	Refund % by Course < 9 weeks
1	100%	100%
2	50%	50%
3	0%	0%
4	0%	0%
5	0%	0%
6	0%	0%
7	n/a	0%
8	n/a	0%
9	n/a	0%

Wisconsin State Refund Policy

The Wisconsin State Refund Policy applies to residents of Wisconsin when students drop or are administratively dropped from a course or the institution, and it is more favorable than the institution's standard refund policy. Wisconsin residents will receive a full refund of all money paid if the student cancels within a three (3) business-day cancellation period. A Wisconsin student who withdraws or is dismissed after attending at least one (1) class, but before completing 60% of the instruction in the current class, is entitled to a pro rata refund as follows:

If Student Drops or Withdraws on	Refund Percentage for 6-week Courses*
Day 0-7	100%
Day 8	80%
Day 9-12	70%
Day 13-16	60%
Day 17-20	50%
Day 21-25	40%
Day 26+	0%
*Refund percentage applied based on last date of attendance (LDA).	
If Student Drops or Withdraws on	Refund Percentage for 9-week Courses*
Day 0-7	100%
Day 8-12	80%
Day 13-18	70%
Day 19-25	60%
Day 26-31	50%
Day 32-37	40%
Day 38+	0%
*Refund percentage applied based on last date of attendance (LDA).	

The University will make every effort to refund prepaid amounts for books, supplies, and other charges unless the student has consumed or used those items and the items can no longer be used or sold to new students, or returned to the supplier by the University. The Technology Fee covers access to University systems such as the online classroom, the Student Portal, and other academic resources. The Technology Fee is fully refundable if a student does not attend beyond week 1

of a course. After this time, the fee becomes non-refundable.

A student will receive the refund within 40 days of the termination date. If a student withdraws after completing 60% of the instruction, and the withdrawal is due to mitigating circumstances beyond the student's control, the University will refund a pro rata amount. Please refer to the *Tuition Credit Request Policy and Procedure* section of this *Catalog*.

A written notice of withdrawal is not required. The University will honor any valid notice of withdrawal within the three (3) business day cancellation period, and within 30 calendar days after dismissal of the student or receipt of notice of withdrawal, shall refund to the student any amounts due and arrange for a termination of the student's obligation to pay any sum in excess of that permitted under the refund policy. For students receiving funds under Title IV, the school will comply with federal guidelines concerning constructive notice of withdrawal. All or a portion of the refund will be used to pay sponsors furnishing grants, loans, scholarships or other financial aid in conformity with federal and state law. After any disbursement to financial aid sponsors have been made, the student shall receive the balance, if any, of the amount due under the refund policy.

For information regarding the return of federal funds policies, please see the *Return of Title IV Funds* policy in this section of this *Catalog*. For information regarding the withdrawal policies, please see the *Withdrawal from the University* policy in the *General Academic Policies and Information* section in this *Catalog*.

Section Five: Admission Policies and Requirements

This section covers the admission policies and requirements for students who are admitted to a degree program at University of the Rockies.

Application Submission

Admission materials may be completed online on the University of the Rockies website at www.rockies.edu. For additional information, contact the University of the Rockies Admissions Office by writing to 1201 16th St., Suite 200, Denver, CO 80202, by emailing admissions@rockies.edu, or by calling, toll-free (855) 531-4705 for on-ground programs or (866) 621-0124 for online programs.

For a list of information and forms required, please see the *Admission Requirements* for the degree program of interest in this section of the Catalog.

Transcript Requests

The Registrar's Office will manage the request of all transcripts for students who have signed a *Transcript Request* form as a part of the application process.

General Admission Requirements

Self-Disclosure Policy

University of the Rockies has determined that some self-disclosure of personal information in classroom and supervision settings may at times be required of students. Students should take this into consideration before applying to University of the Rockies.

English Language Requirement

Applicants must have the ability to study, read, and write in English indicated by one of the following:

- Received a recognized high school diploma, GED, or college/university degree equivalent in which the primary language of instruction was English;
- Earned a Bachelor's, Master's, or other post-secondary degree from a regionally accredited college/university in the United States in which the primary language of instruction was English; or

- Earned a minimum of 30 college-level credits from a degree-seeking program at a college/university recognized by a University-approved evaluation service as equivalent to a regionally accredited college/university in a country where English is the official language.

Students not satisfying one of the listed requirements must provide the results from the Test of English as a Foreign Language (TOEFL) examination taken within the past two (2) years. A minimum score of 550 paper-based or 79 Internet-based is required. An unofficial copy of scores must be submitted prior to provisional admission; official scores must be submitted prior to full admission. The University's TOEFL school code is 4175.

Any student who studied in a United States territory or commonwealth may be required to satisfy the English Language Requirement by providing successful results from the TOEFL.

Criminal Disciplinary Disclaimer

All members of the University of the Rockies community are entitled to work and study in an environment safe from foreseeable harm. Identification of histories of violence reduces the possibility of future criminal acts on or around the University's communities. Consequently, University of the Rockies requires all on-ground applicants and online Doctoral applicants wishing to enroll to answer questions regarding criminal and disciplinary histories as a condition of admission. Applicants may also be required to submit to a third party criminal background check prior to admission. University of the Rockies reserves the right to deny admission or readmission to any student at its discretion.

Admission Disclaimer

University of the Rockies reserves the right to deny admission or readmission to any applicant. University of the Rockies recognizes the importance of protecting student privacy and reserves the right to request documentation to establish or verify any student's identity at any time, for administrative or compliance purposes. Students are expected to provide such documentation, and failure to do so may be considered a violation of the Student Community Standards. The University may deny or rescind admission to any student for failure to authenticate his or her identity.

Background Check Consent Policy

Prospective Mental Healthcare Specialization licensure students must sign the appropriate consent(s) for a background check at the time of application. The consent form permits the University to conduct a background check at the time of application and at any point after the student's enrollment in the program. A copy of the signed consent(s) will be maintained in the permanent student record.

Refusal to Submit to a Background Check Policy

Refusal to request the criminal background check or falsification of information regarding the background check will preclude the student from enrollment, matriculation, continued training, or graduation, if applicable.

Technology Competencies and Requirements

It is our intent to assist students and to prepare them for their coursework at University of the Rockies. Therefore, technology competencies and requirements have been established. These requirements are in effect for all University of the Rockies applicants and existing students and may be updated at any time.

Please note: University of the Rockies strives to maintain the most updated list of technology requirements in this Academic Catalog. To check compatibility, students should reference Technical Requirements in the online classroom under Technology Information.

Students must possess the following online competencies:

- Ability to access course and program material on the Web;
- Ability to correspond with University staff, students, and faculty using email and the Web; and
- Ability to use appropriate antivirus utilities so that files transmitted and received are virus free.

Students must have a computer with the following minimum features and system configurations:

- Platforms: Mac OS X 10.6 or greater or Windows XP (SP3) or greater;
- Hardware: 256 Mb RAM, CD-ROM, DVD player and 1 Gb free disk space, soundcard and speakers;
- Productivity Software: Microsoft Word, PowerPoint and Excel 2003 or greater; Adobe Reader 8 or greater; Adobe Flash 10 or greater (Course Digital Materials Users) ; Sun's Java 2 SDK (Java 1.5 or Java 1.6); Microsoft JVM (Windows XP SP1 only);
- Web Browser: Firefox 31 and 32, Internet Explorer 10 and 11, Safari 6.0 or greater, or Chrome 38;
- Networking: 56k dialup modem, DSL, or cable modem; and
- Email: Outlook, Outlook Express, Mac Mail, Eudora, Entourage, or Yahoo/Hotmail/Gmail.

The following are recommended for optimal performance:

- Productivity Software: Microsoft Word, PowerPoint, and Excel 2007 or greater;
- Networking: Broadband internet connection (DSL, Cable, or other); and
- Course Digital Materials users: Windows Media Player 7.0 or higher, sound card and speakers.

Please note students may be required to download standard software readers for electronic document sharing in a course. Certain courses require the use of a microphone to record sound files or access to a scanner for document submission. Instructors may conduct optional tutoring sessions where student use of a webcam would optimize the learning experience.

Conditional Admission Requirements

Students seeking admission to Master of Arts, Doctor of Philosophy (PhD) or Doctor of Psychology (PsyD) programs at the Denver Campus may apply for conditional admission if they have not earned the prerequisite degree required for admission, but will have the prerequisite degree conferred prior to their start date. All other admissions criteria must be met in order to be considered for conditional admission. Applicants with a conditional admission status cannot be scheduled for class until they have provided acceptable documentation such as an unofficial or

official transcript indicating conferral of the degree required for admission and met all requirements of provisional admission.

For conditional admission, applicants must provide the Admissions Office with the following documentation:

- Application for Admission;
- Unofficial transcript of current program credits (official transcripts indicating degree conferral are required to meet full admission requirements);
- Official transcripts from institutions where graduate credit was earned, if applicable; and
- Unofficial or official copies of TOEFL or transcripts to satisfy the English language requirement, if applicable.

In addition to the previously mentioned requirements, conditional admission for the Master of Arts in Counseling with a specialization in Marriage, Couples, and Family Counseling or Clinical Mental Health Counseling and Doctor of Psychology (PsyD), Clinical Specialization also requires the following documentation:

- A three (3) to five (5) page autobiography covering personal and professional goals, academic and professional experience, personal qualities that will contribute to the candidate's success as a graduate student, and why the candidate has chosen to apply to University of the Rockies and the desired program of study;
- Three letters of recommendation on University of the Rockies' *Applicant Recommendation* form. (Letters must be from individuals who are familiar with the candidate's academic ability, work ability, integrity, and potential as a professional psychologist);
- A criminal background check from www.validityacademics.com;
- Miller's Analogies Test (MAT) or Graduate Record Examination (GRE) results; and
- Completion of the interview process.

Conditionally admitted students must provide documentation of their degree conferral and meet all requirements for provisional admission in order to become a provisionally admitted student. Students will be subject to the policies and procedures of the *Academic Catalog* in effect at the time of provisional admission. University of the Rockies reserves the right to modify these policies and procedures at any time

Non-Degree Seeking Student Admission Requirements

Individuals who wish to take a limited number of courses as a non-degree seeking student must hold a Bachelor's degree from a regionally accredited institution of higher education with a cumulative GPA of at least 2.0 on a 4.0 scale or for Doctoral-level courses, hold a Master's degree or higher from a regionally accredited institution with a cumulative GPA of at least a 3.0 on a 4.0 scale. Please see additional policies for non-degree seeking students under *Non-Degree Seeking Students* in the *General Academic Policies and Information* section in this *Catalog*.

Admission Materials

An applicant must submit the following information and forms to be considered for admission:

- *Application for Admission*;
- Unofficial or official transcripts from a regionally accredited institution granting either a:
 - a) Bachelor's degree and any graduate schools attended (for Master's-level courses); or
 - b) Master's degree and any schools where post-Master's degree credit was earned (for Doctoral-level courses);
- Satisfy all prerequisite courses or degree(s) required for admission to the University of the Rockies degree program in which the courses are offered; and
- Unofficial or official copies of TOEFL or transcripts to satisfy the English language requirement, if applicable.

In addition to the previously mentioned requirements, non-degree seeking students who wish to take CSL prefix coursework offered in the Master of Arts in Counseling with a specialization in Marriage, Couples, and Family Counseling or Clinical Mental Health Counseling or Doctor of Psychology (PsyD), Clinical Specialization also require:

- Submission of a criminal background check from www.validityacademics.com; and
- Completion of the interview process.

Master of Arts Admission Requirements (Excluding Master of Arts in Counseling)

Students seeking admission to Master of Arts degree programs (excluding Master of Arts in Counseling) must hold a Bachelor's degree from a regionally accredited institution of higher education or an equivalent international degree with a cumulative GPA of at least 2.0 on a 4.0 scale, or a Master's degree or higher from a regionally accredited institution. Students entering with a Bachelor's degree earned with a grade point average of 2.00 to 2.99 will be placed on Academic Watch.

Admission Materials

An applicant must submit the following information and forms to be considered for full admission:

- *Application for Admission*;
- Official transcripts from institution granting the Bachelor's degree and any graduate schools attended; and
- Official copies of TOEFL or transcripts to satisfy the English language requirement, if applicable.

Provisional Admission Status Requirements

Students are provisionally admitted to Master of Arts degree programs when they submit a completed application indicating that they meet admission requirements outlined previously, including an indication of satisfying the English language requirement. Students who then enroll in courses are considered regular students in their degree program. However, students who do not meet all documentation requirements for full admission are withdrawn from the program at the conclusion of either the first term of enrollment for non-standard term students or the third attempted course for non-term students.

Full Admission Status Requirements

The following provisions must be met prior to the conclusion of the first term of enrollment for non-standard term students or the third completed course for non-term students. To continue, students must meet all admissions requirements applicable to their program and must complete all requirements outlined in the following.

- Submission of an official transcript from the regionally accredited institution that awarded the baccalaureate degree indicating a minimum GPA of 2.0 or a regionally accredited institution awarding a Master's degree or higher.
- Submission of official transcripts from institutions where graduate credit was earned unless the student chooses to relinquish graduate credits that are unavailable for submission.

Students entering with a cumulative GPA of less than 3.0 through (a) or (b) below but above a 2.0 are admitted on Academic Watch and are required to achieve a cumulative GPA of 3.00 and successfully complete 67% of credits attempted in their first payment period.

(a) Students with a Bachelor's degree only or who have fewer than 12 credits of graduate-level coursework will have their GPA calculated for only the Bachelor's degree.

(b) Students who have completed 12 credits or more of graduate-level coursework and do not have a 3.0 undergraduate cumulative GPA may have their GPA calculated on the basis of their graduate coursework.

At the conclusion of Academic Watch, any student who does not meet the previously mentioned requirements will be dismissed from the University.

Master of Arts in Counseling Admission Requirements

Marriage, Couples, and Family Counseling & Clinical Mental Health Counseling Specializations

Students seeking admission to the Master of Arts in Counseling program with a specialization in Marriage, Couples, and Family Counseling or Clinical Mental Health Counseling must hold a Bachelor's degree from a regionally accredited institution of higher education or an equivalent international degree with a cumulative GPA of at least 2.0 on a 4.0 scale, or a Master's degree or higher from a regionally accredited institution. Students entering with a Bachelor's degree earned with a grade point average of 2.00 to 2.99 will be placed on Academic Watch.

It is required that all applicants have completed an appropriate foundation in counseling or psychology, constituted by a Bachelor's or Master's degree in counseling, psychology or related field. Undergraduate coursework with grades of "C" or higher or graduate coursework with grades of "B" or higher from an accredited institution of higher learning that encompasses the following areas may also satisfy this requirement:

- Abnormal Psychology
- Statistics
- Personality Theory
- Human Development
- Tests and Measures
- Psychology of Learning

Students may choose to remediate deficiencies by enrolling in coursework as a non-degree seeking student prior to enrolling in their desired program. Students who choose to enroll in their desired program prior to remediating these deficiencies will be required to take PSY 5001 Survey of Psychology I and/or PSY 5002 Survey of Psychology II. Credits earned will be in addition to published program requirements.

Applicants must submit test results of the MAT or GRE, which have been completed within five years of application. Candidates must arrange to have the report sent to the University of the Rockies Admissions Office. In no case will the MAT or the GRE be the sole reason for a candidate not being selected for admission.

Applicants must consent to a criminal background check that informs the University that the candidate has had no felonies or misdemeanors that would preclude insurability, licensure as a psychotherapist, or working in a mental healthcare setting. Colorado may not license mental health providers who have had a felony conviction or who have had a court accept a nolo contendere plea to a felony if the felony is related to the ability to practice psychotherapy.

The Admissions Task Force considers the interview results and required application materials (e.g., transcripts, autobiography, letters of recommendation, MAT or GRE test results, etc.) in their totality for each applicant to the Mental Healthcare specializations. While the University has not established a minimum standard for the MAT or GRE, scores are considered in the admissions process and higher scores can result in more favorable consideration of the application. The

admission's decision, upon deliberative review of each applicant's file, is final.

Students who have completed graduate-level coursework at another college or university may transfer up to 9 graduate-level semester hours from a regionally accredited institution of higher education on a course-by-course basis. Please review the transfer credit policies for nontransferable courses and program requirements in the *General Academic Policies and Information* section of this *Catalog*.

Students earning a Master of Arts in Counseling degree with a specialization in Marriage, Couples, and Family Counseling or Clinical Mental Health Counseling will have acquired a minimum of 700 hours of supervised counseling experience in Practica and Internship, and are required to obtain 20 hours of personal therapy.

Admission Materials

An applicant must submit the following information and forms to be considered for full admission:

- *Application for Admission*;
- Official transcripts from all colleges, universities, or graduate schools attended;
- A criminal background check from www.validityacademics.com;
- Official copies of TOEFL or transcripts to satisfy the English language requirement, if applicable; and

Provisional Admission Status Requirements

Students are provisionally admitted to a Master of Arts in Counseling program when they submit a completed application indicating they meet admission requirements outlined previously and provide the following: unofficial transcripts from all degree-conferring institutions, autobiography, three recommendation letters, MAT or GRE results, consent to a criminal background check, an indication of satisfying the English language requirement, and completion of the interview process. In order to waive introductory course requirements on the basis of coursework taken at an institution that did not confer a degree, an unofficial transcript showing the coursework completed must be submitted along with the completed application.

Students who then enroll in courses are considered regular students in their degree program. However, students who do not meet all documentation requirements for full admission are withdrawn from the program at the end of the first term.

Full Admission Status Requirements

The following provisions must be met prior to the conclusion of the first term at University of the Rockies. To begin the second term, students must meet all admissions requirements applicable to their program and must complete all requirements outlined in the following.

- Submission of official transcripts from all post-secondary institutions attended.
- Submission of official TOEFL results, if applicable.

Students entering with a cumulative GPA of less than 3.0 through (a) or (b) below but above a 2.0 are admitted on Academic Watch and are required to achieve a cumulative GPA of 3.00 and successfully complete 67% of credits attempted in their first term.

(a) Students with a Bachelor's degree only or have fewer than 12 credits of graduate-level coursework will have their GPA calculated for only the Bachelor's degree.

(b) Students who have completed 12 credits or more of graduate-level coursework and do not have a 3.0 undergraduate cumulative GPA may have their GPA calculated on the basis of their graduate coursework.

At the conclusion of Academic Watch, any student who does not meet the previously mentioned requirements will be dismissed from the University.

Appeal of Dismissal Following Academic Watch (Master of Arts Programs)

A student who has been dismissed for not meeting satisfactory academic progress requirements following Academic Watch may appeal for readmission. Appeals must be submitted to Academic.Progress@rockies.edu and will be evaluated by an Appeal Committee made

up of the University Registrar or his or her designee and the appropriate school Dean or his or her designee who has oversight in the student's program of study. The decision of the Committee will be communicated in writing to the student by the Registrar's Office.

Additionally, the student's appeal letter must include:

- a reasonable explanation for the student's academic performance to date, which includes mitigating circumstances such as student injury/illness, death of a student's family member, or other reasons resulting in undue hardship to the student;
- reasonable evidence that they have the ability to succeed in an academic program due to changed circumstances, experience, and/or successful completion of graduate-level credits during the period of absence; and
- a plan for completion of the coursework required to meet satisfactory academic progress during the following payment period.

The passage of time does not substantiate eligibility for readmission or appeal for readmission. However, students who have experienced mitigating circumstances and have been dismissed from the University for failure to meet satisfactory academic progress requirements and have been denied readmission after an appeal, may submit another appeal to be readmitted after one or more years have elapsed since their last appeal. The appeal must meet the previously mentioned criteria and the student must present reasonable evidence that they have the ability to succeed in an academic program due to changed circumstances, experience, and/or successful completion of graduate level credits since the last appeal was submitted.

Please refer to the *Satisfactory Academic Progress (SAP)* requirements in the *Academic Policies: Non-Standard Term Format* or *Academic Policies: Non-Term Format* sections to review all related satisfactory academic progress guidelines.

Doctor of Philosophy (PhD) Admission Requirements

Students seeking admission to the Doctor of Philosophy (PhD) program must hold a Master's degree from a regionally accredited institution with a graduate level cumulative GPA of 3.0 or higher, or an earned Doctoral degree from a regionally accredited institution.

Admission Materials

An applicant must submit the following information and forms to be considered for full admission:

- *Application for Admission*;
- Official transcripts from institution granting the Master's degree and any schools where post-Master's degree credit was earned; and
- Official copies of TOEFL or transcripts to satisfy the English language requirement, if applicable.

Provisional Admission Status Requirements

Students are provisionally admitted to a PhD program when they submit a completed application indicating that they meet admission requirements outlined previously, unofficial transcripts from any schools where a graduate degree was conferred, and an indication of satisfying the English language requirement. In order to waive introductory course requirements on the basis of a Bachelor's degree, an unofficial transcript showing the Bachelor's degree awarded must be submitted along with the completed application. Coursework or experience will be evaluated per the degree-specific *Doctor of Philosophy (PhD) Admission Requirements* listed previously in this section.

Students who then enroll in courses are considered regular students in their degree program. However, students who do not meet all documentation requirements for full admission are withdrawn from the program at the conclusion of the third attempted course.

Full Admission Status Requirements

The following provisions must be met prior to the conclusion of the third attempted University of the Rockies course. To begin the fourth course, students must meet all admissions requirements applicable to

their program and must complete all requirements outlined in the following.

- Submission of an official transcript from the regionally accredited institution that awarded the Master's degree indicating a minimum GPA of 3.0 or an official transcript from a regionally accredited institution that awarded a Doctoral degree; and
- Official transcripts from institutions where graduate credit was earned or a signed *Authorization to Close* form indicating relinquishment of potential transfer credits for any official transcripts the student is unable to provide.

Doctor of Psychology (PsyD) Admission Requirements (Excluding PsyD, Clinical Specialization)

Students seeking admission to the PsyD program (excluding Clinical specialization) must hold a Master's degree from a regionally accredited institution with a graduate level cumulative GPA of 3.0 or higher, or an earned Doctoral degree from a regionally accredited institution.

Students entering the program who do not hold a Bachelor's degree or a Master's degree in non-clinical psychology, human performance technology, training and development, human resource development, organizational leadership, industrial and organizational psychology, or a related field are required to successfully complete the following survey courses as a part of the program:

Doctor of Psychology, Sport and Performance Psychology Specialization - PSY 5001 Survey of Psychology I (3 credits) and PSY 5002 Survey of Psychology II (3 credits); or

Doctor of Psychology, all other specializations in the School of Organizational Leadership - ORG 5020 Survey of Psychology of Leadership I (3 credits) and ORG 5022 Survey of Psychology of Leadership II (3 credits).

These courses are designed to prepare students for the remainder of the program. Students may appeal to the Registrar's Office to be waived from the introductory course requirements if they have previous coursework or experience in non-clinical psychology, human performance technology, training and development, human resource development, organizational leadership, industrial and organizational psychology, or a related field that satisfies the foundational academic material from the field of psychology. The appeal will be evaluated by the University Registrar or designee and the School Dean. Those students not required to take the introductory courses at University of the Rockies are responsible for familiarity with foundational academic material from the field of psychology.

Admission Materials

An applicant must submit the following information and forms to be considered for full admission:

- *Application for Admission;*
- Official transcripts from institution granting the Master's degree and any schools where post-Master's degree credit was earned; and
- Official copies of TOEFL or transcripts to satisfy the English language requirement, if applicable.

Provisional Admission Status Requirements

Students are provisionally admitted to a PsyD program when they submit a completed application indicating that they meet admission requirements outlined previously, unofficial transcripts from any schools where a graduate degree was conferred, and an indication of satisfying the English language requirement. In order to waive introductory course requirements on the basis of a Bachelor's degree, an unofficial transcript showing the Bachelor's degree awarded must be submitted along with the completed application. Coursework or experience will be evaluated per the *Doctor of Psychology (PsyD) Admission Requirements* listed previously in this section.

Students who then enroll in courses are considered regular students in their degree program. However, students who do not meet all documentation requirements for full admission are withdrawn from the program at the conclusion of either the first term of

enrollment for non-standard term students or the third attempted course for non-term students.

Full Admission Status Requirements

The following provisions must be met prior to the conclusion of the third attempted University of the Rockies course. To begin the fourth course, students must meet all admissions requirements applicable to their program and must complete all requirements outlined in the following.

- Submission of an official transcript from the regionally accredited institution that awarded the Master's degree indicating a minimum GPA of 3.0; and
- Official transcripts from institutions where graduate credit was earned or a signed *Authorization to Close* form indicating relinquishment of potential transfer credits for any official transcripts the student is unable to provide.

Doctor of Psychology (PsyD), Clinical Specialization Admission Requirements

Students seeking admission to the PsyD, Clinical Specialization must hold a Bachelor's degree from a regionally accredited institution of higher education or an equivalent international degree with a cumulative GPA of at least 2.0 on a 4.0 scale. Students entering with a grade point average of 2.00 to 2.99 will be placed on Academic Watch.

It is required that all applicants have completed an appropriate foundation in counseling or psychology, constituted by a Bachelor's or Master's degree in psychology or a related field. Undergraduate coursework with grades of "C" or higher or graduate coursework with grades of "B" or higher from an accredited institution of higher learning that encompasses the following areas may also satisfy this requirement:

- Abnormal Psychology
- Statistics
- Personality Theory
- Human Development
- Tests and Measures

- Psychology of Learning

Students may choose to remediate deficiencies by enrolling in coursework as a non-degree seeking student prior to enrolling in their desired program. Students who choose to enroll in their desired program prior to remediating these deficiencies will be required to take *PSY 5001 Survey of Psychology I* and/or *PSY 5002 Survey of Psychology II*. Credits earned will be in addition to published program requirements.

Applicants must submit test results of the MAT or GRE, which have been completed within five years of application. Candidates must arrange to have the report sent to the University of the Rockies Admissions Office. In no case will the MAT or the GRE be the sole reason for a candidate not being selected for admission.

Applicants must consent to a criminal background check that informs the University that the candidate has had no felonies or misdemeanors that would preclude insurability, licensure as a psychotherapist, or working in a mental healthcare setting. Colorado may not license mental health providers who have had a felony conviction or who have had a court accept a nolo contendere plea to a felony if the felony is related to the ability to practice psychotherapy.

The Admissions Task Force considers the interview results and required application materials (e.g., transcripts, autobiography, letters of recommendation, MAT or GRE test results, etc.) in their totality for each applicant to the Mental Healthcare specializations. While the University has not established a minimum standard for the MAT or GRE, scores are considered in the admissions process and higher scores can result in more favorable consideration of the application. The decision of the Admissions Task Force upon deliberative review of each applicant's file, is final.

Students who have completed graduate-level coursework at another college or university may transfer up to 36 graduate-level semester hours from a regionally accredited institution of higher education on a course-by-course basis. Please review the transfer credit policies for nontransferable courses and program requirements in the *General Academic Policies and Information* section of this *Catalog*.

Students earning the PsyD, Clinical Specialization degree, will have acquired a minimum of 3,000 hours of supervised clinical psychotherapy experience in

Clinical Practica and Pre-Doctoral Internship, and are required to obtain 30 hours of personal therapy.

Students who enroll in a University of the Rockies Master of Arts program and desire to enter the University of the Rockies PsyD, Clinical Specialization program after successfully completing their Master of Arts program must submit updated admission materials as required for the PsyD, Clinical Specialization to the Registrar's Office after successful completion of at least the first year of the Master of Arts program and must complete an interview with an Interview Panel appointed by the Admissions Task Force. The Admissions Task Force may choose to waive the interview for a student on an individual basis. The Admissions Task Force will review the student's records and the Interview Panel's recommendations and make a final decision regarding admission to the PsyD program.

Admission Materials

An applicant must submit the following information and forms to be considered for full admission:

- *Application for Admission*;
- Official transcripts from all colleges, universities, or graduate schools attended;
- A three to five page autobiography. The autobiography should cover personal and professional goals; academic and professional experience; personal qualities that will contribute to the candidate's success as a graduate student; and why the candidate has chosen to apply to University of the Rockies and the desired program of study;
- Three letters of recommendation on the Applicant Recommendation form. (Letters must be from individuals who are familiar with the candidate's academic ability, work ability, integrity, and potential as a professional psychologist);
- Miller Analogies Test (MAT) or Graduate Record Examination (GRE) that have been completed within five years of the application;
- A criminal background check from www.validityacademics.com;
- Official copies of TOEFL or transcripts to satisfy the English language requirement, if applicable; and
- Completion of the interview process.

Provisional Admission Status Requirements

Students are provisionally admitted to a PsyD, Clinical Specialization program when they submit a completed application indicating that they meet admission requirements outlined previously and provide the following: unofficial transcripts from all degree-conferring institutions, autobiography, three recommendation letters, MAT or GRE results, consent to a criminal background check, an indication of satisfying the English language requirement, and completion of the interview process. All materials are considered in the admissions process. In order to waive introductory course requirements on the basis of coursework taken at an institution that did not confer a degree, an unofficial transcript showing the coursework completed must be submitted along with the completed application.

Students who then enroll in courses are considered regular students in their degree program. However, students who do not meet all documentation requirements for full admission are withdrawn from the program at the end of the first term.

Full Admission Status Requirements

The following provisions must be met prior to the conclusion of the first term at University of the Rockies. To begin the second term, students must meet all admissions requirements applicable to their program and must complete all requirements outlined in the following.

- Submission of official transcripts from all post-secondary institutions attended.
- Submission of official TOEFL results, if applicable.

Students entering with a cumulative GPA of less than 3.0 through (a) or (b) below but above a 2.0 are admitted on Academic Watch and are required to achieve a cumulative GPA of 3.00 and successfully complete 67% of credits attempted in their first term.

(a) Students with a Bachelor's degree only or have fewer than 12 credits of graduate-level coursework will have their GPA calculated for only the Bachelor's degree.

(b) Students who have completed 12 credits or more of graduate-level coursework and do not have a 3.0 undergraduate cumulative GPA may have their GPA calculated on the basis of their graduate coursework at the discretion of the Admissions Committee.

At the conclusion of Academic Watch, any student who does not meet the previously mentioned requirements will be dismissed from the University.

Appeal of Dismissal Following Academic Watch (PsyD, Clinical Specialization Program)

A student who has been dismissed for not meeting satisfactory academic progress requirements following Academic Watch may appeal for readmission. Appeals must be submitted to Academic.Progress@rockies.edu and will be evaluated by an Appeal Committee made up of the University Registrar or his or her designee and the appropriate school Dean or his or her designee who has oversight in the student's program of study. The decision of the Committee will be communicated in writing to the student by the Registrar's Office.

Additionally, the student's appeal letter must include:

- a reasonable explanation for the student's academic performance to date, which includes mitigating circumstances such as student injury/illness, death of a student's family member, or other reasons resulting in undue hardship to the student;
- reasonable evidence that they have the ability to succeed in an academic program due to changed circumstances, experience, and/or successful completion of graduate-level credits during the period of absence; and
- a plan for completion of the coursework required to meet satisfactory academic progress during the following payment period.

The passage of time does not substantiate eligibility for readmission or appeal for readmission. However, students who have experienced mitigating circumstances and have been dismissed from the University for failure to meet satisfactory academic progress requirements and have been denied readmission after an appeal, may submit another appeal to be readmitted after one or more years have elapsed since their last appeal. The appeal must meet the previously mentioned criteria and the student must present reasonable evidence that they have the ability to succeed in an academic program due to changed

circumstances, experience, and/or successful completion of graduate level credits since the last appeal was submitted.

Please refer to the *Satisfactory Academic Progress (SAP)* requirements in the *Academic Policies: Non-Standard Term Format* section to review all related satisfactory academic progress guidelines.

Additional Admission Requirements for Applicants with International Credentials

The following requirements are applicable to applicants relying on academic credentials earned outside the United States.

Provisional Admission Status Requirements

In addition to the requirements for provisional admission outlined in the admission policy for graduate programs, copies of documentation indicating that the student meets the following admission requirements are required for provisional admission:

1. Submit copies of an official evaluation from an approved evaluation service indicating that the student has met the following requirements:

- The equivalent of a regionally accredited Master's degree from the United States for Doctoral program applicants.
- The equivalent of a regionally accredited Bachelor's degree from the United States for Master's program and PsyD, Clinical Specialization program applicants.
- For applicants to a Master's program, the requirement for official evaluation of the Bachelor's degree may be waived when a Master's degree has been earned at an appropriately accredited university in the United States.

2. All academic records from countries other than the United States must have been evaluated by one of the following evaluation services:

- Educational Credentials Evaluators, Inc. (ECE); or

- World Education Services (WES).

Note: Students who have already had their international credentials evaluated prior to making application to the University may petition the University Registrar or designee for acceptance of evaluations from other credible agencies. All evaluations should include a thorough course-by-course evaluation, accreditation equivalency, cumulative GPA, and list the language of instruction.

If the credential is earned outside the United States, but holds a regional accreditation by an accepted regional accrediting body inside the United States it may be evaluated without a foreign credential evaluation if the official transcript is in English. A copy of the unofficial transcript is required for provisional admission and an official transcript is required for full admission. The student must provide a copy of the unofficial transcript with the application and request the official transcript for full admission.

Section Six: General Academic Policies and Information

In this section you will find basic academic information and policies affecting all students, including assessment, institutional outcomes, grading, and graduation. Additionally, information about course, program, transfer credit, and military-specific policies can be found in this section.

Assessment at University of the Rockies

Assessment serves as a window into student learning. Through this window, we can measure the success of our students during their academic careers. Assessment is not a single activity; instead, it is a process of continuous improvement to select and analyze meaningful data throughout the institution that supports our commitment to high-quality learning and academic excellence. We consider the assessment of student achievement, learning, and satisfaction fundamental for University of the Rockies to accomplish its mission. The assessment process is grounded in a culture of inquiry to support and enhance the student experience. Each year we pose new questions related to student learning as we work to meet the university's mission: University of the Rockies provides high-quality, accessible learning opportunities globally for diverse groups of individuals seeking preparation for life goals, professional practice, service, and distinguished leadership.

Assessment at University of the Rockies is an ongoing reflective process informed by ideas, experiences, and tangible data. Our goal is to gather meaningful assessment data utilizing manageable and sustainable methods and processes. We align our assessment activities in a way that supports the continuous improvement of university programs and practices, and a positive student experience.

Institutional Learning Outcomes (ILOs)

At University of the Rockies Institutional Outcomes (ILOs) reflect the commitment to the highest standards of academic, interpersonal, and professional preparedness, as well as a guide for continued growth. All students regardless of discipline are expected to achieve this overarching set of outcomes. All programs and course learning outcomes are mapped to the

ILOs. This alignment of outcomes serves as a framework for assessing and improving student success.

ETHICS – Acts in an ethical, legal, and professional manner according to the current codes of ethics in the respective disciplines.

CRITICAL THINKING SKILLS – Demonstrates the ability to use critical thinking skills.

COMMUNICATION – Communicates effectively in written form and oral presentation.

EMOTIONAL INTELLIGENCE – Exhibits emotional intelligence.

LIFELONG LEARNING – Engages in the practice of lifelong learning.

DIVERSITY – Supports diversity and multi-cultural issues and recognizes their impact.

Plans to Improve an Academic Program

University of the Rockies continuously looks for ways to improve our academic programs. In the event we plan to make a significant improvement to a program, as deemed so by the University, we will post that information on our Student Consumer Information page, www.rockies.edu/about/consumer-information. Once an effective date for a significant improvement to an academic program is determined, information about the change will be posted on the website. Please note that significant improvements to academic programs generally only impact new students enrolling with a start date after the effective date. In the event that a significant improvement impacts current students in the program, students will be notified directly.

Program/Course Delivery Formats

Non-Standard Term Format

The Master of Arts in Counseling (all specializations), the Master of Arts in Psychology, Career Management & Counseling, Master of Arts in Psychology, General Psychology, and Master of Arts in Psychology, Sport &

Performance Psychology, and the Doctor of Psychology, Clinical Specialization operate in a “non-standard term” format. In the non-standard term format, students typically take 2 classes at a time. Each term is nine weeks in length.

Non-Term Format

Many programs offered at the Denver Campus and all programs offered Online (except for the Master of Arts in Counseling) operate in a “non-term” format. In the non-term format, courses run continuously, rather than in semesters, and students typically take one course at a time and move on to the next course without a break. Courses are 6 weeks or 9 weeks in length.

Please refer to *Course Delivery* in the *Academic Policies: Non-Standard Term Format* or *Academic Policies: Non-Term Format* sections of this *Catalog* for additional information related to program and course delivery.

Credits

Academic credit at University of the Rockies is granted using the semester credit hour system.

University of the Rockies defines “credit hour” as the approximate amount of work represented in intended learning outcomes and verified by evidence of student achievement. According to the traditional definitions of credit hour (the Carnegie Unit), a credit hour is reasonably equivalent to 45 hours of learning time. Student achievement of course learning outcomes is what ultimately validates the credit hours assigned to a course. The number of credit hours assigned to a course is commensurate with the total effort required of a student in order to achieve the course learning outcomes, not solely the number of clock hours a learner devotes over the duration of a course.

All required enrollments associated with the Pre-Doctoral Internship (School of Professional Psychology) total five credit hours. Students are advised that all Pre-Doctoral Internships must be completed in not less than 12 months and not more than 24 months.

No credits are awarded for required activities associated with Annual Assessments of Student Progress, Portfolio requirements, Advancement to Practicum or Oral Examination.

Credits required for Practica are based on the number of clock hours in the Practicum.

Grade Point Average

The grade point average is determined by dividing the total number of quality points earned by the total number of credits attempted for which quality points are given. The grades of “Incomplete” and “Passing” do not alter the grade point average. If a student repeats a course, only the most recent grade earned affects the grade point average; the grade point value of the first grade is no longer included in calculating the cumulative average. “W,” “WU,” and “I” grades are counted as credits attempted but not earned when calculating completion-rate requirements for satisfactory academic progress. No grades are awarded for transferred credits and transfer credit hours are not reflected in the University of the Rockies grade point average.

Grading System and Grade Points

Grade point averages are calculated on a 4.00 scale and include only coursework attempted at University of the Rockies.

Grades/Quality Points	
A = 4.0 quality points	C+ = 2.3 quality points
A- = 3.7 quality points	C = 2.0 quality points
B+ = 3.3 quality points	U = 0.0 quality points
B = 3.0 quality points	WU = 0.0 quality points
B- = 2.7 quality points	Note: a student may only receive a combination of two C, C+, NP, U, and WU grades at the doctoral level.

Other Grading Designations	
U =	(Unsatisfactory) A grade of U indicates that the student has not demonstrated a satisfactory level of competence in the subject area being evaluated. Credit is not given for coursework in which this grade is earned. The class may be repeated; however, the grade earned in the first attempt remains on the transcript permanently and a repeat symbol is added to indicate that the course has been repeated. The final grade for a second attempt is indicated in the term it is completed.

WU =	(Withdrawn - Unsatisfactory) A grade of WU is issued when a student drops or is administratively dropped from a course after 67% of the total instructional time has elapsed, based on the last date of attendance. Credits are marked as attempted and grade points are equivalent to a "U" grade. Practicum, Thesis, and Dissertation courses are excluded.
R or ** =	(Repeat) Appears after the grade earned on a first attempt and indicates that the course has been repeated. Grades indicated with an "R" or followed by a ** are not used in calculating the cumulative GPA, but do count as attempted credits.
T =	(Transfer Credit) Credits are attempted and earned.
PR =	(Progressing) Indicates student eligibility to continue to the next term of a multiple term experience such as dissertation courses and internship. Credits are attempted and earned. However, PR grades will be changed to Pass only when the student completes all academic requirements for successful completion of dissertation courses or internship. Students who have not completed all requirements of the experience after enrollment in the minimum number of terms required or who have not remained continuously enrolled since the beginning of the course experience may need to enroll in additional credits. Credits are attempted and earned.
P =	(Pass) A grade of P, or Pass, is given for satisfactory completion of practica, final defense of dissertation, comprehensive exams, and internship. Credits are attempted and earned.
NP =	No Pass (No Pass-Unsatisfactory) A grade of NP is given for failure to complete practica, dissertation, comprehensive exams, and internship in a satisfactory manner. Credit is attempted but not earned.
I =	(Incomplete) See policy regarding grades of Incomplete. Credits are attempted but not earned.
W =	(Withdrawn) A grade of W is given when a student drops or is administratively dropped from a course after the add/drop period. Credit is attempted but not earned.
AU =	Audit. Credit is not attempted and is not earned.
TA =	Teaching Assistant (non-credit bearing).

Repeating Courses

When a course is repeated, the grade point average will be calculated based on the grade given in the most recent course. Both courses remain on the transcript. The first attempt is attempted but not earned, and will

count negatively toward successful completion rates once repeated. Students are required to repeat any course required for their degree program that they do not satisfactorily complete. Grades of NP, U, W, and WU are not satisfactory in any program. An overall minimum cumulative GPA of 3.00 or higher is a graduation requirement for all programs.

Exceptions to the limit on repeating courses must be reviewed and approved by the appropriate School Dean when a student presents compelling extenuating circumstances and is otherwise eligible to continue based on satisfactory academic progress requirements. Appeals should be sent to the Registrar's Office to be reviewed with the appropriate School Dean. The final written decision will be communicated by the Registrar's Office. Students wishing to repeat any coursework previously passed should refer to the *Tuition, Fees, and Financial Aid* section of the *Catalog*.

Repeating coursework in either the non-standard term format or non-term format may impact financial aid eligibility. Students should refer to the *Tuition, Fees, and Financial Aid* section of the *Catalog*.

Master's Level Programs:

A student may repeat any course with grades of NP, U, and WU once. A maximum of two different courses with grades of NP, U, and WU may be repeated. There is no restriction on the number of courses with a grade of C or C+ that may be repeated at the Master's level so long as other requirements of satisfactory academic progress are met.

Any courses repeated as part of a Graduate Certificate will be counted as repeated courses in a degree program if a student chooses to apply the Graduate Certificate coursework into a University of the Rockies degree program.

Master's level students who exceed the number of allowable NP, U, and WU grades within a 12 month period will be academically dismissed from their program of study.

Doctorate Level Programs:

A student may repeat any course with grades of C, C+, NP, U, and WU once. A maximum of two different courses with grades of C, C+, NP, U, and WU may be repeated. Grades of C and C+ will count towards meeting degree requirements; however, a student may

only receive a combination of two C, C+, NP, U, and WU grades at the Doctorate level.

Doctorate level students who exceed the number of allowable C, C+, NP, U, and WU grades will be academically dismissed from their program of study.

Doctor of Psychology, Clinical Specialization Program:

A student may repeat any course with grades of C, C+, NP, U, and WU once. A maximum of two different courses with grades of C, C+, NP, U, and WU may be repeated. Grades of C and C+ will count towards meeting degree requirements; however, a student may only receive a combination of two C, C+, NP, U, and WU grades in their program.

Doctorate level students who exceed the number of allowable C, C+, NP, U, and WU grades will be academically dismissed from their program of study.

Incomplete Grades Policy

Incomplete ("I") grades are issued at the discretion of the instructor and based upon compelling circumstances. The "I" grade appears on the grade reports and/or official transcripts. To issue a grade of "I" for a course, the following conditions must be met:

- The student's coursework to date in the course must be of passing quality. Incompletes will not be granted to students hoping to improve their grades.
- The student must send a formal request for the incomplete to the instructor. Incompletes requested in the last week of class will be denied, unless a compelling reason is addressed.
- The instructor must approve the plan presented by the student for satisfying the requirements of the course and meet attendance requirements for the course. Students must meet weekly attendance requirements through the end of the course.
- The student has up to one term (non-standard term) or 30 days (non-term), based on instructor discretion, from the last day of the course to finish his or her coursework, unless an extension is otherwise approved by the Dean of the appropriate School. If the student does not complete the work, his or her grade automatically

defaults to the grade earned as of the conclusion of the course.

- Regardless of a request for an incomplete grade, students are responsible for adhering to all program attendance policies. Incomplete grades will not be issued to students who have not met attendance requirements for the entire course.
- Students experiencing extreme temporary hardship during the last 33% of a course should request an incomplete grade through their instructor prior to the course end date. However, there may be extreme circumstances that prohibit a student from making this request prior to the conclusion of a course. To appeal for an "I" grade after the end date of a course, the student must fax or email the written grade appeal with official documentation of the hardship experienced. An incomplete grade or a grade of "W" may be approved and applied through the appeal process for the following documented reasons that directly impacted the student's ability to complete the course requirements or program during the last 33% of the course:
 - Documented military duty that resulted in an inability to continue in the course or program[^];
 - Documented personal or immediate family medical emergency*;
 - Documented act of nature;
 - Documented death in the immediate family*;
 - or
 - Documented temporary severe economic hardship.
- Students who are administratively dropped from a course for not meeting attendance requirements are not eligible to receive an "I" grade. Students who are not able to complete at least 67% of the course prior to requesting an incomplete grade are also ineligible.
- Due to required hours necessary for a particular term of a registered practicum and the multiple term experience for internship and dissertation courses, incomplete grades may not be issued for practicum, internship, or dissertation courses, with the exception of the final practicum or internship course in the series.

*Immediate family is defined as including spouse, domestic partner, civil union, grandparent, grandchild, mother-in-law, father-in-law, brother-in-law, sister-in-law, daughter-in-law, son-in-law, (step) mother, (step)

father, (step) brother, (step) sister, and (step) child. Additional considerations can be made on a case by case basis as determined by the University. Please contact grade.change@rockies.edu for specific consideration.

^ For information regarding *Readmission of Students After Military Service under the Higher Education Opportunity Act of 2008*, please reference this section in the *Catalog*.

Note: Please refer to the *Student Rights and Responsibilities* section in this *Catalog* for complete details on the University of the Rockies *Grade Appeals* policy.

Non-Degree Seeking Students

Students who wish to take a limited number of courses and do not wish to be enrolled in a degree program at University of the Rockies may enroll as non-degree seeking students (non-degree students or non-matriculated students) by completing an application for admission. Non-degree seeking students pay the standard tuition rate, are ineligible for financial aid, and are not reported as “in-school” for loan deferment purposes. Credit is granted when courses are successfully completed and all earned grades are recorded.

Applicants seeking to enroll in one or more courses as a non-degree seeking student are generally expected to meet the admissions requirements for the degree program through which the course(s) are offered including any prerequisite coursework required for an individual course. Admission requirements for enrolling in coursework as a non-degree seeking student are outlined specifically in the *Admission Policies and Requirements* sections of this *Catalog*.

Registering as a non-degree seeking student in no way guarantees or implies admission to a University of the Rockies degree program. Non-degree seeking students planning to formally apply for admission to a degree program should have their intended course selections reviewed by their Student Advisor or Registrar Advising Specialist to determine relevance and potential applicability to the program. Final determination of applicability will be reviewed and approved by the Registrar’s Office. Students who wish to apply non-degree seeking coursework to a

University of the Rockies degree program may apply up to 15 credits to a Master’s program and up to 12 credits to a Doctoral program.

Individuals who have previously matriculated at University of the Rockies but are not in attendance currently, those who previously have been denied regular admission, or those who have been dismissed or disqualified from University of the Rockies must petition the Provost and receive permission to register as a non-degree seeking student. Graduates of the University of the Rockies are generally permitted to register for continued coursework as non-degree seeking students.

The number of non-degree seeking students in any course may be limited. University of the Rockies reserves the right to limit courses for which a non-degree seeking student may register, as well as to assess the suitability of a non-degree seeking student for any course.

Schedule and Course Cancellation

University of the Rockies reserves the right to make adjustments to student schedules, including, but not limited to course dates, sequence, and modality as deemed necessary by University administration. Registration in a particular course section or with a specific instructor is not guaranteed.

University of the Rockies may cancel or postpone courses or programs as deemed necessary by the University. In such situations, the University will work with students in an effort to provide them with the opportunity to reschedule or to transfer to a comparable University course or program, if available. Any payments made for canceled courses will be refunded or applied to another University course or program. The University will make a reasonable attempt to notify affected students through various communication methods.

Any adjustments made to a student’s schedule, whether due to failing, repeating, dropping or administratively dropping a class, or taking unscheduled breaks may have academic and/or financial implications, including prior loan(s) entering the Grace/Repayment period with an effective date of the student’s last date of attendance. Students are strongly encouraged to consult with their Student

Advisor (online) or the Registrar's Office (Campus) to be advised on the implications of any potential schedule change. The Student Advisor or the Registrar's Office may recommend that the student request a break in attendance due to class availability.

Auditing a Course

With written permission of the Academic Department Chair and the course instructor, University of the Rockies students and graduates may audit an on-ground course offering for half of the current tuition if they have previously taken the course at University of the Rockies or another approved accredited institution of higher education. An audit of a course is for the purpose of reviewing theoretical material. An audit is not to be used in lieu of taking a course for credit. Although students who audit a course are not expected to take exams or write papers, they are expected to meet all of the attendance requirements and come to class prepared to participate in class discussions in order to receive audit credit. The instructor of record determines whether or not the term "audit" will be added to the student's transcript. No letter grade will be given for a course audit. University of the Rockies does not allow online course auditing due to the accelerated nature of course offerings and the unique nature of the online classroom environment.

Requests for Program Change

Students who are requesting a program change must submit any additional admission materials required for the new program of study. Students must meet admission requirements and complete all degree requirements in the current *Catalog* at the time of admission to the new program. Admission is not guaranteed. The University will determine the conditions under which the student may enroll and will convey those conditions to the student.

Changes in programs or specializations may result in the reduction of applicable transfer credit and total earned credits towards the completion of the degree. A reduction in total earned credits may also result in a decrease in the amount of financial aid for which the student may be eligible. Adding an additional specialization to a degree may also result in an increase in total program cost. Students changing or adding a specialization in a Master's degree program must do so prior to starting the final course in their

program. Students adding or removing a specialization may be required to complete a different set of core courses. To change or add a specialization, a student must complete an *Area of Study Declaration* form and may need to submit an updated application and sign a new enrollment agreement.

Completion of Additional Specializations

Students who wish to pursue an additional specialization within a degree program may do so by successfully fulfilling the requirements for that specialization. Coursework in the additional specialization must be completed within the normal timeframe for the degree. All specializations must be declared before completing all graduation requirements. After a degree has been conferred, additional specializations may not be declared.

Note: Specializations in General Psychology, Career Management and Counseling, and Sport and Performance Psychology can only be paired with each other.

Completion of Concurrent Degrees

Students may not enroll in more than one degree program concurrently at University of the Rockies. Students must complete one degree and be eligible before applying for an additional degree.

Completion of Additional Degrees

A student who has previously earned a degree at University of the Rockies, or an appropriately credentialed university, and wishes to earn an additional degree must fulfill all degree and graduation requirements applicable to the additional degree. Any credits applied to a previously awarded degree cannot be applied to a subsequent degree, except in the case of Master's degree credits towards the post-baccalaureate Doctor of Psychology, Clinical Specialization. In all other cases, if a student has completed coursework that fulfills content requirements for the additional degree, the student must complete additional courses to fulfill total credit requirements for the additional degree.

Degree Rescindment Policy

The University Registrar or designee processes all degree rescindments. A University of the Rockies degree may be rescinded when there is clear and convincing evidence that one of the following has occurred:

- A degree has been conferred in error;
- All University-defined requirements were not satisfied at the time the degree was granted;
- A previously awarded passing grade is reversed, resulting in unmet degree requirements; or
- Academic Misconduct, as defined in the Student Rights and Responsibilities section of this Catalog, is discovered by the University. In exceptional circumstances such as this, the University President may rescind the degree.

Withdrawal from the University

Official Withdrawal

University of the Rockies determines that a student is officially withdrawn when he or she requests to officially withdraw or takes an academic leave from the University. Online students wishing to officially withdraw from University of the Rockies must notify their assigned Enrollment Services Advisor, Student Advisor, or other advisor within the Enrollment Services or Student Services Department. Campus students wishing to officially withdraw must notify the Registrar's Office.

For official withdrawals, a student's withdrawal date is:

- The last documented date of academically related activity by the student (attendance is documented on a daily basis in courses utilizing online learning); or
- For independent study courses, in which the last date of academically related activity cannot be determined, the date the student begins the withdrawal process, or the date that he or she provides notice of his or her intent to withdraw. Independent study courses may include but are not limited to thesis, dissertation courses, practicum, and internship experiences.

Unofficial Withdrawal

University of the Rockies determines that a student is unofficially withdrawn when he or she falls into one of the following categories:

- Students who do not register for and attend the current term or course sequence;
- Students who fail to follow the proper procedures for requesting a break or who do not return from an approved break as scheduled; or
- Students who do not meet the minimum attendance requirements for the program as outlined in the current Catalog or Catalog Supplement.

For unofficial withdrawals, a student's withdrawal date is:

- The last documented date of academically related activity by the student (attendance is documented on a daily basis in courses utilizing online learning); or
- For independent study courses, in which the last date of academically related activity cannot be determined, the date of withdrawal will be the midpoint of the payment period up through the 60% point. Independent study courses may include but are not limited to thesis, dissertation courses, practicum, and internship experiences.

Transcripts

One official transcript of coursework is provided free of charge upon graduation. In addition, doctoral internship applicants are provided one official transcript free of charge. Directions on how to obtain additional transcripts, or transcripts needed before graduation, and information on the current transcript fee may be found at www.rockies.edu/transcript. Only official transcripts may be provided to third parties upon written consent from the student via the *Transcript Request* form. Students may print copies of their unofficial transcripts, free of charge, through the Student Portal. Transcripts will be withheld if a student has a transcript hold or is delinquent in his or her financial obligations to the University.

Graduate Programs Credit Maximum Policy

Non-Standard Term programs: MA degree maximum per academic year: 36; PsyD and PhD maximum per academic year: 36

Non-Term programs: MA degree maximum per academic year: 24; PsyD and PhD maximum per academic year: 36

Students may petition in writing to the Academic Department Chair for the level of program for an increase to the maximum number of credits they may attempt per academic year. The student must obtain written permission from the Academic Chair before the student may register for additional coursework. Students are encouraged to contact their Student Advisor (online) or Registrar Advising Assistant/Financial Aid Specialist (Campus) for advisement regarding scheduling and financial implications prior to petitioning to the Academic Department Chair.

Transfer Credits

A minimum of twenty five percent of a student's program must be taken at University of the Rockies in order for a student to earn a degree.

Students in the Doctor of Psychology, Clinical specialization program may transfer up to 36 semester hours when that coursework matches University of the Rockies' curricular offerings.

Courses accepted in transfer must come from a regionally accredited institution and be approved by the Provost or designee. Only courses with a grade of "B-" or above will be considered for transfer credit. Quarter credit hours will be converted to semester hours using the following formula: Quarter Credit Hours x 2/3 = Semester Credit Hours. The converted hours must be equivalent to at least 3 semester hours to be considered for applicability toward a University of the Rockies degree program.

Except in the case of the post-baccalaureate Doctor of Psychology, Clinical Specialization program, graduate courses cannot have been used to satisfy the requirements for a previous graduate degree, including University of the Rockies courses.

Applicable transfer credits will be applied to a student's record once all required official transcripts have been received and the student has been fully admitted.

University of the Rockies reserves the right to determine the relevancy of the transfer course content based on institutional catalog course descriptions, course syllabi, program level, and/or other satisfactory documentation. The University may determine that a

course cannot be transferred due to residency requirements, local laws, and/or program requirements. In addition, coursework completed more than 10 years prior to the date of admission is subject to review for currency and applicability to the current degree program. Please see the *Course Descriptions* section of this *Catalog* for courses that cannot be transferred into University of the Rockies.

Students are responsible for reviewing applied transfer credit. Students may submit a *Transfer Credit Appeal* form with appropriate documentation to request any prior credits completed outside of University of the Rockies to be re-considered for applicability toward a University of the Rockies degree program. Students earning credits outside University of the Rockies post-matriculation must submit an *Appeal to Apply Transfer Coursework Post-Matriculation* form for the credit to be considered for applicability toward their University of the Rockies degree program.

University of the Rockies has no articulation agreements with any other college or university.

Please refer to *Transfer of Clinical and Counseling Practicum Hours* in this section of the *Catalog* for transfer credit information related to practicum hours.

Non-Traditional Credits

University of the Rockies may accept non-traditional credit courses evaluated by American Council for Education (ACE) as a graduate-level equivalent on a course-by-course basis. Students will be responsible for requesting military transcripts and/or ACE transcripts that may include graduate-level equivalent courses in order to be officially evaluated for course-specific transferability.

Transfer of University of the Rockies Credits to Other Institutions

Because University of the Rockies is a regionally accredited institution, other institutions may elect to accept University of the Rockies credits. However, students should be aware that the transfer of credit is controlled by the receiving institution, and therefore cannot be guaranteed by University of the Rockies

unless part of a valid articulation agreement or included in an articulation numbering system.

Outside any formal partnership or agreement, students considering transferring to another institution have the responsibility to determine whether that institution will accept University of the Rockies credits. University of the Rockies does not imply, promise, or guarantee transferability of its credits to any other institution.

Reinstatement Process After Withdrawal (Less Than One Year)

Note: Service members should review the policy relating to Readmission of Students After Military Service under the Higher Education Opportunity Act of 2008 in this section of the Catalog.

Students who withdraw and/or are withdrawn from University of the Rockies may request reinstatement to the same degree/program in which they were enrolled at the time of withdrawal. Students seeking reinstatement to University of the Rockies should contact their Student Advisor for online programs and the Registrar's Office for on-ground programs. Students seeking reinstatement to a different degree/program must submit a new application required for the new program of study. Students must meet admission requirements and complete all degree requirements in effect for the program of study corresponding with the catalog year in which the student changed his or her program. Students who are out over 180 days must submit all required documentation and meet full admission status requirements, as outlined by the admission requirements for their program. Reinstatement is not guaranteed. If reinstatement is granted, University of the Rockies will determine any conditions under which the student may be reinstated and will convey those conditions in writing. Students who are readmitted are subject to the policies set forth in the *Catalog* and in effect at the time of readmission.

Readmission Process After Withdrawal (One Year or More)

Note: Service members should review the policy relating to Readmission of Students After Military Service under the Higher Education Opportunity Act of 2008 in this section of the Catalog.

Students who withdraw and/or are withdrawn from University of the Rockies for one year or more and are seeking readmission to the same or a different degree/program must submit a new application. This process is to ensure that the University has current demographic information for each student. If the student has continued his or her education at another school since leaving the University, official transcript(s) from any other college attended should be submitted to the Registrar's Office. Students must submit all required documentation, meet full admission requirements as outlined by the admissions requirements for their program, and complete all degree requirements in effect for the program of study at the time of readmission. Readmission is not guaranteed. If readmission is granted, the University will determine the conditions under which the student may re-enroll and will convey those conditions to the student in writing. Students who are readmitted are subject to the policies set forth in the *Catalog* and in effect at the time of readmission. Students seeking reinstatement to University of the Rockies should contact the Admissions department.

Military Deployment Provisions

A student who is a member, or the spouse of a member if the member has a dependent child, of the national guard or reserve forces of the United States and who is ordered to state military service or federal service or duty is entitled to the following provisions for each course the student is attending:

- a. Students may withdraw from any current course(s) and receive a tuition credit to be applied in the amount of tuition accrued in the current course(s). Students will be assigned a withdrawal grade that does not count

negatively against Satisfactory Academic Progress

b. Students may make arrangements with instructors for course grades or administratively request a grade of incomplete by submitting any of the request forms named below. If such arrangements are made, tuition shall be assessed for the course(s) in full.

c. Students who withdraw from the institution due to military service are allotted a one-year grace period for collection of any institutional balances owed. This grace period does not apply to repayment of federal student loans which are subject to Title IV repayment regulations.

Students who request to drop any current course(s) due to military necessity and do not need to request a break in attendance should submit a *Military Course Drop/Incomplete Request*.

Students who request a break in attendance of 45 days or greater due to military necessity may do so by submitting a *Military Withdrawal Request*. This request form also facilitates withdrawal from any current course(s), if necessary.

Both request forms are available in the Student Portal.

Readmission of Students After Military Service under the Higher Education Opportunity Act of 2008

University of the Rockies does not deny readmission to a service member of the uniformed services for reasons relating to that service. Students who meet the criteria outlined in the following will be readmitted with the same academic status as the student had when he or she last attended University of the Rockies. An affected service member is any individual who is a member of, applies to be a member of, or performs, has performed, applies to perform, or has the obligation to perform, service in the uniformed services. Service in the uniformed services means service, whether voluntary or involuntary, in the Armed

Forces, including service as a member of the National Guard or Reserve, on active duty, active duty for training, or full-time National Guard duty under Federal authority, for a period of more than 30 consecutive days under a call or order to active duty of more than 30 consecutive days.

Any student whose absence from University of the Rockies is necessitated by reason of service in the uniformed services is entitled to readmission if all of the following apply:

- the student (or an appropriate officer of the Armed Forces or official of the Department of Defense) gives advance written or verbal notice of such service to University of the Rockies' Registrar's Office and provides such notice as far in advance as is reasonable under the circumstances;
- the cumulative length of the absence and of all previous absences from University of the Rockies by reason of service in the uniformed services, including only the time the student spends actually performing service in the uniformed services, does not exceed five years; and
- except as otherwise provided in this section, the student submits a verbal or written notification of intent to re-enroll at University of the Rockies by informing a Student Advisor, an Enrollment Services Advisor, Admissions Counselor, or the Registrar's Office, or by submitting a new application for admission.

However, no advance notice by the student is required if the giving of such notice is precluded by military necessity, such as a mission, operation, exercise, or requirement that is classified; or a pending or ongoing mission, operation, exercise, or requirement that may be compromised or otherwise adversely affected by public knowledge.

In addition, any student (or an appropriate officer of the Armed Forces or official of the Department of Defense) who did not give advance written or verbal notice of service to a Student Advisor, an Enrollment Services Advisor, Admissions Counselor, or the Registrar's Office may meet the notice requirement by submitting, at the time the student seeks readmission, an attestation to University of the Rockies that the student performed service in the uniformed services that necessitated the student's absence from University of the Rockies

When determining the cumulative length of the student's absence for service, the period of service does not include any service:

- that is required, beyond five years, to complete an initial period of obligated service;
- during which the student was unable to obtain orders releasing the student from a period of service in the uniformed services before the expiration of the five-year period and the inability to obtain those orders was through no fault of the student; or
- performed by a member of the Armed Forces (including the National Guard and Reserves) who is:
 - ordered to or retained on active duty under section 688, 12301(a), 12301(g), 12302, 12304, or 12305 of Title 10, U.S.C., or under section 331, 332, 359, 360, 367, or 712 of Title 14, U.S.C.;
 - ordered to or retained on active duty (other than for training) under any provision of law because of a war or national emergency declared by the President or the Congress as determined by the Secretary concerned;
 - ordered to active duty (other than for training) in support of an operational mission for which personnel have been ordered to active duty under section 12304 of Title 10, U.S.C. as determined by the Secretary concerned;
 - ordered to active duty in support of a critical mission or requirement of the Armed Forces (including the National Guard or Reserves) as determined by the Secretary concerned; or
 - called into Federal service as a member of the National Guard under chapter 15 of Title 10, U.S.C., or section 12406 of Title 10, U.S.C.

An affected service member must, upon the completion of a period of service in the uniformed services, notify University of the Rockies of his or her intent to return to University of the Rockies not later than three years after the completion of the period of service. However, a student who is hospitalized for or convalescing from an illness or injury incurred in or aggravated during the performance of service in the uniformed services must notify University of the Rockies of his or her intent to return to University of the Rockies not later than two years after the end of the period that is necessary for recovery from such illness or injury. A student who fails to apply for readmission

within the required period does not automatically forfeit eligibility for readmission to University of the Rockies, but is subject to the established University of the Rockies' general policies and practices.

A student who submits an application for readmission to University of the Rockies must provide to University of the Rockies documentation to establish that:

- the student has not exceeded the specified service limitations; and
- the student's eligibility for readmission has not been terminated due to the occurrence of:
 - a separation from the Armed Forces (including the National Guard and Reserves) with a dishonorable or bad conduct discharge.
 - a dismissal of a commissioned officer permitted under section 1161(a) of Title 10, USC by sentence of a general court-martial; in commutation of a sentence of a general court-martial; or, in time of war, by order of the President.
 - a dropping of a commissioned officer from the rolls pursuant to section 1161(b) of Title 10, USC due to absence without authority for at least three months; separation by reason of a sentence to confinement adjudged by a court-martial; or, a sentence to confinement in a federal or state penitentiary or correctional institution.

In order for a service member to qualify for these benefits by reason of service, a student must submit appropriate documentation to the University. Documents that might establish service member eligibility include, but are not limited to:

- DD214—Certificate of Release or Discharge from Active Duty;
- Copy of duty orders prepared by the facility where the orders were fulfilled with a service completion endorsement;
- Letter from the Commanding Officer of a Personnel Support Activity (or someone of comparable authority);
- Certificate of completion from military training school;
- Discharge certificate showing character of service;
- Copy of extracts from payroll documents showing periods of service; or

- Letter from National Disaster Medical System (NDMS) Team Leader or Administrative Officer verifying dates and times of NDMS training or Federal activation.

University of the Rockies may not delay or attempt to avoid a readmission of a student under this section by demanding documentation that does not exist, or is not readily available, at the time of readmission.

Students who meet the criteria for readmission after military service outlined previously will be promptly readmitted with the same academic status as when they last attended or were last admitted to the institution, but did not begin attendance because of that membership, application for membership, performance of service, application for service, or obligation to permit service. "Same academic status" means that University of the Rockies shall admit the student:

- to the same program to which he or she was last admitted, or, if that exact program is no longer offered, the program that is most similar to that program, unless the student requests or agrees to admission to a different program;
- at the same enrollment status that the student last held at University of the Rockies, unless the student requests or agrees to admission at a different enrollment status;
- with the same number of credit hours completed previously by the student, unless the student is readmitted to a different program to which the completed credit hours are not transferable;
- with the same academic standing the student previously had; and
- if the student is readmitted to the same program, for the first academic year in which the student returns, the student will be assessed the same tuition and fees that would have been in effect had the student continued their education uninterrupted. Previous tuition rate eligibility terminates upon completion of the academic year.

If the student is admitted to a different program, University of the Rockies will assess no more than the tuition and fee charges that other students in the program are assessed for that academic year.

If University of the Rockies determines that the student is not prepared to resume the program, or will not be able to complete the program, the University will make reasonable efforts at no extra cost to the student to

help the student become prepared or to enable the student to complete the program, including but not limited to providing refresher courses at no extra cost to the student, and allowing the student to retake a pretest at no extra cost to the student.

University of the Rockies is not required to readmit the student on his or her return if:

- after reasonable efforts by the University, the University determines that the student is not prepared to resume the program at the point where he or she left off;
- after reasonable efforts by the University, the University determines that the student is unable to complete the program;
- or the University determines that there are no reasonable efforts it can take to prepare the student to resume the program at the point where he or she left off or to enable the student to complete the program.

Department of Defense (DoD) Voluntary Education Partnership

University of the Rockies is a participating institution in the Voluntary Education Partnership with the DoD. In accordance with this partnership, any Active Duty, National Guard, or Reservist student who attends the University will receive a military degree plan within 60 days after the individual has been accepted for admission.

The student will receive a Military Degree Plan with the evaluation of previous coursework received and the requirements for the degree program selected.

The Military Degree Plan affords the student the opportunity to complete the degree requirements within the enrolled degree program within five (5) years of the issued date without the loss of academic progress. Students who choose to change their degree program will forfeit the issued degree plan and be reissued a new Military Degree Plan for the new program.

In-Residence Workshop

Doctoral students have an In-Residence Workshop requirement as part of the Doctoral programs,

excluding Doctor of Psychology, Clinical Specialization. The In-Residence Workshop Series prepares students for their Doctoral Capstone, dissertation, and post-doctoral experiences. These interactive in-person sessions offer students an opportunity to meet and collaborate with colleagues and faculty.

The Workshops include three in-residence weekend workshops in Denver, Colorado as part of their graduation requirements. Students may elect to enroll in an optional fourth in-residence workshop. The face-to-face setting of the in-residence weekends allows students the opportunity to meet faculty and administration as well as to interact closely with other students. In-residence weekend workshops will be scheduled no less than four times per year for students to enroll in the appropriate workshop. Due to the unique nature of the in-residence experience, students are expected to attend the full sixteen (16) hours of instructional time for each in-residence weekend workshop. Failure to attend 90% or greater, at least fourteen (14) hours, of the instructional time during the in-residence session will result in the student being withdrawn from the workshop and required to repeat it.

In-Residence Workshops are scheduled concurrently with other courses. Students experiencing extreme temporary hardship that precludes him or her from completing the workshop as scheduled may submit an In-Residence Workshop Schedule Appeal.

In-Residence Workshop 1

This interactive workshop contributes to a student's commitment toward lifelong learning. As practitioners, leaders, and scholars, students will engage in self-awareness and learn to become active participants in supporting their personal, professional, and academic goals. Students will consider what it means to be a participant of a scholarly community, and how becoming a scholar-practitioner can impact the students' professional community and future goals. Students will engage in the scholarly skills of writing, critical thinking, and research as they learn how to explore topics within their own discipline. Students will formulate questions and provide structured responses, discuss the results and impact of data, recognize the need and scope of research problems, and search for scholarly articles and documents. The dissertation process will be introduced as students will connect their dissertation preparation to the rest of their scholarly journey. In-Residence Workshop 1 will be scheduled following the completion of 2-6 courses.

In-Residence Workshop 2

In the second workshop of the In-residence series, students will continue to build on scholarly competencies, focusing on critical thinking skills and developing more advanced research skills involving assessment and feedback. Through discussion, assessment, feedback, and reflective activities, students will learn a variety of skills, both insight- and action-based, with a core focus on critically assessing oneself and others in order to serve as leaders and scholars in their communities of practice. Students will evaluate a problem statement, critique a scholarly paper, interpret data, and synthesize ideas through the development of a literature review. In-Residence Workshop 2 will be scheduled following the completion of 7-12 courses.

In-Residence Workshop 3

In the third workshop of the In-residence series, students will continue to build on scholarly competencies with clarity and accuracy about data or complex ideas, focusing on the dissertation process and how this definitive scholarly product supports the community in which students serve. As leaders in scholarship and in their communities, it becomes increasingly essential for students to recognize the complexity of the people with whom they interact. In this advanced workshop, students explore their understanding of different populations and the impact of diversity on their research and professional experiences by creating relevant questions. Students will learn to write a problem statement as well as a scholarly paper with a focus on the ethical and legal access and use of information. Students will further explore how to generate, and implement new knowledge as well as create visuals of data in a variety of contexts for scholarly and professional application. In-Residence Workshop 3 will be scheduled following completion of 13+ courses and prior to enrolling in Dissertation Planning I.

In-Residence Workshop 4 (Optional)

This workshop is optional. The session provides an opportunity for students to return to the University of the Rockies community to support the dissertation process, specifically enhancing the quality of their research question, research design, methodology, and/or the analysis. This open-forum, community-based workshop provides the setting to support student-faculty interaction and personalized solutions in assisting students who desire additional face-to-face support.

Note: Attending and completing an In Residence Workshop outside of concurrent coursework does not meet the criteria to establish Title IV financial aid eligibility. A financial aid student considering this option should contact their advisor to discuss the impact on loan repayment.

In-Residence Workshop Schedule Appeal

Students experiencing extreme temporary hardship may be approved to extend the requirement to attend an in-residence workshop within the academic year it is scheduled. In-Residence Workshop Schedule Appeals may be approved for the following documented reasons that directly impacted the student's ability to complete the scheduled requirement

- Documented military duty that resulted in an inability to continue in the course or program[^];
- Documented personal or immediate family medical emergency*;
- Documented act of nature;
- Documented death in the immediate family*;
- Documented temporary severe economic hardship.

[^] For information regarding Readmission of Students After Military Service under the Higher Education Opportunity Act of 2008, please see the General Academic Policies and Information section of this Catalog.

*Immediate family is defined as including husband, wife, domestic partner, grandparent, grandchild, mother-in-law, father-in-law, brother-in-law, sister-in-law, daughter-in-law, son-in-law, (step/adoptive) mother, (step/adoptive) father, (step/adoptive) brother, (step/adoptive) sister, and (step/adoptive) child. Additional considerations can be made on a case by case basis as determined by the University. Please contact the appropriate Dean for specific consideration.

In-Residence Workshop Schedule Appeals may be submitted in writing to the appropriate Academic Department Chair for the level of program explaining in detail the extenuating circumstances precluding the student from attending the workshop as scheduled. Students may submit only one appeal during the course of their degree program.

PsyD, Clinical Specialization Residency Requirement

Licensing boards may require that a student, during the course of his or her Doctoral program, be enrolled for at least three academic years of study from the degree-granting institution, and at least one year must be in full-time residence. To satisfy this residency requirement, University of the Rockies requires students to complete full-time enrollment of six semester hours or more of regular coursework for five consecutive terms (one year). Students should be aware that this is a requirement for graduation.

Students may petition to take fewer than the previously mentioned hour requirement, but they must be aware that doing so may delay Comprehensive Exams, and therefore delay program completion. Comprehensive Examinations are administered at designated intervals only.

Student Professional Liability Insurance Requirements

Students accepted into the Master of Arts in Counseling, Marriage, Couples, and Family Counseling or Clinical Mental Health Counseling Specializations, or the Doctor of Psychology (PsyD), Clinical Specialization degree programs are required to have proof of professional liability insurance in order to register for their first term of practicum. Due to the liabilities associated with direct care, students need to be insured during clinical practicum and internship training. Professional liability insurance can be purchased from one of several insurance carriers. Students are required to provide proof of coverage to the Director of Clinical Training (DCT). The DCT will notify the Registrar's office of anyone that should be disenrolled from a practicum or internship experience for failure to provide proof of or maintain the appropriate insurance coverage.

Memberships in Professional Organizations

After admission to the Master of Arts in Counseling, Marriage, Couples, and Family Counseling Specialization or Clinical Mental Health Counseling Specialization, or the Doctor of Psychology (PsyD), Clinical Specialization programs, students are required to join their respective professional organization (i.e., for the Clinical Mental Health Counseling Specialization, the American Counseling Association; for the Marriage, Couples, and Family Counseling Specialization, the American Association of Marriage and Family Therapy; and for the PsyD, Clinical Specialization, the American Psychological Association). University of the Rockies will credit the base annual student-rate membership dues for students who were actively enrolled at the time they joined the organization. Active students who submit a receipt for the required student-rate annual dues will receive a credit that can be applied to the next term's tuition.

Memberships in other professional associations remain the individual student's responsibility. Membership in a professional organization is not a substitute for professional licensure in any state.

Clinical Practicum or Counseling Practicum or Internship

A Clinical Practicum (minimum of 1,500 hours) is required for all students in the PsyD, Clinical Specialization program. Students who enter the program with a clinical Master's degree may receive credit for up to 700 hours of practicum. The number of transferable practicum hours is determined by the University Registrar in consultation with the Director of Clinical Training. Students in the Master of Arts in Counseling program are required to complete a total of 700 hours of practicum and internship.

Students who are completing a practicum or counseling internship in Colorado must obtain registration with the Colorado Department of Regulatory Agencies (DORA) prior to beginning their practicum experience at the University, and all mental

healthcare specialization students in the School of Professional Psychology must have personal liability insurance prior to beginning practicum. Students will be required to provide documentation of registration with DORA if they are completing practicum hours in Colorado, and documentation of a current professional liability policy for all clinical or counseling practicum experiences.

The Practicum experience gives students the opportunity to integrate Core Competencies, Clinical Proficiencies, and academics as they apply their learning in a real world clinical setting. Students build the skills they will need to be successful in the mental health profession. The Practica also give students the chance to discover the clinical relationship skills and techniques that work for them in the clinical setting and the client populations with which they are most effective. The level of professionalism and enthusiasm, with which students approach their practica, has a direct bearing on their success and the quality of their learning experience.

In the Clinical Practica, students must understand their professional obligations to clients and to the University. They must strive to maintain appropriate relationships and demeanor whenever clients are present. As the American Psychological Association (APA) Code of Conduct states, "Psychologists uphold professional standards of conduct, clarify their professional roles and obligations, accept appropriate responsibility for their behavior, and adapt their methods and needs to different populations."

Students in the PsyD, Clinical Specialization complete Clinical Practicum requirements in community settings with the approval of the Director of Clinical Training. Supervision must be provided by a licensed psychologist who is credentialed and approved by the Director of Clinical Training.. These supervisors agree to be in regular communication with the Director of Clinical Training. Students in the Master of Arts in Counseling program also complete their Practicum and Internship hours in community settings, with the approval of the Director of Clinical Training. Supervision for MA Counseling students should be provided by licensed mental health professionals, including those with doctorates in Counselor Education and Supervision, those with a Master's Degree in Counseling who are Licensed Professional Counselors, or by those who are licensed psychologists, as approved by the Director of Clinical Training

Transfer of Clinical and Counseling Practicum Hours

University of the Rockies may accept up to 700 hours of clinical practicum or up to seven semester credits from approved accredited institutions when those practicum hours are demonstrated to be from a clinical psychology doctoral program that has similar standards of training as University of the Rockies. In such cases, the student must take at least an additional 800 hours of clinical practicum in the University of the Rockies Doctor of Psychology, Clinical Specialization program. Final determination of the acceptance of practicum hours will be made by the Director of Clinical Training.

For students in the Master of Arts in Counseling program, University of the Rockies may accept up to 300 hours of practicum or internship or up to three semester credits from approved accredited institutions when those practicum or internship hours are demonstrated to be from a Master of Arts in Counseling program (with a Clinical Mental Health Counseling or Marriage, Couples, and Family Counseling Specialization or equivalent degree) that has similar standards of training as University of the Rockies. In such cases, the student must take at least an additional 400 hours of practicum and/or internship in the University of the Rockies Master of Arts in Counseling, Clinical Mental Health Counseling or Marriage, Couples, and Family Counseling Specialization program. Final determination of the acceptance of practicum hours will be made by the Director of Clinical Training.

Personal Therapy Requirement

The University of the Rockies faculty understands that as a part of becoming a professional counselor or marriage and family therapist one needs to be aware of his or her biases, beliefs, and challenges. Therefore, each student in the Master of Arts in Counseling, Marriage, Couples, and Family Counseling or Clinical Mental Health Counseling Specializations, or the Doctor of Psychology (PsyD), Clinical Specialization program is required to participate as a client in psychotherapy with a licensed mental health professional. Being a client can be a growth

experience as well as an educational opportunity for the graduate student.

For Master's students, the requirement is met through a minimum of 20 hours or sessions of psychotherapy over a minimum of 20 weeks. For Doctoral students, the requirement is met through a minimum of 30 hours or sessions of psychotherapy over a minimum of 30 weeks. Fifteen of the acquired therapy hours or sessions must be with the same mental health professional. At least 20 of the hours must be in an individual modality. Students may apply up to 18 hours of personal therapy if they have acquired them within the preceding five years with a licensed mental health professional.

University of the Rockies considers 30 hours a minimum number of therapy hours over a minimum of 30 weeks and encourages additional sessions if the student believes it would be of benefit personally or professionally. A requirement of additional hours of therapy may also be a part of a student's development plan designed by the student and his or her advisor or other student support or administrative offices. An additional therapy requirement may also be imposed by the University.

Therapy must be conducted by a licensed mental health professional contingent, who is not a University of the Rockies faculty member. Verification of participation must be indicated in a letter, on the letterhead of the licensed mental health professional, stating the number of sessions and hours spent in therapy, the period of time over which the therapy occurred, and the modality of the therapy. Diagnosis and treatment issues discussed in therapy must not be included in the letter. Verification must be sent to the Registrar's Office and must be on file at the time the student takes his or her Doctoral Comprehensive Examination. Therapy fees are the responsibility of the student and are not covered by tuition.

Doctoral Candidacy

Students will be eligible to apply for doctoral candidacy in Doctor of Psychology (PsyD), Clinical Specialization after they have completed the following:

1. Passed the Doctoral Qualifying Exam,
2. Completed 300 hours of practicum experience, and
3. Had an acceptable annual review of student progress.

Candidacy is officially conferred by the President of the Faculty Council upon recommendation by the student's Faculty Mentor. An appeal of the candidacy decision may be made to the Provost.

Comprehensive Examinations

Doctor of Psychology (PsyD), Clinical Specialization

The PsyD, Clinical Specialization has two stages of Comprehensive Exams – a Doctoral Qualifying Exam and a Doctoral Comprehensive Exam.

Doctoral Qualifying Exam

The Doctoral Qualifying Exam is an objective assessment of students' knowledge of coursework content from the first 39 credits of the curriculum.

Eligibility:

The Doctoral Qualifying Exam can be taken after the completion of the first 39 credits of coursework (6 terms) and must be successfully completed before the third year of coursework. Students must obtain approval to take the Doctoral Qualifying Exam from their Faculty Mentor and the University Registrar. Students who entered the program with a Master's degree must take the Doctoral Qualifying Exam prior to their second year of study in the PsyD, Clinical Specialization at University of the Rockies.

Doctoral Comprehensive Exam

The Doctoral Comprehensive Exam is a summative assessment procedure that assesses students' knowledge of the field of clinical psychology, their ability to diagnose and conceptualize clinical cases, and to present this information in both oral and written formats. This examination must be passed prior to beginning Pre-Doctoral Internship.

Eligibility:

Once students have successfully completed the Doctoral Qualifying Exam, achieved Doctoral Candidacy status, completed all required coursework, and submitted documentation of their 30 hours of personal therapy, they may apply to their Faculty Mentor and the University Registrar for approval to take the Doctoral Comprehensive Exam.

Student Research Policy

Unless authorized by the University, the University prohibits students from conducting formal research using institution-related data at University of the Rockies, Ashford University, or Bridgepoint Education, including conducting retrospective or prospective research, with the intent to disseminate or publish.

Students may conduct dissertation and non-dissertation research using University of the Rockies data about faculty, staff, former students or current students contingent on receiving approval from the Institutional Review Board. Conducting dissertation or non-dissertation research without appropriate Research Review Board or Institutional Review Board approval is an Academic Integrity violation and could result in a sanction.

Any research published based on University of the Rockies data requires approval from the Provost, Legal, and Institutional Research. In addition, disseminated findings must protect the identity of our institution by referring to University of the Rockies with a pseudonym.

Surveys, interviews, and focus groups associated with course assignments may, except for assignments related to dissertation courses, be administered by students to University of the Rockies' students, faculty, staff, or external parties only with explicit approval of the University of Rockies' faculty member teaching the class.

Students working on dissertations should refer to the *Dissertation Handbook* for further guidance.

For additional information on policy related to research, please see *Unapproved Research* as a part of *Academic Integrity Violations* in the *Student Rights and Responsibilities* section of this *Catalog*.

Dissertation

As a requirement for graduation from University of the Rockies with a degree of Doctor of Philosophy (PhD) or Doctor of Psychology (PsyD), each student must complete and successfully defend a dissertation. The purpose of the Dissertation is to ensure that the student has mastered the ability to pursue a systematic investigation, which examines significant issues or problems in applied psychology. The Dissertation requirement is also designed to contribute

to the student's knowledge, skills, and research expertise in psychology. Students choose a topic that addresses carefully chosen research questions that the student then investigates with quantitative or qualitative research, with a meta-analysis, or with a program design or program evaluation.

Students are enrolled in Dissertation for five credits. Students not completing their dissertation during that period and not enrolled in any other course or internship (for PsyD, Clinical Specialization students) will register in Dissertation Extension to remain in the program.

Students are urged to plan carefully and allow approximately 8 weeks (individual experiences will vary) for the time required to complete all remaining steps in the dissertation process after the Final Oral Defense.

Prerequisites, timelines for completion, and attendance requirements for Dissertation, as well as a detailed explanation of each step in the process, are described in the *Dissertation Handbook*.

Student Portfolio

Students are encouraged to create portfolios during the course of their program to showcase their best work and to have a document to utilize and submit when applying for internships, post-doctoral programs, or for employment.

Graduation

A final step in the graduation process is the submission of a *Petition to Graduate* form to the Registrar's Office. This triggers an audit of the student's record to ensure that he or she has met all requirements for graduation at the intended time. After the student has completed the final term of his or her program, his or her name, upon recommendation of the faculty, is submitted to the University of the Rockies Board of Trustees. Formal graduation ceremonies are held once a year. Students are encouraged to attend graduation unless prohibited by military orders or serious illness.

The date of degree conferral recorded on the student's transcript and diploma will reflect the end of the term in which the student completes all degree requirements. Degree completion is generally recorded on a student's official transcript within 30 days of successful

completion of ALL program requirements being recorded. Diplomas are generally ordered within 30 days of successful completion of all program requirements being recorded and payment of all related tuition and fees. Ordered diplomas may take an additional six (6) to eight (8) weeks to arrive. Diplomas, certificates, transcripts, and verifications of degrees awarded will be withheld until all accounts at the University are paid in full. Diplomas will not be issued at the graduation ceremonies.

Diplomas are ceremonial documents and reflect the degree the student earned and the date of degree conferral. The official academic record of a student's achievement is the transcript, which reflects the degree earned, any specializations the student completed, and the date of degree conferral.

Commencement Ceremony

Submission of the completed *Petition to Graduate* form is a requirement for participation in University of the Rockies' commencement ceremony. To be eligible to participate in commencement, students must be scheduled to meet all degree requirements prior to the date of commencement at the time of the submission. Exceptions will be reviewed by the University Registrar or designee. Commencement is held once a year. The deadline for petitioning to participate in the ceremony is published on the *Petition to Graduate* form. Petitions received after the deadline will be forwarded to the next commencement date.

Posthumous Degree Policy

The University may grant Master's and Doctoral degrees posthumously. When the University determines that a deceased student was in good standing and had completed enough credits towards a degree, the President, or designee, has the authority to grant the degree posthumously.

Typically, students pursuing a Master's degree should have successfully completed the majority of their coursework (within 9 credits of meeting degree requirements) for the program of study and students pursuing a Doctorate degree should have successfully completed all course requirements and completed the preliminary oral defense of their dissertation.

Formal requests may be submitted in writing to the Registrar's Office for consideration by emailing student.records@rockies.edu.

Section Seven: Academic Policies - Non-Standard Term Format

The policies included in this section of the Catalog apply to students in degree programs delivered in the non-standard term format.

Non-Standard Term Format

The Master of Arts in Counseling, Master of Arts in Psychology (Career Management and Counseling, Sport and Performance Psychology, and General Psychology specializations), the Doctor of Psychology, Clinical specialization and all programs offered in Colorado Springs operate in a “non-standard term” format. In the non-standard term format, students typically take 2 classes at a time. Each term is nine weeks in length

Academic Calendar

Term Schedule for Academic Years 2016-2017

August 2016 Term	August 2, 2016 – October 3, 2016
October 2016 Term	October 11, 2016 – December 12, 2016
January 2017 Term	January 3, 2017 – March 6, 2017
March 2017 Term	March 14, 2017 – May 15, 2017
May 2017 Term	May 23, 2017 – July 24, 2017

Continuous Enrollment

Matriculated students must be continuously enrolled from the time of matriculation through graduation. Students who must take time off due to medical or family emergency or military deployment may apply for an *Academic Leave* from the University. Please reference the *Academic Leave* policy in this section of this *Catalog* for more information.

Level of Enrollment

Full-Time: 6 or more credit hours per term, or registered for dissertation courses, or pre-doctoral internship.

Half-Time: 3-5 credits per term, or registered in counseling practicum/internship.

Less Than Half-Time: Fewer than 3 credits per term.

Retaking coursework previously passed at University of the Rockies may reduce the enrollment status of a student. Students should refer to the *Tuition, Fees, and Financial Aid* section of this *Catalog* for additional information or contact the Financial Aid Office.

Registration

Registration is conducted annually over several weeks to allow time for students to meet with their Faculty Mentors and/or the Registrar’s Office as needed. Once registration has closed, changes to schedules should be made two weeks before the start of each term. Students wishing to obtain an official copy of their schedule can download it from their Student Portal. Courses will be filled on a first-come, first-served basis. The University reserves the right to cancel any course due to low enrollment or for other reasons.

Course Delivery

On-Ground Courses

The University offers courses and programs for non-standard term format on evenings and weekends. Students should expect to take both evening and weekend format courses during the length of their program.

Online Courses

Specific weekly log-in requirements are built into the design of each course and monitored over the Internet through the online learning platform. The course structure allows students to take the initiative to learn weekly content on their own time and provides carefully developed learning activities that allow students to optimize their knowledge processing/application efforts. Course outcomes are clearly stated and assessed through multiple measures.

Directed Study Courses

Directed Study courses are courses with five or fewer students and may involve a student working one-on-one with a faculty member. Directed Study courses are offered when students have been unable to take a course during one of the regularly scheduled course times due to course cancellations, small cohort size, or course scheduling conflicts beyond student control. Ground based students are not eligible for a Directed Study course if they missed the regularly scheduled class because they took an elective class or because they chose not to take the course at the regularly scheduled time. Depending upon faculty availability, students may be eligible to take a Directed Study course if they missed the regularly scheduled class due to health reasons. Ground based students requesting a Directed Study must obtain written approval from the Academic Chair prior to seeking permission from a faculty member. Students complete the process by registering for the course with the Registrar's Office.

Independent Study

If an on-ground student wishes to take an elective course that is outside the standard curriculum for the student's program, the student may petition to take a course as Independent Study. Independent study courses may not replace courses specifically required in a degree program or specialization.

Independent Study courses are developed by the student in conjunction with a faculty member. Students interested in Independent Study should begin by discussing this option with the Academic Chair, who will obtain the consent of the instructor who is best qualified to teach the course. The Academic Chair makes the final determination concerning a faculty member's qualifications to teach the course. The instructor develops the course syllabus to meet the student needs and in line with University of the Rockies procedures, and consults on textbook selection. Students will not be allowed to apply more than 9 credits of independent study coursework to a degree.

Maximum Course Load

The normal course load at University of the Rockies is six semester credit hours per term. Students may request to take an additional course. In order to do so, a student must petition the Academic Chair in which he or she is enrolled and receive written permission. In

some cases a student's program may require him or her to take an additional course in a given term. In these cases, students do not need to petition. Students registered for Clinical, Counseling, or Professional Psychology Practicum who wish to register for more than one credit of practicum in a term must obtain permission from the Director of Clinical Training. In no case will a student be allowed to take more than 10 credit hours in one term.

Non-Standard Term Format Attendance Policy (Ground)

Students are expected to attend all classes in which they are enrolled. If a student has a compelling reason to be absent from a class, he or she must discuss that absence in advance with the instructor. Students are responsible for any work they miss because of an absence. Faculty members will keep accurate records of student attendance and report attendance to the Registrar's Office at the end of each class.

Students may not miss the first class session in a course unless they have prior written permission from the instructor teaching the course. Students are responsible for arranging to obtain class materials and assignments for the class time they miss.

Students may not attend classes for which they are not officially enrolled. If students who are not listed on the class roster attend a class, the instructor will refer them to the University Registrar or designee for proper enrollment. Whether or not to allow the student to remain in the class for that session is left to the discretion of the course instructor.

Evening Courses: Students enrolled in evening courses are allowed a maximum of two absences from a 3 credit course. Students who fail to attend a third evening will be administratively dropped from the course. Students enrolled in evening courses worth credits other than 3 semester credits will be administratively dropped from the course if they miss 1/3 of the scheduled class time.

Weekend Courses: Students enrolled in weekend courses are allowed a one-day absence per 3 credit course. Students who fail to attend a second day of the course will be administratively dropped from the course. Students enrolled in a weekend course worth

credits other than 3 semester credits will be administratively dropped from the course if they miss 1/3 of the scheduled class time

Additional absences may be approved by the appropriate Academic Chair for the following reasons:

- Documented military duty that resulted in an inability to continue in the course or program^;
- Documented personal or immediate family medical emergency*;
- Documented act of nature;
- Documented death in the immediate family*;
- Documented temporary severe economic hardship.

Students who do not attend at least once in any 14 consecutive day period will be administratively withdrawn from the University by the Registrar's Office retroactive to the last date of recorded attendance.

^For information regarding *Readmission of Students After Military Service under the Higher Education Opportunity Act of 2008*, please see the *General Academic Policies and Information* section of this *Catalog*.

*Immediate family is defined as husband, wife, grandchildren, (step/adoptive) mother, (step/adoptive) father, (step/adoptive) brother, (step/adoptive) sister, (step/adoptive) child, mother-in-law, father-in-law, brother-in-law, sister-in-law, daughter-in-law, son-in-law, or grandparent. Additional considerations can be made on a case by case basis as determined by the University. Please contact student.records@rockies.edu for specific consideration.

Non-Standard Term Format Attendance Policy (Online)

Students are expected to attend each week. Attendance is defined as participating in an academic activity within the online classroom which includes posting in a graded discussion forum or submitting a written assignment. Postings not related to graded discussion forums or written assignments not related to the actual assignment may be reviewed and disqualified for attendance purposes.

Each instructional week begins on a Tuesday and concludes on the following Monday. A student is recorded either absent or present each day based on participation in an academic activity. All recorded time stamps for assignment submissions, discussion board posts, and attendance records reflect Mountain Time Zone.

Students who do not attend at least once in any seven (7) consecutive day period will be issued an attendance warning. Students who do not attend at least once in any 14 consecutive day period will be dropped from the course and administratively withdrawn from the University retroactive to the last date of recorded attendance. Students who attend on the first day following 14 consecutive days of non-attendance will not be dropped from their course or administratively withdrawn. Students who are enrolled in courses concurrently and are meeting attendance requirements for at least one course will not be administratively withdrawn from the University, but will be dropped from any courses in which attendance requirements are not being met.

Students who participate in an academic activity in a course prior to its official start date will not be dropped from their course during Week 1 for non-attendance as long as they subsequently attend at least once during Week 1 of the course.

Please refer to drop policies for grade implications when not meeting attendance requirements. Students who drop a course or are dropped for not meeting attendance requirements and do not attend within 14 days of their last date of attendance will be administratively withdrawn from the University. A student's last date of attendance following successful completion of a course is the end date of that course. The University may schedule breaks during which no courses are scheduled. When this occurs, such as during the annual winter break, the non-enrollment period may extend the 14 day limit to include the break.

For information regarding the determination of withdrawal date, please see the *Withdrawal from the University* policy in the *General Academic Policies and Information* section in this *Catalog*.

Note: New students who do not meet attendance requirements for the first week of their first course, or do not complete their first course, will be administratively withdrawn from the University and

must work with their Admissions Counselor to reschedule their enrollment in the program.

Other Attendance Requirements

Practicum: Students enrolled in the Master of Arts in Counseling or Doctor of Psychology, Clinical Specialization program are expected to attend two supervision sessions per week, one group and one individual. Attendance is reported to the Director of Clinical Training on a weekly basis.

Dissertation: Within the first two weeks of each term that a student is enrolled in Dissertation or Dissertation Extension, he or she must contact their Dissertation Committee Chair (Chair) and communicate their plan for progressing on their dissertation during that term. To help facilitate this contact, students will receive an email from their Chair asking for their plan for the term. Student contact with the Chair may take the form of email communication, phone, or meeting in person when possible.

If students do not make contact with their Chair by the conclusion of the second week of the term, students may be subject to administrative drop from Dissertation or Dissertation Extension course. At the beginning of week seven (7), students will receive another email from their Chair asking for an update on progress toward the plan outlined at the beginning of the term. Student contact with their dissertation Chair may take the form of email communication, phone or meeting in person when possible.

If students do not make contact with their Chair by the conclusion of the term following the week 7 prompt, students may be subject to administrative drop from the Dissertation or Dissertation Extension course, earning a "W" (withdraw) for the term.

Dissertation Planning I and Dissertation Planning II will be held as either evening or weekend classes. Students enrolled in these courses will be held to the attendance requirements defined for those class formats.

Pre-Doctoral Internship: Students are expected to attend Internship as an employee of the Internship site. The Director of Clinical Training will communicate once per term with internship supervisors asking for verification of continued employment of the student at their site. Should the Director of Clinical Training be informed that a student has ceased attending an

Internship, the student may be subject to administrative drop from the Internship course, earning a "W" (withdraw) for the term.

Inclement Weather/School Closures: In the event of a school closure, class session(s) will be made up within one week. The instructor will work with students and will notify the Registrar's Office of the date and time of the rescheduled class session.

Students should refer to the following Course Drop policies for grade implications when not meeting attendance requirements.

Course Add or Drop

Adding a Course

A student may add a course prior to the start of each term, as long as the class size limit has not been reached. Once the course has met, a registered student may add a course with the permission of the course instructor. In this event, the student must submit their course request, along with instructor approval, to the Registrar's Office.

Drop Deadline:

9-week course = First week

Dropping a Course

Students who wish to drop a course may do so by notifying the Registrar's Office by email. Courses dropped prior to the first night of class do not appear on the transcript. After the first night of class has begun, students who wish to drop a course must notify the Registrar's Office. Please see the *Tuition Refund Policy* in the *Tuition, Fees, and Financial Aid* section of this *Catalog* to determine if a tuition adjustment is necessary.

Students who drop or are administratively dropped after the first night of class and prior to 67% of instructional time or 2/3 of the course will receive a grade of "W." A grade of "W," which has no numerical value and therefore does not affect the student's GPA calculation, will appear on the transcript. If a student chooses to drop or is administratively dropped from a course after 67% of instructional time or 2/3 of the course has elapsed, a grade of "WU" will be issued, which has numerical value and will affect the student's

GPA calculation. Both “W” and “WU” grades are attempted and will count negatively toward the successful completion rate when reviewing satisfactory academic progress.

Please note that course drop dates are based on a student's last date of attendance in the course.

Withdrawal from the University

A student wishing to officially withdraw from University of the Rockies must notify the Registrar's Office. Students notifying University of the Rockies for official withdrawal may be asked to complete a written withdrawal form.

The student must resolve any financial obligations to University of the Rockies before receiving an official transcript from the Registrar's Office.

For information regarding the determination of withdrawal date, please see the *Withdrawal from the University* policy in the *General Academic Policies and Information* section in this *Catalog*.

Academic Leave

Although University of the Rockies encourages continuous enrollment from the time of matriculation through graduation for all students, from time to time circumstances may arise that warrant a short break in enrollment. Should a student experience an extraordinary personal situation that would require a request for an academic leave from the program, he or she is encouraged to discuss the matter with the Registrar's Office. The student must complete the *Academic Leave Request* form, which is available from the Registrar's Office.

- *Academic Leave Request* forms must be signed, dated and submitted on or before the last day of class attendance. The student must provide a reason for the request and the school must make a determination that there is a reasonable expectation that he or she will return to school. Requests submitted after the last day of attendance require an explanation for the late submittal. Requests submitted greater than 14 days after the last date of attendance will not be approved.

- An academic leave does not meet the conditions to be an approved leave of absence for Title IV financial aid purposes. Students in non-standard term format degree programs are not eligible for an approved leave of absence for financial aid purposes. Therefore, an academic leave is treated as an official withdrawal for return of Title IV financial aid and student loan deferment purposes. A financial aid student considering an academic leave should contact the Financial Aid Office to discuss the impact on loan repayment. The loan repayment grace period begins on the first day of the student's academic leave.
- Students are allowed one academic leave per 12-month period.
- The academic leave can be no more than 180 days in length.
- Failure to return to school on or before scheduled/approved re-entry date will result in a termination of the academic leave.
- Students should be aware that the PsyD, Clinical Specialization program must be completed within seven years. The only exception to the seven year limit for PsyD, Clinical Specialization students is for those students with exceptional circumstances, as approved by the Provost.

Satisfactory Academic Progress (SAP) Policy Non-Standard Term

We are dedicated to the academic success of our students. As such, the following policy outlines the academic requirements for University of the Rockies programs and how they are measured to ensure that students are making satisfactory academic progress toward successful degree completion. This policy applies to all graduate-level coursework attempted at University of the Rockies, regardless of date attempted.

Academic and Financial Aid Warning and Academic and Financial Aid Probation statuses provide an opportunity for students to improve academic performance and meet overall requirements for degree completion. Students placed on one of these statuses should meet with their Student Advisor to discuss course scheduling and to plan for remediation.

Please contact the University Registrar, or email Academic.Progress@rockies.edu with any questions

concerning the requirements outlined in this policy. This policy applies to all coursework attempted at University of the Rockies, regardless of date attempted.

Graduate Non-Standard Term Program Measures

- Week = Seven (7) calendar days
- Term = Nine (9) weeks
- Payment Period = One (1) Term
- Academic Year Definition = 45 weeks

Graduate students must meet the following minimum qualitative and quantitative requirements to make satisfactory academic progress:

- Cumulative GPA in University of the Rockies coursework for all graduate students = 3.00
- Cumulative GPA includes all graduate-level coursework attempted at University of the Rockies, excluding grades of P, PR, NP, I, or W. Only the later grade is counted in the cumulative GPA when a course is repeated. No grades are recorded or counted towards GPA for transfer credits.
- Successful Completion Rate = 67% or 2/3 of all University of the Rockies attempted graduate-level credits. Grades that count negatively against successful completion rates include NP, I, W, WU, R, and U. Attempted graduate-level credits are all University of the Rockies course attempts recorded on the academic transcript, including repeated courses, withdrawals, and incompletes, as well as applied transfer credits. Grades that count negatively against successful completion rates include NP, I, W, WU, R, and U.
- Repeated courses count negatively against successful completion rates.
- Successful completion of all program requirements within 150% of the normal length of the program as measured in credits attempted towards the program. Credits accepted and applied in transfer toward the student's current degree program are included as attempted and earned credits in determining the maximum timeframe.
- Grade points earned at another college are not used in the computation of the grade point average at University of the Rockies.
- If at any point during the program it becomes clear that a student will not be able to successfully complete all program requirements at the

conclusion of 150% of the normal length of a program as measured in credit hours, that student will be dismissed from the University.

Satisfactory Academic Progress (SAP) Review and Evaluation

Satisfactory academic progress is reviewed at the conclusion of every term. Students are evaluated against both qualitative and quantitative standards at the conclusion of every term of enrollment. Students who have an outstanding incomplete grade at the time of SAP review may not be allowed to continue until the incomplete grade is successfully completed. After each evaluation, students who do not meet SAP standards will be notified in writing.

Academic and Financial Aid Warning

Students who do not meet the minimum requirements for making satisfactory academic progress at the time of evaluation are placed on Academic and Financial Aid Warning for the next term.

Students will be given one term of attempted coursework to meet the requirements for satisfactory academic progress. All coursework attempted after the term during which the student did not meet satisfactory academic progress is counted as part of the Academic and Financial Aid Warning period. Students who are otherwise eligible to receive Title IV financial aid are eligible to receive Title IV financial aid while on Academic and Financial Aid Warning. Students may be required to re-take coursework previously completed in order to increase the likelihood of successfully meeting satisfactory academic progress and/or graduation requirements. These requirements may affect the student's eligibility for financial aid funds.

At the conclusion of the Academic and Financial Aid Warning period, students who do not meet the requirements for satisfactory academic progress will be dismissed from the University. Dismissed students are not eligible to receive Title IV financial aid. Dismissed students should refer to the *Appeal for Readmission after Dismissal* policy in this section of the *Catalog*.

Academic and Financial Aid Probation

Students who have been granted an appeal for readmission after dismissal following a term of

Academic and Financial Aid Warning may complete one additional term of study on Academic and Financial Aid Probation. All coursework attempted after the term during which the student did not meet satisfactory academic progress is counted as part of the Academic and Financial Aid Probation period.

Students who are otherwise eligible to receive Title IV financial aid are eligible to receive Title IV financial aid while on Academic and Financial Aid Probation. Students may be required to re-take coursework previously completed in order to increase the likelihood of successfully meeting satisfactory academic progress and/or graduation requirements. These requirements may affect the student's eligibility for financial aid funds.

At the conclusion of the term of Academic and Financial Aid Probation, students who do not meet the requirements for satisfactory academic progress will be dismissed from the University. Dismissed students are not eligible to receive Title IV financial aid. Dismissed students should refer to the *Appeal for Readmission after Dismissal* policy in this section of the *Catalog*.

Probation—Academic Plan

Students who are approved for re-admission after dismissal following a period of Academic and Financial Aid Probation, after a period on Probation—Academic Plan, or after dismissal due to exceeding the maximum time frame are placed on Probation—Academic Plan, and are required to meet specific academic requirements outlined in writing in an academic plan from the University Registrar. Students are provided with an academic plan to assist the student in meeting regular SAP requirements within a specific period of time. Students may be limited in the number of courses for which they are scheduled while on Probation—Academic Plan. It is the student's responsibility to adhere to the academic plan.

Students who are otherwise eligible to receive Title IV financial aid are eligible to receive Title IV financial aid while on Probation—Academic Plan. Students may be required to re-take coursework previously completed in order to increase the likelihood of successfully meeting satisfactory academic progress and/or graduation requirements. These requirements may affect the student's eligibility for financial aid funds.

Students will be placed on Probation—Academic Plan for the first payment period/SAP increment while on the academic plan. Students on Probation—Academic

Plan are reviewed against the progression requirements outlined in the academic plan at the conclusion of each term. Students who are not meeting plan requirements at the conclusion of each term will be dismissed from the University. Dismissed students are not eligible to receive Title IV financial aid. Dismissed students should refer to the *Appeal for Readmission after Dismissal* policy in this section of the *Catalog*.

Appeal for Readmission after Dismissal

Students who have been dismissed from the University for failure to meet satisfactory academic progress requirements may appeal to be readmitted. Appeals must be submitted to Academic.Progress@rockies.edu and will be evaluated by an Appeal Committee made up of the University Registrar or his or her designee and the appropriate Academic Chair or his or her designee who has oversight in the student's program of study. The decision of the Committee will be communicated in writing to the student by the Registrar's Office.

The student's appeal letter must include:

- a reasonable explanation for the student's academic performance to date, which includes mitigating circumstances such as student injury/illness, death of a student's family member, or other reasons resulting in undue hardship to the student;
- reasonable evidence that they have the ability to succeed in an academic program due to changed circumstances, experience, and/or successful completion of graduate-level credits during the period of absence; and
- a plan for completion of the coursework required to meet satisfactory academic progress during the following payment period.

The passage of time does not substantiate eligibility for readmission or appeal for readmission, however, students who have experienced mitigating circumstances and have been dismissed from the University for failure to meet satisfactory academic progress requirements and have been denied readmission after an appeal, may submit another appeal to be readmitted after one or more years have elapsed since their last appeal. The appeal must meet the previously mentioned criteria and the student must present reasonable evidence that they have the ability to succeed in an academic program due to changed

circumstances, experience, and/or successful completion of graduate level credits since the last appeal was submitted.

Section Eight: Academic Policies - Non-Term Format

This section includes academic policies related to non-term format degree programs at University of the Rockies.

Non-Term Format

In the non-term format, courses run continuously, rather than in semesters, and students typically take one course at a time and move on to the next course without a break. Courses are 6 weeks or 9 weeks in length.

Academic Calendar

The academic calendar for University of the Rockies non-term programs is continuous, rather than defined by term dates. Typically, students take one course at a time and move on to the next course in the program sequence without a break. Regular academic courses are six weeks long. Doctoral Capstone Seminar and dissertation courses are nine weeks long. Opportunities to enroll in programs and to begin a course sequence in a degree program are available frequently throughout the calendar year.

Holidays

There is an annual two-week Winter Break when courses are not scheduled. The Winter Break for 2015-2016 occurs from December 20, 2016 to January 2, 2017.

For Denver Campus courses: With the exception of Thanksgiving and the Fourth of July, when a holiday occurs on a regular class meeting day, that class will be conducted. Classes that would normally fall on Thanksgiving and/or the Fourth of July will be rescheduled by the instructor as make-up sessions during the week in which the holiday falls.

Program Enrollment

Initial enrollment in non-term programs is arranged through a University Admissions Counselor. Prospective online students should contact an Admissions Counselor to register. It is the student's responsibility to officially register for the program course of study. After initial enrollment, students will work with their Student Advisor or Registrar Advising Specialist to register, add courses, or change their

course schedule. Students must communicate any change in the original registration to their Student Advisor or Registrar Advising Specialist. Major changes in a student's schedule may necessitate completion of a new admissions application and enrollment agreement.

Registration

Initial registration and student scheduling is a one-time process based upon the information provided to University of the Rockies in the admission application. The student's initial schedule is based upon the student's desired start date and program of study in conjunction with previous education. Initial registration occurs in consultation with an Admissions Counselor. Upon completion of initial registration, students have access to their individual course schedules and the dates of each course for which they are registered via the Student Portal.

Student Advisors/Registrar Advising Specialists adjust student schedules, in consultation with the student, to accommodate courses applied in transfer once the admission file is completed and the student receives full admission to the University. It is the student's responsibility to review his or her schedule regularly through the Student Portal and to notify their advisor to initiate any schedule changes.

Cohort Size Management

University of the Rockies reserves the right to make adjustments to student schedules, courses, and programs, including but not limited to cancellation, postponement, course dates, sequence, and modality as deemed necessary by University administration. The University may postpone the scheduled starting date or the class schedule due to insufficient cohort size based on projected or actual enrollment in the course. The delay period will be determined by the time necessary to secure sufficient enrollment in the course, but will not exceed one year in length. Students unable to register for a particular course will receive a full refund for any tuition paid for that course. Registration in a particular course section or with a specific instructor is not guaranteed. Students are classified as full time while enrolled.

IMPORTANT NOTE: Additionally, insufficient cohort sizes may occur at the Denver Campus when a student finishes the core program courses and moves into the specialization. The University reserves the right to adjust a student's modality from attending the Denver Campus to attending

Online in order to promote a healthy academic experience. Students adjusted to the online modality by the University will maintain tuition and fees equivalent to the tuition and fees required at the Denver Campus.

Concurrent Course Registration Policy

Concurrent course registration may occur when the student is fully admitted and has completed his or her first three attempted courses. The cumulative GPA must be 3.00 or higher and must be maintained at 3.00 or higher to continue with concurrent course registration. Payment of concurrent courses is not deferred and must be paid for in advance of the course start date. Concurrent course registration cannot violate progression or prerequisite requirements. At no time may a student attend more than two University of the Rockies courses concurrently in a non-term format, with the exception of practicum.* Concurrent registration in an academic course and practicum is anticipated and does not require prior approval or petition to do so. In unique cases and with prior approval of the Academic Department Chair and Faculty Practicum Supervisor, a student may register for concurrent Practicum courses. Students may contact their advisor to request further information.

Dissertation courses may only be taken sequentially and may not be taken simultaneously or in overlapping periods. Students will register for dissertation courses in sequence (one credit per 9-week period). Under extraordinary circumstances beyond the control of the student (e.g., impending deployment or overseas TDY for military personnel or unexpected long-term expatriate relocation for work or with family), students may petition their Academic Department Chair, with the expressed written support of each of their Dissertation Committee members, for an exception to this policy and enroll for two or more credits of dissertation courses simultaneously.

Note: Concurrent course registration is subject to course availability. The University reserves the right to limit the number of concurrent registrations in a calendar year.

** Practicum exception applies to students who are enrolled in practicum as a part of program requirements from a previous Catalog year.*

Degree-Seeking Student Classifications

Class Level

Students enrolled in graduate programs are classified as graduate level students.

Enrollment Status

Students who remain continuously enrolled in non-term format programs are classified as full-time. Students who are on a break of up to 14 consecutive days from their last date of attendance or on an approved break are still classified as full-time. Students who fail to return from a break as scheduled should refer to the Withdrawal from the University policies for information regarding determination of withdrawal date. The University may schedule breaks during which no courses are scheduled. When this occurs, such as during the annual winter break, the student's break may extend the 14 day limit to include the scheduled break. The annual winter break does not extend the 45 day limit for approved breaks that are greater than 14 days. Students enrolled in the Comprehensive Exam only are classified as less than half-time. Changes to enrollment status may affect a student's financial aid eligibility and loan repayment times.

Course Delivery

Online Courses

In general, online courses are six (6) weeks in length. Doctoral Capstone Seminar and dissertation courses are nine (9) weeks in length. Specific weekly log-in requirements are built into the design of each course and monitored over the Internet through the online learning platform. The course structure allows students to take the initiative to learn weekly content on their own time and provides carefully developed learning activities that allow students to optimize their knowledge processing/application efforts. Course outcomes are clearly stated and assessed through multiple measures.

Denver Campus Courses

In general, Denver Campus students complete courses that are six (6) weeks in length. Doctoral Capstone Seminar and dissertation courses are nine (9) weeks in length. The University offers courses and programs using the following delivery modalities:

Evening Courses

Evening Courses meet three (3) hours, two (2) times per week for six (6) week courses. Doctoral Capstone Seminar courses meet three (3) hours, two (2) times per week for nine (9) weeks. Dissertation Planning I and II courses meet three hours, four times over each of the nine week periods.* Dissertation courses encompass collaboration with the Dissertation Chair and Committee several times over multiple nine-week periods.

**Note: Students who miss one, three-hour session of Dissertation Planning I or II will be withdrawn from the course and will be required to repeat the course.*

Weekend Courses

Weekend Courses meet six (6) hours, one (1) time per week for six (6) weeks. Doctoral Capstone Seminar courses meet six (6) hours, one (1) time per week for nine (9) weeks. Dissertation Planning I and II courses meet three (3) hours, four (4) times over each of the nine (9) week periods.* Dissertation courses encompass collaboration with the Dissertation Chair and Committee several times over multiple nine-week periods.

**Note: Students who miss one, three-hour session of Dissertation Planning I or II will be withdrawn from the course and will be required to repeat the course.*

Online Courses for Denver Campus Students

With permission of the Registrar's Office, a Denver Campus student may elect to attempt up to two courses per academic year through the online modality. Online course registration is subject to course availability. Courses may be taken concurrently with courses taken at the Denver Campus when the course term start dates align. Students wishing to complete more than two courses per academic year in the online modality must apply for admission into the online modality program.

Specific weekly log-in requirements are built into the design of each course and monitored over the Internet

through the online learning platform. The course structure allows students to take the initiative to learn weekly content on their own time and provides carefully developed learning activities that allow students to optimize their knowledge processing/application efforts. Course outcomes are clearly stated and assessed through multiple measures.

Online Course Attendance Policy

Students taking classes in an accelerated format are expected to attend each week. Attendance is defined as participating in an academic activity within the online classroom which includes posting in a graded discussion forum or submitting a written assignment. Postings not related to graded discussion forums or written assignments not related to the actual assignment may be reviewed and disqualified for attendance purposes.

Each instructional week begins on a Tuesday and concludes on the following Monday. A student is recorded either absent or present each day based on participation in an academic activity. All recorded time stamps for assignment submissions, discussion board posts, and attendance records reflect Mountain Time Zone.

Students who do not attend at least once in any seven (7) consecutive day period will be issued an attendance warning. Students who do not attend at least once in any 14 consecutive day period will be dropped from the course and administratively withdrawn from the University retroactive to the last date of recorded attendance. Students who attend on the first day following 14 consecutive days of non-attendance will not be dropped from their course or administratively withdrawn. Students who are enrolled in courses concurrently and are meeting attendance requirements for at least one course will not be administratively withdrawn from the University, but will be dropped from any courses in which attendance requirements are not being met.

Students who participate in an academic activity in a course prior to its official start date will not be dropped from their course during Week 1 for non-attendance as long as they subsequently attend at least once during Week 1 of the course.

Please refer to drop policies for grade implications when not meeting attendance requirements. Students who drop a course or are dropped for not meeting attendance requirements and do not attend within 14 days of their last date of attendance will be administratively withdrawn from the University. A student's last date of attendance following successful completion of a course is the end date of that course. The University may schedule breaks during which no courses are scheduled. When this occurs, such as during the annual winter break, the non-enrollment period may extend the 14 day limit to include the break.

For information regarding the determination of withdrawal date, please see the *Withdrawal from the University* policy in the *General Academic Policies and Information* section in this *Catalog*.

Note: New students who do not meet attendance requirements for the first week of their first course, or do not complete their first course, will be administratively withdrawn from the University and must work with their Admissions Counselor to reschedule their enrollment in the program.

Dissertation Courses

Dissertation courses for students enrolled online are supplemented by an online classroom environment where students are expected to actively participate. The standard *Online Course Attendance Policy* applies for dissertation courses.

Academic Participation

In addition to meeting attendance requirements, students attending online courses are expected to participate in their courses by actively engaging in weekly discussion forums with substantial posts and completing the required assignments for each week. A list of all assignments can be found in the course calendar within the Course Guide/Syllabus and in the online course. Assignment instructions are detailed in the weekly instructional units.

Failure to meet academic participation requirements may negatively impact an assignment and/or course grade. Failure to complete the introductory posting on the first day of each course may result in a grade deduction on the assignment. All recorded time stamps for assignment submissions, discussion board posts and attendance records will reflect Mountain Time Zone.

Students who anticipate being absent for an entire week of a course should contact the instructor in advance and make arrangements to complete the required assignments. Acceptance of late work is at the discretion of the instructor and does not waive attendance requirements.

Denver Campus Course Attendance Policy

While courses meet on scheduled days during the week, each instructional week begins on a Tuesday and concludes on the following Monday. Students are expected to attend all class sessions in which they are scheduled. If a student has a compelling reason to be absent from a class, he or she must discuss that absence in advance with the instructor. Students may not miss the first class session in a course unless they have prior written permission from the instructor teaching the course. Students are responsible for arranging to obtain class materials and assignments for the class time they miss. Faculty members will keep accurate records of student attendance and report attendance to the Registrar's Office at the end of each class session.

Students may not attend classes for which they are not officially enrolled. If students who are not listed on the class roster attend a class, the instructor will refer them to the Registrar's Office for proper enrollment. Whether or not to allow the student to remain in the class for that session is left to the discretion of the course instructor.

Students who do not attend at least once in any seven (7) consecutive day period will be issued an attendance warning. Students who do not attend at least once in any 14 consecutive day period will be dropped from the course and administratively withdrawn from the University retroactive to the last date of recorded attendance. Students who attend on the first day following 14 consecutive days of non-attendance will not be dropped from their course or administratively withdrawn. Students who are enrolled in courses concurrently and are meeting attendance requirements for at least one course will not be administratively withdrawn from the University, but will be dropped from any courses in which attendance requirements are not being met.

Please refer to the *Course Drop* policy for grade implications when not meeting attendance

requirements. Students who drop a course or are dropped for not meeting attendance requirements and do not attend within 14 days of their last date of attendance will be administratively withdrawn from the University. A student's last date of attendance following successful completion of a course is the end date of that course. The University may schedule breaks during which no courses are scheduled. When this occurs, such as during the annual winter break, the non-enrollment period may extend the 14 day limit to include the break.

For information regarding the determination of withdrawal date, please see the *Withdrawal from the University Policy* in this section of this *Catalog*.

Dissertation: Dissertation courses for students enrolled at the Denver Campus are supplemented by an online classroom environment where students are expected to actively participate. The standard *Online Course Attendance Policy* applies for dissertation courses.

Inclement Weather/School Closures: In the event of a school closure, class session(s) will be made up within one week. The instructor will work with students and the Registrar's Office to determine the date and time of the rescheduled class session.

Online Courses: Students who register for an online course are required to meet the attendance requirements outlined in the *Online Course Attendance Policy* in this *Catalog*.

Academic Participation

In addition to meeting attendance requirements, students attending Denver Campus courses are expected to participate in their courses by actively engaging in weekly discussions completing the required assignments for each week. Failure to meet academic participation requirements may negatively impact an assignment and/or course grade.

Students who anticipate being absent for an entire week of a course should contact the instructor in advance and make arrangements to complete the required assignments. Acceptance of late work is at the discretion of the instructor and does not waive attendance requirements.

Breaks in Attendance

Students who plan to take a break in attendance of greater than 14 days from their last date of attendance but less than 45 days from the end of the course they last attended may provide a written confirmation of their intent to return and will not be administratively withdrawn, provided they return as scheduled.

Break requests allow students to postpone the start date of their next scheduled course and maintain an active status with the University. New students must complete their first course in order to be eligible for a break. Students must communicate directly with their Student Advisor their intent to take a break with a confirmed return date. Students must complete the *Break Request* form provided by the Student Advisor, within 14 days of the last date of attendance.

Students who fail to return on their scheduled return date or do not attend within the first seven days of the course they are scheduled for when returning from an approved break will be administratively withdrawn. Please note that administrative withdrawal may occur at any point in a student's enrollment when 14 consecutive days of non-attendance occur, whether within an active course or between the last date of attendance in a prior course and first date of attendance in a subsequent course. Students who attend on the first day following 14 consecutive days of non-attendance will not be dropped from their course or administratively withdrawn.

Course Drop

Students who wish to drop a course must do so by contacting their Student Advisor or Registrar Advising Specialist.

Drop Deadlines:

9-week course = Week 1

6-week course = Week 1

Dropping a Course

Courses dropped within the first week do not appear on the transcript. Students are responsible for initiating the drop course process by contacting their advisor. Please see the *Tuition Refund Policy* in the *Tuition, Fees, and Financial Aid* section of the *Catalog* to determine if a tuition adjustment is necessary.

Students who drop or are administratively dropped after the first week of class and prior to 67% of

instructional time or 2/3 of the course will receive a grade of “W.” A grade of “W,” which has no numerical value and therefore does not affect the student’s GPA calculation, will appear on the transcript. If a student chooses to drop or is administratively dropped from a course after 67% of instructional time or 2/3 of the course has elapsed, a grade of “WU” will be issued, which has numerical value and will affect the student’s GPA calculation. Students in Pass/Fail courses will receive a “W” for drops after 67% of instructional time or 2/3 of the course has elapsed. Both “W” and “WU” grades are attempted and will count negatively toward the successful completion rate when reviewing satisfactory academic progress.

Consecutive Course Drops

Students only meeting attendance requirements in the first week of a course for three (3) consecutively enrolled courses at University of the Rockies will be administratively withdrawn for a period of no less than nine (9) months from the student’s last date of attendance. Students who have been withdrawn may appeal this policy by contacting their Student Advisor or Registrar Advising Specialist. Appeals will be reviewed by the University Registrar or designee. The outcome of the appeal will be submitted to the student in writing. Students who have an appeal denied will remain administratively withdrawn for a period of no less than nine (9) months from the student’s last date of attendance. Students who have an approved appeal and do not successfully complete their next scheduled course will be withdrawn for a period of no less than nine (9) months.

Withdrawal from the University

Students wishing to officially withdraw from University of the Rockies must notify their assigned Admissions Counselor, Student Advisor, or other advisor within the Admissions, Student Services, or Registrar departments. Students choosing to notify their advisor verbally of their intent to withdraw may be asked to fill out a written request to withdraw.

Please refer to drop policies for grade implications when not meeting attendance requirements. Students who drop a course or are dropped for not meeting attendance requirements and do not attend within 14 days of their last date of attendance will be administratively withdrawn. A student’s last date of

attendance following completion of a course is the end date of that course. Students who attend on the first day following 14 consecutive days of non-attendance will not be dropped from their course or administratively withdrawn. The University may schedule breaks during which no courses are scheduled, such as during the annual winter break. When this occurs, the break may extend the 14 day limit to include the break.

For information regarding the determination of withdrawal date, please see the *Withdrawal from the University* policy in the *General Academic Information and Policies* section in this *Catalog*.

Satisfactory Academic Progress (SAP) Policy Overview

We are dedicated to the academic success of our students. As such, the following policy outlines the academic requirements for University of the Rockies programs and how they are measured to ensure that students are making satisfactory academic progress toward successful degree completion. This policy applies to all graduate-level coursework attempted at University of the Rockies, regardless of date attempted.

Academic and Financial Aid Warning, and Academic and Financial Aid Probation statuses provide an opportunity for students to improve academic performance and meet overall requirements for degree completion. Students placed on one of these statuses should meet with their advisor to discuss course scheduling and to plan for remediation.

Please contact the University of the Rockies University Registrar, or email academic.progress@rockies.edu with any questions concerning the requirements outlined in this policy.

Graduate Non-Term-Based Program Measures:

Master’s Program Definitions

Week = 7 calendar days

Full Academic Year Definition = a minimum of 36 weeks of instructional time and either 18 successfully earned credits of coursework or 4 successfully earned credits of thesis work that apply toward the student's program of study. The credit requirement may be met through a combination of experiences and will be prorated as follows: 1 credit of coursework equals 1/18 of an Academic Year and 1 credit of thesis work equals 1/4 of an Academic Year.

A full Academic Year consists of 2 increments that may be referenced as payment periods, financial aid payment periods, or Satisfactory Academic Progress (SAP) increments.

- The first payment period in the Academic Year ends when half of the credits and weeks required for a completed Academic Year have been met.
- The second payment period in the Academic Year ends when the requirements for a completed Academic Year have been met.

Final Academic Year Exceptions:

- For any remaining portion of a program that is half of an Academic Year or less, the remaining portion is treated as a single payment period.
- For any remaining portion of a program that is more than half of an Academic Year but less than a full Academic Year, the remaining portion is divided into two payment periods and the first payment period is the period in which the student successfully completes half of the credits and half of the weeks of instructional time in the remaining portion.

Satisfactory Academic Progress (SAP) is evaluated at the end of each payment period.

Doctoral Program Definitions

Week = 7 calendar days

Full Academic Year Definition = a minimum of 36 weeks of instructional time and either 18 successfully earned credits of coursework or 6 successfully earned credits of practicum or 4 successfully earned credits of dissertation courses that apply toward the student's program of study. The credit requirement may be met through a combination of experiences and will be prorated as follows: 1 credit of coursework equals 1/18 of an Academic Year, 1 credit of practicum equals 1/6

of an Academic Year, and 1 credit of dissertation courses equals 1/4 of an Academic Year.

A full Academic Year consists of 2 increments that may be referenced as payment periods, financial aid payment periods, or Satisfactory Academic Progress (SAP) increments.

- The first payment period in the Academic Year ends when half of the credits and weeks required for a completed Academic Year have been met.
- The second payment period in the Academic Year ends when the requirements for a completed Academic Year have been met.

Final Academic Year Exceptions:

- For any remaining portion of a program that is half of an Academic Year or less, the remaining portion is treated as a single payment period.
- For any remaining portion of a program that is more than half of an Academic Year but less than a full Academic Year, the remaining portion is divided into two payment periods and the first payment period is the period in which the student successfully completes half of the credits and half of the weeks of instructional time in the remaining portion.

Satisfactory Academic Progress (SAP) is evaluated at the end of each payment period.

Graduate students must meet the following minimum qualitative and quantitative requirements to make satisfactory academic progress:

- Cumulative GPA in University of the Rockies coursework for all graduate students = 3.00;
- Cumulative GPA includes all graduate-level coursework attempted at University of the Rockies, excluding grades of NP, P, PR, I, or W. Only the later grade is counted in the cumulative GPA when a course is repeated;
- Grade points earned at another college are not used in the computation of the grade point average at University of the Rockies;
- Successful Completion Rate = 67% or 2/3 of all attempted credits. Attempted graduate-level credits are all University of the Rockies course attempts recorded on the academic transcript, including repeated courses, withdrawals, and incompletes, as well as transfer credits that apply toward the student's current degree program.

- Grades that count negatively against successful completion rates include I, W, WU, NP, and U;
- Repeated courses count negatively against successful completion rates, once repeated; and
- Successful completion of all program requirements must be accomplished within 150% of the normal length of the program as measured in credits attempted towards the program. Credits accepted and applied in transfer towards the student's current degree program are included as attempted and earned credits in determining the maximum timeframe.
- If at any point during the program it becomes clear that a student will not be able to successfully complete all program requirements at the conclusion of 150% of the normal length of a program as measured in credits, that student will be dismissed from the University. Dismissed students are not eligible to receive Title IV financial aid.

Satisfactory Academic Progress (SAP) Review and Evaluation

Satisfactory Academic Progress (SAP) is reviewed at regular SAP increments. Students are evaluated against both qualitative and quantitative standards at the conclusion of a SAP increment. Students who have an outstanding incomplete grade at the time of SAP review may not be allowed to continue until the incomplete grade is successfully completed. After each evaluation, students who do not meet SAP standards will be notified in writing.

SAP increments will be adjusted to coincide with the payment period. Please note any of the following activities may have an impact on the student's payment period which may result in a SAP review that may not be congruent with the standard SAP increment:

- Changing program of study;
- Returning to the University after being officially or unofficially withdrawn;
- Retaking coursework in which a passing grade was earned;
- Returning after being out of attendance over 180 days;
- Completing courses which do not apply to the student's program of study; and/or

- Taking courses concurrently.

Additionally, if it is determined that a Satisfactory Academic Progress review did not align with the Financial Aid Payment Period, SAP will be reevaluated to coincide with the current Financial Aid Payment Period and could affect the outcome of the previous SAP review.

Academic and Financial Aid Warning

Students who do not meet the minimum requirements for making satisfactory academic progress at the time of evaluation are placed on Academic and Financial Aid Warning for the following SAP increment.

Students are given up to one SAP increment to meet the requirements for satisfactory academic progress. All coursework attempted after the term during which the student did not meet satisfactory academic progress is counted as a part of the Academic and Financial Aid Warning period.

Students who are otherwise eligible to receive Title IV financial aid are eligible to receive Title IV financial aid while on Academic and Financial Aid Warning. Students may be required to re-take coursework previously completed in order to increase the likelihood of successfully meeting satisfactory academic progress and/or graduation requirements. These requirements may affect the student's eligibility for financial aid funds.

At the conclusion of the Academic and Financial Aid Warning period, students who do not meet the requirements for satisfactory academic progress will be dismissed from the University. Dismissed students are not eligible to receive Title IV financial aid. Dismissed students should refer to the *Appeal for Readmission after Dismissal* policy in this section of the *Catalog*.

Academic and Financial Aid Probation

Students who have been granted an appeal for readmission after dismissal following a period of Academic and Financial Aid Warning may be placed on Academic and Financial Aid Probation for the following SAP increment/payment period and may be required to follow an Academic Plan.

Students will be given up to one SAP increment to meet the requirements for satisfactory academic progress. All coursework attempted after the period during which the student did not meet satisfactory

academic progress will be counted as a part of the Academic and Financial Aid Probation period.

Students who are otherwise eligible to receive Title IV financial aid are eligible to receive Title IV financial aid while on Academic and Financial Aid Probation. Students may be required to re-take coursework previously completed in order to increase the likelihood of successfully meeting satisfactory academic progress and/or graduation requirements. These requirements may affect the student's eligibility for financial aid funds.

At the conclusion of the Academic and Financial Aid Probation period, students who do not meet the requirements for satisfactory academic progress will be dismissed from the University. Dismissed students are not eligible to receive Title IV financial aid. Dismissed students should refer to the *Appeal for Readmission after Dismissal* policy in this section of the *Catalog*.

Probation—Academic Plan

Students who are approved by the Appeal Committee for re-admission after dismissal following a period of Academic and Financial Aid Probation, after a period on Probation—Academic Plan or after dismissal due to exceeding the maximum time frame are placed on Probation—Academic Plan, and are required to meet specific academic requirements outlined in writing in an academic plan from the Registrar's Office. Students are provided with an academic plan to assist the student in meeting regular SAP requirements within a specific period of time. Students may be limited in the number of courses for which they are scheduled while on Probation—Academic Plan. It is the student's responsibility to adhere to the academic plan.

Students who are otherwise eligible to receive Title IV financial aid are eligible to receive Title IV financial aid while on Probation—Academic Plan. Students may be required to re-take coursework previously completed in order to increase the likelihood of successfully meeting satisfactory academic progress and/or graduation requirements. These requirements may affect the student's eligibility for financial aid funds.

Students will be placed on Probation—Academic Plan for the first payment period/SAP increment while on the academic plan. Students on Probation—Academic Plan are reviewed against the progression requirements outlined in the academic plan. Students who are not meeting plan requirements at the time of review will be dismissed from the University.

Dismissed students are not eligible to receive Title IV financial aid. Dismissed students should refer to the *Appeal for Readmission after Dismissal* policy in this section of the *Catalog*.

Appeal for Readmission after Dismissal

Students who have been dismissed from the University for failure to meet satisfactory academic progress requirements may appeal to be readmitted. Appeals must be submitted to academic.progress@rockies.edu and will be evaluated by an Appeal Committee made up of the University Registrar or designee and the appropriate Academic Department Chair or designee who has oversight in the student's program of study. The decision of the committee will be communicated in writing to the student by the Registrar's Office.

Additionally, the student's appeal letter must include:

- a reasonable explanation for the student's academic performance to date, which includes mitigating circumstances such as student injury/illness, death of a student's family member, or other reasons resulting in undue hardship to the student;
- reasonable evidence that they have the ability to succeed in an academic program due to changed circumstances, experience, and/or successful completion of graduate-level credits during the period of absence; and
- a plan for completion of the coursework required to meet satisfactory academic progress during the following payment period.

The passage of time does not substantiate eligibility for readmission or appeal for readmission. However, students who have experienced mitigating circumstances and have been dismissed from the University for failure to meet satisfactory academic progress requirements and have been denied readmission after an appeal, may submit another appeal to be readmitted after one or more years have elapsed since their last appeal. The appeal must meet the criteria outlined above and the student must present reasonable evidence that they have the ability to succeed in an academic program due to changed circumstances, experience, and/or successful completion of graduate level credits since the last appeal was submitted.

Section Nine: Degree Programs

University of the Rockies offers Master's and Doctorate degree programs in the social and behavioral sciences. Students may choose from among a variety of specializations within most degree programs.

Master of Arts in International Leadership

Offered Online

This program is not intended to lead to certification or licensure.*

The ability to interpret, empathize, and act quickly in a global context is essential for leaders to perform in the future business environment. This includes the ability to span different cultures, economies, politics, and geographies; think systemically across multiple networks, deal with rapid change and layers of complexity; speak the language of global business; and see the world from the perspective of others. A growing number of organizations are seeking leaders who can both adapt to these complexities and excel at coaching others to be similarly adaptive and agile.

The program prepares aspiring and ascendant leaders in transnational organizations through a focus on balancing skills at three levels: 1) an inner leadership focus based on self-awareness, reflection, and a commitment to ongoing growth; 2) competency in leveraging interpersonal relationships managing conflict and building highly effective teams; and 3) a systems focus allowing the translation of the external environment to set effective strategies and drive execution.

Program Learning Outcomes

Graduates of the Master of Arts in International Leadership program will be able to:

1. Demonstrate leadership strengths as well as awareness of areas for development to enhance self-understanding, agility, and other skills critical to effective leadership in transnational organizations;
2. Implement leadership strategies that effectively build cross-cultural relationships spanning different cultures, economies,

- political philosophies, and geographic regions;
3. Demonstrate a global mindset and cultural adaptability required to navigate the complexity of diverse cultural situations, conceptualize issues from multiple perspectives, and recognize the cultural nuances related to gender, power, and motivation;
4. Apply relevant leadership theory and an understanding of current global trends and events to generate innovative solutions and processes that address contemporary international leadership challenges;
5. Couple prior experience with complementary knowledge of international leadership principles grounded in an academic environment;
6. Describe how the politics, history, economies, and societies of different nations are inter-related and affect leadership strategy;
7. Integrate knowledge of global finance, macroeconomics, strategy, and marketing into leadership decisions and interactions; and
8. Evaluate diverse ideas, approaches, and solutions in terms of the context of the cultures that produced them.

* Licensure Information

COLORADO RESIDENTS

This program of study does not meet, nor is intended to meet, the requirements for professional licensure in the State of Colorado. The Master of Arts in International Leadership program is not a licensure program.

Master of Arts in Organizational Development and Leadership, Social Media and Technology Specialization

Offered at the Denver Campus and Online

This program is not intended to lead to certification or licensure.*

The Master of Arts in Organizational Development and Leadership, Social Media and Technology Specialization program is designed for students who have a baccalaureate degree in any academic discipline, who seek careers in the application of both psychological principles and theories of media and technology to improving the design, development, structure, and operation of organizations. The Master of Arts in Organizational Development and Leadership is designed both for students who desire Master's level preparation to practice and for those preparing to enter a doctoral program in the field. The course will cover all aspects of how technology is not just about the

latest iPhone application or handheld device, but is deeply embedded in how organizations transform themselves. Students will also explore theories of how people communicate and form identity through social media, as well as how media and communication technologies sit within and outside organizations. Other topics will include the ethics surrounding the integration of information and communication technology (ICT) into organizations, the role of ICTs in decision-making, and leadership effectiveness.

Master of Arts in Organizational Development and Leadership, Sport, Fitness, and Wellness Management Specialization

Offered at the Denver Campus and Online

This program is not intended to lead to certification or licensure.*

The Master of Arts in Organizational Development and Leadership, Sport, Fitness, and Wellness Management Specialization program is designed for students who have a baccalaureate degree in any academic discipline and who seek careers in the field of sport, wellness, and/or fitness management. Students will complete a degree program that addresses principles to improve the design, development, structure and operation of organizations and emphasizes the complexity of organizational systems and aspects of facilitating organizational change. Additionally, this specialization focuses on the application of specific

sport, wellness, and fitness concepts and affords students a comprehensive curriculum covering the areas of marketing, administration, facilities management, finance, fundraising, law, personnel management, sociology and ethics.

This program is an ideal complement for professionals in the area(s) of sport performance psychology, coaching, organizational wellness and/or sport industry consulting. This program prepares students for positions in professional sport, interscholastic and intercollegiate athletics, college and university recreation and intramural programs, coaching, sport facility management, sport marketing, sport industry consulting, community sport programs, and fitness/wellness management. In addition, the curriculum prepares students to enter a doctoral program after course completion, if desired.

For more information about on-time completion rates, the median loan debt of students who completed this program, and other important information, please visit www.rockies.edu/dmaodl for Denver Instructional Site program information and www.rockies.edu/pd/omaodl for online program information.

However, release of transcripts, diplomas, and verifications for degrees awarded are contingent upon submission of an electronic version of the dissertation for binding, the Petition to Graduate form, payment of the graduation fee, and payment of any outstanding balances with the University.

The degree will be noted on the transcript as a Doctor of Philosophy in Organizational Development and Leadership.

Doctor of Philosophy (PhD) in Organizational Development and Leadership, Corporate Training and E-Learning Specialization

Offered Online

This program is not intended to lead to certification or licensure.*

The Doctor of Philosophy (PhD) in Organizational Development and Leadership, Corporate Training and E-Learning Specialization program is designed for students with career aspirations and research interest in corporate training and e-learning. The specialization emphasizes the complexity of learning and development as it relates to organizations. The coursework applies a systems approach to learning initiatives, with a focus on planning, implementing, monitoring, and evaluating learning systems to meet organizational expectations. Students explore instructional strategies, systems theory and design, training needs assessment models and methods, as well as the impact of diversity and globalization on learning and design. This specialization provides the foundation to develop research and expand knowledge in the fields of corporate training and e-learning.

For more information about on-time completion rates, the median loan debt of students who completed this program, and other important information, please visit www.rockies.edu/dphdodl for Denver Instructional Site program information and www.rockies.edu/pd/ophd for online program information.

Doctor of Philosophy (PhD) in Organizational Development and Leadership, Organizational Diversity Specialization

Offered Online

This program is not intended to lead to certification or licensure.*

The Doctor of Philosophy (PhD) in Organizational Development and Leadership, Organizational Diversity Specialization program is designed for students with career aspirations and research interest related to diversity and inclusion in the workplace. This specialization focuses on a critical examination of theory, method, practice and policy that equips leaders, scholars and practitioners to apply the concepts and principles related to diversity, multiculturalism and inclusion to their discipline or area of practice. This specialization helps to extend knowledge in the field of diversity and examines the influence that multiculturalism and differences have on an organization system.

Doctor of Philosophy (PhD) in Organizational Development and Leadership, Risk Management Specialization

Offered Online

This program is not intended to lead to certification or licensure.*

The Doctor of Philosophy (PhD) in Organizational Development and Leadership, Risk Management Specialization program is designed for students with career aspirations in applying the principles of psychology of human performance in organizations to improve organizational operations and strategic execution. This includes researching the theoretical and practical study of risk management – process of planning, organizing, and controlling the activities of an organization in order to minimize the effects of risk on the organization – and adding to the field of organizational development and leadership.

The PhD in Organizational Development and Leadership resembles the traditional practitioner model for the student who desires more preparation in the application of research, statistics, assessment, and related methodologies.

Doctor of Philosophy (PhD) in Organizational Development and Leadership, Social Media and Technology Specialization

Offered Online

This program is not intended to lead to certification or licensure.*

The Doctor of Philosophy (PhD) in Organizational Development and Leadership, Social Media and Technology Specialization program is designed for

students with careers in applying the principles of psychology of human performance in organizations, as well as current research in communication media and technology, to improve organizational operations and strategic execution. Students will have the opportunity to apply theories of how people communicate and form identity through social media to organizational development and leadership. Students will use knowledge of how media technologies sit within and outside complex organizations to conduct original research into how communication technologies like social media can structure and transform organizations. More broadly, students will apply knowledge of how technology is not just about the latest iPhone application or handheld device, but is deeply embedded in how organizations transform themselves since the beginnings of the industrial revolution. The program challenges students to build plans and models based on research, as well as providing them a toolkit for using technologies effectively with leadership and within organizations. The ethics surrounding the integration of information and communication technology (ICT) into organizations and the role of decision-making will also be explored.

For more information about on-time completion rates, the median loan debt of students who completed this program, and other important information, please visit www.rockies.edu/dphdodl for Denver Instructional Site program information and www.rockies.edu/pd/ophd for online program information.

Doctor of Psychology (PsyD), Mediation and Conflict Resolution Specialization

Offered Online

This program is not intended to lead to certification or licensure.*

The Doctor of Psychology (PsyD), Mediation and Conflict Resolution Specialization program provides students with a consultative framework to address the complex challenges and conflicts public and private entities experience. Students will learn to analyze, influence, and effect change in familial, organizational and community systems that require mediation and conflict resolution. Students will also evaluate systems theory, ethical practices, and legal requirements in the context of conflict resolution and organizational change. In addition, they will employ various methodologies to validate resolution and change initiatives. For more information about on-time completion rates, the median loan debt of students who completed this program, and other important information, please visit www.rockies.edu/dpsyds for Denver Campus program information and

Offered Online

This program is not intended to lead to certification or licensure.*

The Doctor of Psychology (PsyD), Organizational Leadership Specialization program includes the theoretical and practical study of psychology as applied to organizational environments with the objective of understanding human behavior, characteristics and performance dynamics. Programmatic goals are to increase individual leadership potential and enhance organizational effectiveness through the application of knowledge and interventions that raise individual performance, improve process relationships, enhance understandings of culture and equity and promote

leadership. For more information about on-time completion rates, the median loan debt of students who completed this program, and other important information, please visit www.rockies.edu/dpsyds for Denver Instructional Site program information and www.rockies.edu/opsyds for online program information.

* Licensure Information

COLORADO RESIDENTS

This program of study does not meet, nor is intended to meet, the requirements for professional licensure in the State of Colorado. The Doctor of Psychology (PsyD), Organizational Leadership Specialization program is not a licensure program.

OUT-OF-STATE RESIDENTS

The Doctor of Psychology (PsyD), Organizational Leadership Specialization program is not a licensure program. The University of the Rockies cannot confirm whether its courses or programs meet requirements for professional licensure in your state. Doctor of Psychology (PsyD)

Specializations:

- Clinical Specialization
- Sport and Performance Psychology Specialization

Doctor of Psychology (PsyD), Clinical Specialization

Offered at the Denver Campus

This program may lead to licensure.*

The Doctor of Psychology (PsyD) Clinical Specialization program follows the Practitioner-Scholar Model, which prepares all students, regardless of previous earned master's degrees** or transfer credits, to be skilled practitioners who provide mental health services that are based upon and firmly grounded in the science of psychology. The program philosophy is to prepare practitioners with the knowledge and skills requisite to critically evaluate and effectively apply scientific research findings to everyday practice. To this end, students complete research methodology coursework and engage in research as a part of the program. Through this experience, students grow in their ability to evaluate the research of others and to conduct research that will ultimately enhance the effectiveness of the services they provide.

Further, the program employs an educational model of experiential learning wherein students learn by and while doing. This is clearly reflected through student involvement in practicum experiences that allow for sequentially graduated levels of responsibility and complexity, from the point of matriculation through the completion of all foundation and applied skill coursework.

Classes are offered in either an evening or weekend format and are taught on campus in a face-to-face format.

Within the PsyD, Clinical Specialization, Doctoral candidates may pursue one of five areas of

concentration: Clinical Neuropsychology, Forensic/Correctional Psychology, Health Psychology, Marriage and Family Therapy, and Sport Neuroperformance. The completion of a Concentration is not required in order to graduate with the PsyD, Clinical Specialization degree, but may be chosen by students who want focused education and/or experience in one of the concentration areas. The completion of a Concentration will not be noted on the diploma, but will be listed on graduate transcripts following the granting of the degree.

For more information about on-time completion rates, the median loan debt of students who completed this program, and other important information, please visit www.rockies.edu/dpsydcl for Denver Campus program information.

Students who complete a Master of Arts in Psychology/ Master of Arts in Counseling program with a specialization in either Marriage, Couples and Family Counseling or Clinical Mental Health Counseling at University of the Rockies may apply up to 43 credits from their Master's degree toward the Doctor of Psychology, Clinical Specialization, upon acceptance to the program.

* Licensure Information

COLORADO RESIDENTS

The Doctorate of Psychology, Clinical Specialization meets the requirements for professional licensure in the State of Colorado.

OUT-OF-STATE RESIDENTS

The University of the Rockies cannot confirm whether its courses or programs meet requirements for professional licensure in your state. For information regarding professional licensure requirements in your state, you should contact the applicable licensing board or agency in your state and determine whether the program meets requirements for licensure in the state where you reside.

Additional information will be provided to you when you contact the school and during your first term in your program of study.

Below are links to Licensing Boards:

[General State Licensing Boards for University of the Rockies](#)
[US Psychology Licensing Boards for University of the Rockies](#)

The Clinical Specialization in the Doctor of Psychology program is not accredited by the American Psychological Association (APA) or registered with the Association of State and Provincial Psychology Boards

(ASPPB), which is a requirement for licensure in some states. Other factors, such as a student's criminal history, may prevent an applicant from obtaining licensure or employment in this field of study. All prospective students are advised to contact individual state boards of psychology for additional information relating to licensure requirements prior to enrolling. In addition, beginning in 2017, APA accreditation will be a requirement for students who intend to participate in APPIC Match or APPIC-member internships, which may be a requirement for licensure in some states. A list of state psychology boards is available here: www.asppb.net/i4a/pages/index.cfm?pageid=3395. Prospective students are also advised to regularly review the state's policies and procedures relating to licensure as those policies are subject to change.

Please note: A criminal record may prevent an applicant from obtaining state licensure. Please refer to individual state licensing boards for additional information relating to licensure requirements.

*Note: Students entering the program without an appropriate foundation in psychology as outlined in the *Admission Policies and Requirements* section of this *Catalog* will be required to take PSY 5001 Survey of Psychology I and PSY 5002 Survey of Psychology II. Credits earned will be in addition to published program requirements.

Program Learning Outcomes

Graduates of the PsyD, Clinical Specialization will be able to:

1. Exhibit behavior and comporment that reflects the values and attitudes of psychology;
2. Demonstrate awareness, sensitivity, and skills in working professionally with diverse individuals, groups, and communities who represent various cultural and personal background and characteristics;
3. Apply ethical concepts and legal issues regarding professional activities with individuals, groups, and organization;
4. Practice with personal and professional self-awareness and reflection, with awareness of competencies, and with appropriate self-care;
5. Relate effectively and meaningfully with individuals, groups, and/or communities;
6. Understand research, research methodology, techniques of data collection and analysis, biological bases of behavior, cognitive-affective bases of behavior, and development across the lifespan. Respect scientifically derived knowledge;

7. Generate research that contributes to the professional knowledge base and evaluate the effectiveness of various professional activities;
8. Integrate research and clinical expertise;
9. Assess and diagnose problems, capabilities, and issues associated with individuals, groups, and/or organizations;
10. Use interventions designed to alleviate suffering and to promote health and well-being of individuals, groups, and/or organizations;
11. Provide expert guidance and/or professional consultation in response to a client's needs or goals;
12. Provide instruction, disseminate knowledge, and evaluate acquisition of knowledge and skill in professional psychology;
13. Supervise and train others in the practice of psychology;
14. Identify and interact with professionals in multiple disciplines and be aware of key issues and concepts in related disciplines;
15. Manage the direct delivery of services and/or the administration of organizations, programs, or agencies; and
16. Advocate for change at the individual, institutional, and/or systems level regarding the impact of social, political, economic or cultural factors.

Second Year Courses

- PSY 6160 Family Systems & Dynamics* (3 credits)
- PSY 5610 Psychometrics: Tests & Measurements* (3 credits)
- PSY 7961 Clinical Practicum (1 credit)
- Doctoral Qualifying Exam
- PSY 7210 Psychopathology I: Adults^ (3 credits)
- PSY 7220 Clinical Personality Assessment: Objective Techniques (3 credits)
- PSY 7962 Clinical Practicum (1 credit)
- PSY 7360 Psychopathology II: Children & Adolescents^ (3 credits)
- PSY 7340 Assessment of Intelligence (3 credits)
- PSY 7963 Clinical Practicum (1 credit)
- PSY 7480 Neuropsychology (3 credits)
- PSY 6470 Theories & Techniques of Group Counseling & Psychotherapy (3 credits)
- PSY 7964 Clinical Practicum (1 credit)
- PSY 6580 Human Sexuality & Sexual Disorders (3 credits)
- PSY 7540 Clinical Personality Assessment: Projective Techniques (3 credits)
- PSY 7965 Clinical Practicum (1 credit)

Third Year Courses

- PSY 7870 Substance Abuse & Dependence (3 credits)
- PSY 7640 Quantitative Research Design & Methods (3 credits)
- PSY 7971 Clinical Practicum (1 credit)
- PSY 7740 Qualitative Research Design & Methods (3 credits)
- PSY 7490 Integrative Report Writing (2 credits)
- PSY 7720 Evidence-Based Practices in Psychotherapy
- PSY 7972 Clinical Practicum (1 credit)
- PSY 7880 Psychopharmacology (3 credits)
- PSY 7620 Professional Issues in Clinical Psychology (3 credits)
- PSY 7973 Clinical Practicum (1 credit)
- PSY 7940 Advanced & Multivariate Statistical Analysis (3 credits)

- PSY 7950 Theories & Methods of Supervision & Consultation (3 credits)
- PSY 7974 Clinical Practicum (1 credit)
- Elective (3 credits)
- Elective (3 credits)
- PSY 7975 Clinical Practicum (1 credit)

Fourth Year Courses

- Doctoral Comprehensive Exam
- PSY 7981 Clinical Practicum (1 credit)
- PSY 7982 Clinical Practicum (1 credit)
- PSY 7983 Clinical Practicum (1 credit)
- PSY 7984 Clinical Practicum (1 credit)
- PSY 7985 Clinical Practicum (1 credit)
- PSY 8990 Dissertation (1 credit per term, 5 terms) (5 credits)
- Elective (3 credits)

Fifth Year Courses

- PSY 8980 Pre-Doctoral Internship 1,500 Hours (1 credit per term, 5 terms) (5 credits)

Total Credits 121

*Required to complete the Master of Arts in Psychology (39 credits). A minimum of 27 credits taken at University of the Rockies must be earned at the Master's level in order to earn a Master of Arts in Psychology en route to a PsyD, Clinical Specialization degree. Students must successfully complete the Doctoral Qualifying Exam in order to be awarded a Master of Arts in Psychology.

Note: The date of degree conferral recorded on the student's transcript and diploma will reflect the end of the term in which the student completes all degree requirements. For students who have successfully completed their Dissertation requirements and whose final graduation requirement is the Pre-doctoral Internship, the date of degree conferral will reflect the date the final requirement was met. However, release of transcripts, diplomas, and verifications for degrees awarded are contingent upon submission of the *Petition to Graduate* form, payment of the graduation fee, and payment of any outstanding balances with the University.

This course may not be transferred in.

Please refer to *Comprehensive Examination School of Professional Psychology* in the *General Academic Policies and Information* section of this *Catalog* for additional information on the *Doctoral Qualifying Exam* and the *Doctoral Comprehensive Exam*.

Please refer to *Dissertation* in the *General Academic Policies and Information* section of this *Catalog* for more information on dissertation requirements.

Graduation Requirements

To be eligible for the PsyD, Clinical Specialization, a student must successfully complete:

- The approved program consisting of 121 credits*;
- Doctoral Qualifying Exam;
- Doctoral Comprehensive Exam;
- 1,500 hours of Practicum;
- Pre-doctoral Internship;
- Personal Therapy requirement;
- Dissertation requirements; and
- Earn a minimum cumulative grade point average of 3.00;

*Students who elect to enroll in the Sport Neuroperformance Concentration are required to complete 127 total program credits.

Note: The date of degree conferral recorded on the student's transcript and diploma will reflect the end of the term in which the student completes all degree requirements. However, release of transcripts, diplomas, and verifications for degrees awarded are contingent upon submission of the *Petition to Graduate* form, payment of the graduation fee, and payment of any outstanding balances with the University.

The degree will be noted on the transcript as a Doctor of Psychology, Clinical Specialization.

Areas of Concentration

Students in the PsyD, Clinical Specialization program may prepare as a generalist or may choose an emphasis in one or more of University of the Rockies' concentrations. Students who desire a concentration may choose an area and complete the elective courses required for each concentration.

Concentrations are offered in the following areas:

- Clinical Neuropsychology (9 credits)
- Forensic/Correctional Psychology (9 credits)
- Health Psychology (9 credits)
- Marriage and Family Therapy (9 credits)
- Sport Neuroperformance (15 credits)

Clinical Neuropsychology Concentration Requirements

University of the Rockies offers a concentration in Clinical Neuropsychology within the PsyD, Clinical Specialization program. In addition, the Clinical Neuropsychology specialization can be completed by individuals already holding a graduate degree in psychology who wish to acquire a certificate in Neuropsychology. The concentration is primarily aimed at developing competencies in administering, scoring, and interpreting a wide variety of neuropsychological assessment instruments. The systematic training includes coursework in clinical neuroanatomy, clinical neuropsychopathology (e.g., Parkinson's Disease, movement disorders, dementias, traumatic brain injury), clinical psychopharmacology (neuroactive drugs that can skew measurement), and supervised practice in neuropsychological assessment.

Courses in biological bases of behavior and psychopharmacology are a part of the PsyD, Clinical Specialization degree program.

Note: Neuropsychology is typically a post-Doctoral specialty designation, requiring state licensure as a psychologist and several years of specialized training and supervised practice. Those prospective or current students who are interested in completing the requirements necessary to practice as a neuropsychologist should consult with the National Academy of Neuropsychology and the state psychology licensing board in which they are practicing or would like to practice to determine the requirements for designation as a neuropsychologist. This concentration does not lead to a designation or licensure as a neuropsychologist.

Courses (9 credits):

- PSY 8185 Pediatric Neuropsychology (3 credits)
- PSY 8110 Neuropsychological Assessment (3 credits)
- PSY 8170 Neurofeedback Assessment & Treatment (3 credits)

Forensic/Correctional Psychology Concentration Requirements

The Forensic/Correctional Concentration within the PsyD, Clinical Specialization is designed to give students an introduction to the exciting and emerging fields of Forensic and Correctional Psychology. At its core, Forensic Psychology is the application of psychological principles, research, assessment and practice to the legal, correctional, and criminal/civil justice systems, while Correctional Psychology is the application of psychological principles, research, assessment and practice to correctional systems and facilities. Students who complete this concentration will have a good understanding of the various areas in which forensic and correctional psychologists practice, including corrections, law enforcement, research, consultation and assessment. Students examine the forensic and correctional applications of traditional personality and cognitive assessment instruments and specific forensic instruments used for evaluation of such areas as competency to stand trial, psychopathology, propensity to commit sexual offenses, risk of violent behavior, and general response style. Through hands-on practice (under supervision), students develop a basic competency in the major personal and social theories of correctional mental health practice and family violence, including elder abuse, and develop skills in the treatment of inmates and victims of family and other types of violence.

Courses (9 credits):

Choose 9 credits from the following:

- PSY 8540 Forensic Psychology (3 credits)
- PSY 8160 Forensic Assessment (3 credits)
- PSY 8310 Correctional Mental Health: Theory and Practice (3 credits)
- PSY 6230 Treatment of Family Violence (3 credits)

Health Psychology Concentration Requirements

The Health Psychology Concentration within the PsyD, Clinical Specialization program is designed to prepare psychologists to function more effectively in health care settings and to develop a much deeper understanding of the interrelationships between physical and emotional health. Students may focus

their studies within the concentration in general health psychology or in pain management.

Courses in biological bases of behavior and psychopharmacology are a part of the PsyD, Clinical Specialization degree program.

Courses (9 credits):

- PSY 8820 Health Psychology (3 credits)

Choose 6 credits from the following:

- PSY 8821 Major Illnesses: Health Psychology's Role (3 credits)
- PSY 8822 Treatment Approaches in Health Psychology (3 credits)
- PSY 8823 Medical Ethics in Health Psychology (3 credits)

Marriage and Family Therapy Concentration Requirements

The Marriage and Family Therapy Concentration within the PsyD, Clinical Specialization program prepares the clinician to work with a wide range of issues that confront families and systems. This concentration focuses on the systemic approach for numerous problem areas and diagnoses. Topics covered include: assessment, treatment, and interventions.

Courses (9 credits):

Choose 9 credits from the following:

- PSY 6460 Marital Systems (3 credits)
- PSY 6600 Theories & Techniques of Marriage & Family Therapy I (3 credits)
- PSY 6610 Theories & Techniques of Marriage & Family Therapy II (3 credits)
- PSY 8620 Advanced Seminar in Marriage & Family Therapy (3 credits)

Sport Neuroperformance Concentration Requirements

University of the Rockies offers within the PsyD, Clinical Specialization program a concentration in Sport Neuroperformance. The concentration is primarily designed to prepare psychologists to work with athletes and other performers in a variety of

contexts. With an emphasis on neuropsychology, students in this concentration learn neuropsychological assessment skills, concussion assessment and management skills, psychological aspects of injury, as well as performance enhancement techniques. This concentration consists of 15 credits of coursework, and can be completed by students enrolled in the University of the Rockies PsyD, Clinical Specialization.

Courses (15 credits):

- PSY 8110 Neuropsychological Assessment (3 credits)
- PSY 8170 Neurofeedback Assessment and Treatment (3 credits)
- PSY 7314 Rehabilitation in Sports & Performance (3 credits)
- PSY 7301 Advanced Performance Enhancement I: Core Mind-body Practices (3 credits)
- PSY 8190 Sport Neuropsychology (3 credits)

Note: This concentration in the PsyD, Clinical Specialization program does not lead to Association for Applied Sport Psychology (AASP) certification. AASP does not certify programs or curricula, but rather approves specific courses in 12 areas leading to certification. Many of the courses in the PsyD, Clinical Specialization program, Sport Neuroperformance Concentration at University of the Rockies have been approved by AASP as meeting criteria in specific content areas, but students may need to use undergraduate courses or take additional courses to meet all AASP requirements. Students will complete practicum courses as part of this Concentration that may meet some or all of AASP internship requirements for certification. Students are strongly encouraged to check with AASP to determine specific internship requirements.

Electives

Electives are offered based on the interests and needs of the student body and the availability of faculty with expertise in each area. Electives required for a concentration are offered on an "as needed" basis. Students should consult their Registrar Advising Specialist concerning the timing of enrollment in relevant electives. Students usually take electives in their third year of study; however, certain one-hour electives offered by visiting faculty are open to students in the first and second years of the program. Students should consult the Registrar's Office

concerning the timing of enrollment in relevant electives. Students are advised that taking electives out of their normal course sequence could delay completion of their program.

Annual Student Review

At the conclusion of each academic year, the faculty review the progress of each student in the program. This review includes grades, course evaluations, practicum work, and other feedback from faculty, instructors, and supervisors. Faculty Mentors provide feedback to their students, including strengths and any areas that may need improvement. This feedback is documented on the Annual Student Review form.

Grand Rounds

Grand Rounds are generally held once a term. Grand Rounds offer students and faculty an opportunity to participate in a school-wide presentation by a student, faculty member, or other professional who presents on a professional or clinical topic of interest. The Director of Clinical Training, who serves as the moderator, appoints a panel consisting of at least one faculty member and one student who have a special interest in the topic. The faculty member and the student lead the discussion after the presentation. All students and faculty are invited to attend the Grand Rounds, which may, in certain instances, be required as part of Professional Issues.

Enrolling in Practica and Advancement to Pre-Doctoral Internship

Students in the PsyD, Clinical Specialization must complete 1,500 hours of practica. To enroll in practica, students must complete all prerequisite courses and have approval from the Director of Clinical Training. In addition, students who are completing a practicum in Colorado must obtain registration with the Colorado Department of Regulatory Agencies (DORA) prior to beginning their practicum experience at the University, and all clinical or counseling students must have personal liability insurance prior to beginning practicum. Students will be required to provide documentation of registration with DORA if they are completing practicum hours in Colorado, and documentation of a current professional liability policy for all clinical or counseling practicum experiences.

The Pre-Doctoral Internship is a State of Colorado requirement for licensure as a psychologist. Students

in the Doctor of Psychology (PsyD), Clinical Specialization are eligible for advancement to Pre-Doctoral Internship after successfully completing a minimum of 111 semester hours of required and elective graduate credit, passing the Doctoral Comprehensive Exam, and having completed the formal Dissertation Proposal. The student can then enroll in Pre-Doctoral Internship (PSY 8980). The PsyD, Clinical Specialization program requires a 1,500-hour Pre-Doctoral Internship at a University of the Rockies approved site. Students must complete the Pre-Doctoral Internship in no less than 12 months and no more than 24 months. The Pre-Doctoral Internship is designed to provide an intensive clinical experience building upon the coursework, practica experiences, and supervision skills developed during the previous years of the Doctoral program. The Pre-Doctoral Internship must be conducted in a setting which meets the same requirements as APPIC or APA internship sites and must be approved by the University of the Rockies Director of Clinical Training.

To prepare for the Pre-Doctoral Internship, students are encouraged to read [Guide to Obtaining a Psychology Internship](#) (4th ed., 2001) by E. Megargee. This book describes the Pre-Doctoral Internship application process, and specific chapters cover preparation of the curriculum vitae and the interview process. For further detailed information, see the *University of the Rockies Pre-Doctoral Internship Handbook* and contact the Director of Clinical Training.

Successful completion of the Pre-Doctoral Internship and successful defense of the Dissertation are required for graduation and awarding of the Doctor of Psychology (PsyD) degree.

Clinical Program Time Limits

In keeping with some licensing board regulatory statutes, students cannot complete a Clinical Doctoral program at University of the Rockies in less than three years. To satisfy the residency requirement, the University requires students to complete full-time enrollment of six (6) semester credits or more of regular course work for five (5) consecutive terms (one academic year). Students should be aware that this is a requirement for graduation. In addition, the PsyD, Clinical Specialization program has a seven (7) year time limit from the term that the student was admitted to the PsyD, Clinical Specialization program. Students can expect to complete the PsyD, Clinical Specialization program in four and one half years to

five years of continuous full-time study from their beginning term.

In some circumstances it may take longer for an individual student to earn his or her Doctoral degree. For instance, not maintaining full-time status, taking an academic leave from the program, retaking a class, failing to advance to the next stage of the program at an annual review, or failing to pass the Comprehensive Examinations, or the Dissertation defense, can delay a student's completion of the program. From the time a student enters the first term of the PsyD, Clinical Specialization program, he or she has a maximum of seven years to complete the program, except in exceptional cases approved by the Academic Department Chair.

Guidance in the Profession

University of the Rockies provides coursework that is designed to be beneficial to students in preparing to find employment in the mental health field either while attending the University or upon graduation. Part of the Professional Issues in Clinical Psychology (PSY 7620) curriculum for PsyD, Clinical Specialization students includes helping graduates prepare for, and succeed in, positions within the field of psychology.

Members of the University faculty are available to talk to students about what it means to be in the profession and to give advice on career decision making. Collectively, the faculty has many years of experience in the mental health profession and can be a rich resource to students in career planning.

The Career Services department is available to provide students with additional assistance with interviewing, resume preparation, job search techniques, and informational resources.

Doctor of Psychology, Respecialization

University of the Rockies does not provide a Doctor of Psychology (PsyD) Respecialization course of study. Students wishing to pursue a doctorate in clinical psychology who already have an advanced degree in psychology should consult with an Admissions Counselor to determine the recommended program of study at University of the Rockies.

Doctor of Psychology (PsyD), Sport and Performance Psychology Specialization

Offered at the Denver Campus and Online

This program is not intended to lead to certification or licensure.*

The Doctor of Psychology, Sport and Performance Psychology Specialization program is designed for students with career aspirations in applying the principles of psychology to sport and performance. The emphasis of the program is to train students in advanced psychological assessment and change strategies designed to enhance performance. Students learn to utilize comprehensive approaches in the evaluation of sport and performance psychology, human development, physiological functioning, psychosocial factors and group dynamics. The course materials present diverse and in-depth ways of realizing human potential. For more information about on-time completion rates, the median loan debt of students who completed this program, and other important information, please visit www.rockies.edu/dpsydspp for Denver Campus program information and www.rockies.edu/opsydspp for online program information.

* Licensure Information

COLORADO RESIDENTS

This program of study does not meet, nor is intended to meet, the requirements for professional licensure in the State of Colorado. The Doctor of Psychology, Sport and Performance Psychology Specialization program is not a licensure program.

OUT-OF-STATE RESIDENTS

The Doctor of Psychology, Sport and Performance Psychology Specialization program is not a licensure program. The University of the Rockies cannot confirm whether its courses or programs meet requirements for professional licensure in your state. For information regarding professional licensure requirements in your state, you should contact the applicable licensing board or agency in your state and determine whether the program meets requirements for licensure in the state where you reside.

Additional information will be provided to you when you contact the school and during your first term in your program of study.

[General State Licensing Boards for University of the Rockies](#)

Program Learning Outcomes

Graduates of the PsyD, Sport and Performance Psychology Specialization will be able to:

1. Evaluate effective applications of physiological and psychological research in sport and performance settings;
2. Examine the impact of social and cultural diversity in sport and performance settings;
3. Evaluate normal and abnormal behavior in sport and performance settings;
4. Employ ethical practices in sport and performance settings;
5. Assess group and team dynamics in sport and performance settings;
6. Execute appropriate performance enhancement interventions with individuals, teams and organizations; and
7. Demonstrate leadership skills appropriate for sport and performance settings.

Program Requirements

- PSY 7512 Psychology of Leadership (3 credits)
- PSY 7510 Biological Bases of Behavior (3 credits)
- PSY 7600 Family Systems (3 credits)
- PSY 7210 Psychopathology I: Adults (3 credits)
- PSY 7260 Adult Psychopathology & Treatment II (3 credits)
- ORG 7272 Group Process & Group Leadership in Organizations (3 credits)
- RES 7302 Advanced Research Methods (3 credits)
- RES 7402 Advanced Tests & Measurements (3 credits)
- RES 7415 Advanced Statistics (3 credits)
- ORG 7101 Assessment Tools for Organizational Leadership (3 credits)

Specialization Requirements

- PSY 7301 Advanced Performance Enhancement I: Core Mind-Body Practices (3 credits)
- PSY 7305 Advanced Psychomotor Development & Kinesiology (3 credits)
- PSY 7311 Advanced Performance Enhancement II: Integrative Mind-Body Practices (3 credits)
- PSY 7314 Rehabilitation in Sports & Performance (3 credits)
- PSY 7330 Sport & Performance Psychology as a Business (3 credits)
- PSY 7317 Advanced Group Dynamics in Sports & Performance Settings (3 credits)
- PSY 7321 Advanced Performance Enhancement III: The Psychology of Peak Experience (3 credits)

Doctoral Capstone and Dissertation Courses

- PSY 8770 Doctoral Capstone Seminar (4 credits)
- RES 8910 Dissertation Planning I (1 credit)
- PSY 8912 Dissertation Planning II (1 credit)
- PSY 8990 Dissertation (5 credits)

Total Credits 62

Please refer to *Dissertation* in the *General Academic Policies and Information* section of this *Catalog* for more information on dissertation requirements.

Graduation Requirements

To be eligible for the PsyD, Sport and Performance Psychology Specialization, a student must successfully complete:

- The approved program consisting of 62 credits;
- Dissertation requirements;
- A minimum cumulative GPA of 3.00; and
- Three non-credit In-Residence Workshops**

** Please refer to *In-Residence Workshop Requirements* in the *General Academic Policies and Information* section of this *Catalog* for more information on in-residence workshop requirements.

Note: The date of degree conferral recorded on the student's transcript and diploma will reflect the end of the term in which the student completes all degree

requirements. However, release of transcripts, diplomas, and verifications for degrees awarded are contingent upon submission of an electronic version of the dissertation for binding, the *Petition to Graduate* form, payment of the graduation fee, and payment of any outstanding balances with the University.

The degree will be noted on the transcript as a Doctor of Psychology, Sport and Performance Psychology Specialization.

Master of Arts in Human Development

Specializations:

- Adult Development
- Gerontology
- Standard Program of Study

Master of Arts in Human Development, Adult Development Specialization

Offered Online

This program is not intended to lead to certification or licensure.*

The Master of Arts in Human Development, Adult Development specialization is designed to prepare students to better understand how adults learn and develop by recognizing frames of reference, redefining problems from different perspectives, recognizing and challenging assumptions, beliefs, and habits of mind.

The classroom environment provides a collaborative place for students to practice transformative learning strategies by creating the opportunity to come to the shared understanding of meaning schemes based on life experiences. With a learning experience rich in self-awareness, self-management, and critical reflection, students will learn the skills and knowledge needed to affect personal transformation, social responsibility, and social change as well as individual justice and development.

Transformative theory can be applied to numerous situations that benefit from personal transformation, such as life coaching, conflict mediation, community education, leadership training, and service learning. Students will also learn about the implications of applied research in the development process of adult personal transformation.

* Licensure Information

COLORADO RESIDENTS

This program of study does not meet, nor is intended to meet, the requirements for professional licensure in the State of Colorado. The Master of Arts in Human

Development, Adult Development specialization program is not a licensure program.

Program Learning Outcomes

Graduates of the Master of Arts in Human Development, Adult Development Specialization program will be able to:

1. Compare theoretical perspectives of adult development and personal growth;
2. Engage in practices related to adult development and transformational learning;
3. Evaluate the relevance and application of personality theories to adult development;
4. Demonstrate knowledge of critical issues related to interpersonal relationships over the adult lifespan;
5. Assess the adult developmental learning process from an emotional, cognitive, spiritual, and physical perspective;
6. Apply reflective practices to assess and critique personal transformation from emotional, cognitive, spiritual, and social perspectives;
7. Evaluate the implications of ethics and cultural diversity within adult development practices; and
8. Apply primary and secondary research methods or practice to a specific issue related to adult development and personal transformation.

Master of Arts in Human Development, Gerontology Specialization

Offered Online

This program is not intended to lead to certification or licensure.*

The Master of Arts in Human Development, Gerontology Specialization is designed to prepare students to assess and improve programs and services that meet the changing needs of society and families related to aging in diverse cultures. A specialization in gerontology will give students an increased understanding about the emotional, cognitive, spiritual, and physical needs of older people as they progress through the aging process. The courses are designed to prepare students to influence and support the needs of older people and their families in context to social, political, and environmental factors. Students will also learn about the implications of applied research for policy and practice in gerontology.

*Licensure Information

Master of Arts in Human Development (Standard Program of Study)

Offered Online

This program is not intended to lead to certification or licensure.*

The Master of Arts in Human Development is an engaging program that focuses on the varying and constant developmental and transformational changes across the life span. This program is designed for persons who want to understand stages of human development and apply effective practices to address pressing public issues and social needs related to factors that shape human development such as emotional, cognitive, cultural, environmental, ethical, and social structures.

This program prepares individuals who plan to serve in roles as instructors, trainers, curriculum developers, consultants, public policy influencers, or for those who seek to be more authentic in their own leadership in organizations and communities. Graduates of the program will be prepared to conduct applied research and apply human development knowledge in their work with organizations and groups. This program also prepares graduates to engage stakeholders in open and mindful dialogue for the purpose of social change for the common good. The program currently offers two specializations within the M.A. degree: Gerontology and Adult Development.

- The approved program consisting of 30 credits;
- A minimum cumulative GPA of 3.00.

Note: degree conferral is contingent upon submission of the Petition to Graduate form, payment of the graduation fee, and payment of any outstanding balances with the University.

The degree will be noted on the transcript as a Master of Arts in Human Development.

Master of Arts in Public Sociology

Specializations:

- Standard Program of Study
- Medical Sociology
- Applied Sociology

Master of Arts in Public Sociology, (Standard Program of Study)

Offered Online

This program is not intended to lead to certification or licensure.*

The Master of Arts in Public Sociology program is at the forefront of sociological innovation. Public sociology is an approach to sociology with an express focus on engagement beyond the academy. Public sociology involves engaging in open dialogue with stakeholders beyond the university to deepen our collective understanding of public issues in a social context. Public sociology includes applied policy driven work, advocacy, and empirically-based problem solving. Students will acquire expertise and skills to apply sociological theory and research methods to address contemporary public issues and social problems in organizations and communities.

The program is designed for persons who want to understand social structures and systems and apply effective practices to address pressing public issues and social needs in public, nonprofit, community, and other organizations as well as communities. Graduates of the program will be prepared to conduct social science research and apply sociological knowledge. The program currently offers two specializations within the M.A. degree: Medical Sociology and Applied Sociology.

- Note: degree conferral is contingent upon submission of the Petition to Graduate form, payment of the graduation fee, and payment of any outstanding balances with the University.

The degree will be noted on the transcript as a Master of Arts in Public Sociology.

Master of Arts in Public Sociology, Medical Sociology Specialization

Offered Online

This program is not intended to lead to certification or licensure.*

The Master of Arts in Public Sociology, Medical Sociology Specialization is designed to prepare students to address a variety of research and practice issues in health care organizations, health systems, and communities. By specializing in medical sociology, students will increase their understanding of: (1) social contexts of health and illness; (2) social, political, and environmental factors that influence health disparities; and (3) social forces that influence health care policy, health care delivery systems, and people's responses to illness. Students will also learn about the implications of sociological theory and research for health policy and practice.

Below are links to [Licensing Boards](#):

[General State Licensing Boards for University of the Rockies](#)

An online degree from the University of the Rockies (UoR) does not lead to teacher licensure in any state. If you want to become a classroom teacher, contact your state's education authorities prior to enrolling at UoR to determine what state-specific requirements you must complete before obtaining your teacher's license. UoR graduates will be subject to additional requirements on a state-by-state basis that will include one or more of the following: student teaching or practicum experience, additional coursework, additional testing, or, if the state requires a specific type of degree to seek alternative certification, earning an additional degree. None of UoR's online education programs are CAEP, TEAC, or NCATE** accredited, which is a requirement for certification in some states. Other factors, such as a student's criminal history, may prevent an applicant from obtaining licensure or employment in this field of study. All prospective students are advised to visit the [Education Resource Organizations Directory \(EROD\)](#) and to contact the licensing body of the state where they are licensed or intend to obtain licensure to verify that these courses qualify for teacher certification, endorsement, and/or salary benefits in that state prior to enrolling. Prospective students are also advised to regularly review the state's policies and procedures relating to licensure as those policies are subject to change.

** The Council for the Accreditation of Educator Preparation (CAEP) is the resulting entity from the merger of the Teacher Education Accreditation Council (TEAC) and National Council for Accreditation of Teacher Education (NCATE)

Program Learning Outcomes

Graduates of the Master of Arts in Education program will be able to:

1. Investigate historical, theoretical and philosophical foundations of human learning with an emphasis on adult learning;
2. Develop curriculum, instructional strategies & assessments that leverage educational resources and emerging technologies in diverse education;
3. Apply learning theories and models and engage in reflective practice regarding curriculum and instruction;
4. Utilize pedagogical models, frameworks, and approaches;
5. Apply and evaluate assessment models for decision-making related to student learning;
6. Apply principles of legal and ethical decision-making to inform policy and practice;
7. Critically analyze issues of cultural diversity; and

8. Apply emotional intelligence, communication and leadership skills in diverse learning communities.

The degree for the Not-for-Profit Specialization will be noted on the transcript as a Master of Arts in Human Services, Not-for-Profit Management Specialization.

Doctor of Philosophy (PhD) in Education, Curriculum, Instruction, and Assessment Specialization

Offered Online

This program is not intended to lead to certification or licensure.*

The Doctor of Philosophy (PhD) in Education, Curriculum, Instruction, and Assessment Specialization program is designed for students with career aspirations and research interests related to education and specifically to the areas of curriculum, instruction, and assessment. The advanced curriculum in this specialization focuses on providing the students with the skills needed to design and evaluate various curriculum, instruction, and assessment models. The program also focuses on applied research intended to improve instruction using innovative curriculum design and a variety of assessments methodologies. This specialization offers advanced theory and practice in research methodology and the application of curriculum mapping, instructional assessment, and collaborative curriculum development. Research is critical to the advancement of knowledge in this profession. In addition to course-related research activities, students in this PhD program will complete a

dissertation, which is a major piece of original research.

In-Residence Workshop: As a doctoral learner, you will attend three non-credit weekend workshops at various stages of your program in Denver, Colorado, in addition to your regular coursework. The workshops are designed to provide students with insights and knowledge related to research as well as provide them with valuable, timely, in-person interaction with one of their professors as they first prepare for and then undertake research and complete their dissertation.

For more information about on-time completion rates, the median loan debt of students who completed this program, and other important information, please visit <http://www.rockies.edu/dphded> for Denver Campus program information and <http://www.rockies.edu/ophded> for online program information.

4. Design and evaluate appropriate instructional strategies and systems to support student learning;
5. Analyze the complexity of educational systems and functions as an effective change agent through evidence based application of educational research; and
6. Apply diverse methods and principles of inquiry, discovery, evaluation, and original scholarship to educational research questions and practices.

Specialization Learning Outcomes

1. Apply research based theories and practices to emerging educational issues distributed learning and technology;
2. Assess root causes of educational problems distributed learning and technology;
3. Develop education-based solutions to societal problems distributed learning and technology;
4. Demonstrate leadership competencies to transform educational policy and practice distributed learning and technology; and
5. Conduct research and disseminate innovative solutions for educational challenges distributed learning and technology.

Core Course Requirements

- EDU 7000 Learning & Cognition (3 credits)
- EDU 7100 History of Education & Social Change (3 credits)
- EDU 7120 Transformative Issues & Trends in Education (3 credits)
- EDU 7200 Strategies for Teaching & Learning (3 credits)
- EDU 7220 Educational Leadership: Challenges & Opportunities (3 credits)
- EDU 7240 Diversity in Education (3 credits)
- RES 7400 Research Design & Methods – Quantitative (3 credits)

- RES 7410 Research Design & Methods – Qualitative (3 credits)
- Research Course** (3 credits)

Specialization Requirements

- EDU 8310 Research into the Effective Use of Technology in Education (3 credits)
- EDU 8320 Change in People, Society, Bureaucracies, & Institutions (3 credits)
- EDU 8330 Bridging the Digital Divide (3 credits)
- EDU 8340 Laws, Legislation, & Policy in the Use of Technology (3 credits)
- EDU 8350 Technology Infrastructure Plans (3 credits)
- EDU 8360 Distance Learning Concepts & Configurations (3 credits)
- EDU 8370 Involvement & Advocacy in Distance Learning (3 credits)

Doctoral Capstone and Dissertation Courses

- EDU 8770 Doctoral Capstone Seminar* (4 credits)
- EDU 8910 Dissertation Planning I (1 credit)
- EDU 8912 Dissertation Planning II (1 credit)
- EDU 8990 Dissertation (5 credits)

Total Credits 59

* This course may not be transferred in.

Please refer to *Dissertation* in the *General Academic Policies and Information* section of this *Catalog* for more information on dissertation requirements.

**Choose from the following Research Courses:

- RES 7415 Advanced Statistics
- RES 7420 Advanced Statistics in Mixed Research Methods
- RES 7430 Action Research
- RES 7440 Advanced Statistics in Qualitative Research

Graduation Requirements

To be eligible for the PhD in Education, Distance Learning Specialization a student must successfully complete:

- The approved program consisting of 59 credits;
- Earn a minimum cumulative GPA of 3.00;
- Dissertation requirements; and
- In-residence course requirements**.

** Please refer to In-Residence Workshop Requirement in the *General Academic Policies and Information* section of this *Catalog* for more information on in-residence workshop requirements.

Note: The date of degree conferral recorded on the student's transcript and diploma will reflect the end of the term in which the student completes all degree requirements. However, release of transcripts, diplomas, and verifications for degrees awarded are contingent upon submission of an electronic version of the dissertation for binding, the Petition to Graduate form, payment of the graduation fee, and payment of any outstanding balances with the University.

The degree will be noted on the transcript as a Doctor of Philosophy in Education, Distance Learning Specialization.

Doctor of Philosophy (PhD) in Human Services

Offered Online

This program is not intended to lead to certification or licensure.*

The Doctor of Philosophy (PhD) in Human Services program is designed for students with career aspirations and research interests related to guiding the policies and practices needed to address the needs of diverse and underserved populations, including those struggling with addiction, illness, poverty and violence. The advanced curriculum in this specialization is designed to provide opportunities for increasing both depth and breadth of knowledge in the field of human services. This specialization offers advanced theory and practice in research methodology and the application of a variety of human services theories and practices. Research is critical to the advancement of knowledge in this profession. In addition to course-related research activities, students in this PhD program will complete a dissertation, which is a major piece of original research.

In-Residence Workshop: As a doctoral learner, you will attend three non-credit weekend workshops at various stages of your program in Denver, Colorado, in

addition to your regular coursework. The workshops are designed to provide students with insights and knowledge related to research as well as provide them with valuable, timely, in-person interaction with one of their professors as they first prepare for and then undertake research and complete their dissertation.

For more information about on-time completion rates, the median loan debt of students who completed this program, and other important information, please visit <http://www.rockies.edu/dphdhs> for Denver Campus program information and <http://www.rockies.edu/ophdhs> for online program information.

* Licensure Information

COLORADO RESIDENTS

This program of study does not meet, nor is intended to meet, the requirements for professional licensure in the State of Colorado. The Doctor of Philosophy (PhD) in Human Services program is not a licensure program.

OUT-OF-STATE RESIDENTS

The Doctor of Philosophy (PhD) in Human Services program is not a licensure program. The University of the Rockies cannot confirm whether its courses or programs meet requirements for professional licensure in your state. For information regarding professional licensure requirements in your state, you should contact the applicable licensing board or agency in your state and determine whether the program meets requirements for licensure in the state where you reside.

Additional information will be provided to you when you contact the school and during your first term in your program of study.

[General State Licensing Boards for University of the Rockies](#)

Program Learning Outcomes

Graduates of the PhD in Human Services program will be able to:

1. Design and evaluate research about theories and systems related to human services based on student's specific interests in the field;
2. Investigate matters of social justice in human services organizations, including weaving socio-cultural diversity into their missions, governance structures and operations;
3. Assess, evaluate, and design human services performance structures, capacity building, and

talent development implementation strategies specific to the specialization course interests of the student;

4. Apply concepts, demonstrate skills, and evaluate policies and initiatives that are fundamental to ethical and legal practice in human services settings tailored around the student's specialization course interests;
5. Assess the general complexity of human services systems and formulate effective strategies based on best practices; and
6. Advocate through multiple communication methods in support of specific strategies, standards, policies, practices, and service delivery methods.

Core Course Requirements

- HUM 7100 History and Systems of Human Services (3 credits)
- ORG 8518 Professional and Business Ethics in Organizational Leadership (3 credits)
- HUM 7140 Socio-Cultural Determinants in Society (3 credits)
- HUM 7160 Organizational Operations & Human Services Administration (3 credits)
- HUM 7170 Financial & Grant Management (3 credits)
- HUM 7175 Program Review & Evaluation (3 credits)
- RES 7400 Research Design & Methods – Quantitative (3 credits)
- RES 7410 Research Design & Methods – Qualitative (3 credits)
- Research Course (3 credits)
- HUM 7210 Leadership & Advocacy (3 credits)
- HUM 7250 Emerging Trends & Innovations in Human Services & Social Sector (3 credits)
- HUM 7480 Evidence-based Practice in Human Services (3 credits)
- Electives** (15 credits)

Doctoral Capstone and Dissertation Courses

- HUM 8770 Doctoral Capstone Seminar^ (4 credits)
- RES 8910 Dissertation Planning I (1 credit)
- RES 8912 Dissertation Planning II (1 credit)
- RES 8990 Dissertation (5 credits)

Total Credits 62

^ This course may not be transferred in.

Please refer to *Dissertation* in the *General Academic Policies and Information* section of the *Online Catalog* for more information on dissertation requirements.

*Choose from the following Research Courses:

- RES 7415 Advanced Statistics (3 credits)
- RES 7420 Advanced Study in Mixed Research Methods (3 credits)
- RES 7430 Action Research (3 credits)
- RES 7440 Advanced Study in Qualitative Research (3 credits)

**Choose from the following Electives Courses:

- HUM 8105 Applied Human Services Policy (3 credits)
- HUM 8115 Theories & Strategies of Community Development & Advocacy (3 credits)
- HUM 8125 Performance & Quality Management (3 credits)
- HUM 8135 Advanced Issues in Socio-cultural Concepts & Practices (3 credits)
- HUM 8145 Child & Family Advocacy (3 credits)
- HUM 8205 Change Agents in Human Service Systems (3 credits)
- HUM 8215 Special, Vulnerable & Underserved Populations in Human Services (3 credits)
- HUM 8225 Human Services Information Technology (3 credits)

Graduation Requirements

To be eligible for the PhD in Human Services a student must successfully complete:

- The approved program consisting of 62 credits;
- Earn a minimum cumulative GPA of 3.00;
- Dissertation requirements; and
- In-residence course requirements**.

** Please refer to In-Residence Workshop Requirement in the *General Academic Policies and Information* section of this Catalog for more information on in-residence workshop requirements.

Note: The date of degree conferral recorded on the student's transcript and diploma will reflect the end of

the term in which the student completes all degree requirements. However, release of transcripts, diplomas, and verifications for degrees awarded are contingent upon submission of an electronic version of the dissertation for binding, the Petition to Graduate form, payment of the graduation fee, and payment of any outstanding balances with the University.

The degree will be noted on the transcript as a Doctor of Philosophy in Human Services.

Section Ten: Course Descriptions

Not all courses are offered in all modalities or with the same frequency. Please reference the Degree Programs section of this Catalog to find a list of courses offered and/or required in each degree program.

Course Numbering System

The following offers a general correlation between course levels and numbers:

Course Levels Course Number Range

Master's Level	5000-6000
Doctorate Level	7000-8000

University of the Rockies awards semester credit hours.

CSL Counseling

CSL 5101 Professional Orientation & Issues in Counseling 3 credits

This course provides an overall orientation to the counseling profession, including the professional roles, functions, and relationships that counselors hold, counseling practice, history of the discipline, licensing, professional organizations within the discipline, and contemporary issues in the field.

CSL 5130 Life Span Development 3 credits

This course surveys the major theoretical perspectives on life span development from conception through late adulthood. Developmental processes related to physical, cognitive, moral, and emotional functions are reviewed as well as societal and cultural aspects of development. Cross-listed as and equivalent to PSY 5130.

CSL 5280 Ethics, Laws & Standards of Professional Practice 3 credits

This course is a study of the ethical and legal issues confronting the practicing counselor. Topics related to clinical methodology, standards of practice, and inter-professional relations are

explored. Students learn principles of ethical decision-making, standards for human and animal use in research, and standards of care specified by state and federal laws. Emphasis is placed on exploration of the emotional impact that major ethical and legal dilemmas have on decision-making. Students also master the current Code of Ethics of the American Counseling Association and other professional codes of ethics, such as the code of the American Association of Marriage and Family Therapy or the code of the American Psychological Association. Cross-listed as and equivalent to PSY 5280. ***This course may not be transferred in.***

CSL 5290 Theories & Techniques of Counseling & Psychotherapy 3 credits

This course is an overview of the psychodynamic, cognitive/behavioral, and existential/humanistic schools of psychology, as well as corresponding models of counseling and frequently used assessment and therapeutic techniques. The primary focus in the course is on the development of both skills and rationale in the application of intervention strategies to treatment and case management. Cross-listed as and equivalent to PSY 5290.

CSL 5330 History of Psychology 3 credits

This course introduces students to the theoretical systems, methods of inquiry, and terminologies associated with the history of psychology. The course is grounded in a broad historical understanding that builds a framework for understanding the contemporary field of psychology. The focus is on the contributions of religion, philosophy, and biology to the development of psychology as well as on the development of Psychoanalytic, Behaviorist, Cognitive, Humanistic, and Existential theories and their impact on the current practice of psychology. Cross-listed as and equivalent to PSY 5330.

CSL 5400 Understanding, Interpreting, & Applying Research Concepts 3 credits

This course teaches students how to critically analyze, interpret, and apply statistical concepts to research in education and the social sciences. The focus is on a quantitative approach to the concepts and methods of statistical inference. Topics include sampling, frequency distributions,

estimation, hypothesis testing, and probability. Statistical analyses covered include correlation, regression, t-tests, nonparametric tests, and Analysis of Variance. Basic research design issues are also addressed focusing on selecting data analysis techniques to appropriately address research questions and to apply the concepts covered to various psychological problems and realistic situations. Emphasis is on developing skills in interpreting statistical results presented in research articles. Cross-listed as and equivalent to ORG/RES/PSY 5400.

CSL 5410 Physiological Bases of Behavior 3 credits

This course is designed to provide the student with a foundation of human physiology including the nervous, hormonal, reproductive, and sensory systems, and the attendant functions of digestion, sleep, learning and memory, emotion and other human biological functions. The course provides an essential knowledge base for most other offerings in the field of psychology. Cross-listed as and equivalent to PSY 5410.

CSL 5420 Principles of Social Psychology 3 credits

This course provides an introduction and overview of the principles and theories of social psychology. The course includes exploration of behavior in groups, group impacts on individual behavior and the ways in which organizational rules and norms impact behavior. Constructs of social psychology, including social influence, social thinking, and attitude formation are covered and related to sociological and psychological research. Cross-listed as and equivalent to PSY 5420. Equivalent to ORG 5520.

CSL 5530 Cultural Diversity & Individual Differences 3 credits

This course provides a systematic review of the wide range of cultures and individual differences and the ways in which cultural mores, ethnocentrism, and factors such as matters of race, gender, religion, sexual orientation, customs and cultures impact behavior of the individual themselves and of those around them. Through this course, students better understand themselves and others, in terms of perceptions and behaviors. Cross-listed as and equivalent to PSY 5530/ORG 6499/EDU 6499.

CSL 5610 Psychometrics: Tests & Measurements 3 credits

This course involves the study of the theory and practice of psychological measurement. The focus is on the process of measuring and differentiating variables of psychological interest. Students explore basic concepts of measurement and the principles of test construction. The course familiarizes the prospective professional psychologist with the common tests used in psychological and educational practice. These include intellectual, aptitude, and achievement tests; interest inventories; personality tests; and social measures. Cross-listed as and equivalent to PSY 5610/ORG 5100.

CSL 6120 Lifestyle & Career Development 3 credits

This assessment course focuses on the evolution of the concept of career development. Students review the major theories and their application to the collection, evaluation, and use of career information for counseling psychology as it applies to individuals and groups across the adult life span. Students also learn to use assessment instruments (MBTI, FIRO-B, Strong, etc.) and integrate the findings in vocational counseling situations as they relate to adults. Cross-listed as and equivalent to ORG/PSY 6120.

CSL 6140 Assessment of Children & Adolescents 3 credits

This course involves the study of the theory and practice of behavioral and diagnostic assessment of children and adolescents. The course focus is on how behavioral assessment is used to provide information in educational, psychiatric, and neurological practice. Primary emphasis is on adaptive behavior, anxiety, depression, trauma, and learning problems associated with children and adolescents. The student gains familiarity with numerous evaluation instruments and techniques used with children with behavioral, emotional, and learning problems. Prerequisite: CSL 5610. Cross-listed as and equivalent to PSY 6140.

CSL 6160 Family Systems & Dynamics 3 credits

This course is an introduction to the systems approach to intervention with families. It includes a historical perspective on family theory development. The focus is on obtaining

knowledge and theory about the nuclear family in traditional and alternative forms. Normal family patterns of interaction, family life cycle, family of origin, family subsystems, and societal influence are explored. Contemporary issues and outcome research literature are reviewed. This course serves as a knowledge base for further study of assessment, treatment, and intervention with families. Cross-listed as and equivalent to PSY 6160.

CSL 6210 Survey of Psychopathology 3 credits

This course includes an examination of DSM criteria for each disorder listed, differential diagnoses, and etiological theories as revealed in the most recent research in the field. Students become acquainted with the most efficacious treatment options and have an opportunity to review and analyze the techniques that lead to successful outcomes with clients.

CSL 6220 Family/Marital Assessment 3 credits

This course covers assessment goals related to treatment strategies, assessment techniques, and assessment instruments used in working with couples and families. Guided practice in selecting, administering, scoring, and interpreting assessment techniques and instruments is provided. Prerequisite: CSL 5610.

CSL 6230 Treatment of Family Violence 3 credits

This course explores the major personal and social theories of family violence, including elder abuse. The course focuses on severe marital conflicts, rape, and physical and emotional violence. The cycle of family violence is examined with emphasis on societal factors that contribute to this behavior. Students explore causality and treatment alternatives for victims and perpetrators as well as current research findings in the field. Prerequisite: CSL 6160. Cross-listed as and equivalent to PSY 6230.

CSL 6370 Addiction Counseling 3 credits

This course addresses the basic models and theories of addiction, substance abuse and chemical dependence.; assessment, diagnosis and differential diagnosis of substance use disorders (including assessment with the AUI, ASI, MAST and others); and treatment models

and modalities for addicted or substance abusing clients.

CSL 6380 Seminar in Marriage & Family Therapy 3 credits

This course is for students with prior coursework in marriage and family therapy. It focuses on current research and theory in the field, and provides students with the opportunity to build theory and create and develop marriage and family interventions. Prerequisites: CSL 6160 and CSL 6600.

CSL 6460 Marital Systems 3 credits

This course explores current theory and practice of couple and marital therapy. It includes a review of the professional and non-professional literature related to the subject. Topics such as divorce, infidelity, relationship enhancement, cross-cultural marriages, and same sex couples are researched. Interactive patterns, societal influences, and intervention strategies are discussed. Prerequisite: CSL 6160 or equivalent. Cross-listed as and equivalent to PSY 6460.

CSL 6470 Theories & Techniques of Group Counseling & Psychotherapy 3 credits

This course is a study of the history, theory, and practice of group counseling and psychotherapy. Several major contemporary models of group counseling are examined. Instructional methods include both didactic presentations and experiential methods. Students are afforded the opportunity to participate in a training group as a group member and as a leader. A strong emphasis is placed on ethical standards and self-assessment of personal strengths and weaknesses that affect group leadership. Prerequisite: CSL 6210. Cross-listed as and equivalent to PSY 6470.

CSL 6501 Psychology of Personality 3 credits

This course explores the major theories of personality including Psychodynamic, Behavioral, Biological, Cognitive, Trait-Factor, and Humanistic/Existential approaches. Students study individual theories and compare and contrast these theoretical positions in terms of current research. In addition, students explore the relevance and application of personality theories to the profession of psychology. Cross-listed as and equivalent to PSY 6501.

CSL 6570 Comparative Styles in Parenting 2 credits

This course reviews the various styles of parenting and guiding the development of children and adolescents. Styles are compared and contrasted, with specific targets toward assisting parents in the marriage and family counseling process.

CSL 6575 Couples Communication 2 credits

This course provides an examination of the types and levels of effectiveness of communication employed by couples. Areas of focus include communication media, modalities, styles, techniques, and methods of interpretation used by couples.

CSL 6580 Human Sexuality & Sexual Disorders 3 credits

This course focuses on the sexual response cycle, sexual identity, and the treatment of sexual disorders in clinical practice. The primary emphasis is on the way in which a disturbance in the processes of the sexual response cycle (desire/excitement/orgasm/resolution) leads to sexual dysfunction. The student also becomes familiar with the paraphilias and gender identity disorders. Cross-listed as and equivalent to PSY 6580.

CSL 6585 Play Therapy 2 credits

This course is designed to acquaint students with the types of children with whom therapy is appropriate and to help students improve their ability to conduct meaningful assessment interviews with children, parents, and teachers. The course emphasizes the play therapy approach to psychotherapy with children and familiarizes the student with current law and play therapy techniques addressing physical, emotional, and sexual abuse of children, including theoretical understanding of play therapy techniques.

CSL 6600 Theories & Techniques of Marriage & Family Therapy I 3 credits

This course is a didactic integration designed to introduce the student to the foundations of marriage and family therapy. It provides an overview of the major theoretical approaches to marriage and family therapy. Assessment techniques and intervention strategies are

presented for all of the schools of thought, with an emphasis on intergenerational, communication, experiential, structural, and behavioral approaches. Cross-listed as and equivalent to PSY 6600.

CSL 6610 Theories & Techniques of Marriage & Family Therapy II 3 credits

This course focuses on mastery of basic and advanced principles of marriage and family therapy through an integration of therapeutic perspectives of modernist models. Models studied include strategic, brief solution focused, narrative, and integrative. Intervention strategies from each perspective are presented and practiced. Prerequisites: CSL 6160 and CSL 6600. Cross-listed as and equivalent to PSY 6610.

CSL 6820 Treatment of Children & Adolescents 3 credits

This course examines effective treatment modalities for at risk populations of children and adolescents. Intervention strategies to support the child within the school, community, and family system are discussed and demonstrated through case studies and video vignettes. The course targets a variety of disorders, the most notable of which are ADD, ADHD, Autism, PDD, Asperger's, Tourette's, Reactive Attachment Disorder, Phobias, NARD, OCD, Fragile X Syndrome, and other genetic disorders.

CSL 6851 Counseling Practicum 1 credit

The Counseling Practicum experience at University of the Rockies is designed to further the classroom experience that students have completed and to allow them to begin practice and application of skills. The competencies that are evaluated are designed to train graduate level mental health clinicians consistent with the standards of national accrediting bodies (e.g., CACREP). Prerequisites: CSL 5280 and CSL 5290, as well as completion of Practicum Application and permission of instructor.

CSL 6852 Counseling Practicum 1 credit

The Counseling Practicum experience at University of the Rockies is designed to further the classroom experience that students have completed and to allow them to begin practice and application of skills. The competencies that are evaluated are designed to train graduate

level mental health clinicians consistent with the standards of national accrediting bodies (e.g., CACREP). Prerequisite: CSL 6851.

CSL 6853-6857 Counseling Internship 1 credit (each)

The Counseling Internship experience at University of the Rockies is designed to further the classroom and Internship experience that students have completed and to allow them to begin practice and application of skills. The competencies that are evaluated are designed to train graduate level mental health clinicians consistent with the standards of national accrediting bodies (e.g., CACREP.)

CSL 6951 Marriage & Family Therapy Practicum 1 credit

The Marriage & Family Therapy Practicum experience at University of the Rockies is designed to further the classroom knowledge that students have completed and to allow them to begin the practice and application of skills. The competencies that are evaluated are designed to train graduate level mental health clinicians consistent with the standards of national accrediting bodies (e.g., CACREP, AAMFT.) Prerequisites: CSL 5280 and CSL 6600 as well as completion of Practicum Application and permission of instructor.

CSL 6952 Marriage & Family Therapy Practicum 1 credit

The Marriage & Family Therapy Practicum experience at University of the Rockies is designed to further the classroom knowledge that students have completed and to allow them to begin the practice and application of skills. The competencies that are evaluated are designed to train graduate level mental health clinicians consistent with the standards of national accrediting bodies (e.g., CACREP, AAMFT.) Prerequisite: CSL 6951.

CSL 6953–6957 Marriage & Family Therapy Internship 1 credit (each)

The Marriage & Family Therapy Internship experience at University of the Rockies is designed to further the classroom knowledge that students have completed and to allow them to begin the practice and application of skills. The competencies that are evaluated are designed to train graduate level mental health clinicians

consistent with the standards of national accrediting bodies (e.g., CACREP, AAMFT.)

EDU Education

EDU 5101 Learning Theory 3 credits

This course focuses on human learning theory and systems. It explores historical and theoretical views of human learning throughout the developmental lifecycle. Students will address the factors that contribute to individual differences in learning. Students will investigate the major theories concerning the learning process and explore the implications. Students will analyze and apply research in the field through a combination of critical discussions, case studies, journaling, interviews, and written assignments. Equivalent to ORG 6508.

EDU 5250 Foundations of Learning 3 credits

Students in this course will investigate case studies of actual situations within their chosen areas of interest in higher education institutions. They will develop a broad perspective by critically analyzing the foundational theories and existing educational research. Students will utilize reflective strategies to analyze and improve professional practice.

EDU 5450 Educational Trends 3 credits

This course addresses the shift from the pedagogy of instructor-led, classroom-based instruction to just-in-time, project-based, collaborative learning and explores the use of mobile, hybrid, and online platforms as emerging forces in teaching and training. Students will explore integrating emerging technologies to support student learning, accessibility, social learning, the shift in authority from the institution to the learning community and the changing landscape of knowledge creation and schools.

EDU 5650 Current Education Research 3 credits

The field of education is rapidly changing. To meet the demands of these changes, students will delve into recent research to critically analyze the depth of research for their chosen topic in preparation for proposing a solution.

EDU 6100 Identifying Solutions in Education 3 credits

Students leverage their understandings of historical, theoretical, and philosophical foundations in the field of education to identify a relevant problem. This course focuses on proposing solutions to problems in the field of education. It explores the theory and application of problem-solving. Students will synthesize a critical analysis of foundational theories and current research in their area of interest to propose a solution to an identified problem in education.

EDU 6200 Implementing Solutions in Education 3 credits

In this project based course, students will leverage their understandings of historical, theoretical, and philosophical foundations in the field of education to analyze educational situations for solutions. Learners will develop models or frameworks to effect change in practice and apply their learning through application.

EDU 6215 Curriculum Design & Implementation 3 credits

Students will gain the skills and knowledge needed to apply adult and other learning theories, pedagogical models, and frameworks to current issues in higher education curriculum, instruction, and assessment. This will be accomplished by designing an original sample curriculum, and an implementation and evaluation plan. Students will have the opportunity to apply theoretical learning to a real-world setting. They will utilize varied instructional design strategies and incorporate innovative technologies into their curriculum, implementation, and evaluation plan with the goal of enhancing their own students' learning. Finally, students will integrate effective leadership principles to ensure stakeholder engagement.

EDU 6235 Strategies for Assessment & Evaluation 3 credits

Students will examine formative and summative assessment, and direct and indirect evaluation methods to assess student learning and evaluate the effectiveness of education programs. Leading research and emergent trends for assessment,

accountability, and outcomes evaluation will be examined.

EDU 6300 Communication Methods in Education 3 credits

Grounded in communication theory, this course provides students the opportunity to practice their communication skills in multiple settings and modalities. Students will distinguish which communication methodologies work best in particular settings for the given message, taking into account target populations and influencing factors. Students will create various types of reports and a summative presentation to communicate the results of their project.

EDU 6315 Developing & Managing the Distance Learning Infrastructure 3 credits

This course is an exploration of the relationship between training and technology. It will guide students through an exploration of three key components critical to the development of technology solutions based on the addressed needs of the institution: hardware, software, and training. The course will also explore learning support, operations scalability, and sustainability.

EDU 7000 Learning & Cognition 3 credits

Educational practice is based on theories and philosophies of learning and cognition. These accepted theories have evolved, from idealism to realism, pragmatism to constructivism, and are incorporating new research in brain-based learning. This course will focus on theories and philosophies of learning and cognition along with ways in which these theories are studied and applied in educational practice.

EDU 7100 History of Education & Social Change 3 credits

This course examines the history and philosophy of education, as well as a systematic analysis of the effect of social change on education and vice versa. Adult learning and higher education settings are a focus in this course.

EDU 7120 Transformative Issues & Trends in Education 3 credits

This course examines current issues in education, and explores how changing social trends affect educational systems and practices bound by decades of tradition. Topics include

applicable federal and state policies and regulations, national education standards, access to education, and others.

EDU 7200 Strategies for Teaching & Learning 3 credits

In this course students will examine strategies and approaches used in teaching and student learning. They will investigate and research current issues, with an emphasis on theories, learning, learning communities, and educational systems.

EDU 7220 Educational Leadership: Challenges & Opportunities (3 credits)

This course explores current trends in higher education with an emphasis on challenges and opportunities that administrative leadership will face in the next ten years due to changing demographics, technology, structures, and resources. The 21st century education administrator faces a number of challenges including student preparedness, campus safety, reduced institutional aid, programmatic costs, environmental concerns, and a myriad of other factors that make appropriate problem assessment and decision-making a priority. This course will focus on diagnosing the root causes of common institutional problems and apply appropriate solution-based critical thinking skills.

EDU 7240 Diversity in Education 3 credits

Students will identify and analyze the socio-cultural, institutional, historical, legal and political resources, policies, and needs associated with serving diverse populations in an educational setting. They will be prepared to advocate for underserved communities and for constituents with diverse needs and learning processes. Students will grapple with complex situations and propose strategies for resolution.

EDU 8205 Advanced Theories & Designs of Learning 3 credits

Students will explore the history of and most current research on learning theories and design, and examine how they relate to curriculum, instruction, and assessment. Students will design and/or evaluate appropriate instructional strategies and systems to support student learning at the post-secondary adult education and higher education settings. The student will incorporate factors that contribute to effective

learning, along with research driven strategies into curriculum models appropriate to integrate into an institution of higher learning.

EDU 8215 Assessment Research & Evaluation 3 credits

This course will provide an analysis of differing orientations to assessment of student learning, program and instructor evaluation, and outcomes research within educational systems. Emphasis is on assumptions and expectations of what constitutes scientific knowledge and explanations; relationship of research orientation, methods of inquiry, theory, and practice.

EDU 8225 Culture, Curriculum & Learning 3 credits

This course explores literature and recent debate related to culture and linguistic diversity, learning, and instruction both within the United States and globally. Emphasis will be placed on an exploration of the history of and recent debates related to social, cultural and linguistic diversity, learning, and instruction in the service of leveraging resources and systems to support student learning in diverse populations.

EDU 8235 Curriculum Development in an Adult Learning Environment 3 credits

This course combines research from curriculum theory, instructional design, online learning, and instructional text design in order to explore alternative possibilities for designing curriculum materials in an adult learning environment. Students will explore alternative curriculum design possibilities and select and utilize instructional strategies and interventions appropriate for adult learners. The interventions will address the needs of the learners and emphasize evaluation of the learning. The course will put the student in the role of an instructional designer using instructional design competencies to carry out an experiential project.

EDU 8240 Theories & Models of Instructional Systems Design 3 credits

This course will include an examination of the major instructional design models and their theoretical, empirical, historical, and philosophical foundations in technology and media. Students will evaluate current theories and models and examine the historical and philosophical foundations of these theories and will present

their analyses of instructional design examples as well as prepare an outline for an instructional design project, incorporating relevant learning theory, media, and other technology applications. Equivalent to ORG 8540.

EDU 8250 Curriculum, Assessment, Design, & Evaluation 3 credits

This course will provide students with an opportunity to study curriculum assessment, design and evaluation principles, processes, approaches and models. The focus will be on the resulting impact on curriculum, assessment, design and evaluation modifications at the classroom, school, system, state, and national levels. The influence of societal trends will be examined as will recent major higher educational reform efforts and potential future trends.

EDU 8260 Integrating Technology 3 credits

This course will equip learners to recognize and integrate appropriate learning theory into instructional design, and to make effective use of instructional interventions, technology and media. Participants will evaluate current theories and models, policies and initiatives, along with original scholarship, to examine the historical and philosophical foundations of these theories and their influence on the use of technology and media.

EDU 8310 Research into the Effective Use of Technology in Education 3 credits

Two decades of experimenting in the use of technology in teaching, training, and learning have resulted in both unexpected successes and misspent millions. This course explores the use of technology to support student achievement. Students will critically review the history not only of the success and failure of technology integration, but also will critically evaluate the research that has been conducted on technology integration in education. Students will prepare an analysis of the research as part of a proposal to their educational institutions regarding the most effective use of technology to support student achievement.

EDU 8320 Change in People, Society, Bureaucracies, & Institutions 3 credits

This course explores the contradictory roles of educators and educational institutions in both preserving the past and preparing students for

the future. The impacts of recent innovations and advancements in technologies have not been fully realized and will be the foundation of exploration in this course. The role of change agents, early adopters, and the diffusion process on the acceptance of innovation will be investigated.

EDU 8330 Bridging the Digital Divide 3 credits

Differences in access to technology are emerging among countries, institutions and individuals, and having distinctive effects on communication and opportunities. This course addresses these effects and efforts to diminish and resolve the Digital Divide, from Voice for America to One Laptop per Child to the ubiquity of the smartphone.

EDU 8340 Laws, Legislation, & Policy in the Use of Technology 3 credits

This course explores the legal and ethical issues and challenges that facilitate or constrain the use of technology in higher education. Legal principles covered include academic freedom, fair use and copyright, the Digital Millennium Copyright Act, the TEACH Act, FERPA and ADA compliance, and CFAA. The course is structured to assist educational leaders with the legal and ethical frameworks necessary to lead in evolving technology-rich environments.

EDU 8350 Technology Infrastructure Plans 3 credits

Technology infrastructure plans detail hardware, software, and training needs for an organization, and should include both maintenance and new investments. Students will critique five-year plans for technology use for their accuracy and creativity in aligning with an organization's vision and mission as well as managing resources. Students will outline a technology infrastructure plan for their own organization.

EDU 8360 Distance Learning Concepts & Configurations 3 credits

This course examines the current issues in distance learning through an exploration of the multiple venues and modalities that currently identify the term "distance learning." Students are expected to analyze the various methodologies associated with distance learning by providing

realistic solutions to selected institutional problems.

EDU 8370 Involvement & Advocacy in Distance Learning 3 credits

Distance learning leaders have a responsibility for involvement in policy decisions and student advocacy at the national and international level. This course explores ways distance learning leaders can share their experiences and voice their opinions as advocates for the advancement of human knowledge and opportunity. Students will develop a plan of advocacy to advance a topic of interest on both the national and international stage that will achieve this result.

EDU 8770 Doctoral Capstone Seminar 4 credits

This seminar provides students the opportunity to apply what they learned in their doctoral core coursework as well as their fields of specialization. Students will review, analyze, and evaluate material related to important topics in education and will demonstrate the ability to apply the content by preparing a final integrative portfolio project. Students will contemplate complex questions posed by their instructor, reply to those questions, and respond to other students' analyses and evaluations. Additionally, segments of the final integrative project will be submitted for review and feedback at intervals throughout the course. The final portfolio project will comprehensively demonstrate the student's critical thinking on the essential issues studied in the doctoral program in education. Prerequisite: completion of all required coursework. ***This course may not be transferred in.***

HUD Human Development

HUD 5110 Human Sexuality 3 credits

Human Sexuality provides a comprehensive introduction to interdisciplinary issues of social, cultural, behavioral, biological, and psychological aspects of sexuality. The course provides knowledge in the basic areas of sexuality theory across the life-span that includes childhood, adolescence, adulthood, and later life. Students will apply and critically analyze contemporary human sexuality research to public policy, health services, and other social services programs by

addressing issues (some of which are controversial) such as challenges in discussing sexuality, sexual problems and dysfunction; sexual coercion and abuse; sex industry; sexual identity (mainstream and LGBTQ) sexually transmitted infections (STIs) and sexual risk; aging and sexual function, and finally optimal sexual well-being in later life.

HUD 5320 Advanced Theories of Adult Personal Transformation 3 credits

This course combines theoretical concepts of adult development and adult learning with the experiential processes that lead to personal transformation. Course topics add to the external, rational, and analytical perspectives by also exploring the internal processes of how adults learn and transform their meaning schemes over time. Students will have the opportunity to become aware and analyze current assumptions, interpretations, emotions, beliefs, habits of mind, and perspectives that define their external and internal world. Students will participate in mindfulness practices designed for transformational change, such as journaling, discourse, and a variety of reflective practices.

HUD 5330 Personality Development 3 credits

This course introduces an array of personality theories, assessments, current research, and mechanism for transformational growth. Topics include psychodynamic models of personality, trait theories, and humanistic theories. Students will gain a broad grasp of the field of personality development by participating in experiential activities designed to foster an understanding and acceptance of their personality that include identity, agency, personal power, and shadows, the assumptions of each, and the implications for personal moral, emotional, and spiritual development; and interpersonal relationships.

HUD 5340 Resiliency, Transformation, and Life's Challenges 3 credits

This course examines the theoretical concepts and assumptions of an individual's ability to appropriately manage and cope with life's stressors and adversity. Topics will explore factors in developing resilience when dealing with both ordinary and extraordinary stress. Students will have the opportunity to explore their own sense of resiliency and practice strategies based on empirical evidence from research on resilient

individuals who have a tendency for adopting coping strategies that elicit positivity. Resiliency strategies include cognitive reappraisal such as finding benefit-in life's challenges, humor, or optimism; realistic planning, self-confidence, goal directed problem solving skills, and the ability to manage strong impulses and feelings.

HUD 5420 Interdisciplinary Theories of Gerontology 3 credits

This course explores the interdisciplinary issues associated with gerontology and aging. Topics include social, biological, cognitive theories; differences in issues related to environment and gender; and future implications for service organizations and policy makers in relation to an aging society. Students will understand the individual aging process related to psychological, economic, cultural, and health issues. Students will critically assess the practical implications of an aging population, its social significance, and its effect on society at large in relation to policy, services, living environments, retirement, social support, family relationships, and diseases of older adulthood.

HUD 5430 Physical and Psychological Aspects of Aging 3 credits

This course explores the current trends in research regarding the ethical, philosophical, and emotional aspects of death and dying for the individual, family, care-givers, and others. Students will gain an understanding of the physical and psychological aspect of aging including topics and related to the meaning and end of human life according to various religious and cultural viewpoints in relation to topics such as the quality and sacredness of life, end of life moral issues, grief and mourning, suicide, and perspectives on life after death. Students will be provided realistic case studies to critically analyze the broad array of choices faced by people who are approaching the end of their lives, including their families and loved ones and other who are involved in the decision making process. Students must consider questions related to suffering, dying, prolonging, and manipulating life.

HUD 5440 Optimizing Aging: Learning, Leisure, and Social Interaction 3 credits

This course focuses on recent theory related to the elderly within a social context. Students will

be able to personally relate with the aging process and the skills necessary to cope with the emotional and physical challenges associated with the aging process, including how society responds to older adults. Topics include demographics, stereotypes and attitudes, intimate relationships, recreation, physical ability, wellness, family relationships, caregiving, employment and retirement, finances, living environments, crimes against and by older adults, social programs, and political power of the older cohort.

HUD 6001 Overview of Human Development 3 credits

This course provides a foundation of human development theory from birth to death. Students will learn about classic and contemporary research and perspectives about human development throughout the life span. Topics focus on the nature of development that involves biological, cognitive, and socio-emotional processes of development. Included in the course are biological and environmental influences within different age groups, including concepts of age.

HUD 6910 Human Development Capstone 3 credits

This capstone course addresses the application of human development theory to research and practice. Students will choose from a selection of case studies provided that deal with gerontology or adult development and will be required to develop a proposed solution that applies their learning through an integrative project plan that combines advanced research, data collection, analysis, and reporting. Prerequisite: completion of all required coursework.

HUM Human Services

HUM 5010 Overview of Human Services 3 credits

This course is designed to introduce the student to the broad field of human services, the types of disciplines represented in the field, the general nature and scope of services provided by the disciplines, the similarities in services provided, and the differences among the disciplines. A major emphasis will be on the ways in which human services professionals can effectively and efficiently interact to enhance service delivery and maximize the use of valuable resources.

HUM 5060 Grant Writing 3 credits

This course provides students with knowledge of various types of government and private grants, sources of information on funding agencies, grant writing principles and techniques, pre-submission consultation review processes, and the overall grant review process. Practice in researching funding sources and grant guidelines and in proposal preparation are included.

HUM 5100 Integrative Project for Human Services 3 credits

This course provides the opportunity for students planning careers in human service agencies to apply knowledge and skills obtained throughout the program in a practical way. Students may opt for projects in new program/ service delivery design, program evaluation, quantitative or qualitative research on an issue in human service delivery, or other appropriate areas, approved by the instructor. HUM 5100 is intended to be a capstone course in the student's program. Prerequisite: completion of all required coursework.

HUM 5210 Recruiting & Coaching Volunteers 3 credits

This course is designed to provide students with working knowledge of volunteer use in human service agencies. Sources and methods of volunteer recruitment, legal issues in the recruitment and use of volunteers, screening issues, methods of training, and techniques for coaching, securing and maintaining on-going commitment, and effective use of volunteers are areas of focus.

HUM 5220 Non-Profit Principles & Practices 3 credits

This course provides students with the common issues and principles surrounding non-profit agencies and organizations. Background and philosophy, rules and regulations, tax implications, principles of philanthropy, the role of grants and other sources of external funding are emphasized.

HUM 5300 Human Services Delivery Skills & Processes 3 credits

This course provides students with a broad overview of the laws and regulations that govern delivery of services in the various human services disciplines. Cross-disciplinary regulations, policy development and review in agencies, and methods to impact policy

/regulation development and revision at the state and national level are areas of emphasis.

HUM 5400 Organizational Behavior & Leadership 3 credits

This course explores the theories of human organizations, principles of organizational behavior, and principles of leadership, focusing on functions and factors which influence the structure, design, operation, and performance of individuals in complex organizations. The emphasis is on integrating theory and concepts from the behavioral and social sciences as a basis for understanding human behavior and leadership within organizations.

HUM 5500 Human Services Administration 3 credits

This course draws from the concepts of organizational behavior and leadership theory and human services policy to present the students a conceptual framework for leading a human services organization. Leadership issues unique to human services settings will be discussed, with the focus on developing effective leadership styles for deployment in human services agencies. Prerequisites: HUM 5300.

HUM 6100 Group Theories & Human Systems 3 credits

This course will explore group theories and groups as human systems. Students will study how large and small groups are utilized in human service organizations. The students will also gain an understanding of group dynamics and functionality for the application of research and theory relating to large and small groups and human social systems for the enhancement of service delivery. The emphasis is on integrating theory and concepts from the behavioral and social sciences as a basis for understanding group systems theory and human behavior within human services and society.

HUM 7100 History & Systems of Human Services 3 credits

This entry point course provides the historical context and development of the human services field. This course examines the historical context and the evolution of health and human services professions. Students will study the origins of the profession and evaluate ways in which philosophical and ideological perspectives have defined the fields of practice throughout its

history. Students will analyze the ways service delivery and social policy has changed in response to political influence and societal needs. Students will explore the differing political, social, and economic perspectives and their influence on health and human services professions.

HUM 7140 Socio-Cultural Determinants in Society 3 credits

In this case study-based course on social determinants of human services and aspects of diversity, students will examine the conditions in which people are born, grow, live, work, and age in varying US and global social systems and demographics. Students will explore social constructs, correlates of behavior, impact of social and community structure on status, and disparities within diverse communities. Students will apply social and behavioral theories of human service resources, strategies, methods, ethics, and public policy.

HUM 7160 Organizational Operations & Human Services Administration 3 credits

Students will apply advanced critical thinking skills in this course designed to expose them to a broad range of essential organizational operations and extend students' existing knowledge base on the workings of human services administration. In addition to exploration of volunteer recruitment, retention and management, marketing, cross-disciplinary regulations, development and implementation of policy, change management, fund-raising, the critical focus will apply to leadership theories and organizational behavior aimed at positions of leadership within an organization.

HUM 7170 Financial & Grant Management 3 credits

This financial and grant management course critically examines and identifies various accounting and financial knowledge related to the establishment and monitoring of financial strategies, policies, and tools within a government or private human services organization or service. In addition, financial management roles and responsibilities, advanced grant writing principles and techniques, and ethical financial practices and accountability will be explored and developed.

HUM 7175 Program Review & Evaluation 3 credits

This practical program review and evaluation course for the human services discipline will employ a hands-on approach ultimately culminating in a hypothetical program evaluation and service-level improvement by completing weekly process goals, to include analysis of a completed needs assessment survey. The course will provide students with all materials needed in order to evaluate the complex program presented and complete tasks to ultimately modify it by the end of the term.

HUM 7200 Governance & Finance in Non-Profit Organizations 3 credits

This advanced course explores issues and best practices in the governance of non-profit organizations with an emphasis on the relationship between mission, financial management, and governance. Topics include balancing long-term financial stability with short-term mission focus, governance and financial controls, budgeting, income forecasting, program priorities, and staff compensation.

HUM 7210 Leadership & Advocacy 3 credits

This course explores theories of developing and applying motivation, influence, communication and persuasion methods for leaders to empower, enable, and encourage others to become actively engaged in social, human, and service issues within political and community populations in both domestic and global environments. This course is intended to prepare students to successfully assume organizational leadership roles and will include hands-on, real world leadership and advocacy opportunities in order to gain this experience for their future.

HUM 7250 Emerging Trends & Innovations in Human Services & Social Sector 3 credits

This highly collaborative course on the emerging trends and innovations in human services and the social sector will require students to conduct extensive literature reviews resulting in the exploration of prospective dissertation topics to gain significant knowledge of the evolution of their chosen topic. In addition to other activities to determine the future innovations in the human services and social sectors, the students will each examine the root of their prospective dissertation topic, the literature available, and what they see in the future that is emerging from this chosen topic. Students will share their findings periodically as scheduled throughout the

course for collaboration and peer review purposes.

HUM 7480 Evidence-based Practice in Human Services 3 credits

This course demonstrates the value of evidence-based practice as an integral part of formulating human services research and policy. Course work examines the current definition of evidence-based policy and approaches to move the field forward. The course provides an evaluation of evidence-based literature, including case study examples of the application of evidence-based practices in human services. The course also examines actions to further evidence-based policy, including preparing and communicating data more effectively, using existing analytic tools, conducting policy surveillance, and tracking outcomes with different types of evidence.

HUM 8060 The Non-Profit Executive as Fund Raiser 3 credits

This advanced seminar examines all recognized methods of fund raising, forecasting fund raising income, and balancing administrative and fundraising expenses in the short term with longer term programmatic and mission goals. Topics include direct mail, planned giving, special events, corporate giving, and foundation grant writing.

HUM 8070 Advanced Seminar: Volunteers & Non-Profit Governance 3 credits

Non-profit organizations and their governance, depend heavily on sound working relationships among staff, especially executive staff, volunteer officers, and board members. This course explores common issues and concerns related to this governance, especially succession planning, assessing the ability of potential leaders, executive development, and engaging volunteers during and between board meetings.

HUM 8105 Applied Human Services Policy 3 credits

This course examines cutting edge trends in the formation and execution of human services policy in public and private organizations. Selected topics include the current human services climate, forces driving policy formation and execution, and issues related to the future of human services policy. The topics selected will connect human service policy with culture, existing organizational strategies, and the process of change in future directions. Effective

mechanisms to influence policy are emphasized. Major case study examples of human services policy are included in the learning process.

HUM 8115 Theories & Strategies of Community Development & Advocacy 3 credits

This course examines the theories and research underlying the political, economic, and social structures related to community groups and organizations within contemporary society. Students analyze methods of creating communities and social organizations that empower and support individuals to work together to initiate change, with or without the assistance of outside advocacy. Students develop skills to create and assess community action plans, incorporate persuasive language into client advocacy, and organize political action groups to seek opportunities for themselves and others. There is a focus on social and economic justice within the context of human services' ethics that supports and sustains the well-being of individuals and communities, especially among diverse populations.

HUM 8125 Performance & Quality Management 3 credits

This course provides students with the opportunity to explore the theories underlying performance evaluation and approaches to evaluation in human services settings. Emphasis is placed on conceptual, methodological, organizational, political, and ethical problems in evaluating both risks and approaches involved in the delivery of human services. Students will learn to identify quality and outcome indicators. They will learn to evaluate research and analyze data associated with the evaluation of the quality of service delivery and the assessment of risk. They will learn construct techniques used to perform the evaluations, strategies for getting human services professionals to be invested in the development of the research and in the outcomes, demonstration of program effectiveness, and dissemination of results to stakeholders.

HUM 8135 Advanced Issues in Socio-cultural Concepts & Practices 3 credits

This course provides students with a framework to explore social problems and approaches using a global perspective. Students will evaluate the sociocultural-theoretical assumptions and

methodological techniques underlying the practice of global human services. Students will examine the processes of advocacy and social change at a global level. Students will assess the ways in which community, national, and international sociocultural issues impact the human services professional.

HUM 8145 Child & Family Advocacy 3 credits

This course will provide students with a critical understanding of child and family welfare. Topics analyzed will include infancy, baby, child, youth, and adolescent physical, cognitive, emotional human development and behavior with related issues. Additionally, family systems, challenges, and resources available, legal issues related to familial dysfunction and abuse, domestic violence, health services, global issues (e.g., human trafficking, disease, child safety, etc.).

HUM 8205 Change Agents in Human Service Systems 3 credits

This course examines the complex, dynamic, and rapidly changing human service system in the United States. Action research will be examined critically and applied. Students will explore the nature of becoming a change agent in the human service systems and the influences that create change in these systems, with an emphasis on current policy issues, performance challenges, and program solutions. Students will examine the social, economic, and political forces that have shaped and continue to influence the human services along with strategies to effectively manage the changes they produce, with a goal of becoming effective change agents. Students develop skills to master inner strengths and overcome limitations associated with being effective change agents.

HUM 8215 Special, Vulnerable & Underserved Populations in Human Services 3 credits

This course will apply a hands-on approach to understanding the unique needs of vulnerable and underserved populations in the human services field. Students will explore all of the following and select one to complete a practical project incorporating the study of and recommendations for specific needs of: military members and their families, veterans, homeless individuals and homeless families, immigrants, the geriatric community, medically underserved, chronically and severely mentally ill, single

parents, the uninsured, economically disadvantaged children and families, those with human immunodeficiency virus [HIV], racial/ethnic minorities, incarcerated individuals and their families, or any other instructor approved demographic population.

HUM 8225 Human Services Information Technology 3 credits

This course explores the past, present, and future of various human services information technology modalities from the basics of computer literacy, telecommunications, networking, accounting and administrative applications, to security issues and Health Insurance Portability and Accountability Act of 1996 (HIPAA). With evolving changes in laws and policies, such as implementation of the Affordable Care Act, this course is recommended for those students interested in staying abreast of the latest in cutting-edge technologies that coincide with this and other legislative initiatives impacting the human services field.

HUM 8519 Advanced Seminar: Ethical Issues in Non-Profit Management 3 credits

This advanced seminar examines enduring issues in business and professional ethics and applying proven approaches to ethical professional practice and organizational operations in contemporary non-profit organizations. Topics will include social responsibility of for-profit organizations in support of non-profit organizations, program operating budgets vs. long-term financial stability, and ethical concerns related to governance and program priorities.

HUM 8770 Doctoral Capstone Seminar 4 credits

This seminar provides students the opportunity to apply what they have learned in their curriculum to highly realistic case studies related to their fields of specialization for the doctorate. Through discussions among students and the instructor, students will review, analyze and evaluate case studies emphasizing the practice of the content in their curriculum. The course will involve the analysis and evaluation of one or more case studies. Students will contemplate complex questions posed by their instructor, reply to those questions, respond to other students' analyses and evaluations, and receive faculty feedback. Each student will submit a final assignment on

each case, involving his or her critical thinking on the core issues presented in the case and the presentation and defense of an approach to addressing those core issues. Prerequisite: completion (including approved credits transferred) of all coursework required in the student's doctoral curriculum). *This course may not be transferred in.*

INT International Leadership

INT 6210 Foundations of International Leadership 3 credits

This course provides the foundation for students to think and act across cultures. The course examines different cultural concepts of leadership and work that span different cultures, economies, politics, and geographies throughout the world. Particular attention is given to developing leadership and sustaining successful transnational organizations.

INT 6225 International Leadership Integrative Project I 3 credits

In this course, students further their exploration, assessment, and development of themselves as leaders. The course will provide an opportunity for students to develop and reflect on an understanding of themselves and how such self-awareness contributes to effective organizational leadership. Students will explore a range of self-assessment tools, take part in an immersive cultural experience, and synthesize new learning with knowledge and skills gained in previous Leading Self courses to develop plans to further develop the emotional and cultural intelligence required to be effective leaders in the global arena. Prerequisites LDR 6220 and ORG 6499.

INT 6230 Leading Across Boundaries 3 credits

Effective organizational leadership occurs when groups collaborate across boundaries to achieve outcomes that are above and beyond what those groups could achieve on their own. No longer do leaders work only within an intact group in which leaders and followers share a culture, values, and interests. Global leaders must also be able to lead across groups, where a diversity of experience, expertise, and culture intermingle.

This course provides students with the knowledge and skills required to lead successfully across intra-and inter-organizational group boundaries in the global, multi-cultural environment. Students explore leadership styles, principles, and theories; cultural competence required to lead successfully in the global environment; characteristics and challenges of the six boundaries that leaders encounter (vertical, horizontal, stakeholder, demographic, and geographic); and specific strategies for spanning these boundaries in the global context. Prerequisite: INT 6225.

INT 6240 Cross-Cultural Coaching 3 credits

This course will guide students in examining and analyzing essential constructs and practices for effective cross-cultural coaching, and the impact and influence that cultural differences have on the coaching process and its participants. Students will explore cutting-edge executive coaching models, various coaching orientations, tools, and techniques of effective cross-cultural coaching, and will have the opportunity to build basic skills in coaching such as establishing rapport and purpose, effective listening skills, giving effective feedback, and goal setting. Students will conclude the course designing a cross-cultural coaching session. Prerequisite: INT 6225.

INT 6245 International Leadership Integrative Project II 3 credits

International leaders must learn to effectively lead cross-cultural and virtual teams. The ability to build and maintain relationships is critical and requires a focus on the needs of others with both cognitive and emotional skills. This course will provide students with the opportunity to gain both knowledge and real-world experience building and leading cross-cultural teams. Students will use knowledge, skills, and tools acquired in the course and previous courses to lead the team in the development of a proposal to address a pertinent organizational issue and develop a change management plan to effectively implement the initiative within a diverse, trans-cultural or transnational organization. Prerequisites: INT 6240 and RES 5240.

INT 6250 Glocalization: Leading Across Cultures & International Communication 3 credits

This course introduces the concept and evolution of *glocalization* over past decades. The dialectic of global and local are examined within complex globalized marketplaces where global dexterity is required. Students are grounded in basic theories of communication and explore how dimensions of culture influence leading and communicating across cultures, particularly at an organizational level. Students design a plan to “glocalize” an organization by adapting their leadership and communication behaviors and styles.

Prerequisite: INT 6245

INT 6270 International Financial Leadership & Management 3 credits

This course is designed to empower students with a framework of essential finance and accounting terminology, concepts, and applications for a range of organizations in the private, non-profit, and public sector. Students will learn how financial decisions impact the operation of organizational units and the viability of organizations. Students will also learn the key elements of typical finance and accounting operations in organizations and how such activities relate to the effective development and deployment of leadership strategies in an organization. Prerequisite: INT 6245

INT 6280 International Strategic Leadership 3 credits

This course provides students with the knowledge, tools, and skills required to develop a coherent and effective organizational strategy and to lead strategically within an international environment that features diverse economic systems, volatile political environments, conflicting labor practices, and other complex global and/or regional realities. Students will explore the essential elements of an effective strategic plan; the leader's role and responsibilities in the application of strategic thinking, planning, and implementation within international organizations; and the extrinsic factors that influence the success of a strategic plan. Students will gain knowledge and skills that allow them to better align their leadership and work with the strategic goals of international organizations and the larger, long-term interests of a global community. Prerequisite: INT 6245

INT 6285 International Leadership Integrative Project III 3 credits

Effective leadership requires a strong outward

focus and perspective. As a capstone experience, this course will give students the opportunity to integrate knowledge from prior courses to identify critical strategies, relate human capital concepts to those strategies, and produce actionable organizational strategies and plans that are globally focused through a practical, real-world experience. Students will work in teams to design a social innovation initiative, develop an effective grant proposal for the initiative, evaluate proposals, and assess their leadership strengths in light of the experience. The course is delivered over the course of six weeks in an asynchronous online environment. Prerequisite: completion of all required coursework.

LDR Leadership

LDR 6220 The Focused Leader 3 credits

The Focused Leader provides students with insight- and action-based skills focused on understanding oneself and one's impact on others—skills necessary for effective interactions in the global arena. The course builds upon research in emotional intelligence, mindfulness, and motivation, and gives students an understanding of the role of emotional intelligence as an aspect of personal empowerment and professional effectiveness, in the global context in particular. Students learn methods of managing emotions triggered by differences, develop strategies for building harmonious and productive relationships, and gain tools and strategies to help others develop emotional intelligence. Students will leave the course having identified goals for their own personal development, strategies for meeting those goals, and a plan for implementing those strategies. Prerequisite: INT 6210

ORG Organizational Leadership

ORG 5270 Mental Health & Psychopathology in the Workplace 3 credits

This course acquaints the student with both normal and abnormal behavior evident in the workplace. The focus of the course is creating a healthy culture in the workplace, maintaining a healthy work/life balance, and managing stress. In addition, students learn the common mental disorders and personality disorders manifested in

an organizational setting and how to exercise leadership to bring about positive change. Equivalent to PSY 5800.

ORG 5525 Psychology of Marketing & Purchasing Behavior 3 credits

Marketing of products and services focuses on consumer and business purchasing behavior. Marketing applies the principles of social psychology, qualitative research, and quantitative research to creating demand and supplying that demand. This course explores the social psychology of purchasing behavior and marketing efforts to influence that behavior among consumers and business decision-makers. Topics include market research, mass marketing, branding, packaging, pricing, labeling, and product fads.

ORG 5571 Traditional Criminological Theories 3 credits

This course introduces students to traditional theories of crime to facilitate an understanding of the causes of criminal behavior. Emphasis will be placed on the origins of traditional, interdisciplinary, and theoretical frameworks as they relate to delinquency, deviant behavior, and other types of crime. Specific types of criminal behavior will be used to explain and evaluate the various theories. Additionally, issues concerning societal problems will be discussed in relation to divergent theoretical views.

ORG 5574 Criminal Justice Organizations & their Functions 3 credits

In this course, the criminal justice process and its components are examined. Students will become familiar with the different organizations that the justice system comprises. The complexity of criminal justice processes functioning as a dynamic system of interrelated yet separate parts will also be studied. In addition, students will be introduced to the distinctions between the adult criminal justice and the juvenile justice system to gain an understanding of the different ways in which offenders are dealt with in each system.

ORG 5600 Theories of Conflict 3 credits

This course will introduce students to conflict resolution and mediation theories, approaches to resolving conflict, and tools available to mediate solutions to conflict. Topics include negotiation approaches and conflict mediation involving individuals, couples, families, teams, groups, organizations and communities.

ORG 5601 Diagnosing Conflict 3 credits

This course focuses on the methods available to examine the causes of conflict. Topics include theories of the dynamics that lead to conflict, power in families, teams, organizations, and communities, and outcomes of conflict. Emphasis is upon understanding the origins of conflict as a means to designing effective ways to resolve conflict through mediation rather than adversarial confrontation.

ORG 5605 Communication Strategies for Conflict Resolution & Mediation 3 credits

Mediation of conflict often relies on a variety of effective communication strategies and approaches students will explore in this course: dialogue, mediation, negotiation, and arbitration. The course emphasizes making wise choices of message, timing, and media for communicating to parties in conflict. Techniques include recognizing when parties are approaching states in which conflict resolution is likely to succeed based on what and how they are communicating.

ORG 5650 Contemporary Issues in Mental Health Care Compliance 3 credits

This course familiarizes the student with major areas of compliance in the administration of mental health agencies. Through readings and exercises students will explore HIPAA, JCAHO, other accrediting bodies, grant compliance, insurance regulations and lobbying efforts on behalf of mental health systems of care. Other topics may also be examined as new issues arise.

ORG 6200 Adult Learning & Human Development 3 credits

This course gives students an understanding of adult learning principles and best practices. It also provides an introduction to key theories of human development and learning as they apply to corporate training.

ORG 6210 Instructional Systems Design 3 credits

This course explains the principles, strategies, and techniques that are essential to the instructional systems design approach. Students learn to assess needs, conduct audience analyses, develop instructional materials, and evaluate courses.

ORG 6215 E-Learning & Instructional Technology 3 credits

This course exposes students to a range of multi-media tools used to design interactive instruction including computer-based training (CBT) and web-based training (WBT) products. Students apply instructional design principles to the development and delivery of instruction using e-learning technologies. Equivalent to EDU 6345.

ORG 6260: International Legal & Ethical Issues (3 credits)

This course provides students with the opportunity to research, identify, and analyze ethical and legal issues and concerns related to and affecting leadership and management in a global environment. Students will review the ethics and legal considerations related to international organizations operating in different economic, legal, environmental, and cultural settings, and discuss variances in individual ethics, organizational codes of conduct, and governmental regulations among diverse nations and regional cultures. Students will examine specific ethical and legal issues and case studies such as those surrounding bribery, human rights, drug policies, child labor, and environmental standards, and apply this knowledge to recognize and propose solutions to legal and ethical dilemmas faced by international organizations. Students will leave the course with knowledge of legal and ethical issues needed to customize their leadership behavior and decision-making in the global arena. Prerequisite: INT 6245

ORG 6300 Human Development 3 credits

This course explores the major theories of adult development related to emotions, personality, cognitive functioning, social and family influences, and physical functioning. Current theoretical approaches and research related to adult development are emphasized as well as practical applications in the therapy setting.

ORG 6340 Critical Issues in the Health of the Nation 3 credits

This course provides a broad perspective on the health of our nation and the world. It explores the nature of health problems; the cost to individuals, systems, and organizations as well as effective interventions and prevention strategies. Students will study research on determinants of health – social, psychological, physical, and environmental, causes of death and disability, impact of legislation, health benefit plans and designs, diverse healthcare delivery systems.

Students will analyze the impact on the cost of health care, productivity, and profitability of businesses and communities. In addition, national and global health issues, cultural differences, and successful intervention strategies will be examined. These critical issues will be used to make the case for the importance and efficacy of health promotion programs designed to improve the health of individuals, communities, and organizations.

ORG 6343 Intervention Strategies in Wellness Programs 3 credits

This course explores the various methodologies for assessing the needs of target populations through health risk assessments, biometric health screenings, medical insurance data, culture audits, and health interest surveys whose focus is to select appropriate interventions. Interventions covered will include organizational changes, integration of wellness initiatives with various departments and functions, utilizing current research, as well as health education and behavioral strategies. Efficacy of intervention strategies will be explored in terms of their ability to improve lifestyle, mental health, and enhanced organizational performance. Additional issues to be explored include information on our aging workforce, medical consumerism, and prevention of relapses. Students learn to prioritize and tailor the various interventions for organizations and will plan for involving a population in the health promotion interventions.

ORG 6346 Best Practices in Health Promotion Management 3 credits

This course provides students with the critical design elements necessary to plan a wellness program that incorporates best practices. The course explores best practices in the development of an operating plan, including achieving upper management support by building a strong research-based foundation, collecting relevant data, creating wellness teams, devising a vision and mission for the program, and choosing appropriate interventions. In addition, the learners are introduced to the following principles: developing a marketing and communication plan, a program delivery system, an evaluation and reporting system, and strategies to build alliances within the organization that support program integration.

ORG 6354 Communication Methods & Technologies in Health Promotion 3 credits

This course covers the complex issues in communicating health information and providing health coaching to participants in the program. The curriculum explores the broad range of communication techniques from one-on-one models to tailored internet programs. The course evaluates the individual strategies vs. group support strategies and technology-based options such as social networks. Students distinguish which communication methodologies work best in particular organizations, taking into account target populations and influencing factors such as differing demographics, organizational cultures, and available technology.

ORG 6358 Evaluating the Impact of Health Promotion Interventions 3 credits

This course examines various means for tracking the costs of disease and injuries to businesses, assessing the severity of health issues and documenting the benefits to organizations from effective health promotion interventions. Students will research the impact of health issues on business, such as medical and prescription costs, absenteeism, disability, and productivity. This course explores various tools to measure the severity of health problems such as health risk assessments, biometric screenings, and culture audits. Students learn how the raw data from various parts of the organization can be applied to track the impact of the program on individuals, departments, and the organization's bottom line. Topics include quantitative and qualitative outcome measures and tools to measure ROI (return on investment, other financial metrics, and key indicators).

ORG 6420 Fundamentals of Risk Management & Organizational Strategy 3 credits

The history and theoretical principles of Risk Management and organizational strategy form the foundation of this specialization overview course. From that foundation, the course explores the inter-dependence of all phases of risk management and organizational strategy. Students will develop an understanding of these principles and potential application to organizational development and leadership.

ORG 6423 Leadership's Impact on Organizational Risk Management 3 credits

In this course students will analyze the behaviors

and strategies leaders use to manage the risk management function in organizations. Through case studies, and the examination of related theories, students will develop support for a set of best practices for organizational leaders who are responsible for managing risk in organizations.

ORG 6425 Fundamentals of Risk Management Tools & Terminology 3 credits

This course focuses on the study of the various instruments, assessment tools, and financial models that are used by executives and leaders in their business planning, risk management and decision making processes. This will span tools commonly used in organizational leadership assessment, risk assessment, business planning, and financial models and tools to measure ROI (return on investment), and perform cost/benefit analyses. From this foundation, the course will explore the inter-dependence of ROI, risk and cost/benefit analysis in the executive strategic planning and decision-making processes. Students will review theories and develop executive decision process models based upon quantitative risk, financial and strategy analysis tools and models.

ORG 6430 Managing Risk in Organizational Change Management 3 credits

This course focuses on the implementation of risk management principles and models as they relate to organizational change management concepts and processes. Risk management processes will be integrated with change management initiatives throughout the organization. Students will develop skills in integrating change management with effective risk management practices and organizational development and leadership.

ORG 6434 Human Resources & Risk Management 3 credits

This course examines the process of risk management as it relates to the human resources of organizations. Various operational aspects of human resource management such as selection, human motivation, labor demand and supply, basic human resource management strategies, diversity, training and development, and compensation and benefits will be analyzed as it relates to the management of risk. Ethical issues related to organizational risk will also be examined. Students will use case studies to examine and apply their knowledge on managing

risk in organizations as it relates to human resource strategy.

ORG 6440 Risk Management in a Global Environment 3 credits

This course examines organizational risk management processes as related to a global marketplace. Students will research and examine global organizations that have successfully applied risk management principles to their global business operations. This course will evaluate effective risk management practices as related to creating global business competitive advantage.

ORG 6499 Cultural Diversity & Individual Differences 3 credits

This course provides a systematic review of the wide range of cultures and individual differences and the ways in which cultural mores, ethnocentrism, and factors such as matters of race, gender, religion, sexual orientation, customs and cultures impact behavior of the individual themselves and of those around them. Through this course, students better understand themselves and others, in terms of perceptions and behaviors. Cross-listed as and equivalent to CSL/PSY 5530/EDU 6499/ HUM 6500.

ORG 6501 Foundations of Organizational Consulting 3 credits

This course focuses on the application of psychological principles to the workplace and how psychologists can facilitate the improvement of work environments, conditions, employee performance, and interpersonal/team functioning. In addition, the course provides a review of the basic theory, research, and practice in organizational training, development, and behavior. Topics covered include job performance and attitudes, work motivation, personnel selection and classification, group influence, and training and development. There is an emphasis on the contribution of specific psychological skills in organizational consultation.

ORG 6503 Organizational Theories & Systems 3 credits

This course explores the theories of human organizations and how they function and the factors which influence the structure, design, operation, and performance of individuals in complex organizations. The emphasis is on integrating theory and concepts from the behavioral and social sciences as a basis for

understanding human behavior within organizations.

ORG 6504 Leadership & Management 3 credits

This course is an overview of essential principles and current issues in leadership and management theory and practice. Students explore the evolutionary progress of leadership and management theories and practices from early in the industrial age to the present. Students learn to distinguish effective management and leadership practices for different organizations and operating environments. This class will examine systematic approaches to leadership in the context of organizational culture and interpersonal factors such as leadership ethics, organizational mission, individual motivation, leadership power, organizational strategy, and team performance. Equivalent to ORG 6350 / ORG 6525

ORG 6505 Diagnosing Organizations 3 credits

This course explores qualitative and quantitative research methods and data analysis that leaders and consultants use in organizations with particular attention to interview and observation. An understanding of organizational structure and organizational life-cycle development is provided. The course also examines how leaders in organizations can mediate high performance and learning through project team development, communication, collaboration, and individual and group conversation-based assessment.

ORG 6506 Leading Organizational Change 3 credits

This course focuses on the principles and techniques associated with leading organizations through the change process. Included is a discussion of why organizations need to change in the current business and organizational environment. In addition, a process model of how best to bring about change serves as the core schema for the class sessions. To complement the "macro" or organizational approach to creating change, we also examine a "micro" viewpoint, addressing how to encourage individuals to change. Along these lines, we spend some time exploring the parallels between the organizational change process and how this discipline might inform how we change ourselves, and perhaps individuals. Finally, we draw some

connections between the function of change and the role of leadership.

ORG 6510 Introduction to Human Performance Technology 3 credits

This course is an exploration of the factors that impact performance of individuals in organizations with an emphasis on front-end analysis and job evaluation to determine the causes and solutions to gaps in performance. The course includes the study of performance gaps, their common classes of causes (organizational structure, skill/knowledge, environment/culture, tools and systems) and solutions appropriate to specific performance gaps. Students learn the basics of conducting job studies and performance gap analysis, as well as recommending solutions to organizational leaders in business terms.

ORG 6511 Introduction to Human Performance Management 3 credits

This course focuses on improving performance from the individual level, to teams, and overall organizational performance. Students explore influences upon individuals' performance in organizations, with an emphasis on the strategic and tactical decisions required to deploy human resources effectively. This course includes systematic themes, models, and theories for making decisions related to recruitment, selection, training, development, placement, and retention. Students also learn the basics of conducting job analysis and performance evaluation, as well as how to recommend solutions to organizational leaders in business terms. Topics include legal, ethical, and diversity issues related to employee selection, performance measurement and evaluation and progressive sanctions.

ORG 6512 Training & Development 3 credits

This course examines the role of training and development initiatives as tools for change at the individual, team, and organizational levels. Students will also explore training and development systems designed to have an ongoing impact on organizational performance. The course explores the variety of methodologies, techniques, settings, and approaches to training and development including curriculum design and various training delivery modalities. The practical issues related

to designing training and development initiatives that target specific organizational strategies will be discussed, based on established principles of adult learning. Topics include aligning training and development initiatives to business strategy, facilitating training programs, and evaluating the impact those programs have on individual, team, and organizational performance. Equivalent to ORG 6220.

ORG 6513 Leading & Evaluating Learning Programs 3 credits

This course explores the variety of methodologies, settings, and approaches to adult learning including curriculum design. The course explores practical issues related to designing learning programs that target specific organizational strategies, based on established principles of adult learning. Topics include aligning adult learning programs and curricula to business tactics, leading adult learning programs, and the evaluation of the impact those programs have on individual learners and organizational performance. Prerequisite: ORG 6508.

ORG 6515 Social Capital (Networking in Organizations) 3 credits

The concept of social capital is used to describe the resources available to individuals through their membership in community networks. This course explores the history and definitions of social capital, the approaches to measuring social capital, and an in-depth analysis of how systems can be designed to prevent the erosion and encourage the development of social capital.

ORG 6520 Professional Ethics, Standards of Practice & Law 3 credits

This course is a study of the ethical and legal issues confronting organizational leadership. Topics related to discrimination and anti-harassment, personnel selection procedures, standards for psychological testing, and social media will be explored. Students will learn principles of ethical decision-making and corporate social responsibility as well as explore the impact that major ethical and legal dilemmas create for organizations. Students will master the importance of non-discrimination and anti-harassment legal principles including affirmative action, Title VII of the Civil Rights Act of 1991, as well as the Equal Employment Opportunity Act of 1972 through the study of laws and relevant court decisions. Students will also master the current

code of ethics of the American Psychological Association and other relevant professional code of ethics. Students will further master essential consumer protection principles. Equivalent to EDU 5200/ ORG 6217/ORG 6752.

ORG 6522 Fundamentals of Coaching 3 credits

This course will examine and analyze essential constructs and practices of effective executive coaching. It will focus on cutting edge executive coaching models, various coaching orientations, tools, and techniques of effective coaching. Students will get practice in basic skills in coaching such as establishing rapport and purpose, effective listening skills, giving effective feedback, and goal setting. The course also explores legal and ethical issues in the application and practice of executive coaching.

ORG 6523 Teams in Organizations 3 credits

In this course students explore the dynamics of highly functioning teams and their role in improving performance and increasing cross-functional collaboration in organizations. Students analyze the fundamental building blocks of effective teams in organizations, including behaviors of effective team members, factors that distinguish effective problem solving by teams, how organizational cultures influence team effectiveness, and the vital dimensions of team leadership. The course explores the life cycle of a team, including how leaders effectively form teams and optimize performance at different stages of the life cycle.

ORG 6534 Human Resources Management 3 credits

This course will focus on the evolving role of human resource management (HRM), which emphasizes its strategic importance to organizational effectiveness. The course also explores the systems-oriented view of HRM integral current best practices. Students will examine the impact of trends and changes in the external environment on the design and implementation of organizational HRM strategies and practices. Topics include recruitment, selection, retention, compensation, benefits, training, development, employee engagement, and succession planning.

ORG 6570 Victimology: Theory, Research & Policy 3 credits

To broaden the student's understanding of

criminal events, this course explores the impact of crime on victims, both in relation to the criminal event itself as well as its aftermath, when criminal justice agencies become involved. The student is also introduced to various viewpoints on trauma effects of victimization, responses to victimization, and media intervention. In addition, the course examines the role and participation of victims in the processing of criminal cases.

ORG 6572 Law Enforcement & Communities 3 credits

This course introduces students to traditional policing strategies as well as to new movements and trends in policing. The role of communities in policing, the interaction of police with communities, and their collective impact on the effectiveness of policing strategies will be examined. In addition, the range of possible consequences related to various policing strategies used in communities will be covered.

ORG 6574 Law & Society 3 credits

In this course students explore the links between the application of law and its impact on society. Major course topics include how laws are developed, the evolution of the legal system, and the impact society has on the creation and changing of laws. The ways in which the law plays a role in creating social change will also be analyzed. Additionally, constitutional issues that guide and constrain criminal processes will be addressed

ORG 6580 Correctional Philosophies & Strategies 3 credits

This course introduces students to the various theoretical, philosophical, and historical foundations for the punishment of offenders. Theoretical perspectives will be linked to strategies developed to deal with offenders. Further, the rationale behind these linkages will be explained and analyzed from a historical perspective. Students will be required to perform a critical examination to compare the relative merits and drawbacks of each philosophical approach and to assess how these approaches affect the ways in which offenders are dealt with in society.

ORG 6600 Principles of Human Resource Management 3 credits

This survey course explores the key role of the human resources discipline and professionals in organizations. Topics include recruitment,

selection, training, development, diversity, compensation, benefits, and employment law and employee relations. The course explores human resources both from the perspective of preventing legal actions against an organization and leveraging human resources as a competitive advantage.

ORG 6610 Principles of Project, Program & Operations Management 3 credits

This course explores the application of best management practices in leading projects, managing programs composed of many projects, and managing operations of large organizations. Topics include project planning, staffing and budgeting, and managing people, funds, schedules, and other resources to accomplish project and program goals. The course emphasizes the psychology of selecting and teaming individuals based on diversity of backgrounds, skills, and styles as well as motivating individuals and teams to perform.

ORG 6650 Managing Conflict: Intra- & Interpersonal 3 credits

Students begin the course with an examination of their own beliefs and approaches to conflict, using instruments designed to assess individuals' perspectives on conflict. The course also emphasizes how people's feelings, thoughts, and behaviors can produce interpersonal conflict, and how individual differences and diversity of cultural and familial backgrounds impact individuals' approaches to conflict.

ORG 6651 Managing Group & Organizational Conflict 3 credits

Students will develop collaborative solutions, explore models, and learn strategies to address group and organizational conflict resolution. The course also deals with the increasingly complex challenges and issues groups and organizations face, which require shared solutions, developed through broad constituency engagement. Topics include methodologies for resolving conflicts in larger organizational, institutional and community contexts.

ORG 6655 Intercultural, Societal & Global Conflict Resolution & Mediation 3 credits

Conflicts in cultural interaction often result from ethnocentrism. This course addresses conflict resolution in the context of ethnocentrism through the application of cultural relativity approach, evaluating conflict in various global cultures

based upon the values held closely within diverse cultures. Students are challenged to think beyond cultural awareness and accepting diversity to celebrating diversity among cultures as a means to enrich best practices in mediation and conflict resolution.

ORG 6660 Fiscal Administration in Mental Health Care Systems 3 credits

This course explores the common metrics organizations use, the data used in support of those metrics, the assessment of fiscal outcomes, trends and events. Identifying cost centers and programs is considered. Students will evaluate differing funding streams that could potentially support the provision of services including public funding, public insurance programs (e.g. Medicaid, Medicare), government and foundation grants and private donations. Fundraising efforts as applied to an overall budget strategy will also be considered.

ORG 6701 Emotional Intelligence & Diversity 3 credits

Students will learn a variety of skills, both insight- and action-based, with a core focus on understanding oneself and others in order to have productive interactions. The course builds upon research in emotional intelligence, and upon the work of diversity scholars who have developed integrative competency models for emotional intelligence and diversity. The four key-competencies include affirmative introspection, self-governance, intercultural literacy, and social architecting. Students will gain an understanding of the role of emotional intelligence as an aspect of personal empowerment and professional effectiveness, learn methods to manage emotions triggered by differences, develop strategies for building harmonious and productive relationships, and gain tools and activities to help others develop emotional intelligence and diversity.

ORG 6705 Cross-cultural Communications 3 credits

Students will explore the dimensions of culture as well as the theories of culture and the impact that it has on intrapersonal and interpersonal communication inclusive of basic negotiation techniques. The course will explore cultures around the world from various viewpoints. Students will further develop an understanding for the depth of complexity behind ethnocentrism,

and the notion of acculturation and enculturation as understood in different nations and then applied to global organizations.

ORG 6710 Strategic Diversity Management 3 credits

In this course, students will learn to create the infrastructure to support diversity in the organization, learn about measuring programmatic diversity outcomes, setting up diversity councils and taskforces as well as working with leadership to assure that the concept of heterogeneity is imbedded into the culture of the organization. Special emphasis will be focused on the building a business case to support diversity work in a multitude of different business environments from healthcare to higher education to technology companies.

ORG 6740 Sport, Fitness, & Wellness Management 3 credits

This course emphasizes the significance of administration/management theory for the sport, fitness, and wellness manager. It examines important influences in management philosophy, as well as modern management theories practiced in the sports, fitness, and wellness industry. Effective leadership and management principles are emphasized, as well as the importance of governance, human resources, problem solving, planning, organizing, leading, and evaluating within this field.

ORG 6742 Fundraising & Financial Concepts in Sport, Fitness, & Wellness Management 3 credits

This course stresses the use of sound methods and practices in financial management and fundraising in the field of sport, fitness, and wellness management. Topics related to financial management include basic financial concepts, systems, and strategic budgeting. Fundraising concepts include sourcing funding through traditional promotional strategies, solicitation and sales techniques, philanthropic giving, and the management of specific fundraising events. The distinct issues that make financing sport, fitness, and wellness unique in comparison to other types of business are also examined.

ORG 6745 Marketing in Sport, Fitness, & Wellness 3 credits

This course examines the marketing concepts as they relate to organizations that function within the sports, fitness and wellness industry as well

as provides an overview of the historical perspectives of marketed sporting events. Topics covered in this course include branding, athletic endorsements, corporate sponsorships, market research and consumer behavior as well as social issues in sport-related advertising.

ORG 6747 Facilities Management in Sport, Fitness, & Wellness 3 credits

This course examines the fundamental theories, standards, and recommendations for developing, planning, constructing, and managing various venues in sports, fitness, and wellness. Included in the course are essential topics related to planning for events and tournaments, facility design/construction, program development, facility scheduling, staff and security planning, crowd control, fiscal control, law and risk management, facility marketing, facility maintenance, and box office/concession management. The course combines theoretical and practical opportunities to help students gain a background of its importance for success in the industry of sport, fitness, and wellness.

ORG 6750 Legal Concepts & Personnel Leadership in Sport, Fitness, & Wellness 3 credits

This course examines legal concepts and trends, and additional areas of human resource management (HRM) pertaining to performance evaluation and development in the field of sport, fitness and wellness management. Additionally, this course emphasizes specific legal matters, such as workplace discrimination and anti-trust issues.

ORG 6800 Foundations of Entrepreneurship 3 credits

This course presents the foundations of entrepreneurship and the development and management of entrepreneurial ventures. Includes the structure, legal/compliance issues, management processes, strategic planning and foundational skills required for entrepreneurial ventures. Contrasts entrepreneurial ventures with traditional enterprises.

ORG 6802 Product & Service Development & Management 3 credits

This course gives students an understanding of the principles and practices associated with the development of new products and services, and the management of these through their lifecycle.

ORG 6805 Financing Development, Innovation, & Growth 3 credits

This course presents approaches to financing the development and growth of innovations within corporations and in entrepreneurial ventures. Different forms of financing are discussed and compared, as well as their application to different types of ventures. The financing process and associated considerations are also discussed.

ORG 6807 Marketing & Managing Innovation 3 credits

This course will explain principles, strategies, and techniques for identifying market needs and feasibility. In addition, it will cover the importance of brand in innovation marketing and the fundamentals of brand marketing and management. These are contrasted with traditional marketing techniques and discussed in the context of both innovations within existing organizations and new ventures. The use and evolution of social media as a marketing tool will also be discussed.

ORG 6810 Measuring & Managing Innovation 3 credits

This course provides students with an understanding of the principles and practices associated with managing innovation. This includes different approaches that organizations take to managing innovation and factors that contribute to innovation. It will also discuss control techniques such as stage gate processes, funnel measurements, and other metrics for tracking innovation.

ORG 6812 Managing Through Growth Stages 3 credits

This course will bring together the various principles and practices and show how they are applied at various stages of growth. Conceptual models for growth stages are presented and discussed, and the evolution of principles and practices at each stage will be demonstrated.

ORG 6900 Technology, Communication, & Media in Organizations 3 credits

This course explores the history and scholarship of technology, communications, and media, and how these fields intersect with Organizational Development and Leadership. The broader role that technological innovation plays in the historical development of organizations and work processes will also be explored. Topics will include the role of social media in the

construction of identity, the effects of telecommunications and media on organizational culture and collaboration, the role of communications and media in globalization, and the role the internet has played in the development and leadership of organizations.

ORG 6902 Effects of Technology Projects in Organizations 3 credits

People don't often think about how technological responsibilities and skillsets are spread throughout the organization, and at the same time, the project affects those on the team and others throughout the organization. This course will look at the integration of change, culture, emotions, decision-making, risk, organizational structure, and project management from a technological perspective.

ORG 6905 Emerging Media & Social Networking in Organizations 3 credits

The main focus of this course is on the role that media forms like "social media" (or computer-mediated social networking sites like Facebook or LinkedIn) play in large companies and organizations. Topics include emerging media and internet technologies, the ethical questions surrounding social media, personal identity and the workplace, the role that the internet, blogs and email have on group decision-making and the effectiveness of leaders, the utilization of social media for promotion and public relations, and how content communities and virtual social worlds are utilized in organizations.

ORG 6907 Technology Innovation in Organizations 3 credits

Innovation is the buzzword, but does technology equate to being innovative? This course studies innovation theories, the subsequent disruptions, and ethics within and upon organizations and society.

ORG 6910 Introduction to Organizational Development Facilitation Using Technology 3 credits

Facilitating components of organizational work with technology-based tools can be a valuable skillset. This course teaches you facilitation, tools, and success factors for implementation.

ORG 6912 Current Trends: How Media & Communication Technologies are Transforming Leadership in Organizations 3 credits

This course will be based on the analysis of case studies and current trends in organizations. The main focus of this course will be to examine the most current research into how information, communication, and media technologies (ICMTs) can be used to increase the effectiveness of managers and leaders. Students will analyze case studies and formulate plans for how to solve problems and create solutions for organizations that use media and technology for development, communication, organization, and innovation.

ORG 7101 Assessment Tools for Organizational Leadership 3 credits

This course involves the study of the theory and practice of objective personality assessment and its application to executive coaching and organizational leadership. The course focuses on how objective personality assessment is used to provide insights into readiness for leadership and management roles. Primary emphasis is on those published instruments and inventories commonly used in executive coaching, organizational leadership assessment and organizational development, including instruments such as: FIRO-B, Social Style Profile, Myers-Briggs Type Indicator, CPI 260, Thomas-Kilmann Conflict Mode, Campbell Leadership Index, Workplace Big Five, Change Style Indicator, Campbell Organizational Survey, and Conflicts Dynamics Profile. (All of the above will not necessarily be included in each session of the course; instructors will select representative examples from classes of instruments.) Cross-listed as and equivalent to PSY 7101.

ORG 7272 Group Process & Group Leadership in Organizations 3 credits

This course provides an overview of group theory, processes and dynamics in organizations. It will also examine effective behaviors and characteristics of facilitating/leading groups in an organizational setting. Students will be afforded the opportunity to participate in group simulations both as participant and facilitator. Students will receive evaluation and feedback on their group facilitation skills. A strong emphasis is placed on ethical standards and behavior in groups along with legal issues. The impact on groups of factors such as diversity, culture, distance, and others are explored. Cross-listed as and equivalent to PSY 7272.

ORG 7340 Advanced Leadership in Health Promotion Programs 3 credits

This course examines the role of a health promotion leader and the impact of culture on organizations. It provides students with the ability to be a positive catalyst within organizations to influence and lead transformational change initiatives to promote the health of the individuals and their organization/system. Students begin with an examination of tools that influence workplace cultures. An extensive and realistic case study will teach students how to track the impact on productivity as a result of creating healthy cultures, and to evaluate the role of health promotion leaders of the future. In addition to providing students with the necessary foundation to understand health promotion leadership competencies, this course also emphasizes the importance of being a strategic business partner in both organizational and system roles.

ORG 7343 Advanced Intervention Strategies in Wellness Programming 3 credits

This course examines the full range of intervention strategies and learning modalities for promoting health and wellness. Students will explore the most updated and proven theories for achieving strong employee participation, improving lifestyles and health outcomes, as well as for reducing health care costs. Students will analyze and plan advanced interventions for new wellness programs and mature wellness programs. Additional topics in this advanced course will cover recent issues in health care such as the impact of an aging population, use of incentives, injury prevention, and medical consumerism. Students will conduct a survey of relevant research to determine suitable environments and conditions for integration of current best practices.

ORG 7356 Integrative Medicine in Health Promotion Programs 3 credits

This course examines recent advances in traditional and nontraditional research that have led to new ways of thinking about well-being and illness. Drawing on fields such as neuroscience, positive psychology, and interdisciplinary consciousness studies, students will enhance their awareness of ways to promote exceptional health habits through self-awareness and enlightenment. Students will also conduct in-depth studies of advanced research and theories

that integrate mind-body practices beneficial to the health of individuals, groups, and organizations alike. Advanced practices in the areas of performance, health psychology, energy healing, indigenous, and Eastern medicine will be explored. Students will assess the efficacy and appropriateness of various practices to know which of them to incorporate into health promotion programs. The Health and Wellness Psychology student will be well-informed about the ramifications of nutrient deficiency, and that there is a fourth aspect of well-being besides (a) stress management, (b) dietary choices, and (c) exercise regimen. This fourth aspect is (d) dietary supplementation with the goal of counterbalancing nutrient deficiency. The safety of dietary supplements is explored, along with the differences between synthetic, natural and organic supplements.

ORG 7500 Diversity in the Workplace 3 credits

This course is a systematic study of multi-cultural issues in the workplace, emphasizing respect for diversity of people and families, particularly with regard to matters of race, ethnicity, gender, religion, and sexual orientation. Specific ethnic groups are studied in regard to family relations and cultural impacts on workplace behaviors. Attention is given to ethnocentrism and racism in society and traditional culture-bound organizational human resources approaches. Through this course, students better understand themselves, including expectations and biases toward others based on their ethnic families of origin. Positive and negative feelings about ethnicity are also explored.

ORG 7525 Issues & Methods in Market Research 3 credits

This advanced workshop explores current techniques in mass market and Internet market research, with an emphasis on state of the art methods and issues facing practitioners. The course explores the social psychology of creating and supplying demand for products and services, by applying qualitative and quantitative research methods in both traditional retail and business distribution channels as well as through the Internet. Topics include market segmentation, product feature targeting, packaging, pricing, bundling, and placement, as well as advertising through direct mail, email, Internet, electronic

mass media, and print media. Equivalent to ORG 8015/ ORG 8813.

ORG 7650 Organizational Systems & Conflict Theories 3 credits

Systems theory involves an orientation to the unified whole of any system in which human beings find themselves. The emphasis will be on integrating theory and concepts from the behavioral and social sciences as a basis for understanding human behavior within organizations and resulting conflict from that behavior. Experiential exercises will augment theoretical learning.

ORG 7701 Theoretical Foundations for Diversity Work 3 credits

This course will review the theoretical underpinnings for diversity work in the United States. Students will consider the implications of different models and explore what diversity means as a developing field. The course explores multi-disciplinary scholars, practitioners and theorists (academic, public policy, organizational, and others) to formulate discussion, analysis and experiment in the concept of diversity as a framework for organizational success.

ORG 7705 Advanced Topics in Cross-Cultural Communications 3 credits

This advanced course in cross-cultural communication will focus on the natural tensions that exist when conducting business globally. Within a framework of transnational business and global economics, students will address contemporary concerns that apply to strategic alliances and the management of the globally diverse organization. Topics covered include the achievements of global leaders, characteristics of leaders, leading across cultures, leading change and relationship between leaders and followers.

ORG 7710 Cross-Functional Diversity Alignment 3 credits

Promoting an organizational environment that fosters diversity requires aligning to and with organizational values, missions and visions. This course provides an overview of the organizational system including the design, control, and improvement of business systems. Topics include operations strategy, marketing and public relations, the legal landscape, principles of measuring organizational results, quality management, affirmative action and its role with

Human Resources, as well as supplier diversity management.

ORG 7715 Social Aspects of Diversity 3 credits

In this advanced class in diversity, students will take a deeper look into the impact that privilege, stereotypes, bias and language have on individuals, teams and organizations. Students will review the history of the civil rights in the United States and its impact on organizational structure with an emphasis on marginalization, privilege, and structural inequality from a political and organizational framework. Students will then apply this to personal and professional setting to gain skills for addressing these issues individually and systemically in organizations.

ORG 8001 Sport Funding & Finance for the Sport, Fitness, & Wellness Manager 3 credits

This course emphasizes the use of specific financial management and fundraising concepts for the sport, fitness, and wellness professional. Topics related to financial management include basic fundamentals of financing a sport, fitness, or wellness operation. The challenges that face the sport, fitness, and wellness professional are also examined, as these are different compared to other segments in the field of management. Modifications in the funding of sport will be emphasized, as well as an examination of the varied funding sources afforded to the sport, fitness, and wellness manager today. Lastly, an examination of recent research in these areas is offered for the student.

ORG 8003 Law & Personnel Management for the Sport, Fitness, and Wellness Manager 3 credits

This course examines the significance of legal concepts, fundamentals of human resource management (HRM), and the importance of each in the successful operation and advancement of the sport, fitness and wellness operation. Selected topics will have an emphasis on developing the student who will lead or manage a sport, fitness, and wellness organization. A comprehensive overview of legal and personnel concepts are examined, such as tort, contract law, constitutional law, risk management and liability issues, and ethical approaches in human resource measurement and evaluation. Lastly, an

examination of recent research in these areas is offered for the student.

ORG 8005 Group & Team Dynamics in Sport, Fitness, & Wellness 3 credits

This course, through the emphasis on theory and practice, examines how each member of a group can maximize their performance to better themselves and their team, ultimately leading to more cohesive groups and high-performing teams. The factors influencing the process and outcomes of group and team efforts are discussed in-depth, providing the student with a stronger understanding of how leadership dynamics can influence the group as a whole to accomplish the task at hand.

ORG 8010 Organizational Burnout in Sport, Fitness & Wellness 3 credits

This course provides an overview of the construct of burnout, the development of employee burnout and how this affects the organizational system. Interventions for reducing employee burnout are discussed as well as strategies to prevent workplace burnout. The specific component of athlete burnout is addressed as well as the relationship between burnout and employee engagement.

ORG 8061 Administration of Grants & Contracts: Governmental & Community Funding 3 credits

This course provides students with knowledge of the various types of funding sources, including government agencies, private and community sources, grants and contracts as well as rules, guidelines and typical procedures applied to gaining and managing funding. The course also includes basic skill building in using social capital to develop funding sources and in grant proposal development. Interagency collaboration is emphasized.

ORG 8160 Mental Health Programs & Services for Special Populations 3 credits

This course covers the unique mental health service programming options for individuals representing special populations, including individuals with traumatic brain injury, mental retardation/developmental disabilities, co-occurring disorders, physical disabilities, individuals who are homeless, individuals in distressed communities, etc. The impact of family systems is also considered.

ORG 8165 Mental Health in the Context of Community Wellness 3 credits

This course is designed to present the student with methods of conducting needs analysis, developing presentation activities, and programs to promote positive mental health. Interaction with, and promotion within the community, is also an area of focus. Methods of conducting and presenting results of cost-benefit analysis of community mental wellness programs are also covered. Prevention and wellness programs are discussed.

ORG 8172 The Principles of Risk Management & Organizational Strategy Overview 3 credits

The history and theoretical principles of Risk Management and organizational strategy form the foundation of this specialization overview course. From that foundation, the course explores the inter-dependence of all phases of risk management and organizational strategy. Students will develop an understanding of these principles and potential application to organizational development and leadership.

ORG 8177 Risk Assessment, Financial, & Strategic Development Tools 3 credits

This course focuses on the study of the various instruments, assessment tools, and financial models that are used by executives and leaders in their business planning, risk management and decision making processes. This will span tools commonly used in organizational leadership assessment, risk assessment, business planning, and financial models and tools to measure ROI (return on investment), and perform cost/benefit analyses. From this foundation, the course will explore the inter-dependence of ROI, risk and cost/benefit analysis in the executive strategic planning and decision-making processes. Students will review theories and develop executive decision process models based upon quantitative risk, financial and strategy analysis tools and models.

ORG 8180 Organizational Change Management & Paradigm Shifts as Related to Managing Risk 3 credits

This course focuses on the theoretical principles and models of organizational change management as they relate to the implementation of risk management processes throughout the organization. Concepts and processes

associated with the discovery and development of new paradigms will be integrated with change management and risk management activities throughout the organization. Students will develop skills in integrating change management and paradigm discoveries with effective risk management practices and organizational development and leadership.

ORG 8182 Risk Management of Human Capital 3 credits

This course examines the process of risk management as it relates to the human capital of organizations. People impact all areas within organizations; therefore the focus on Human Capital risk is a very important part of an effective organizational risk management program. Research on topics such as talent management, human motivation, basic human resource management strategies, labor demand and supply, reorganization strategies, diversity management, training and development, organizational global re-positioning, and compensation and benefits will be analyzed as it relates to the management of risk and human capital. Ethical and diversity issues related to organizational risk will also be examined. Students will use case studies to examine and apply their knowledge on managing risk in organizations as it relates to human capital.

ORG 8185 Risk Management & Global Organizational Business Practices 3 credits

This course involves the research and application of risk management processes to organizational operations in the global marketplace. Students will learn how to effectively use risk management tools and processes to identify, evaluate, and prioritize global strategic and operational objectives and opportunities. Students will research organizations that have successfully applied risk management principles to their global business operations and use that research to create a risk management strategy for a global organization. Risk management as a source of global business competitive advantage will be explored.

ORG 8201 Learning Strategies in Organizations 3 credits

This course explores aligning organizational learning and business strategies. Students will explore current issues in this area, including different approaches that organizations take to

planning, implementing, managing, and evaluating training as well as factors that contribute to success. Topics include selecting the optimal combination of curricula and delivery modalities; choosing and implementing learning management systems, selecting and utilizing instructional technology tools; and evaluating the impact of learning programs on strategic organizational performance.

ORG 8205 Training Needs Assessment Models & Methods 3 credits

This course focuses on the process of applying research design models and methodologies to the analysis of performance problems or opportunities for organizations, teams or individual workers. Students will develop and apply a variety of systematic measurement tools, including extant (existing) data research, surveys, benchmarking, and focus groups while conducting performance and root cause analysis in the context of needs assessments or front end analysis.

ORG 8210 Training Evaluation Models & Methods 3 credits

This course presents approaches to utilizing quantitative, qualitative, and mixed methods to evaluate the effectiveness and impact of training programs. Models/methods will include Kirkpatrick's levels of evaluation, Brinkerhoff's Success Case Method, Phillip's ROI method, and new developments in TDR (Talent Development Reporting).

ORG 8213 Strategic Talent Development 3 credits

This course focuses on the role of the training function as it relates to strategic talent development utilizing an evidence-based approach. Students will learn how to integrate and align a development strategy with the long-term goals and needs of the organization. Connections will be made to tools and methods utilized for performance management, identification of high-potential leaders, and succession planning. Topics will include the increasing demand for leadership development and executive coaching.

ORG 8215 Global Issues in Training & Development 3 credits

This course will focus on the issues, challenges and opportunities associated with operating a training and/or learning & development function

for international and multi-national organizations. Topics such as cultural norms, learning style preferences, linguistic issues, and technological differences will be explored.

ORG 8270 Diversity & Inclusion - Research in Action 3 credits

In this course, students will conduct an action research project to help select the appropriate interventions related to diversity and inclusion. It is critical that when designing plans, students understand the role that different solutions have toward meeting organizational goals. Students will first begin by defining diversity and inclusion and how the definitions relate to organizational solutions. Then, they will explore approaches that organizations may take to assess and evaluate their needs, and to plan and then execute the appropriate response to support the organizational strategy. Topics will include: learning and development, training, communications, event planning, and community relations.

ORG 8300 International Comparison of Health Insurance Systems 3 credits

This course examines healthcare delivery systems in various developed economies around the world. Content focuses on health insurance and other forms of healthcare financing, and means of providing efficient and effective healthcare to the general public. The course includes discussions of a variety of healthcare financing and healthcare delivery systems in countries around the world, some of which offer nationally financed programs, while others offer a combination of nationalized and private health care features. Pertinent issues related to healthcare financing and delivery systems located in the United States will be highlighted and analyzed. Topics include current issues and practices in the public policy related to financing and delivery of healthcare, preventative and wellness programs, access to healthcare, and quality of care.

ORG 8320 Environmental Stress on Mind and Body 3 credits

This course addresses important aspects of environmental influences on health and wellness, such as exposure to industrial chemicals, environmental toxins in air, water due to excessive use of agricultural chemicals, as well as contaminants from radon, molds and cancer

causing erionite exposure. A corporate health and wellness consultant needs to be familiar with basic environmental hazards that cause illness both in the private and corporate settings, as well as how to address the health and wellness needs of those whose health has already been compromised through environmental agents.

ORG 8340 Exploring the Self: Increasing the Efficiency of Helping Others 3 credits

This course emphasizes the importance of reflecting on the self. The emphasis is on exploring unresolved shame, guilt, anger and interpersonal communication blunders, the role of forgiveness and making amends, along with negative and positive communication patterns as they help future health and wellness experts increase their effectiveness in advising and counseling employees, patients and clients in various organizational settings. The role of suppressing biased thinking is also addressed. The idea is that people who are able to address their own psychological needs are more efficient in helping others, than those who have unresolved issues.

ORG 8500 Advanced Topics in Organizational Consulting 3 credits

This course focuses on the application of psychological principles to the workplace and how psychologists can facilitate the improvement of work environments, conditions, employee performance, and interpersonal/team functioning. In addition, the course provides a review of the basic theory, research, and practice in organizational training, development, and behavior. Topics covered include job performance and attitudes, work motivation, personnel selection and classification, group influence, and training and development. There is an emphasis on the contribution of specific psychological skills in organizational consultation. Equivalent to ORG 8560.

ORG 8510 Advanced Seminar: Leading Organizational Change 3 credits

This seminar examines cutting edge trends in organizational change, the current global business climate, forces driving change, and issues related to positioning organizations for the future. The topics selected will connect change with culture, existing organizational strategies, and the process of change in future directions.

Major case study examples of organizational change are included in the learning process.

ORG 8511 Advanced Topics in Performance Management 3 credits

This course takes a broad perspective on the theory and strategic application of performance management systems design and implementation, with an emphasis on the more complex issues and questions associated with these advanced systems. This advanced course explores strategic issues and best practices in employee engagement, leadership development, succession planning, evaluative performance feedback, and compensation models. The ways that the changing nature of work and changing demographics in the business world are influencing performance management systems are examined, including globalization, generational differences, multinational operations and cross-cultural issues. Based on current theories and applications for performance management systems, students explore current literature and case examples to implement and support organizational development and increased organizational effectiveness.

ORG 8512 Leadership & Organizational Cultures 3 credits

This course addresses the key relationships among organizational culture, executing business strategy, structuring organizations into teams and workgroups, and aligning these with culture. The role of leaders in creating, maintaining, and changing culture gets special emphasis. The course includes current theories on the role of culture in organizational success and the role of leadership in guiding the organization and its culture toward successful outcomes. Equivalent to ORG 8175 / ORG 8612.

ORG 8516 Ethical Leadership in Organizational Culture 3 credits

This course examines business and professional ethics with an emphasis on their impact in organizational operations. Personal leadership attributes and characteristics and the role of leadership in guiding the organization and its culture toward successful outcomes receive special emphasis. Topics include the social response of organizations, leadership skills and practice, key relationships among organizational cultures, structuring organizational teams and

workgroups and the role of leaders in creating, maintaining and changing cultures.

ORG 8518 Professional & Business Ethics in Organizational Leadership 3 credits

This advanced seminar examines enduring issues in business and professional ethics and applying proven approaches to ethical professional practice and organizational operations to contemporary organizational environments and issues. Equivalent to HUM 7120 / ORG 8629.

ORG 8522 Transformational Leadership, Coaching Top Level Executives 3 credits

Many major companies have made coaching and leadership development a core part of executive development. This course takes the next step in examining the theories of leadership with emphasis on linking theory and practice to create effective organizational leaders. Equivalent to ORG 8013.

ORG 8530 Influence, Motivation & Persuasion in the Workplace 3 credits

This advanced graduate seminar explores theories of motivating adult performance in the workplace. The exploration includes theories and application of methods for leaders to influence and persuade others in ways that motivate and engage them in their work and their organization's mission.

ORG 8532 Advanced Seminar: The Leader as Coach 3 credits

This advanced graduate seminar explores models and techniques for organizational leaders to apply in coaching others in their organization, especially direct reports and others they influence in matrixed organizations. Equivalent to ORG 8520.

ORG 8534 Advanced Seminar: Human Resources Business Strategy 3 credits

This advanced graduate seminar explores issues and models for leveraging human resources to execute business strategy. Topics include succession planning, leadership development models, workforce staffing models, compensation models, and training and development strategies.

ORG 8535 Organizational Consulting as a Business 3 credits

Organizational consulting is a partnership between the consultant, the organization and its

leadership, in which all involved agree on the specific goals and parameters of the contract. Topics include establishing and marketing the consultant's unique skills as well as basic business management. Also emphasized are the ethical, legal, and business obligations of the person engaged in the consulting profession.

ORG 8542 Advanced Seminar: Learning Strategies in Organizations 3 credits

This advanced seminar explores current topics in aligning educational and business strategy in organizations. Students will explore current issues in this area, including published literature, with an emphasis on learning the implementation of educational and learning strategy in organizations. Topics include return on investment in learning programs, selecting the optimal combination of curriculum, instruction, and technology, and evaluating the impact of learning programs on the strategic organizational performance.

ORG 8545 Advanced Seminar: Learning Initiatives & Organizational Change 3 credits

This advanced course explores the role of learning, education and training in designing and implementing organizational change. The course examines the role of learning initiatives as tools for change and as environmental factors that impel organizations toward changing their strategies and tactics. Based on current theories and applications for leading organizational change, students will explore current literature and case examples of learning initiatives and educational programs to implement and support organizational change and organizational development.

ORG 8550 Organizational Systems Theory 3 credits

Based on current thinking in systems theory and its application, this course applies systems thinking to organizational development. Topics include system dynamics, system archetypes, dynamic links, loops, and the application of chaos theory to improving organizational performance.

ORG 8571 Contemporary Criminological Theory 3 credits

This course involves a critical analysis of contemporary criminological theories and current applications or revisions of traditional theories. Students will explore topics ranging from

restorative justice and gender-driven theories to critical criminology and environmental criminology. The relative benefits and drawbacks of each topic will be examined, as well as the status of current research relating to them.

ORG 8573 Types & Characteristics of Crime 3 credits

The purpose of this course is to review the classification of different crime types, and to assess the distribution of each type across an array of socio-demographic variables, including class, race/ethnicity, gender, age, and locale. Students will learn about the various causes of the different types of crimes, and the specific ways the justice system should respond to different types of offenders.

ORG 8575 Advanced Analysis of Criminal Justice Processes 3 credits

This course examines the processing of offenders through the criminal justice system, from arrest to corrections. Issues of due process will be analyzed and critiqued, with particular emphasis placed on judicial system parameters. Recognition of the need for the three components of the justice system to process cases efficiently will lead the student to an understanding of how systems theory is integrated into an overall analysis of the justice system.

ORG 8577 Juvenile Justice 3 credits

This course focuses on the juvenile justice system, while highlighting differences between the juvenile and the adult criminal justice system. The course will not only cover traditional topics such as juvenile delinquency and the processing of juvenile offenders, but also current concerns about juvenile behavior, such as rates of youth violence and gang participation. The legal and philosophical bases for the separate system for juveniles will also be analyzed and debated.

ORG 8580 Mental Health & Crime 3 credits

The relationship between crime, mental health, and mental illness are covered in this course, with a focus on analyzing specific treatment and rehabilitation practices used with various types of offenders in diverse settings. Emphasis will be placed on changes in the mental health system that generated an increase in the presence of mentally ill offenders in the criminal justice system. Additionally, focus will be placed on issues such as the accurate assessment of mental illness, problems with certain therapy

methods, and difficulties in treating dangerous offenders, drawbacks of utilizing personnel with limited training, and other impediments and limitations to effective treatment of offenders.

ORG 8582 Drugs, Addiction, & Crime 3 credits

This course explores the relationships among criminality, drug use, and addiction by examining the evolution of drug policies from the following perspectives: enforcement, prosecution, and sentencing of drug users and addicts. The impact of drug laws on criminal justice processing will also be examined. Students will gain an understanding of drug use and will explore theoretical orientations that help to explain why people use drugs and how such use leads to criminal behavior. Further, the ways in which drug use and drug policies have an impact on the juvenile justice and criminal justice systems will be covered. An integral part of this course will be based on current events, policies on drug treatment, and enforcement of drug laws.

ORG 8586 Evaluating Criminal Justice Interventions 3 credits

This course focuses on methods used to examine the effectiveness of programs developed to treat offenders, support victims, as well those concerning crime prevention schemes. Prior evaluation models will be reviewed and problems and appropriate methods in assessing effective models of intervention will be discussed. Evaluation concerns will not only include program effectiveness, but also issues of ethics and legal requirements. Students will become familiar with how to address the need to design and evaluate programs according to such concerns. They will also have an opportunity to use prediction techniques and operational research methods to measure the effectiveness and performance of criminal justice programs.

ORG 8600 Innovation & Business 3 credits

Innovation in business and organizations means to introduce a truly new idea, method, service, or product. This advanced course explores the psychology of human creativity, team synergy, and breakthrough thinking. Topics include the history of innovative advances in science, technology, and business, and methods such as brainstorming, analog thinking, and inventive tinkering. The course separates myth from reality

about innovation, and the mental and group social processes of creativity and innovation.

ORG 8615 Advanced Topics in Organizational Development & Leadership 3 credits

This highly experiential course explores current issues and practices in the application of leadership and organizational development processes and systems. Topics include succession planning, facilitation skills, leading across global cultures, strategic planning, transforming organizational cultures, implementing effective leadership development programs, and other current topics. Learning methodology include simulated organizational environments and the development of realistic strategic plans, systems, and processes that address the issues that impact the performance of organizations viewed as a whole.

ORG 8619 Current & Global Issues in Industrial & Organizational Psychology 3 credits

Due to the rapidly and continually changing nature of industrial and organizational (I/O) psychology, it is important for scholars, researchers, and practitioners to stay abreast of current and emerging issues in the field. Given that many of the changes occurring in the field of I/O are due to the globalization of the business world, particular emphasis will be focused on the role and practice of I/O in the complex environment of global organizations. In this advanced seminar, students explore current and global issues that attract the attention of researchers and practitioners in I/O psychology, as evidenced by the published literature, with an emphasis on learning the application and implementation of best practices and emerging theories in the field. Topics in the seminar will evolve along with the issues that appear most often in the I/O literature, issues that receive the most attention in the professional and business press, and current lines of research having the most impact on the field.

ORG 8621 Advanced Seminar: High Performance Teams 3 credits

An advanced seminar, this course requires students to identify and research cutting edge issues in the formation, leadership, development, and functioning of teams in organizations. Topics include formal and informal leadership, self-managing teams, motivating teams to respond to

mission critical or emergent situations, and sustaining high-level performance. Research emphasizes both principles of group dynamics and case studies of highly performing teams.

ORG 8630 Influencing Leaders to Resolve Conflict 3 credits

This course explores the theories and methods leaders can use to influence and persuade others to employ as constructive approaches to conflict resolution. Topics include the power leaders can employ to provide impetus to conflict resolution and effective communication strategies for leaders to employ in resolving conflict.

ORG 8632 Evaluating Conflict Resolution Processes 3 credits

This course explores principles, challenges, and models of conflict resolution. The course emphasizes using organizational business metrics as key macro-level outcomes measures, and multiple-method, multiple source measurement approaches to predicting and explaining outcomes.

ORG 8635 Developing Conflict Resolution Plans & Policies 3 credits

This course will lead the student through the development of a conflict resolution plan, and will focus on how a written plan serves as a key tool in conflict resolution for mediators, managers, and negotiators alike. Further emphasis will be given to the role communication plays the resolution process by providing a concrete structure, guidelines, and standards for conflict resolution.

ORG 8650 Strategies & Policies to Advance Mental Health Care 3 credits

Analyze and transform mental health treatment systems, cross cultural mental health systems, advocate for legislative change, integrate research into coherent and effective argument to analyze and transform mental health treatment systems.

ORG 8770 Doctoral Capstone Seminar 4 credit (9 weeks)

This seminar provides students the opportunity to apply what they have learned in their curriculum to highly realistic case studies related to their fields of specialization for the doctorate. Through discussions among students and the instructor, students will review, analyze and evaluate case studies emphasizing the practice of the content in

their curriculum. The course will involve the analysis and evaluation of one or more case studies. Students will contemplate complex questions posed by their instructor, reply to those questions, respond to other students' analyses and evaluations, and receive faculty feedback. Each student will submit a final assignment on each case, involving his or her critical thinking on the core issues presented in the case and the presentation and defense of an approach to addressing those core issues. Prerequisite: completion (including approved credits transferred) of all coursework required in the student's doctoral curriculum. Cross-listed as and equivalent to PSY 8770.

ORG 8801 Organization Design for Innovation 3 credits

This course focuses on developing an organization design that encourages innovation and enhances the success of entrepreneurial ventures. Various organization design techniques are discussed as a foundation, followed by application to various scenarios and business issues.

ORG 8803 Creating a Culture of Innovation 3 credits

This course focuses on the development of an organizational culture that encourages innovation and entrepreneurship. Principles of organizational culture are discussed as a foundation, as well as factors that increase innovation and entrepreneurship. Levers for driving culture and techniques of culture change will also be demonstrated. Students will develop an idea and business plan for an innovative venture within a corporation/agency or a new entrepreneurial venture. Students will demonstrate application of the program content in the creation of a business plan.

ORG 8805 Managing for Agility 3 credits

Students in this course will learn the principles of managing for creativity and agility. This will include the role of management in encouraging and inhibiting creativity, as well as specific management techniques for managing staff in creative jobs. Specific management techniques will be compared and contrasted for their potential application to innovation and entrepreneurship. This seminar-based course will focus on the ability of organizations to rapidly respond to changing market conditions and

emerging opportunities. Topics such as disruptive innovation, alternative organization models, the extended enterprise, and others will be discussed, with a focus on the latest thinking in this area.

ORG 8810 Social Entrepreneurship 3 credits

This course will focus on the evolving practice of Social Entrepreneurship and its application. This will include a contrast with traditional entrepreneurial ventures and the potential for integration of social entrepreneurship into existing enterprises.

ORG 8815 Global Issues in Innovation & Entrepreneurship 3 credits

This course will focus on the emerging practice of innovation and entrepreneurship around the globe, with a particular focus on developing and lesser-developed countries. As countries such as India and China emerge as sources of innovation and entrepreneurship, it presents new challenges for countries that have traditionally held positions of economic leadership – how can innovators and entrepreneurs capitalize on this trend and counter these threats? Innovation and micro-enterprise in lesser-developed countries and the opportunities that it presents will also be discussed.

ORG 8850 Theorizing Technology, Communication, & Media in Organizations 3 credits

Students will use the history and scholarship of technology, communications, and media, to explore and develop theories for how these fields intersect with Organizational Development and Leadership. The broader role that technological innovation plays in the historical development of organizations and work processes will also be explored. Topics will include the role of social media in the construction of identity, the effects of telecommunications and media on organizational culture and collaboration, the role of communications and media in globalization, and the role the internet has played in the development and leadership of organizations. Students will develop a theoretical expertise and conduct research about the role of information and communication technologies for new forms of organizing and organizational structure. Students will also explore and develop theories

for how technology and communication have historically transformed organizations.

ORG 8853 Organizational Implications of Implementing Technology Projects 3 credits

Implementing technologies within an organization is no trivial task, as they impact all aspects of the organization and its culture. Managing the technology itself is very complex. However, the associated organizational issues are equally complex throughout the full lifecycle of the project – from initial ideas to full sustainment. Topics include departmental and organizational-wide decision-making processes, organizational and individual authority dynamics, balancing inter-departmental needs, managing change, and the impact upon people and their work. Students will take their integrated systems knowledge and develop plans for advising or re-directing work.

ORG 8855 Advanced Social Networking for Organizations 3 credits

The role that media forms like “social media” (or computer-mediated social networking sites like Facebook or LinkedIn) play in large companies and organizations has become increasingly important for the analysis and leadership of organizations. In this course, students will develop a theoretical basis in, and begin to differentiate among, emerging media and internet technologies, the ethical questions surrounding social media, personal identity and the workplace, and the role that the internet, blogs and email have on group decision-making and the effectiveness of leaders. Students will take their knowledge of how social media are used for promotion and public relations, and how content communities and virtual social worlds are utilized in organizations, and apply it to creating plans for transforming organizations.

ORG 8857 Building Innovative Organizational Capabilities 3 credits

How can innovation be best leveraged in organizations to achieve their strategic goals? Is technology always an organizational asset? This course builds innovative toolsets, which includes evaluating the possible impacts of various innovation theories, organization structures, and ethics upon organizations and society.

ORG 8860 Leveraging Technology Toolsets as an Organizational Development Practitioner 3 credits

Technology-based tools -- such as immersive, web-based, hand held, collaborative software, and facilitator-led technologies -- can augment the capabilities and outcomes of an Organizational Development intervention. This course studies various tools an Organizational Development practitioner can use, including selection, design, and facilitation techniques

ORG 8863 Advanced Topics: How Media & Communication Technologies are Transforming Leadership in Organizations 3 credits

This course will be based on the analysis of case studies and current trends in organizations. Students will develop a theoretical basis and develop plans for the development and implementation of Information, Communication, and Media Technologies (ICMT's) in organizations. Students will also explore the critical scholarship surrounding the ethics of implementing ICMT's in organizations, and use this to derive ethical strategies for increasing the effectiveness of leaders. The main focus will be on using case study analysis for creating solutions to current problems in the interaction of ICMT's and leadership effectiveness.

PSY Professional Psychology

PSY 5001 Survey of Psychology I 3 credits

This course is a survey course developed to assist students with degrees in areas other than psychology to become prepared for graduate study in psychology. Survey I covers an introduction to research, basic psychotherapeutic concepts, cognitive development, sexual development and issues, child issues, family therapy and other therapies, learning and memory and ethics. This course is the first of two survey courses in this preparation process.

PSY 5002 Survey of Psychology II 3 credits

This course is the second of two survey courses. This course covers a brief history of psychology, psychoanalytic theories of personality as well as other personality theories, human motives and social motives, psychological therapies and questions about psychotherapy, intelligence measurement, personality traits and their measurement, social relation in groups, stress,

health and illness and mind, self and well being.
Prerequisite: PSY 5001.

PSY 5003 Introduction to Applied & Professional Psychology 3 credits

This course provides an overview of the roles, relationships, and responsibilities of individuals in the various specialties in applied and professional psychology. Attention is given to identifying those specialties for which licensure or certification is possible and/or available, those specialties that apply the principles of psychology to organizations and organizational problems, and the distinction between experimental/theoretical psychology and applied/professional psychology.

PSY 5130 Life Span Development 3 credits

This course surveys the major theoretical perspectives on life span development from conception through late adulthood. Developmental processes related to physical, cognitive, moral, and emotional functions are reviewed as well as societal and cultural aspects of development. Cross-listed as and equivalent to CSL 5130.

PSY 5280 Ethics, Laws & Standards of Professional Practice 3 credits

This course is a study of the ethical and legal issues confronting those practicing in human services. Topics related to clinical methodology, standards of practice, and inter-professional relations are explored. Students learn principles of ethical decision making, standards for human and animal use in research, and standards of care specified by state and federal laws. Emphasis is placed on exploration of the emotional impact that major ethical and legal dilemmas have on decision making. Students also master the current code of ethics of the American Psychological Association and other professional codes of ethics, such as the code of the American Association of Marriage and Family Therapy or the code of the American Counseling Association. Cross-listed as and equivalent to CSL 5280. ***This course may not be transferred in.***

PSY 5290 Theories & Techniques of Counseling & Psychotherapy 3 credits

This course is an overview of the psychodynamic, cognitive/behavioral, and

existential/humanistic schools of psychology, as well as corresponding models of counseling and frequently used assessment and therapeutic techniques. The primary focus in the course is on the development of both skills and rationale in the application of intervention strategies to treatment and case management. Equivalent to ORG 6530. Cross-listed as and equivalent to CSL 5290.

PSY 5330 History of Psychology 3 credits

This course introduces students to the theoretical systems, methods of inquiry, and terminologies associated with the history of psychology. The course is grounded in a broad historical understanding that builds a framework for understanding the contemporary field of psychology. The focus is on the contributions of religion, philosophy, and biology to the development of psychology as well as on the development of Psychoanalytic, Behaviorist, Cognitive, Humanistic, and Existential theories and their impact on the current practice of psychology. Cross-listed as and equivalent to CSL 5330.

PSY 5410 Physiological Bases of Behavior 3 credits

This course is designed to provide the student with a foundation of human physiology including the nervous, hormonal, reproductive, and sensory systems, and the attendant functions of digestion, sleep, learning and memory, emotion and other human biological functions. The course provides an essential knowledge base for most other offerings in the field of psychology. Cross-listed as and equivalent to CSL 5410.

PSY 5420 Principles of Social Psychology 3 credits

This course provides an introduction and overview of the principles and theories of social psychology. The course includes exploration of behavior in groups, group impacts on individual behavior and the ways in which organizational rules and norms impact behavior. Constructs of social psychology, including social influence, social thinking, and attitude formation are covered and related to sociological and psychological research. Equivalent to ORG 5520. Cross-listed as and equivalent to CSL 5420.

PSY 5520 Cognitive & Affective Bases of Behavior 3 credits

This course studies the science of the cognitive and affective bases of behavior. The course reviews the contributions of cognitive psychology and also studies the effect of emotion and motivation on behavior. Cognitive psychology emphasizes perception, attention, memory, reasoning, language, imagery, and problem solving. Affective psychology focuses on emotional arousal, motivation, attribution, and mood. Students are thoroughly acquainted with research and research methods in this area and also focus on how this information applies in clinical practice.

PSY 5610 Psychometrics: Tests & Measurements 3 credits

This course involves the study of the theory and practice of psychological measurement. The focus is on the process of measuring and differentiating variables of psychological interest. Students explore basic concepts of measurement and the principles of test construction. The course familiarizes the prospective professional psychologist with the common tests used in psychological and educational practice. These include intellectual, aptitude, and achievement tests; interest inventories; personality tests; and social measures. Cross-listed as and equivalent to ORG 5100/CSL 5610.

PSY 6120 Lifestyle & Career Development 3 credits

This assessment course focuses on the evolution of the concept of career development. Students review the major theories and their application to the collection, evaluation, and use of career information for counseling psychology as it applies to individuals and groups across the adult life span. Students also learn to use assessment instruments (MBTI, FIRO-B, Strong, etc.) and integrate the findings in vocational counseling situations as they relate to adults. Cross-listed as and equivalent to CSL / ORG 6120.

PSY 6121 Theories & Techniques of Career Counseling 3 credits

This course reviews the various theories of career counseling as they relate to career development theory, and provides the student with the knowledge base and skills necessary to select and employ career counseling techniques to help clients to affect career decision-making

and career choices/career change choices. Prerequisite: PSY 6120.

PSY 6122 Occupational/Educational Information 3 credits

In this course the student gains information on and skill in using the various print and electronic sources of occupational information. Included are sources that provide information such as education that is necessary in various job types/roles, occupational outlook and future market demand for different career areas, roles, expectations, and career ladders in various job areas, and related information. The use of technology in career counseling/career management also composes a major segment of course content

PSY 6160 Family Systems & Dynamics 3 credits

This course is an introduction to the systems approach to intervention with families. It includes a historical perspective on family theory development. The focus is on obtaining knowledge and theory about the nuclear family in traditional and alternative forms. Normal family patterns of interaction, family life cycle, family of origin, family subsystems, and societal influence are explored. Contemporary issues and outcome research literature are reviewed. This course serves as a knowledge base for further study of assessment, treatment, and intervention with families. Cross-listed as and equivalent to CSL 6160.

PSY 6230 Treatment of Family Violence 3 credits

This course explores the major personal and social theories of family violence, including elder abuse. The course focuses on severe marital conflicts, rape, and physical and emotional violence. The cycle of family violence is examined with emphasis on societal factors that contribute to this behavior. Students explore causality and treatment alternatives for victims and perpetrators as well as current research findings in the field. Prerequisite: PSY 6160. Cross-listed as and equivalent to CSL 6230.

PSY 6290 Learning Theory & Behavioral Applications 3 credits

This course surveys traditional areas of learning theory, including classical and instrumental

conditioning paradigms, motivation, reinforcement variables, stimulus discrimination, generalization and transfer, habituation, and memory. Also reviewed are models of social learning theory, modeling, and behavioral rehearsal. Behavioral approaches to therapy that focus on modifying specific, observable behaviors, using the principles of learning theory such as systematic desensitization, cognitive-behavioral approaches, and dialectical behavioral therapy. Prerequisite: PSY 5520 or equivalent.

PSY 6301 Cultural & Historical Approaches to Sports & Performance 3 credits

This course provides a foundation for understanding the cultural and historical perspectives on sports and performance psychology. The curriculum explores the key contributors, important research discoveries and differing roles of professionals in the field. Students investigate models of performance from ancient to contemporary traditions. Emphasis is on the successful integration of various cultural perspectives on sports and performance.

PSY 6310 Physiological Factors in Sports & Performance 3 credits

This course provides the foundation for understanding the physiological dimensions of sports and performance. The curriculum will focus on physiological components of behavior and their relationship to the mental and emotional aspects of performance. Attention is given to the areas of regulating arousal, stress, anxiety and fear. Students will learn to assess parameters of the stress response. The course is designed to assist the working professional in creating strategies for optimizing human performance.

PSY 6312 Performance Enhancement 3 credits

Psychological Skills Training (PST) is the systemic and disciplined use of psychological skills to enhance performance. Similar to physical skills, mental and psychological skills development requires precision and repetition of multiple capacities. These include focusing and concentration, arousal regulation, imagery, increasing confidence, motivation and effective goal-setting.

PSY 6315 Enhancing Health & Well-Being in Sports & Performance Settings 3 credits

This course explores the central importance of health and well-being in sports and performance. Excellence in performance often demands balanced mental and physical functioning and adherence to a well-designed training regimen. In attaining health and well-being, particular attention is given to psychological and behavioral components that either support or detract from performance. Supportive elements include healthy exercise, recovery, diet and relationships. Indicators of imbalance include injuries, illness, eating disorders, addictions, aggression and burnout. Further, the course examines the temptations and dangers of illicit performance enhancing drugs. Attainment of balance is seen as a core ingredient of optimal and sustainable well-being.

PSY 6318 Youth Development & Sports 3 credits

One purpose of sports and performance psychology is helping people improve performance through the use of mental techniques. Sports and performance psychology also looks at how involving ourselves in sports and performance activities facilitates personal growth and well-being. Students are introduced to several important topics: 1) how physical activity and psychological development are linked, 2) effective coaching practices for youth and young adults, 3) child/parent interaction, and 4) application of this knowledge with adults.

PSY 6320 Group & Team Dynamics 3 credits

Taking advantage of the overall abilities of each member of a group or team, as well as understanding the potential solutions for challenges facing dysfunctional groups and teams, are two areas that great leaders master. This course examines the process and outcomes of group and team efforts, as well as the power of teamwork and cohesion by studying the critical foundations of high-performing groups and teams.

PSY 6460 Marital Systems 3 credits

This course explores current theory and practice of couple and marital therapy. It includes a review of the professional and non-professional literature related to the subject. Topics such as divorce, infidelity, relationship enhancement, cross-cultural marriages, and same sex couples are

researched. Interactive patterns, societal influences, and intervention strategies are discussed. Prerequisite: PSY 6160 or equivalent. Cross-listed as and equivalent to CSL 6460.

PSY 6470 Theories & Techniques of Group Counseling & Psychotherapy 3 credits

This course is a study of the history, theory, and practice of group counseling and psychotherapy. Several major contemporary models of group counseling are examined. Instructional methods include both didactic presentations and experiential methods. Students are afforded the opportunity to participate in a training group as a group member and as a leader. A strong emphasis is placed on ethical standards and self-assessment of personal strengths and weaknesses that affect group leadership. Prerequisites: PSY 7210 or equivalent. Cross-listed as and equivalent to CSL 6470.

PSY 6501 Psychology of Personality 3 credits

This course explores the major theories of personality including Psychodynamic, Behavioral, Biological, Cognitive, Trait-Factor, and Humanistic/Existential approaches. Students study individual theories and compare and contrast these theoretical positions in terms of current research. In addition, students explore the relevance and application of personality theories to the profession of psychology. Cross-listed as and equivalent to CSL 6501.

PSY 6580 Human Sexuality & Sexual Disorders 3 credits

This course focuses on the sexual response cycle, sexual identity, and the treatment of sexual disorders in clinical practice. The primary emphasis is on the way in which a disturbance in the processes of the sexual response cycle (desire/excitement/orgasm/resolution) leads to sexual dysfunction. The student also becomes familiar with the paraphilias and gender identity disorders. Cross-listed as and equivalent to CSL 6580.

PSY 6600 Theories & Techniques of Marriage & Family Therapy I 3 credits

This course is a didactic integration designed to introduce the student to the foundations of marriage and family therapy. It provides an overview of the major theoretical approaches to

marriage and family therapy. Assessment techniques and intervention strategies are presented for all of the schools of thought, with an emphasis on intergenerational, communication, experiential, structural, and behavioral approaches. Cross-listed as and equivalent to CSL 6600.

PSY 6610 Theories & Techniques of Marriage & Family Therapy II 3 credits

This course focuses on mastery of basic and advanced principles of marriage and family therapy through an integration of therapeutic perspectives of modernist models. Models studied include strategic, brief solution focused, narrative, and integrative. Intervention strategies from each perspective are presented and practiced. Prerequisites: PSY 6160 and PSY 6600, or equivalents. Cross-listed as and equivalent to CSL 6610.

PSY 7210 Psychopathology I: Adults 3 credits

This course focuses on the etiology and diagnosis of adult psychopathological disorders. Students develop skills in case conceptualization and addressing adult disorders, differential diagnosis and construction of a systematic treatment plan, emerging treatment revision, assessment of outcome, termination, and ethical issues in the treatment process. While placing treatment within a theoretical context, the real emphasis in this course is on treatment techniques aimed at symptom and problem reduction. Benefits and limitations of the diagnostic process are reviewed. ***This course may not be transferred in.*** Equivalent to ORG 7210.

PSY 7220 Clinical Personality Assessment: Objective Techniques 3 credits

This course involves the study of the theory and practice of objective personality assessment. The course focuses on how objective personality assessment is used to provide information in educational, psychiatric, industrial, and medical practice. Primary emphasis is on the Minnesota Multiphasic Personality Inventory - 2nd Edition, and the Millon Clinical Multiaxial Inventory - 3rd Edition. Secondary emphasis is on the Personality Assessment Inventory and tests of normal personality functioning. In addition, the student gains familiarity with numerous scales

and inventories used to measure functioning in educational, industrial, and psychiatric practice. Prerequisite (for clinical programs only): PSY 5610 or equivalent.

PSY 7260 Adult Psychopathology & Treatment II 3 credits

This course examines the methods and techniques employed to assist adult clients in the change process with specific reference to problem diagnosis, case conceptualization, and construction of a systematic treatment plan, emerging treatment revision, assessment of outcome, termination, and ethical issues in the treatment process. While placing treatment within a theoretical context, the real emphasis in this course is on treatment techniques aimed at symptom and problem reduction. Prerequisite: PSY 7210 or equivalent. Cross-listed as and equivalent to ORG 7260.

PSY 7301 Advanced Performance Enhancement I: Core Mind-Body Practices 3 credits

This course presents mind-body practices that provide the core elements of behaviors for individual and team performance. The student will learn to practice and to teach mastery of cognitive and physical skills to control systemic arousal and focusing behavior. The course will provide tools to construct performance profiles on individuals taking into account age, gender and cultural parameters. This depth of analysis provides the foundation to effectively integrate mind-body practices with performance enhancement. The student will be given strategies for measuring the efficacy of applying mind-body practices in diverse settings.

PSY 7305 Advanced Psychomotor Development & Kinesiology 3 credits

This course explores the practical applications of physiological and psychomotor dimensions of performance. The curriculum provides a comprehensive analysis of human movement and mental training applications. Parameters for measuring the stress response will be explored in conjunction with optimizing human performance. The lifelong developmental aspects of physiological and motor behavior will be examined.

PSY 7311 Advanced Performance Enhancement II: Integrative Mind-Body Practices 3 credits

This course provides in depth study of advanced research and theories that integrate mind-body practices in enhancing performance. Students are taught how to utilize multiple conceptual frameworks and research findings in training skills such as advanced arousal control, imagery and focusing. The student will be able to assess the influence of age, gender and cultural factors on performance and apply this understanding to developing individualized training protocols. The graduate will be able to assess the efficacy of integrative mind-body practice models in enhancing individual, group and team performance.

PSY 7314 Rehabilitation in Sports & Performance 3 credits

This course examines crucial rehabilitation topics in sports and performance. The curriculum provides methods of psychological evaluation and treatment for injuries, addictions, eating disorders, and burnout. Students will investigate the dynamics of aggression in sports and performance settings. Retirement issues and exercise adherence strategies are explored. Inclusive in the course is a special debate section challenging students to confront current ethical issues in the field.

PSY 7317 Advanced Group Dynamics in Sports & Performance Settings 3 credits

This course examines the integral relationship between leadership, communication, and group performance. The curriculum applies group and team principles to diverse populations such as youth, special needs, high-profile performers and support networks. Leadership is studied within the context of group functioning. Students will develop research protocols for assessing group and team functioning.

PSY 7321 Advanced Performance Enhancement III: The Psychology of Peak Experience 3 credits

This course is the pinnacle of performance enhancement teachings. The emphasis in this course is the development of advanced awareness skills in the attainment of self-mastery. The student learns how to guide individual goal achievement in congruence with

current skills. The ultimate goal for the student is to recognize and cultivate individual and group experiences that are characterized by such terms as optimal performance, actualization, effortless awareness, flow, and peak experience.

PSY 7330 Sport & Performance Psychology as a Business 3 credits

This course assists students in developing personal business plans. The curriculum addresses the financial, legal and ethical issues encountered in sport and performance psychology. The course gives the student persuasive arguments to use with clients to prevent their use of licit and illicit drugs and performance enhancing substances, as well as advising clients who have already used illicit substances and how to handle accusations against them for substance use or abuse. Potential career opportunities are identified and compared. The student will prepare a personal resume, market analysis and comprehensive business plan.

PSY 7340 Assessment of Intelligence 3 credits

This course involves the study of the theory and practice of intellectual assessment. The course focuses on how intellectual assessment is used to provide information in educational, psychiatric, industrial, and neurological practice. Primary emphasis is on the Wechsler intelligence assessment instruments. Secondary emphasis is on the Stanford-Binet and Kaufmann Assessment Battery for Children. The student also gains familiarity with numerous intelligence tests and achievement tests used in school and industrial settings and with tests used with non-traditional clients. Prerequisite: PSY 5610 or equivalent.

PSY 7360 Psychopathology II: Children & Adolescents 3 credits

This course focuses on the etiology and diagnosis of child and adolescent psychopathological disorders. Students develop skills in addressing disorders of childhood and adolescence, as well as psychotherapeutic techniques to be employed with children and adolescents with a broad range of psychological problems from stress reactions to psychosis. Treatment modalities include group, family, and individual. The course includes an examination of psychopathology in childhood and adolescence

with emphasis on diagnostic classification systems for children, major types of disturbances, assessment techniques, and etiology as related to constitutional, environmental, and familial factors. Benefits and limitations of the diagnostic process are reviewed. ***This course may not be transferred in.***

PSY 7480 Neuropsychology 3 credits

This course is designed to familiarize the student with language and terms used in neuroanatomy and physiological psychology. The course explores brain-behavior relationships that exist and are diagnostic in the practice of psychology. There is emphasis on the anatomy of the brain and the nervous system. The course also looks at several neurological conditions, including AIDS, Parkinson's disease, and Multiple Sclerosis as well as the psychological and neurological impacts of these diseases. Prerequisite: PSY 5410 or equivalent.

PSY 7490 Integrative Report Writing 2 credits

This course demonstrates essential components that make up report writing commonly used in the field of mental health, including forensic/criminal/custody, school, traditional psychological, neuropsychological, industrial/organization, and other areas. Common structure of various types of reports will be considered, but with attention also given to more focused mental health venues. Common elements in report writing, integrating report writing, treatment plans and progress notes and summaries, evaluation of treatment outcomes, and documentation will be covered. Practice in writing reports will be a vital part of the course as well as review examples of well-constructed reports. Finally, ethical issues of report writing will also be examined. Prerequisites: PSY 7220 and PSY 7340.

PSY 7510 Biological Bases of Behavior 3 credits

This course is designed to provide the student with a foundation of human physiology including the nervous, hormonal, reproductive, and sensory systems, and the attendant functions of digestion, sleep, learning and memory, emotion and other human biological functions. The course provides an essential knowledge base for most

other offerings in the field of psychology. Cross-listed as and equivalent to ORG 7510.

PSY 7512 Psychology of Leadership 3 credits

The course will provide an overview of the key events and accomplishments that have played an important role in the historical evolution of the psychology of leadership and the systems that form the basis of the discipline. A review of the history of organizational psychology introduces several important distinctions that define the discipline, and theoretical models and perspectives that trace the evolution of theory and practice. The learning activities emphasize the dichotomy between the science and applications of organizational psychology and leadership. The course approaches the psychology of leadership from three different perspectives 1) objectives for research and practice in the field, 2) basic methodological orientation of practitioners and 3) the systems and research-based foundations that form the basis of organizational psychology and the psychology of leadership. Can be substituted for: ORG 7509, ORG 7519, PSY 7509

PSY 7540 Clinical Personality Assessment: Projective Techniques 3 credits

This course involves the study of the theory and practice of projective personality assessment and the way in which projective assessment is used to provide information in clinical practice. Primary emphasis is on the Comprehensive System for scoring and interpreting the Rorschach Ink Blot Test. In addition, the student gains familiarity with the Holtzman Inkblot Technique, the Thematic Apperception Test, and projective drawings. Prerequisites: PSY 5610 or equivalent.

PSY 7600 Family Systems 3 credits

This course is an introduction to the systems approach to intervention with families. It includes a historical perspective on family theory development. The focus is on obtaining knowledge and theory about the nuclear family in traditional and alternative forms. Normal family patterns of interaction, family life cycle, family of origin, family subsystems, and societal influence are explored. Contemporary issues and outcome research literature are reviewed. This course serves as a knowledge base for further study of assessment, treatment, and intervention with

families. Cross-listed as and equivalent to ORG 7600.

PSY 7620 Professional Issues in Clinical Psychology 3 credits

This course is focused on the skills necessary to successfully complete a doctoral program in Clinical Psychology and work as a licensed psychologist in Colorado. This includes completing a dissertation, obtaining an internship, completing post-doctoral hours, securing state licensure and gaining professional employment. The student is prepared to become a positive representative of, and contributor to, the mental health professional community. Prerequisite: PSY 5003 and PSY 7640.

PSY 7640 Quantitative Research Design & Methods 3 credits

This course extends a student's knowledge of the principles and procedures involved in complex behavioral sciences research. The goal is to provide the student with an educational experience that allows him or her to become an informed consumer of scholarly psychological research. The course also prepares the student to conduct advanced research. Topics include philosophy of science, advanced research methods, and analysis of variance. Prerequisite: PSY 5400 or equivalent.

PSY 7720 Evidence-Based Practices in Psychotherapy 1 credit

The recent trend toward empirically-based treatments excludes other, more potent factors responsible for psychotherapy outcome. This course takes a critical look at "business as usual" in mental health, exposes its mythmakers, and translates the latest research findings on what really works in therapy into empirically supported principles for clinical practice. It emphasizes practical skill building over theory by teaching students how to use valid and reliable feedback from clients to deliver effective, efficient, and accountable care.

PSY 7740 Qualitative Research Design & Methods 3 credits

Readings and exercises in this course emphasize design, analysis, and research concepts most appropriate to investigating intangibles and common data in psychological modeling. Techniques of methodological design related to

observational, evaluative, systemic, psycho-historical, phenomenological, heuristic, mythic, and case methods are emphasized. Other course topics include data collection, reliability, validity, data summary and analysis, data reporting, influences on response rate, techniques of survey sampling (mail, questionnaire, and telephone surveys), and semi-structured interview schedules. Research issues of protection of human subjects, privacy, and confidentiality are also addressed. Students are supervised and share experiences gained while preparing to develop, administer, and analyze qualitative research projects. Emphasis is placed on the role that qualitative methodologies play in the world of research. Prerequisite: PSY 5400 or equivalent.

PSY 7870 Substance Abuse & Dependence 3 credits

This course addresses the basic models and theories of substance abuse/chemical dependency; basic psychopathology and psychodynamics of substance abuse/chemical dependency; assessment, diagnosis, and differential diagnosis of substance use disorders (including psychological testing and assessment with the MMPI-2, MAC, AUI, MAST, and others); and treatment models and modalities for substance abusing and chemically dependent clients.

PSY 7880 Psychopharmacology 3 credits

This is a required course which all clinical students must complete at University of the Rockies or through transfer credit. This course includes an examination of basic neurobiology, the brain, CNS, and biologic models of major psychiatric illness. Students examine in-depth the clinical uses, mechanisms of action, therapeutic efficacy, side effects, and other practical and clinical issues associated with psychotropic medications. These medications, designed to treat mental illness, include anti-depressants, mood stabilizers, anti-anxiety agents, and anti-psychotic medications. This course also examines the match between different clinical subgroups and various psychotropic medications, as well as the complex relationships between substance abusing or chemically dependent patients and psychopharmacologic treatments. Prerequisites: PSY 5410, PSY 5520 and PSY 7480, or equivalents.

PSY 7940 Advanced & Multivariate Statistical Analysis 3 credits

This course builds on the foundation covered in PSY 5400. The focus is on multivariate techniques commonly used in psychological research, such as factorial analysis of variance, analysis of covariance, repeated measures analysis of variance, multivariate analysis of variance, multiple regression, factor analysis, canonical correlation, and other multivariate techniques. The emphasis is skill-building and conceptual understanding, with exposure to a variety of procedures, so students gain a solid understanding of the reasoning/logic behind statistical procedures. Extensive use of statistical software packages (e.g., SPSS, R) will help illustrate techniques and concepts. This course prepares students to analyze and interpret data collected for the dissertation. Prerequisite: PSY 5400.

PSY 7950 Theories & Methods of Supervision & Consultation 3 credits

This course is designed as an interactive experience including a variety of exercises, group discussions, debates, and observations of supervision. The course prepares participants for a variety of therapy settings including private practice, agencies, and academia. The following critical areas of knowledge and skills are addressed: major models of supervision, development of a personal model of supervision, co-evolving therapist-client and supervisor's relationships, issues in supervision, and ethical and legal considerations related to supervision. Students are also acquainted with best practices for consulting in agency settings. Prerequisite: 1 of the Practicum courses must have been taken at University of the Rockies, and students must have done at least one term of Practicum in the Rockies Counseling Center.

PSY 7961–7965 Clinical Practicum 1 credit (each)

Students obtain direct clinical experience during participation in the provision of psychological services. Students provide clinical services in the form of psychotherapy and psychological assessment to a broad range of clients in collaboration with, and under the supervision of, licensed psychologists. Students receive both individual and group supervision from licensed psychologists. This clinical practicum is conducted in the Rockies Counseling Center or

at a site approved by the Director of Clinical Training. Prerequisites: PSY 5280 and PSY 5290.

PSY 7971–7975 Clinical Practicum 1 credit (each)

Students obtain direct clinical experience during participation in the provision of psychological services. Students provide clinical services in the form of psychotherapy and psychological assessment to a broad range of clients in collaboration with, and under the supervision of, licensed psychologists. Students receive both individual and group supervision from licensed psychologists. This clinical practicum is conducted in the Rockies Counseling Center or at a site approved by the Director of Clinical Training. Prerequisites: PSY 7962-7965.

PSY 7981–7985 Clinical Practicum (100 Hours, 1 Term) 1 credit (each)

Students obtain direct clinical experience during participation in the provision of psychological services. Students provide clinical services in the form of psychotherapy and psychological assessment to a broad range of clients in collaboration with, and under the supervision of, licensed psychologists. Students receive both individual and group supervision from licensed psychologists. This clinical practicum is conducted in the Rockies Counseling Center or at a site approved by the Director of Clinical Training. Prerequisites: PSY 7971-7975 and PSY 7220, PSY 7340 and PSY 7540.

PSY 8110 Neuropsychological Assessment 3 credits

This course focuses on the theory and practice of neuropsychological assessment and how behavior can be measured to provide information regarding brain functioning. Primary emphasis is on neuropsychological assessment using the Halstead-Reitan and other single or comprehensive batteries. Secondary emphasis is given to instruments used for neuropsychological screening and to illuminate abilities in specific areas of brain functioning. The student learns how these tests are used to provide assessments and recommendations in clinical practice. Prerequisites: PSY 5610, PSY 7340, PSY 7220, PSY 7480, or equivalents.

PSY 8150 Trauma Assessment 3 credits

This course examines the various subjective and

objective measures of trauma and victimization. This course is especially useful for those who will be conducting clinical work with traumatized clients. Prerequisites: PSY 5610, PSY 7340, and PSY 7220.

PSY 8160 Forensic Assessment 3 credits

Students examine the forensic application of traditional assessment instruments such as MMPI-II, Rorschach, and MCMI-III. This course also acquaints the student with specific forensic instruments such as the Hare Psychopathy Checklist, Multiphasic Sex Inventory, and risk assessment instruments. Students have the opportunity to administer and interpret a number of forensic measures and apply the results in clinical situations. Prerequisites: PSY 5610, PSY 7340, and PSY 7220.

PSY 8170 Neurofeedback Assessment & Treatment 3 credits

This course introduces the student to converging trends that have influenced the development of applied biofeedback/ psychophysiology. Major antecedents in classical and operant conditioning, psychophysiology, behavioral medicine, and electroencephalography will be examined, as well as the key role that CNS arousal patterns play in the genesis and etiology of various brain-based disorders. The primary focus of the course is on neurofeedback (NF), and offers the student a decidedly hands-on opportunity for learning how to: 1) become a competent NF technician; and 2) gain familiarity with the clinical skills that comprise the basics of choosing NF protocols individually tailored for patients with a variety of medical and psychological maladies.

PSY 8185 Pediatric Neuropsychology 3 credits

This course focuses on the theory and practice of pediatric neuropsychology and its distinctions from adult neuropsychology. Thus, emphasis is given to the unique practical considerations in assessing the child/adolescent, to ensure that data collection is valid and free from unnecessary confounding factors. The student is also exposed to a variety of common neurological conditions such as TBI, sports concussion, Autistic Spectrum, toxic exposure, Reactive Attachment Disorder, etc. In addition, introduction and hands-on practice with the administration, scoring, and

interpretation of a thorough pediatric neuropsychological battery is provided. The student furthermore gains supervised experience in writing meaningful clinical reports and with regard to treatment planning. Lastly, practical information on how to provide effective assessment feedback to parents/caretakers is supplied. Prerequisites: PSY 5610, PSY 7340, PSY 7220, and PSY 7480.

PSY 8190 Sport Neuropsychology 3 credits

Sport Neuropsychology covers the application of neuropsychological understanding to the world of sport, with a particular emphasis on concussion assessment and management. Topics will include epidemiology of concussions, on field and post-concussion assessment, concussion management, and counseling issues related to concussions and neuropsychology. Students will develop knowledge and expertise in concussion recognition and management. Prerequisites: PSY 7480 and PSY 8110.

PSY 8310 Correctional Mental Health: Theory & Practice 3 credits

Correctional Mental Health covers the application of mental health theory and practice to jail and prison settings, with a particular emphasis on identifying and treating mental illness for those who are incarcerated. Topics will include legislative and court battles that established correctional mental health, suicide prevention, components of mental health treatment in correctional systems and facilities, and issues related to the provision of psychotherapy in jails and prisons. Students will develop the knowledge and expertise that will enable them to practice effectively in correctional systems.

PSY 8540 Forensic Psychology 3 credits

This course is designed to acquaint the student with psychological services provided to the criminal and civil justice systems. Emphasis is placed on the role of psychologists in correctional institutions, the assessment of juvenile and adult offenders, consultation with various law enforcement agencies, criminal profiling, and mental health law. Prerequisite: PSY 5280 or equivalent.

PSY 8620 Advanced Seminar in Marriage & Family Therapy 3 credits

This course is for students with significant

experience in marriage and family therapy and explores the cutting edge research and theory in the field. Students have the opportunity to build theory and create and develop marriage and family interventions. Prerequisites: PSY 6160, PSY 6600, PSY 8600, and PSY 8610, or equivalents.

PSY 8720 Seminar in Eating Disorders 3 credits

This course provides a survey of the origins and treatment of anorexia nervosa, bulimia nervosa, the proposed category binge eating disorder, and compulsive overeating/obesity. Students gain expertise in assessment procedures, diagnostic considerations, and the latest treatment techniques effective with clients who have severe disturbances in eating behavior. Case studies, role-plays, and independent research prepare students to excel in the treatment of eating disorders. Prerequisites: PSY 7360, PSY 7210 or equivalents.

PSY 8730 Assessment and Treatment of Eating Disorders 3 credits

This course acquaints students with various methods of assessment in eating disorder treatment and allows for practice in their usage. In addition, the course focuses on the mastery of evidence-based treatment, both inpatient and outpatient, in the areas of psycho-education, cognitive-behavioral, interpersonal, self-psychology, feminist, group, family, and self-help. Students have ample opportunity to practice these techniques through readings, class discussion, role-plays, and structured exercises. Prerequisites: PSY 7360, PSY 7210 or equivalents.

PSY 8770 Doctoral Capstone Seminar 4 credits (9 weeks)

This seminar provides students the opportunity to apply what they have learned in their curriculum to highly realistic case studies related to their fields of specialization for the doctorate. Through an asynchronous discussion among students and the instructor, students will review, analyze and evaluate case studies emphasizing the practice of the content in their curriculum. The course will involve the analysis and evaluation of one or more case studies. Students will contemplate complex questions posed by their instructor, reply

to those questions, respond to other students' analyses and evaluations, and receive faculty feedback. Each student will submit a final assignment on each case, involving his or her critical thinking on the core issues presented in the case and the presentation and defense of an approach to addressing those core issues. Prerequisite: completion (including approved credits transferred) of all coursework required in the student's doctoral curriculum. Cross-listed as and equivalent to ORG 8770.

PSY 8812 Theory & Practice of Hypnosis and Relaxation Therapy 3 credits

This course introduces the student to the history, theories and practice of hypnosis and related clinical methodologies. Traditional hypnoanalytic, hypnotherapeutic, as well as Ericksonian, psychological and medical approaches are presented.

PSY 8820 Health Psychology 3 credits

This course explores the major theories and techniques of health psychology, behavioral medicine, psychoneuroimmunology, and body-mind approaches to healing and health care. Psychodynamic theories and the theories of Reich and Lowen; biofeedback and behavioral theories; humanistic, Eastern, and body-mind theories are explored, as well as the works of Borysenko, Ornish, Siegel, and Weil. Current theoretical approaches and research related to the field are explored.

PSY 8821 Major Illnesses: Health Psychology's Role 3 credits

Purpose of this course is to familiarize the students with major medical illness, disease progression, and the contribution of life-style to disease etiology, prevention, wellness, and quality of life. Treatment issues are reviewed only by way of illustrating problems of compliance or adherence once an illness is diagnosed and treatment has begun. Case illustrations will be used to describe the health psychology approach to etiology, assessment, treatment planning, treatment tools and modalities, and the multidisciplinary environment that the health psychologist functions within.

PSY 8822 Treatment Approaches in Health Psychology 3 credits

This course explores major theories and

techniques of health psychology treatment, behavioral medicine, psycho-neuroimmunology, and body-mind approaches to health and health care. Biofeedback, stress management/relaxation training, behavioral management approaches, guided imagery, autogenic phrases/progressive relaxation, hypnosis, meditation / yoga / acupuncture, massage/body work, pain management, flotation REST, spirituality and health, relationship/social support and health, and other related treatment approaches will be explored. The work of health psychology /behavioral medicine professionals such as Neil Miller, Dean Ornish, Bernie Siegel, Andrew Weil, and Joan Borysenko along with current theoretical approaches and research related to the field are explored. Prerequisite: PSY 8820.

PSY 8823 Medical Ethics in Health Psychology 3 credits

This course is devoted to learning about the practice of psychology in the health care environment dealing with medical illnesses whether integrated or non-integrated. Emphasis is placed on ethical issues in health psychology and behavioral medicine.

PSY 8830 Pain Management I: Overview 3 credits

The purpose of this course is to familiarize students with the major medical illnesses which are accompanied by chronic pain and the contribution of the biopsychosocial model to understanding the phenomena of chronic pain. A major focus of this course is developing an awareness of the phenomenology of chronic pain and the mind-body connection, psychological comorbidities, the etiology of chronic pain, its prevention, and its impact on the quality of life. Case illustrations will be used to describe medical psychology's approach to assessment, treatment planning, and the treatment of chronic pain. Instructor approval or PSY 8820 is required to take this course. It is also recommended the student have completed PSY 5410 prior to enrolling in this course. A clinical exposure to typical patients will be available at the University of the Rockies Neuropsychology Center or other community settings as part of the student's practicum. Students will be expected to attend Clinical Grand Rounds at the Clinic or Hospital where they are doing their practicum as part of this Advanced Seminar.

PSY 8831 Pain Management II: Specialty Concerns 3 credits

This second course, in a series developed in conjunction with the American Academy of Pain Management (AAPM), helps develop a clear understanding of the medical psychologist's role on the chronic pain treatment team. The purpose of this course is to familiarize students with the other major Health Care Professionals (HCP) management of chronic pain. Students will tour other facilities, interact with other HCP's, and discuss these specialists' perceived roles in the management of chronic pain. For example, it is expected students will become familiar with the role of surgery, chiropractic, physical therapy, acupuncture, anesthesiology, and nursing in the management of chronic pain. Students will be taught how to introduce the biopsychosocial model to these specialists to assist them in understanding the phenomena of chronic pain. Students will be expected to become comfortable in interacting with a wide range of medical professionals and understand the limits and scope of practice of the psychologist in the treatment of chronic pain. Instructor approval or PSY 8820 is required to take this course. It is also recommended the student have completed PSY 5410 prior to enrolling in this course. A clinical exposure to patients will be available at community settings as part of the student's practicum. Students will be expected to attend Clinical Grand Rounds at the Clinic or Hospital where they are doing their practicum as part of this Advanced Seminar.

PSY 8850 Advanced Treatment of Trauma Based Disorders 3 credits

This is largely an experiential course. Students demonstrate competence using innovative treatment methods for clients who present with the symptoms of psychological trauma. The methods include therapeutic breathing, examples from energy psychology (TAT, EFT, TFT), the HeartMath biofeedback procedures, applied kinesiology, and strategies for increasing hemispheric balance. Writing assignments include case notes from client sessions, and logs that describe have self-applied the methods. Prerequisites: PSY 7360, PSY 7210 and PSY 5290.

PSY 8861 Treating the Traumatic Origins of Complex Emotional Disorders I (EMDR-II) 3 credits

Students in this course will review the current literature, research, ethics, and practice related to trauma treatment with eye movement desensitization and reprocessing (EMDR). Students will learn and practice EMDR through role plays, and in two or more practicum experiences with real-life problems. Students will demonstrate minimal competence in using EMDR in a therapist role, and will receive treatment in a client role, with a single-incident trauma or disturbing memory. Prerequisites: PSY 7360, PSY 7210 and PSY 5290.

PSY 8880 Treating the Traumatic Origins of Complex Emotional Disorders II (EMDR-II) 3 credits

The course begins with a review of PSY 8861, and of students' experiences in using EMDR with clinical clients. Students will demonstrate minimal competence in using EMDR in a therapist role, and will receive treatment in a client role, with real-life presenting problems. In addition to demonstrating competence in treating traumatic memories and anxiety, students will also be expected to show effective use of EMDR with one or more of the following problems: recent traumatic events, dilemma, phobia, physical pain, cognitive and emotional interferences with achievement, disturbing dreams, and grief. Prerequisite: PSY 8861.

PSY 8980 Pre-Doctoral Internship (1500 Hours; 1 credit per term, 5 terms) 1 credit

The Internship year provides students with an intensive clinical experience building upon coursework, Practicum experiences, and supervision skills obtained during the first three years of coursework. Through their own investigation and with the assistance of the Internship Director at University of the Rockies, students obtain approved Internship sites either locally or at a distance to provide them with an opportunity to exercise clinical skills in their area of specialization or in general psychotherapy. Students are immersed during the Internship experience in a clinical setting that allows them to work full time in the field of psychology and therefore prepares them for a career in psychology. Students may refer to the Internship Handbook for detailed information regarding Internship requirements. All Internships must meet APPIC requirements. Prerequisites: 15 hours of Clinical Practicum and Passing of Doctoral Comprehensive Examination.

RES Research

RES 5240 Applied Research Methods 3 credits

This course involves the study of research design, and the quantitative and qualitative methods that can be used in addressing research questions. Students will be introduced to social scientific inquiry and the research design process, as well as some of the most common quantitative and qualitative research methodologies. Through the process of critiquing research articles, students will learn how to determine the appropriate use of research design, recognize errors and biases in conducting research, and communicate the methods and results of particular studies. Cross-listed as and equivalent to ORG/PSY 6405.

RES 5400 Understanding, Interpreting, & Applying Statistical Concepts 3 credits

This course teaches students how to critically analyze, interpret, and apply statistical concepts to research in education and the social sciences. The focus is on a quantitative approach to the concepts and methods of statistical inference. Topics include sampling, frequency distributions, estimation, hypothesis testing, and probability. Statistical analyses covered include correlation, regression, t-tests, nonparametric tests, and Analysis of Variance. Basic research design issues are also addressed focusing on selecting data analysis techniques to appropriately address research questions and to apply the concepts covered to various psychological problems and realistic situations. Emphasis is on developing skills in interpreting statistical results presented in research articles. Equivalent to ORG/PSY/CSL 5400.

RES 7302 Advanced Research Methods 3 credits

This course involves the advanced study of research design, and the quantitative and qualitative methods that can be used in addressing research questions. The course is divided into three sections, which cover social scientific inquiry and research design, quantitative methodologies, and qualitative methodologies. Qualitative methods will be emphasized, but a foundation for quantitative methodological principles will be provided. Students will be required to complete a training on ethics in

research, as well as complete a qualitative research proposal in an area of interest, which may include dissertation related research.

RES 7400 Research Design & Methods – Quantitative 3 credits

This course involves the advanced study of research design, and the quantitative methods that can be used in addressing research questions. Students will gain experience developing their own research ideas and learning how to select and apply appropriate research designs to test those ideas. Through the process of critiquing research articles, students will also learn how to evaluate which research designs would be appropriate to test various areas of inquiry, as well as how to communicate the methods and results of particular quantitative studies. Students will be required to complete a training on ethics in research, as well as complete a quantitative research proposal in an area of interest, which may include dissertation related research. Cross-listed as and equivalent to ORG 7400.

RES 7402 Advanced Tests & Measurements 3 credits

This course involves the advanced study of the theory and practice of psychological measurement. Students review and apply the concepts of measurement (levels of measurement, variables, and validity and reliability of instruments and measurement procedures), and basic principles of statistics (descriptive statistics, univariate inferential statistics for comparisons of sample means, correlation, and regression), as a basis for exploring the proper use of tests and measurements in psychological research. Students will explore published research based on psychometric instruments and other measurement methodologies, and design a quantitative research proposal in an area of interest, which may include dissertation related research. Prerequisites for PhD: ORG 7410 and ORG 7400. Prerequisite for PsyD: ORG 7302. Cross-listed as and equivalent to PSY 7402.

RES 7410 Research Design & Methods – Qualitative 3 credits

This course involves the advanced study of research design, in general, and the qualitative inquiry, in particular, that can be used in

addressing research questions. The epistemological assumptions underlying the qualitative methodology will be explored as students become familiar with the philosophical issues underlying how we know what we know. The ability to choose a researchable topic and create associated research questions will be emphasized. Students will become familiar with a variety of approaches including ethnography, grounded theory, phenomenology, narrative, participatory action research, and case study. A variety of common data collection methods will be studied, such as observation, interviews, surveys, and historical document collection. Validation and reliability standards, as well as evaluation criteria for qualitative approaches will be addressed. Students will be required to complete training on ethics in research, as well as complete a qualitative research proposal in an area of interest, which may include dissertation related research. Cross-listed as and equivalent to ORG 7410.

RES 7415 Advanced Statistics 3 credits

This course emphasizes inferential statistical concepts related to methods most appropriate to data and theories. The focus is on a quantitative approach to the concepts and methods of statistical inference. Topics include hypothesis testing, probability, multiple correlation and regression, t-tests, Analysis of Variance, Analysis of Covariance, and Multivariate Analysis of Variance, and nonparametric tests. Research design issues are addressed, with a focus on selecting data analysis techniques to appropriately address research questions and apply the concepts covered to various research problems and real life situations. Emphasis is on developing skills for interpreting statistical results presented in scholarly research articles. Prerequisite for PhD: RES 7410. Additional prerequisite for PhD ODL: ORG 7402. Prerequisite for PsyD: ORG 7402. Cross-listed as and equivalent to ORG/PSY 7415

RES 7420 Advanced Study in Mixed Research Methods 3 credits

Students with an interest in mixed methodology or with a desire to utilize this methodology for their respective doctoral dissertation will be given the opportunity to greatly expand their knowledge base on both qualitative and quantitative methodology and ultimately, the juxtaposition of the two into one project. Students may elect to

begin working on a preliminary proposal for their doctoral dissertation (or select and explore a topic of interest that may become the dissertation topic) for the culminating project in this course. Prerequisites: RES 7400 and RES 7410.

RES 7430 Action Research 3 credits

Action research is a reflective process of collaborative, participatory problem solving. This course addresses the processes and procedures for conducting action research, as well as how to develop an action research plan. Students will attain a conceptual and applied understanding of action research methods and the skills to use these methods to transform an organization through data driven decision making. Students will be able to critically analyze and design action research projects, collect and analyze data, interpret results, and articulate action research principles as a leader in relevant contexts. Prerequisites: RES 7400 and RES 7410.

RES 7440 Advanced Study in Qualitative Research 3 credits

Students with interest in qualitative research, or with a desire to utilize this methodology for their respective doctoral dissertation, will be given an opportunity to greatly expand their existing knowledge base on qualitative research methodology. Students may elect to begin working on a preliminary proposal for their doctoral dissertation (or select and explore a topic of interest that may become the dissertation topic) for the culminating project in this course. Prerequisites: RES 7400 and RES 7410.

RES 8910 Dissertation Planning I 1 credit (9 weeks)

In this course students begin drafting their dissertation under instructor supervision. Students working individually on their dissertation drafts focus on the description of their topic, refinement of their research questions, and outlining their review of the literature with feedback and recommendations for revisions from their instructor. (Final approval of these drafts of portions of the dissertation rests with the student's individual dissertation committees, as described in the current University of the Rockies Dissertation Handbook, as revised from time to time. Following the procedures outlined in the Handbook, students may form their committees before, during, or after their enrollment and

completion of Dissertation Planning I and II.)
Prerequisite: Doctoral Capstone Seminar. Cross-listed as and equivalent to EDU/HUM/ORG/PSY 8910.

RES 8912 Dissertation Planning II 1 credit (9 weeks)

In this course students continue drafting their dissertation from Dissertation Planning I under instructor supervision. Students working individually on their own dissertation drafts focus on further refinement of the description of their topic, the final draft wording of their research questions, and beginning to write their review of the literature and research methodology with feedback and recommendations for revisions from their instructor. Students will exchange research concepts and proposed approaches about their research methodology with other students proposing similar methods (qualitative, quantitative, mixed, action). Final approval of these drafts of portions of the dissertation rests with the student's individual dissertation committees, as described in the current University of the Rockies Dissertation Handbook, as revised from time to time. Following the procedures outlined in the Handbook, students may form their committees before, during or after their enrollment and completion of Dissertation Planning I and II. Prerequisite: completion of all required coursework and Dissertation Planning I. Cross-listed as and equivalent to EDU/HUM/ORG/PSY 8912.

RES 8990 Dissertation (1 credit per term, 5 terms) 1 credit

Students writing a dissertation must complete a total of 5 credits by registering for five consecutive terms of dissertation credit, one credit per term. Dissertations are written per the policies, practices and procedures in the Dissertation Handbook. Clinical program students register for dissertation after they complete PSY 7620, Professional Issues in Clinical Psychology. Cross-listed as and equivalent to EDU/HUM/ORG/PSY 8990.

RES 8991 Dissertation Extension 1 credit

When Dissertation extends beyond 5 credit hours or one year in length, students must register in Dissertation Extension consecutively until the Dissertation is complete. Cross-listed as and equivalent to EDU/HUM/ORG/PSY 8991.

SOC Sociology

SOC 5110 Sociological Theory 3 credits

This course provides a systematic review of classical and contemporary sociological theory and its application to social situations and social problems. Students will learn about classical theorists, contemporary perspectives on society, and the social and organizational contexts in which these theories were developed.

SOC 5510 Sociology of Health and Medicine 3 credits

Through this course, students will develop an understanding of social factors that influence health, wellness, and health care delivery systems. Course topics include social and demographic influences on health, social roles in prevention and illness, medical care institutions and their systems and structures, and the intersection between social policy and health.

SOC 5520 Social Epidemiology 3 credits

This course provides a perspective on understanding how social, psychological, political, cultural, and economic circumstances influence health. Epidemiology is the study of health patterns in a population, their causes, and means of prevention. It provides the scientific basis for evidence-based medicine and strategies to improve public health. Students will learn about the intersection of social theory and epidemiology to explore the connections between social factors and health, with a particular focus on the connections between social and health inequalities.

SOC 5530 Structure and Function of Health Care Organizations 3 credits

In this course, health care organizations and their structures and functions are examined. Students will become familiar with the different organizations that comprise the health care delivery system, and their interrelated components. Students will learn about the complexity of health care delivery as a dynamic system of interrelated yet separate organizations that are governed by health policy and regulation.

SOC 5610 Structure and Function of Nonprofit and Government Organizations 3 credits

In this course, the nonprofit organization, the governmental organization, and their structure and function are examined. Students will become familiar with different types of nonprofit and governmental organizations and their interrelated and often interdependent functions. Students will learn about the complexity of the public and nonprofit sectors

functioning as a dynamic system of interrelated yet separate organizations that are governed by social and fiscal policy and regulation.

SOC 5620 Sociology of Work in Contemporary Society 3 credits

This course explores theories and concepts of work in contemporary society within and external to formal employment, and the intersection of work, gender, and family. Students will understand a broad range of experiences of work, drawing upon research on how temporal, socio-economic, gender and family roles, culture, and other factors shape work experiences. Students will also consider implications for policy and practice.

SOC 5630 Community Organizations and Analysis 3 credits

This course explores the structure, function, and culture of community organizations, and the ways in which social scientists can use qualitative and quantitative data to inform decision making, identify and address needs, and evaluate processes and outcomes. Students will read and analyze a variety of case studies and approaches that address these issues.

SOC 6910 Public Sociology Capstone 3 credits

This capstone course addresses the application of sociological theory and research methods to social problems or policy concerns in organizations or communities. Students can either choose from a selection of case studies provided or identify a local organization with an applied or medical social problem or policy issue and develop a proposed solution that applies their learning through an integrative project plan that combines theory, research, and practice. Prerequisite: completion of all required coursework.

Section Eleven: Governance

This section provides background and credentials for the University of the Rockies Board of Trustees. University Administration, including the Rockies Counseling Center, is also listed here.

Board of Trustees

Carolyn L. Baker, MA (Chair)

Carolyn Baker joined the board in January 2014. Carolyn recently retired from Federal Service and now works as a consultant. She has over 30 years of senior management experience at military installations, major commands, and Department of Defense levels of operation. She has worked in the Pentagon, Army major commands headquarters, and on military installations in the United States and overseas. Prior to retirement she was the Chief of Voluntary Education Programs for the Defense Department, with responsibilities including the management, planning, direction and policy implementation for adult, non-traditional, voluntary higher education programs, and military tuition assistance program for military members and their spouses. Additionally, she chaired and served on numerous government interagencies, (Veterans Affairs, Department of Education, Defense and Justice) professional steering committees, and task forces on military education programs and services. She has also worked with presidential and congressional staff on issues related to military voluntary education, distance learning, and transition assistance programs. She earned her undergraduate degree from the University of Hawaii, and her Master's in Guidance and Counseling from Troy State University, Alabama.

Dr. Dawn Iwamoto, EdD

Dr. Dawn Iwamoto joined University of the Rockies in September 2015. She brings more than 30 years of experience in a broad range of educational settings. Most recently, she served as Executive Vice President and Chief Academic Officer for Education Corporation of America. In this role, she was principal advisor to the Chief Executive Officer on all academic matters and strategic initiatives covering 81 programs, 34 campuses, and 15,000 students. Currently, Dr.

Iwamoto serves as a Peer Reviewer for the Higher Learning Commission of the North Central Association of Colleges and Schools, as well as the Accrediting Council for Independent Colleges and Schools. She is a Consulting Editor for the peer-reviewed International Journal of Special Education and has experience with programmatic accreditation in the areas of education, technology, business, nursing, and counseling. Dr. Iwamoto holds a bachelor's degree in Elementary and Special Education from Michigan State University, a master's degree in Education from Northern Arizona University, and a doctorate in Education from Northern Arizona University.

Donald M. Bird, PhD

Dr. Donald Bird was a member of the Colorado School of Professional Psychology's (COSPP) Board of Directors from 2001 and chaired the Board from 2002 to 2014. Bridgepoint Education, Inc. acquired COSPP in September 2007 and renamed it University of the Rockies. Dr. Bird's PhD in Chemistry is from the University of Colorado, and for many years he has served as a chemistry professor at the US Air Force Academy. A retired Air Force Lieutenant Colonel, Dr. Bird is also Chair of the Board of the Air Academy Federal Credit Union, and he is active in many civic and social organizations in the Pikes Peak Region. Among his notable accomplishments, Dr. Bird is a long time Consultant-Evaluator for The Higher Learning Commission of the North Central Association.

Deborah Blue, PhD

Dr. Deborah Blue joined the board in January 2009. Dr. Blue's career in K-12 and higher education spans over 30 years. Dr. Blue currently serves as Chancellor for State Center Community College District (SCCCD). She has served in educational administrative roles in a number of community college districts in the Northern California region. In addition, Dr. Blue was the Vice President of Policy and Research for the Accrediting Commission for Junior Colleges, Western Association of Schools and Colleges. Currently, Dr. Blue serves as Chancellor for State Center Community College District (SCCCD). She has presented in the area of community college accreditation and is also a published author in higher education. Dr. Blue holds a Bachelor's degree in Speech Pathology and Audiology from Western Michigan University, and a Master's and PhD in Speech and Hearing Sciences.

Jeff Jensen, BA

Jeff Jensen joined the board in September 2007. Jeff Jensen is a Realtor and the former owner and broker of a three-office residential real estate firm called Windermere real estate with over 120 agents. In July of 2012 he sold his interest in the company to his partners to enjoy more quality time with his two daughters and to pursue other interests. Jeff has been in Real Estate for over twenty years and an owner for the last ten. His holdings also included three mortgage companies and a title business in Tacoma, Washington. Jensen continues to work as a consultant, realtor, developer, and participates actively in real estate in a multitude of other ways. Prior to real estate, Mr. Jensen worked for a regional office-interiors firm specializing in space planning, interior design, sales of systems, case goods, and high-end custom-built furniture. A native of Tacoma-Pierce County, Washington, Mr. Jensen graduated from the University of Puget Sound with a Bachelor of Arts in English, with a Business Minor.

Rita Jordan, PhD

Dr. Rita A. Jordan joined the board in January, 2015. Dr. Jordan is currently an affiliate professor at Regis University and an adjunct faculty member of University of Colorado, Colorado Springs. She has over 30 years of experience working both in and for the military. She has served in many educational administration roles at the Air Force Academy in Colorado Springs, CO in addition to having taught at the Air Force Institute of Technology (AFIT) as well as UCCS. She has served on and chaired several boards and committees including the Association for the Advancement of Collegiate Schools of Business (AACSB) International, U.S. Coast Guard Academy Advisory Board, the Dept. of Leadership and Management, the Dean's Faculty Finance and Budget Committee, and the AFIT Academic Review Board. She has presented in the area of organizational leadership and is a published author in the field. Dr. Jordan received her Bachelor of Arts degree from Case Western Reserve Arts (OH), her Master of Arts degree from Louisiana Tech University and her Doctor of Philosophy in Business Administration from University of Colorado.

Eric Lee, PhD

Dr. Eric Lee joined the board in March 2011. Dr. Lee currently serves as the Executive Director of the Colorado Community College Online. Prior to joining the Colorado Community College System, Dr. Lee served as the President and CEO of the Colorado

Black Chamber of Commerce from 2009-2013. Dr. Lee's higher education experience includes serving as Assistant to the President at Suffolk University, where he was a member of the President's Executive Cabinet. Lee worked with the President and Provost on matters related to institutional research, information technology, strategic planning, and institutional diversity. He also taught in the Sawyer Business School and the College of Arts & Sciences. Dr. Lee earned his Bachelor of Science and Master's degree from Wayne State College (NE) and his PhD from the University of Nebraska.

Tom McCarty, MBA

Tom McCarty joined the Board in January 2016. Tom helps companies find opportunities for growth and focus their efforts to improve performance. He has deep experience in general management, sales, marketing, strategy and analytics. His clients range from Institutions of higher education to medium sized businesses and non-profits. Before becoming a marketing and management consultant, Tom was Senior Vice President of Strategy and Product Marketing for University of Phoenix, a subsidiary of Apollo Group. There he transformed education's largest internet advertising program, driving a 20% improvement in performance in a multi-hundred million dollar spend. He also did groundbreaking work in marketing analytics, predictive modeling, segmentation, program planning and development, and branding, pricing, and media research. Prior to Apollo, Tom led Aptimus as the general manager of the education business to become a top education lead platform and helped sell it to University of Phoenix, its largest client. Earlier in his career, he led successful Internet and direct marketing businesses and demonstrated a consistent track record as a top sales person. He has experience leading teams in entrepreneurial ventures and managing sales teams to profitable growth.

David Paris, PhD

Dr. David C. Paris joined the board in October 2013. He is Vice President for Integrative Liberal Learning and the Global Commons at the Association of American Colleges and Universities. Dr. Paris oversees programs on curricular development and global learning. From 2009-2013, he was the Executive Director of the New Leadership Alliance for Student Learning and Accountability, which sought to create shared norms for assessing student learning

and to establish improved practices for assessment and accountability throughout American higher education. Prior to that he was a Professor of Government and Dean of the Faculty at Hamilton College in Clinton, New York. His scholarly work includes articles and books on education policy, political thought, and democratic theory. Dr. Paris received his MA and PhD from Syracuse University.

Karen Smith, CPA, PhD

Dr. Karen Smith joined the Board in January 2016. Dr. Smith brings more than 20 years of financial and higher education leadership to the Board. As a finance executive in both publicly- and privately-held companies, Dr. Smith brings her experience in financial management, information technology, accounting, and operations. Her knowledge provides the Board with broad expertise in financial and operational best practices, particularly in economically complex and competitive environments. As a Board Director at Quadrem (a technology company now part of Ariba/SAP), she helped guide the company's strategic expansion into new industries. Dr. Smith's professional experience in higher education began as a MBA and undergraduate accounting faculty member at the W.P. Carey School of Business at Arizona State University and has continued in both online and traditional instruction and curriculum development adjunct positions at several not-for-profit and for-profit institutions. Dr. Smith's finance leadership at Apollo Education Group brought greater clarity to the expected and real academic and financial returns of strategic and operational initiatives. Dr. Smith holds a Bachelor's degree in Accounting from the University of Delaware and a PhD in Accounting and Quantitative Methods from the University of Texas at Austin. Dr. Smith is a Certified Public Accountant in the State of Arizona.

Chris Henn, BA

Chris Henn joined the Board in March, 2016. As Executive Vice President and Chief Operating Officer for Bridgepoint Education, he oversees the operational aspects of Bridgepoint, including functional areas such as marketing, shared services, and information technology. Mr. Henn joined Bridgepoint in 2015. Mr. Henn has extensive experience in the insurance industry and spent 15 years at Esurance. In his last position he served as Managing Director – Product, where he oversaw the rapid expansion of all Esurance programs and helped grow the company from a mono-

line automotive insurance carrier in 30 states to a multiline insurance company writing automotive policies in 43 states, renter's policies in 19 states, homeowner's policies in 16 states, and motorcycle policies in 11 states. At Esurance, Mr. Henn also served as Managing Director/Chief Operating Officer and Senior Vice President – Insurance Operations. Mr. Henn holds a BA in Economics from John Carroll University in Cleveland, Ohio.

Section Twelve: Faculty

The faculty of University of the Rockies is dedicated to ensuring the integrity of our graduate programs. University of the Rockies faculty members are experts in the subject matter they teach, well educated, highly credentialed, and committed to student success. Faculty are involved in the professional community through writings, publications, and presentations. Faculty members all have earned doctorates and have recent experience practicing what they teach. At University of the Rockies, both the theory and its practical application are taught. Instructors will enliven discussions and provide feedback with real-world lessons from their workplace experience.

Full Time Faculty

The Full-Time Faculty form the academic foundation of University of the Rockies. Its members design and recommend course curriculum, provide instruction in the classroom and advise, mentor, and supervise students in the Doctor of Philosophy, Doctor of Psychology, and Master of Arts programs. Members of the Full-Time faculty are practicing professionals in the fields of psychology, mental health, organizational leadership, education, human services, consulting, business, or research. All Full-Time Faculty members hold earned Doctorates. Most have taught at the graduate level for many years, and all hold professional licensure, certification, or memberships in professional organizations appropriate to their disciplines.

Kristin Ballard

Education: Bachelor of Arts in Psychology, University of Maryland; Master of Science, Professional Counseling, Capella University; PhD, Human Services, Capella University,

Professional: American Psychological Association; Society for Military Psychology; Sigma Mu Psychology Honor Society.

Specializations: Human Services, Lifespan Development, Qualitative Research, Non-Traditional Student Development, Social Psychology, Development and Learning.

Jim Castleberry

Education: Bachelor of Science in Elementary Education, University of Wisconsin; Master of Science in Sociology/Corrections, Minnesota State University; PhD in Human Services, Capella University; Juris Doctorate, William Mitchell College of Law.

Professional: American Bar Association Alternative Dispute Resolution Section, member; Arizona Bar Association, member; Maricopa County Bar Association, member; Veterans Administration Community Advisory Board, member; Naval Academy Information Officer Program, reserve officer; US Department of Agriculture, mediator; Mental Health Commitment Hearings, hearing officer; consultant and pro bono counsel to the regional housing coalition; 20 years' experience in labor law, regulatory law, and administrative law; served as a legal officer (JAG) for the Coast Guard.

Specializations: Human Services Administration, Crisis Intervention, Social Problems, Criminology, Ethics and Law, Alternative Dispute Resolution.

Allen E. Cornelius

Education: Bachelor of Arts in Chemistry and Philosophy, Franklin and Marshall College; Master of Forensic Sciences, George Washington University; Master of Arts in Sport Psychology, University of North Carolina at Chapel Hill; PhD, Counseling Psychology, University of North Carolina at Chapel Hill.

Professional: Member, American Psychological Association.

Specializations: Research Methods, Statistics, Counseling, Sport Psychology, Youth Development through Sport.

Paul Greenberg

Education: Bachelor of Arts in Psychology, Macalester College; Master of Arts in Psychology, University of Arizona; PhD in Psychology, University California at San Diego

Specializations: Psychology, Neuroscience, Public Speaking, Creativity & Innovations, Leadership, Higher Education & Teaching

Gina Hernez-Broome

Education: Bachelor of Arts in Psychology, University of Colorado at Colorado Springs; Master of Science in Industrial and Organizational Psychology, Colorado State University; PhD in Industrial and Organizational Psychology, Colorado State University.

Professional: Society for Industrial and Organizational Psychology (SIOP); American Evaluation Association (AEA); American Psychological Association (APA); Society for Human Resource Professionals (SHRM); American Society for Training and Development (ASTD); International Coaching Federation (ICF).

Specializations: Industrial/Organizational Psychology, Evaluation, Testing, Research, and Measurement, Executive Coaching, Leadership Development, Human Resources, and Instructional Systems Design.

Donna Chandler Kornegay

Education: Bachelor of Arts in Psychology, University of North Carolina At Wilmington; Master of Arts in Counselor Education, North Carolina Central University; PhD in Counselor Education, North Carolina State University.

Professional: American Counseling Association (ACA), Professor/Program Lead, Clinical Mental Health Counseling Program and Marriage and Family Counseling, University of the Rockies, Director of Wellness at North Carolina Central University School of Law, Walden University, Professor. Mobile clinician with Raleigh, NC police department, 25 years of counseling and social work experience. Liberty University, Adjunct Professor, On-Call Clinician for the Crisis and Assessment Unit in Raleigh, NC, provided supervision to new clinicians at Solay Counseling and Research Center.

Licensure/Certification: Licensed Professional Counselor (LPC), Licensed Professional Counselor Supervisor (LPCS), National Certified Counselor (NCC).

Specialization: Racial Identity Development, Multiculturalism, Crisis Intervention, Diversity, Counseling individuals with Mood Disorders, Anxiety Disorders, Psychosis and Social Concerns as it Relates to Race.

Eric Muenks

Education: Bachelor of Arts in Psychology, Stetson University; Master of Science in Counseling and Human Development, Troy State University; PhD in Industrial/Organizational Psychology, Capella University.

Professional: Licensed Mental Health Counselor, Qualified Clinical Supervisor (State of Florida).

Specializations: Counseling and Human Development, Mental Health Administration, Executive Coaching, Performance Enhancement and Motivation, Health and Wellness, Human Services and Healthcare Quality. Non-traditional Student Development, LGBT Issues.

Timothy H. Rice

Education: Bachelor of Science in Physical Education, Mobile College; Master of Sport Science degree in Sport Management, United States Sports Academy; Doctor of Sports Management, United States Sports Academy.

Professional: North American Society for Sport Management (NASSM).

Specializations: Sport Psychology, Sport Management, Sport Coaching, Sport Fundraising.

Irene F. Stein

Education: Bachelor of Science in Mathematics, Bucknell University; Master of Science in Computer Science and Applications, Virginia Polytechnic Institute; Master of Arts in Human and Organizational Systems, Fielding Graduate Institute, Master of Arts in Communication Development, Colorado State University, Ph.D. in Human and Organizational Systems, Fielding Graduate University

Professional: Board Member, Graduate School Alliance for Executive Coaching (GSAEC); Host, International Coach Federation (ICF) Research Community of Practice; Member, International Coaching Federation; Member, Institute of Coaching Professionals Association; Editorial Board, Coaching: An International Journal of Theory, Research and Practice; Certified Hudson Institute Coach.

Specializations: Coaching, Coaching Research, Communication, Organizational Leadership, Adult Development, Transformational Learning, Qualitative Research.

Peggy Sundstrom

Education: Masters of Public Health in Behavioral Sciences and Health Education, University of California Los Angeles; PhD Social Research Methodologies, University of California, Los Angeles

Jennie Walker

Education: Bachelor of Science Mass Communication, University of Colorado Boulder; Bachelor of Arts Spanish Language and Literature, University of Colorado Boulder; Master of Arts in Mass Communication, University of Colorado Boulder; PhD Higher Education, University of Denver.

Professional: Professional in Human Resources (PHR), certification; 20 years of experience in professional learning and performance; consultant and facilitator for many Fortune 500 companies; direct study and work experience in Spain, Argentina, Chile, Mexico, Peru, and Suriname; fluent in Spanish; Society for Human Resources Management (SHRM), member; American Educational Research Association (AERA), member; International Leadership Association (ILA), member; Academy of Management (AOM), member; Academy of International Business (AIB), member; Hogan Assessments, certification; Global Mindset Inventory, certification; Insights Discovery Trainer, certification; Insights Transformational Leadership Trainer, certification; Booth 360 Assessment and Coaching, certification; Influencer Trainer, certification; Achieve Global Leadership Development Suite of Courses Trainer, certification; Crucial Conversations Trainer, certification; Crucial Confrontations Trainer, certification; Workin' It Out Trainer, certification; Professional Association of Diving Instructors (PADI), Master Instructor.

Specializations: Leadership Development; Global Leadership; Human Resources; Management; Professional Learning and Development; Higher Education; Diversity and Global Cultures; Mixed Methods Research.

Dianne Weinstein

Education: Bachelor of Arts, New York University; Master of Business Administration, Hofstra University; PhD Applied Organizational Psychology, Hofstra University; numerous certifications including distance learning, human resources, coaching, behavioral analysis, motivational analysis, etc.

Professional: Global executive coach and consultant; Former Vice President – Human Resource, Chief Ethics Office and Change Agent for various global Fortune 500 and entrepreneurial organizations; Online course designer and facilitator for 15 + years; Association membership including: Society of Industrial/Organizational Psychologists, American Psychological Association, Sigma Beta Delta Honor Society, Society of Human Resources Management, Academy of Management, Organizational Behavior Teaching Society, International Federation of Coaching.

Specializations: Business Psychology, Leadership, Management, Change Management, Human Resources Management, Strategic Management, Organizational Behavior, Coaching, and Business Ethics.

Associate Full-Time Faculty

Associate Full-Time Faculty are appointed from among Adjunct Faculty who have taught with high degrees of success online, on campus, or both, and provide important supplemental support to the University's programs and to the Full-Time Faculty. In addition to their teaching duties, Associate Full-Time Faculty serve as content area coordinators, peer reviewers, new faculty mentors, student mentors, doctoral dissertation committee members, academic governance committee members, clinical supervisors of students in practica and internships (for licensure track programs) and are voting members of School Faculty Councils. Associate Full-Time Faculty members, like Full-Time/Ranked Faculty, play significant roles in course, curriculum and program development and governance, supporting the achievement, assessment and improvement of student learning, and advancing the scholarship of the University.

Denise Antoon

Education: Bachelor of Arts, University of North Carolina; Master of Science, Capella University; Juris Doctorate, McGeorge School of Law.

Professional: Member, California Association of Licensed Investigators; Member, American Society of Trial Consultants; Member, National Criminal Justice Association; Member, American Psychology and Law Society; Member, American Judicature Society; Member, Association for Criminal Justice Research;

Member, Society for Human Resource Management, Member, Ladies Who Launch.

Specializations: Criminal Justice, Professional and Business Ethics, Conflict Resolution, Forensic Research, Legal Investigations and Research, Mediation and Jury Research.

Julie Frese
